The Board has been unable to find any formula which applied to the facts would work out a just and reasonable wage for the many thousands of positions involved in this dispute. The determination of such wages is necessarily a matter of estimate and judgment in view of all the conditions; a matter on which individuals will differ widely as their information or lack of it,

their interest, situation and bias may influence them.

Those persons who consider the rates determined on herein too high should reflect on the abnormal conditions resulting from the high cost of living and the high rates now being paid in other industry. The employees who may believe these rates too low should consider the increased burden these rates will place on their fellow countrymen, many of whom are less favorably situated than themselves.

The Board has considered the seven circumstances suggested by the Act. "The hazards of the employment," "the training and skill required" and "the degree of responsibility" were well presented by the representatives of the employees and of the carriers. These factors are recognized by all and have had due weight. With reference to "the character and regularity of the employment," the Board finds that with few exceptions railroad employment is more regular, and the character of the work is more desirable than in occupations outside. As a rule railroad employees are such for life and usually remain for years with the same company. This permanence of employment has certain advantages which have been considered by the Board. As to "inequalities of increases in wages or of treatment the result of previous wage orders or adjustments" the urgency of prompt action has made elaborate investigation into this factor impracticable. It has, however, been considered. With regard to "the scale and wages paid for similar kinds of work in other industries," and "the relation between wages and the cost of living," the Board has been under some difficulty. It is clear that the cost of living in the United States has increased approximately one hundred per cent since 1914. In many instances the increases to employees herein fixed, together with prior increases granted since 1914, exceed this figure. The cost of living and wages paid for similar kinds of work in other industries, however, differ as between different parts of the country. Yet standardization of pay for railroad employees has proceeded so far and possesses such advantages that it was deemed inexpedient and impracticable to establish new variations based on these varying conditions.

For the reasons stated it was necessary to adopt the method of determining what, if any, increases over existing wages (established under the authority of the United States Railroad Administration) would constitute a reasonable and just wage for the hundreds of classifications of railroad employees. By so doing such differences in present rates as are the result of local differences are preserved together with (in general) the differentials between different classes of employees which have come about in the railroad service and which may be considered *prima facie* to be based on good reason. It is believed that this method accomplishes that approximation to justice which is practicable in human affairs.

The Board has endeavored to fix such wages as will provide a decent living and secure for the children of the wage earners opportunity for education, and yet to remember that no class

of Americans should receive preferred treatment and that the great mass of the people must ultimately pay a great part of the increased cost of operation entailed by the increase in wages determined herein.

It has been found by this Board generally that the scale of wages paid railroad employees is substantially below that paid for similar work in outside industry, that the increase in living cost since the effective date of General Order No. 27 and its supplements has thrown wages below the pre-war standard of living of these employees and that justice as well as the maintenance of an essential industry in an efficient condition require a substantial increase to practically all classes.

The American people desire and must have transportation adequate to their needs. They also wish to do justice to men employed in the public service whether on public utilities or otherwise. Wage scales which are insufficient to attract or support men of the character necessary for railroad work constitute waste and extravagance and not economy. Transportation cannot be efficient unless the personnel throws itself into its work with the devotion which public service ought to inspire and no such devotion can exist in the minds of men who feel themselves treated with injustice. It is hoped that the present decision which adds substantial amounts to present wages will be felt to be just and equitable under all the circumstances and railroad employees will accordingly render the best service of which they are capable. If they will do this, it is believed the American people will receive benefits far outweighing the cost of the increases decided upon herein.

It is believed that if the keen intelligence of railroad employees and managers alike is fired by an eagerness to serve the people and a spirit of co-operation to that end is brought about, such economies of material and labor, such improvements in method and workmanship, such solutions of transportation problems will result as will offset a great part of the increase of wages provided for herein and that the people will thus be relieved of a part of the burden of these increases. They deserve and have a right to expect this spirit.

During the hearings, the "International Association of Railroad Supervisors of Mechanics," and the "American Train Dispatchers' Association" have been made parties to this dispute. In granting hearings to them, this Board has not assumed or decided any question of jurisdiction between the several organizations or associations either parties to or outside of this dispute.

There are in the dispute as presented questions involving rules and working conditions, some of which are interwoven with and materially affect earnings and wages. Adequate investigation and consideration of these questions would demand time. Existing conditions required that the Board should make as early decision of the wage question as practicable. For that reason, it has been necessary,—and both parties to the controversy have indicated it to be their

judgment and wish, that the Board should separate the questions involving rules and working conditions from the wage questions. Accordingly, the Board has not undertaken herein to consider or change the rules and agreements now existing or in force by the authority of the United States Railroad Administration or otherwise and this decision will be so understood and applied.

The Board assumes as the basis of this decision the continuance in full force and effect of the rules, working conditions and agreements in force under the authority of the United States Railroad Administration. Pending the presentation, consideration and determination of the questions pertaining to the continuation or modification of such rules, conditions and agreements no changes therein shall be made except by agreement between the carrier and employees concerned. As to all the questions with reference to the continuation or modification of such rules, working conditions and agreements, further hearings will be had at the earliest practicable date and decision thereon will be rendered as soon as adequate consideration can be given.

It is further declared that this Board, finding it necessary to adopt a basis for the rates and advances decided on, has adopted the rates established by or under the authority of the United States Railroad Administration. The intent of this decision is that the named increase, except as otherwise stated, shall be added to the rate of compensation established by and under the authority of the United States Railroad Administration.

The decision of the Board is the result of the action of the Board, composed of nine members acting as a body, under the usual parliamentary methods of procedure and its own rules. Each and every separate question was considered and voted upon—each and every rate for each class was voted upon and adopted by a majority vote of the Board, and in every instance one or more of the public group, as the law requires, voted in the affirmative on any classification or rate adopted.

In a problem so complex and involving the inter-relationship of the wages of so many different classes of employees, it is obvious that there could not be unanimous agreement among all the members of the Board on all increases fixed by this decision; but inasmuch as the several increases hereinafter set forth represent, in each instance, the best judgment of the majority of the Board, it is believed that no useful purpose would be served by setting forth the views held by the members who for one or another reason dissented from particular increases. This statement is made in order that it may not be inferred that the decision, in all its details, states the precise increase which any one of the members hereof might have stated if he had the sole power and responsibility for fixing such increase.

This Board estimates that the increase in wages herein provided for will impose on the railroads an addition to the payroll of March 1st, 1920, aggregating approximately six hundred millions of dollars per annum.

The Board appreciates that some time will necessarily be required for computing back pay from May 1st. This is work of a kind which must be done by regular employees, familiar with the classifications, rates and rules.

The Board believes that the railroads will proceed with diligence in the matter. It urges upon them that there be no unnecessary delay; and it urges equally upon the employees that they exercise patience and refrain from unreasonable pressure or criticism.

The Board decides upon the present dispute and submission that the rates of increase set out below, added and applied to the rates established for the positions specified by or under the authority of the United States Railroad Administration, constitute, for the said positions on carriers named herein, a just and reasonable wage.

The Board also decides that the rates set out below constitute for the positions specified on carriers named herein a just and reasonable wage.

#### ARTICLE I.—RAILROADS AFFECTED.

(This Article comprises a list of over 300 United States railroads.)

#### ARTICLE II.—CLERICAL AND STATION FORCES.

Add to the rates established by or under the authority of the United States Railroad Administration, for each of the hereinafter named classes the following amounts per hour:

- Sec. 1. Storekeepers, assistant storekeepers, chief clerks, foremen, subforemen, and other clerical supervisory forces. . . . . 13 cents.
- Sec. 2. Clerks with an experience of one (1) or more years in railroad clerical work, or clerical work of a similar nature in other industries, or where their cumulative experience in such clerical work is not less than one (1) year. . . . . 13 cents.
- Sec. 3. Clerks whose experience as above defined is less than one (1) year, and until an experience of one (1) year in such work entitles them to the increase provided for in Section 2. 6½ cents
- Sec. 4. Train and engine crew callers, assistant station masters, train announcers, gatemen, and baggage and parcel room employees (other than clerks). . . . . 13 cents.
- Sec. 5. Janitors, elevator and telephone switchboard operators, office, station and warehouse watchmen, and employees engaged in assorting way bills and tickets, operating appliances or machines for perforating, addressing envelopes, numbering claims and other papers, gathering and distributing mail, adjusting dictaphone cylinders, and other similar work. . . 10 cents.

Sec. 6. Office boys, messengers, chore boys and other employees under eighteen years of age, filling similar positions, and station attendants. . . . 5 cents.

Sec. 7. Station, platform, warehouse, transfer, dock, pier, store-room, stockroom, and team-track freight handlers or truckers, and others similarly employed. . . . . 12 cents.

Sec. 8. The following differentials shall be created or maintained, as the case may be, between truckers and the classes named below:—

(a) Sealers, scalers, and fruit and perishable inspectors, one (1) cent per hour above truckers' rates as established under Section 7.

(b) Stowers or stevedores, callers or loaders, locators and coopers, two (2) cents per hour above truckers' rates as established under Section 7.

The above shall not operate to decrease any existing higher differentials.

Sec. 9. All common laborers in and around stations, store houses and warehouses, not otherwise provided for. . . . . 8½ cents.

#### ARTICLE III.—MAINTENANCE OF WAY AND STRUCTURES AND UNSKILLED FORCES SPECIFIED.

Add to the rates established by or under the authority of the United States Railroad Administration, for each of the hereinafter named classes, the following amounts per hour:

- Sec. 1. Building, bridge, painter, construction, mason and concrete, water supply, and plumber foremen, except such water supply, and plumber foremen as were paid under the provisions of Supplement No. 4, to General Order No. 27. . . . . 15 cents.
- Sec. 2. Assistant building, bridge, painter, construction, mason and concrete, water supply, and plumber foremen, and for coal wharf, coal chute, and fence gang foremen, pile driver, ditching, and hoisting engineers and bridge inspectors, except such assistant water supply and plumber foremen as were paid under the provisions of Supplement No. 4 to General Order No. 27. . . . . 15 cents.
- Sec. 3. Section, track and maintenance foremen, and assistant section, track and maintenance foremen. . . . . 15 cents.
- Sec. 4. Mechanics in the maintenance of way and bridge and building departments, except those that come under the provisions of the national agreement with the Federated Shop Trades. . . . . 15 cents.
- Sec. 5. Mechanics' helpers in the maintenance of way and bridge and building departments, except those that come under the provisions of the national agreement with the Federated Shop Trades. . . . . 8½ cents.

Sec. 6. Track laborers, and all common laborers in the maintenance of way department and in and around shops and roundhouses, not otherwise provided for herein.....8½ cents.

Sec. 7. Drawbridge tenders and assistants, pile-driver, ditching and hoisting firemen, pumper engineers and pumpers, crossing watchmen or flagmen, and lamp lighters and tenders..8½ cents.

Sec. 8. Laborers employed in and around shops and roundhouses, such as engine watchmen and wipers, fire builders, ash-pit men, flue borers, coal passers (except those coming under the provisions of Article VIII, Section 3, this decision) coal chute men, etc.....10 cents.

ARTICLE IV.—SHOP EMPLOYEES.

Add to the rates established by or under the authority of the United States Railroad Administration, for each of the hereinafter named classes, the following amounts per hour:

Sec. 1. Supervisory forces.....13 cents.

Sec. 2. Machinists, boilermakers, blacksmiths, sheet metal workers, electrical workers, carmen, moulders, cupola tenders and coremakers, including those with less than four years experience all crafts.....13 cents.

Sec. 3. Regular and helper apprentices and helpers, all classes.....13 cents.

Sec. 4. Car cleaners.....5 cents.

ARTICLE V.—TELEGRAPHERS, TELEPHONERS AND AGENTS.

Add to the rates established by or under the authority of the United States Railroad Administration, for each of the hereinafter named classes, the following amounts per hour:

Sec. 1. Telegraphers, telephone operators (except switchboard operators), agents (except agents at small non-telegraph stations as referred to in Supplement No. 13 to General Order No. 27, Article IV, Section c), agent telegraphers, agent telephoners, towermen, lever men, tower and train directors, block operators and staffmen.....10 cents.

Sec. 2. Agents at small non-telegraph stations as referred to in Supplement No. 13 to General Order No. 27, Article IV, Section (c).....5 cents.

ARTICLE VI.—ENGINE SERVICE EMPLOYEES.

Add to the rates established by or under the authority of the United States Railroad Administration, for each of the hereinafter named classes, the following amounts per mile, per hour or per day, as the case may be, except in Section 4, as noted:

Sec. 1.—Passenger Service.

Class.	Per Mile	Per day
	cents	
Engineers and motormen....	.8	\$0.80
Firemen (coal or oil).....	.8	0.80
Helpers (electric).....	.8	0.80

Sec. 2.—Freight Service.

Class	Per mile	Per day
	cents	\$
Engineers (steam, electric, or other power).....	1.04	1.04
Firemen (coal or oil).....	1.04	1.04
Helpers (electric).....	1.04	1.04

Sec. 3.—Yard Service.

Class.	Per Hour.
	cents
Engineers.....	18
Firemen (coal or oil).....	18
Helpers (electric).....	18

Sec. 4.—Hostler Service.

Note: Superseding rates established by or under the authority of the United States Railroad Administration and in lieu thereof, for each of the hereinafter named classes, the following increased rates are established.:

Class	Per day.
Outside hostlers.....	\$6.24
Inside hostlers.....	5.60
Helpers.....	5.04

## ARTICLE VII.—TRAIN SERVICE EMPLOYEES.

Add to the rates established by or under the authority of the United States Railroad Administration, for each of the hereinafter named classes, the following amounts per mile, per day, or per month, as the case may be, except in Section 4, as noted:

## Sec. 1.—Passenger Service.

Class	Per Mile.	Per Day	Per Mo.
	cents.	\$	\$
Conductors.....	.67	1.00	30.00
Assistant conductors or ticket collectors.....	.67	1.00	30.00
Baggagemen handling both express and dynamo.....	.67	1.00	30.00
Baggagemen operating dynamo.....	.67	1.00	30.00
Baggagemen handling express.....	.67	1.00	30.00
Baggagemen.....	.67	1.00	30.00
Flagmen and brakemen...	.67	1.00	30.00

## Sec. 2.—Suburban Service (Exclusive).

Class	Per Mile	Per Day	Per Mo.
	cents.	\$	\$
Conductors.....	.67	1.00	30.00
Ticket collectors.....	.67	1.00	30.00
Guards performing duties of brakemen or flagmen.....	.67	1.00	30.00

## Sec. 3.—Freight Service.

Class.	Per Mile	Per Day
	cents.	\$
Conductors (through).....	1.04	1.04
Flagmen and brakemen (through).....	1.04	1.04
Conductors (local or way freight).....	1.04	1.04
Flagmen and brakemen (local or way freight).....	1.04	1.04

## Sec. 4.—Yard Service.

Note: Superseding rates established by or under the authority of the United States Railroad Administration, and in lieu thereof, for each of the hereinafter named classes, the following increased rates are established:

Class.	Per Day.
Foremen.....	\$6.96
Helpers.....	6.48
Switchtenders.....	5.04

## ARTICLE VIII.—STATIONARY ENGINE (STEAM) AND BOILER ROOM EMPLOYEES.

Add to the rates established by or under the authority of the United States Railroad Administration, for each of the hereinafter named classes, the following amounts per hour:

Sec. 1. Stationary engineers (steam)...	13 cents.
Sec. 2. Stationary firemen and engine room oilers.....	13 cents.
Sec. 3. Boiler room water tenders and coal passers.....	10 cents.

## ARTICLE IX.—SIGNAL DEPARTMENT EMPLOYEES

Add to the rates established by or under the authority of the United States Railroad Administration, for each of the hereinafter named classes, the following amounts per hour:

Sec. 1. Signal foremen, assistant signal foremen and signal inspectors.....	13 cents.
Sec. 2. Leading maintainers, gang foremen and leading signalmen.....	13 cents.
Sec. 3. Signalmen, assistant signalmen, signal maintainers and assistant signal maintainers.....	13 cents.
Sec. 4. Helpers.....	10 cents.

## ARTICLE X.—MASTERS, MATES AND PILOTS.

(This Article comprises a schedule of wage rates for masters, mates and pilots on ferry boats, tug boats and steam lighters in certain specified harbours.)

## ARTICLE XI.—OTHER SUPERVISORY FORCES.

Add to the rates established by or under the authority of the United States Railroad Administration, for each of the hereinafter named classes, the following amounts per hour:

Sec. 1. Train dispatchers.....	13 cents.
--------------------------------	-----------

Sec. 2. Yard masters and assistant yard masters.....15 cents.

#### ARTICLE XII.—MISCELLANEOUS EMPLOYEES

Add to the rates established by or under the authority of the United States Railroad Administration, for employees in the hereinbefore named departments who are properly before the Board and not otherwise provided for, an amount (as per Section 3, Article XIII) equal to that established for the respective classes to which the miscellaneous classes herein referred to are analogous. The intent of this article is to extend this decision to a miscellaneous class of supervisors and employees, practically impossible of specific classification, and at the same time insure to them the same consideration and rate increase as provided for analogous service.

#### ARTICLE XIII.—GENERAL APPLICATION.

Sec. 1. The increases in wages and the rates hereby established shall be effective as of May 1, 1920, and are to be paid according to the time served to all who are then in the carriers' service and remained therein, or who have since come into such service and remained therein.

Sec. 2. The provisions of this decision will not apply in cases where amounts less than thirty dollars (\$30.00) per month are paid to individuals for special service which takes only a portion of their time from outside employment or business.

Sec. 3. Increases specified in this decision are to be added to the hourly rates as established by or under the authority of the United States Railroad Administration for employees now being paid by the hour. For employees paid by the day, add eight times the hourly increase specified to the daily rate. For employees paid by the month, add two hundred and four (204) times the hourly rates specified to the monthly rate.

Sec. 4. Each carrier will in payment to employees on and after August 1, 1920, include therein the increases in wages and the rates hereby established.

Sec. 5. The amounts due in back pay from May 1, 1920, to July 31, 1920, inclusive, in accordance with the provisions of this decision, will be computed and payment made to the employees separately from the regular monthly or semi-monthly payments, so that employees will know the exact amount of their back payments.

Recognizing the clerical work necessary to make these computations for back pay and the probable delay before the entire period can be covered, each month, beginning with May, 1920, shall be computed as soon as practicable and, as soon as completed, payment shall be made.

Sec. 6. The increases in wages and the rates hereby established shall be incorporated in and become a part of existing agreements or schedules.

Sec. 7. Except as specifically modified herein, the rules regulating payments of overtime or working conditions in all branches of service, and the established and accepted methods of computing time and compensation thereunder, shall remain in effect until or unless changed in the manner provided by the Transportation Act, 1920.

Sec. 8. It is not intended in this decision to include or fix rates for any officials of the carriers affected except that class designated in the Transportation Act of 1920, as "Subordinate Officials," and who are included in the act as within the jurisdiction of this Board. The Act provides that the term "Subordinate Officials" includes officials of carriers of such class or rank as the Interstate Commerce Commission shall designate by regulation duly formulated and issued. Hence, whenever in this decision words are used, such as "foremen," "supervisor", etc., which may apply to officials, such words are intended to apply to only such classes of subordinate officials as are now or may hereafter be defined and classified by the Interstate Commerce Commission as such subordinate officials.

#### ARTICLE XIV.—INTERPRETATION OF THIS DECISION.

Sec. 1. Should a dispute arise between the management and the employees of any of the carriers as to the meaning or intent of this decision, which cannot be decided in conference between the parties directly interested, such dispute shall be referred to the United States Railroad Labour Board in the manner provided by the Transportation Act, 1920.

Sec. 2. All such disputes shall be presented in a concrete joint signed statement setting forth: (1) the article of this decision involved, (2) the facts in the case, (3) the position of the employees and (4) the position of the management thereon. Where supporting documentary evidence is used it shall be attached in the form of exhibits.

Sec. 3. Such presentations shall be transmitted to the Secretary of the United States Railroad Labour Board who shall place same before the Board for final disposition.

By order of,

UNITED STATES RAILROAD LABOR BOARD

R. M. BARTON,  
Chairman.

## FAIR WAGE CONTRACTS, JULY, 1920

**D**URING July the Department of Labour received for insertion in the **LABOUR GAZETTE**, the following information relative to twelve fair wage contracts, of which eleven were awarded by the Department of Public Works, and one by the Department of Railways and Canals. All the contracts, with one exception where a fair wage schedule was included, contained the usual fair wage clause which provides for the prompt payment of such wages as are current in the district in which the work is to be performed, and for observance on the various works under contract of the prevailing hours of labour, and which otherwise prevents abuses and secures the legitimate rights of the labour employed.

A statement was also received as to supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, etc.

### DEPARTMENT OF PUBLIC WORKS.

Rebuilding of wharf, Little Current, Ont. Name of contractor, William Bermingham, Kingston, Ont. Date of contract, June 24, 1920. Amount of contract schedule of prices.

Construction of concrete platform for Air Board of Canada, Jericho Beach, Vancouver, B.C. Name of contractors, Ambrose & Aitken, Vancouver, B.C. Date of contract, June 30, 1920. Amount of contract, \$4,950.

Construction of wooden slipway for Air Board of Canada, Jericho Beach, Vancouver, B.C. Name of contractor, William Greenlees, Vancouver, B. C. Date of contract, July 8, 1920. Amount of contract, \$5,878.

Construction of plank roadway from Imperial Street alongside of Jericho

Beach to Air Station Platform, Jericho Beach, Vancouver, B.C. Name of contractor, William Greenlees, Vancouver, B.C. Date of contract, July 10, 1920. Amount of contract, \$4,285.

Elevator enclosure, etc., at Printing Bureau, Ottawa, Ont. Name of contractors, Union Architectural Iron Works, Montreal, Que. Date of contract, July 13, 1920. Amount of contract, \$5,450.

Supply and installation of fittings in connection with Military Hospital barracks, Winnipeg (Tuxedo), Man. Name of contractor, R. N. Wyatt, Winnipeg, Man. Date of contract, July 14, 1920. Amount of contract, \$6,014.

Alterations, etc., in Central Post Office, Montreal, Que. Name of contractors, P. Lyall & Sons Construction Co. Ltd., Montreal, Que. Date of contract, July 13, 1920. Amount of contract, \$26,428.

Supply and installation of fittings in Postal Station "B", Hamilton, Ont. Name of contractors, Burton & Baldwin Manufacturing Co., Ltd., Hamilton, Ont. Date of contract, July 19, 1920. Amount of contract, \$3,970.

Dredging. William Head, B.C., Quarantine Station (Main and Coal Wharf). Name of contractors, The Pacific Construction Company, Ltd., Vancouver, B.C. Date of contract, July 5, 1920. Amount of contract, Class "B" \$0.48 per cu. yd. (in situ.)

Dredging. Port Arthur, Ont. Name of Contractors, Canadian Dredging Company, Ltd., Midland, Ont. Date of contract, July 2, 1920. Amount of contract, Class "B" \$0.28 per cu. yd. (scow measure).

Repairs to wharf, St. François Sud, Island of Orleans, Que. Name of contractor, Siméon Ratté, Ste Anne de Beaupré, Que. Date of contract, July 26, 1920. Amount of contract, schedule of prices.

Trade or Class of Labour.	Rate of wages. Not less than the following			
Foreman carpenter.....	65	cents	per	hour, 9 hours a day
Carpenters.....	60	"	"	9 " "
Blacksmith.....	50	"	"	9 " "
Blacksmiths' helpers.....	40	"	"	9 " "
Ordinary labourers.....	35	"	"	9 " "
Driver with 1 horse and cart.....	45	"	"	9 " "
Driver with 2 horses and wagon.....	60	"	"	9 " "

## DEPARTMENT OF RAILWAYS AND CANALS.

Fabrication of beam span and furnishing of all materials required for highway bridge at Mileage 17.4, Levis Sub-division. Name of contractors, Mac-Kinnon Steel Company, Ltd. Date of contract, June 25, 1920. Amount of contract, \$1,020.

## POST OFFICE DEPARTMENT.

The following is a statement of payments made in July for supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, and the performance of work under sanitary conditions:

Nature of orders.	Amount of orders
Making metal dating stamps and type and other hand stamps and brass crown seals.....	\$ 278.25
Supplying stamping material, pads and ink.....	145.44
Supplying mail bag fittings.....	3,907.54
Hampers and letter boxes repaired.....	60.25
Making up and supplying letter carriers' uniforms.....	7,227.16

## PRICES RETAIL AND WHOLESALE IN CANADA, JULY, 1920

**T**HE prices movement in July was marked by decreases in many lines of materials and by seasonal changes in foods some of which were upward and some downward. The chief change in retail prices was in potatoes which declined considerably after the end of June as the new crop came on the market.

In retail prices the average cost of a family budget of staple foods in some sixty cities at the middle of the month was \$16.84 as compared with \$16.92 in June and \$7.42 in July, 1914. The chief decrease was in potatoes, but there were slight decreases in several lines. The chief increase was in sugar, but there were slight increases in meats, and eggs averaged higher. Coal, wood and rent showed increases.

In wholesale prices the index number was again lower, falling to 346.8 as compared with 349.3 for June, 356.6 for May, 249.9 for July, 1919, and 134.6 for July 1914. The chief decreases for the month were in grains, fish, fruits and vegetables, textiles and lumber,

with increases in livestock and meats, butter and eggs, sugar, coal and coke, some building materials and some chemicals.

The accompanying tables and notes give details as to the prices movement during the month and as compared with the same month in previous years.

The table of retail prices gives statistics for some 60 localities in Canada, having a population of approximately 10,000 or over. Quotations are obtained by the correspondents of the LABOUR GAZETTE, resident in each locality, from representative dealers doing a considerable trade with workingmen. All prices are for delivered goods. The exact quality for which the quotation is given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The list of commodities includes over one hundred staple foods

and groceries, coal, wood and coal oil, the number of articles having been increased twice since January, 1910, when the regular publication of these statistics was begun.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts, with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central, without modern conveniences or with incomplete conveniences.

The weekly family budget calculated in terms of the average prices in the cities for which reports are received includes twenty-nine staple foods, laundry starch, coal, wood, coal oil, and rent, these being the items for which statistics have been obtained each month and published in the LABOUR GAZETTE since January, 1910. The quantities of each commodity included are modifications of those employed in similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance the only fruits are evaporated apples and prunes, and the only fresh vegetable is potatoes. As market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportion of expenditure on the various foods therefore tends to be maintained.\* In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the difference in quality. It was estimated, when the budget was first

published in 1912, that these calculations represented from sixty to eighty per cent of the expenditure of an ordinary family, according to the total income. For the average family of five the expenditure on these items of food, fuel, light, and rent would be perhaps two-thirds or about sixty-five per cent of the total income. While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province. The quantities of meats, dairy products, cereals, etc., included were designed to afford a liberal supply for the healthy family of a man at hard physical work. On the other hand an average family with an income sufficient to do so would buy less meat, etc., but more fruit, fresh and canned vegetables, etc.; so that the comparative expenditure would be little changed.

The index number of wholesale prices is based on the quotations for 271 commodities, and is the simple average of the percentages of current prices of the several commodities in relation to the average prices for the base period, 1890-1899, these being therefore made equal to 100. The quotations for most farm products are obtained weekly and averaged for the month, the quotations for other commodities are taken for the middle of the month. The table of index numbers shows the changes by groups and sub-groups for the previous month and for corresponding months back to 1913.

### Retail Prices

In meats, a number of slight changes in several cities caused increases in the averages for all lines, except mutton in which there were decreases in the averages. Bacon averaged slightly higher. In eggs, there were a number of increases, but in a number of the cities there was no change. Milk was lower in Brockville, Prince Albert and Calgary. Butter advanced in some of the cities,

\*At times when the price of an article heavily weighted for this purpose rises (or falls) abnormally the increase (or decrease) in food prices so indicated is exaggerated and this should be taken into account in using the budget as an indicator of changes in the cost of living.

OST PER WEEK OF A FAMILY BUDGET OF STAPLE FOODS, FUEL AND LIGHTING, AND RENT IN TERMS OF  
THE AVERAGE PRICES IN SIXTY CITIES IN CANADA.

h Hard coal.

but declined in others, averaging lower. Cheese showed little change. Bread decreased at Ottawa and Belleville, but increased at Nelson, Victoria and Nanaimo. Flour averaged the same as in June. Rolled oats averaged lower. Rice was slightly higher, but beans averaged lower. Canned vegetables showed little change. Onions declined in a number of the cities. Potatoes were lower in a number of the cities, averaging nearly 60 cents per bag lower. There were some increases in raisins, jams and canned fruit. Sugar averaged one cent per pound higher. Tea and coffee showed little change.

Anthracite coal advanced in many of the cities and there were some increases in bituminous coal. In wood there were some slight increases. Rents were higher at Moncton, Chatham and Nanaimo.

### Wholesale Prices

**GRAINS AND FODDER.**—Wheat was unchanged at the prices fixed early in May for millers at \$3.15 in store at Fort William for spring wheat and \$2.98 at Montreal for winter wheat. In the United States wheat had reached \$3.00 at the middle of July at Minneapolis, but fell to \$2.40 at the last day of the month and the next day to \$2.30 recovering in a few days to \$2.75. Oats at Winnipeg had eased off in June and fell to \$1.29 at the beginning of July, and again to \$1.11 in the last week. Barley was down to \$1.80 at the beginning of the month, but fell to \$1.48 at the end of the month. Corn was easier at \$2.30 per bushel at Toronto. Flaxseed was down to \$3.85 per bushel at the beginning of the month and to \$3.45 at the end. Hay was \$1.00 higher at Toronto at \$31.00, but straw was \$1.00 lower at \$15.00-\$16.00 per ton.

**ANIMALS AND MEATS.**—The best cattle at Winnipeg were lower at \$13.00-\$14.00 per hundred pounds and butcher cattle at Toronto at \$14.00-\$15.00. Veal was firmer at 25 cents per pound for the prime grade. Hogs had risen to \$19.00 in June after falling early in the month, and reached \$20.50 by the end of July.

Bacon was 2 cents higher at 48-49 cents per pound and ham at 43-44 cents. Lard fell 1 cent to 27-27½ cents per lb. Dressed lamb was easier at 30-35 cents per pound.

**DAIRY PRODUCTS.**—Butter was firmer at 58¾ cents per pound at Montreal. Cheese was lower at 28 cents per pound. Eggs rose from 57 cents to 64 cents per dozen at Montreal.

**FISH.**—Cod, dry, was lower at 10 cents per pound and haddock at 7 cents. Salt mackerel was down from 9 to 8 cents per pound. Lake trout was higher at 19-20 cents per pound at Toronto. Canned salmon, sockeye, advanced from \$4.75 per dozen to \$4.95-\$5.25 at Toronto.

**FRUITS AND VEGETABLES.**—Strawberries were down to 17-20 cents per box at Toronto at the end of June, but rose to 20-23 cents at the end of July. Raspberries rose from 25-35 cents per box to 30-35 cents. Cherries advanced from \$1.25-\$1.50 per eleven quart basket to \$1.50-\$2.00. Bananas were firmer at 10½ cents per pound. Lemons were firmer at \$5.75 per box. Valencia oranges came on at \$7.50-\$9.00 per box. Evaporated apples were lower at 21 cents per pound. Prunes were firmer at 18½ cents per pound. Potatoes were down to \$4.00 per bag at Montreal.

**MISCELLANEOUS FOODS.**—Oatmeal was higher at \$7.25 per bag. Tapioca was lower at 11-12 cents per pound. Sugar advanced 5 cents per pound, reaching \$24.21 per hundred, at Toronto. Maple sugar was lower at 26-28 cents per pound. Pepper was lower at 35 cents per pound. Cream of tartar was lower at 80-85 cents per pound.

**TEXTILES.**—Ontario wool, unwashed, was 2 cents lower at 16-26 cents per pound, but advanced slightly toward the end of the month. Washed wool was selling between 24½ and 42½ cents per pound, but also advanced slightly. A line of underwear declined 12 per cent. Raw cotton was higher at 42½ cents per pound. Coloured cottons averaged higher. Raw silk, Japan, was lower at \$6.50

\*Preliminary figures. †Eight commodities off the market, fruits, vegetables, etc.; one line of spelter was dropped in 1915.

‡One commodity only, strawberries.

per pound. Jute continued to fall and hessians declined 20 per cent.

**HIDES, LEATHER, BOOTS AND SHOES.**—Horsehides were \$1.00 lower at \$4.00-\$5.00 each. Harness leather was lower at 94-95 cents per pound.

**METALS AND IMPLEMENTS.**—Black iron sheets and galvanized sheets advanced. Quicksilver was lower. Silver bar advanced to 99½ cents per ounce. Zinc and tin were firmer. Crowbars advanced 10 per cent.

**FUEL AND LIGHTING.**—Bituminous coal at Montreal rose to \$10.50 per ton. Connellsville furnace coke advanced to \$17.00-\$18.00 at the ovens.

**BUILDING MATERIALS.**—New Bruns-

wick spruce deals fell from \$40.00 per thousand to \$38.00. British Columbia fir at Winnipeg, was down \$3.00 per thousand. Fire bricks and plaster of Paris were higher. Building paper advanced 10 per cent. Coal tar, nails and sash weights advanced. Linseed oil and turpentine were substantially lower. Paris green was higher.

**HOUSE FURNISHINGS.**—No changes were reported.

**DRUGS AND CHEMICALS.**—Bleaching powder, brimstone and caustic soda advanced.

**MISCELLANEOUS.**—Malt declined. In raw furs, raccoon and skunk were firmer. Raw rubber was lower at 34 cents per pound.

## PRICES IN THE UNITED KINGDOM AND IN OTHER COUNTRIES

**T**HE accompanying tables and the following notes give the latest statistics available as to prices movements in the United Kingdom and in other countries.

### United Kingdom

In the British *Labour Gazette*, July, 1920, the Ministry of Labour reported as follows:

#### Food.

There was a slight increase in the retail prices of the principal articles of food at 1st of July, as compared with a month earlier, the average increase in the cost of the pre-war working class dietary being 158 per cent at 1st of July, as compared with 155 per cent at 1st of June. The rise was mainly due to the introduction of new potatoes into general use during June, the prices of new potatoes at 1st of July being considerably higher than those of old potatoes a month earlier. There was also a seasonal increase in the prices of eggs. On the other hand butter, tea and margarine were cheaper at 1st of July than at 1st of June.

#### RENT, CLOTHING, FUEL AND LIGHT.

Increases in rents of working-class dwellings are limited by the Increase of Rent Restriction Acts, and, for the same accommodation, rents generally at 1st July were the same

as before the war, except in so far as higher rents had resulted from increased rates. On the basis of the available information it is estimated that the increase up to 1st July averaged between 15 and 20 per cent of the pre-war rents (including rates).

As regards the prices of clothing, the statistics are designed to relate to the same qualities, so far as possible. Owing to the wide range of quotations, both now and before the war, to change in qualities and in stocks held by retailers, and to variations in the extent to which different articles and qualities have been affected by price changes, it is impossible to make an exact calculation of the increase in prices, but from information as to the movements of prices of men's suits and overcoats, underclothing and hosiery, textiles materials and boots received from retailers in the principal towns it is estimated that the level of prices of clothing, quality for quality, taking goods of the kind purchased by the working classes, averaged about 330 per cent higher than in July, 1914.

In the fuel and light group, the average increase in the retail prices of coal since July, 1914, was about 135 per cent at 1st July. For gas the increase was about 85 per cent, for lamp oil about 200 per cent, and for candles (cheap kinds) about 260 per cent, while matches show a still greater increase. The last three items have, however, relatively small influence on the average movement in the fuel and light group, in which, taken as a whole, the average increase is estimated at about 130 per cent.

## ALL ITEMS.

If the average increases in the cost of all the foregoing items are combined in accordance with their relative importance in pre-war working-class family expenditure, allowance being also made for the increase in the prices of soap, soda, domestic ironmongery, brushware and pottery, tobacco, fares and newspapers (estimated at an average of about 120 per cent), the resultant figure for 1st July, 1920, is about 152 per cent.

The result of this calculation (in which the same quantities and, as far as possible the same qualities of each item are taken in 1920 as in 1914) is to show the *increase in the cost of maintaining unchanged the average pre-war standard of living of the working-classes* (i.e., the average standard actually prevailing in working-class families before the war, irrespective of whether such standard was adequate or not). Owing to the shortage in the supplies of certain articles, notably of sugar, it would not, of course, be possible for everyone to obtain every article in the same quantity as before the war. Moreover, re-adjustments in expenditure have no doubt been effected in many cases (e.g., in families whose incomes have not risen so much as prices). No allowance is made in the figures for such economies and re-adjustments of expenditure, as to which trustworthy statistics are not available.

At the beginning of August the Ministry of Labour reported the increase in food prices to have reached 162 per cent.

## France

The General Statistical Office reported the index number of retail prices of food at Paris, in June, 1920, to be 2.4 per cent lower than in May, but 269 per cent higher than in July, 1914. The index number for the retail prices of food in large towns, not including Paris, for the second quarter of 1920 showed an increase of 18.3 per cent over the first quarter and a rise of 279 per cent over the third quarter of 1914.

## Italy

Food prices in Rome in May, 1920, were reported by the Municipal Labour office to be 4.6 per cent higher than in April and 225 per cent higher than in 1914. The general level of prices of household necessities, including food, clothing, fuel, lighting, rent, etc., showed a rise of 218 per cent as compared with 1914. In Milan, the Municipal Office

of Labour reported that the cost of maintaining a family in June, 1920, was 2.3 per cent higher than in the month before and 348 per cent higher than in 1914, food having increased 358 per cent, clothing 492 per cent, heat and light 474 per cent, and rent 8.3 per cent.

## Belgium

Retail prices of food and other necessities in April, were 3.6 per cent higher than in March and 361 per cent higher than in April, 1914, food having risen 377 per cent, clothing, fuel and light 364 per cent.

## United States

In reporting on the index number of wholesale prices for the beginning of August, *Dun's Review*, August 7, 1920, stated:

Expectations of further commodity price deflation during July have proved well founded, as evidenced by the fall in *Dun's* Index number of wholesale quotations to the lowest level since last January. At \$252,288 on August 1, the latest compilation is 3.1 per cent below the \$260,414 of a month earlier, and is 4.2 per cent under the high record of \$263,332 of May 1, this year. Since that date, the price recession has been continuous, and the present downward movement contrasts sharply with the tendency of a year ago, when a sharp rise was witnessed. While the index number is 4.4 per cent above the figure at this period in 1919, yet the yielding of some important markets has become more pronounced since the current month opened, and the trend toward a more natural price basis, which is largely the outcome of diminished consumption of commodities, may conceivably be extended.

While four of the seven divisions into which the index number is separated reached higher levels on August 1 than a month earlier, yet the yielding in the breadstuffs, dairy and garden products, and clothing classes considerably more than offset the advances elsewhere. With a violent break in grain prices during July, notably in wheat and corn, the breadstuffs group fell nearly 13 per cent. . . . while the total of dairy and garden articles declined . . . 5.7 per cent. The change in the clothing class, while less extensive, marked the fourth consecutive monthly recession, the decrease from the high point of the present year, established on April 1, approximates 10 per cent. Of the four groups which advanced last month, metals show the widest alteration, rising to a new high record for the year. . . .

## FATAL INDUSTRIAL ACCIDENTS REPORTED DURING THE SECOND QUARTER OF 1920

**T**HE Department has received reports of 237 fatal industrial accidents that occurred during the second quarter of 1920, as compared with 277 in the previous quarter (including 14 subsequently reported), and 276 in the corresponding quarter of 1919. Of these 223 accidents, 66 occurred in April, 76 in May, and 81 in June. The lumbering

industry showed the greatest number of fatalities, there being 45 in this industry, while the steam railway group showed 26 fewer accidents than in the first quarter. The following statement, while not necessarily including all the fatal accidents that may have occurred, has been prepared from all sources available.

### FATAL INDUSTRIAL ACCIDENTS DURING THE SECOND QUARTER OF 1920.

Trade or Industry	Locality	Date	Age	Cause of fatality.
<b>METALS, MACHINERY AND CONVEYANCES:—</b>				
Machinist at foundry.....	Midland, Ont.....	April 6	43	Scratched finger; infection.
Ladleman.....	Sydney, N.S.....	" 7	20	Crushed between ladle and mould.
Shipfitter.....	Vancouver, B.C.....	" 27	53	Struck by falling bulkhead.
Shipbuilder.....	Toronto, Ont.....	May 4	28	Fell from gang plank; drowned.
Blacksmith at textile factory.....	Kingston, Ont.....	" 12	63	Cut arm; infection.
Electrician at shipyards.....	Halifax, N.S.....	" 14	38	Electrocuted.
Repairman at car works.....	Fort William, Ont.....	" 19	44	Crushed between cars.
Millwright at auto plant.....	Ford, Ont.....	" 20	38	Struck by falling crane.
Fitter with contractor.....	Toronto, Ont.....	" 26	28	Fall of loaded shelf.
Employee at bridge works.....	Montreal, Que.....	June 5	..	Breaking and fall of derrick arm.
Steel worker.....	Caughnawaga, Que.....	" 9	28	Breaking of boom on derrick.
Foundryman.....	Chatham, Ont.....	" 14	..	Heart failure when working overtime.
Workman at steel plant.....	Toronto, Ont.....	" 18	50	Strained by lifting.
Helper at forging plant.....	Walkerville, Ont.....	" 24	21	Scalded.
<b>FOOD, TOBACCO AND LIQUOR:—</b>				
Labourer at brewery.....	Hamilton, Ont.....	April 22	35	Smothered by fumes in vat.
Employee at dairy.....	Montreal, Que.....	" 26	28	Crushed between elevator and floor.
Fireman at brewery.....	Winnipeg, Man.....	" 29	..	Fell from ladder.
Miller.....	Portage la Prairie, Man.....	June 29	52	Tetanus; died July 8, 1920.
<b>TEXTILES, CARPETS AND CORDAGE</b>				
Employee at cotton mill.....	Milltown, N.B. ....	May 26	14	Caught between elevator and floor.
<b>PULP, PAPER AND FIBRE:—</b>				
Employee at pulp mill.....	La Tuque, Que.....	April 22	36	Explosion in a compressed air reservoir.
Employee at pulp mill.....	Donnacona, Que.....	May 19	20	Clothing caught in machinery.
Electrician at pulp mill.....	East Angus, Que.....	" 27	..	Electrocuted.
Workman at paper mill.....	Thorold, Ont.....	" 31	..	Crushed by car.
Labourer at paper mill.....	Iroquois Falls, Ont.....	June 4	40	Fractured leg; infection.
Employee at pulp mill.....	St. Raymond, Que.....	" 14	17	Caught in conveyor chain.
Woodman with paper company	Millwood, Ont.....	" 17	..	Axe wound.
Labourer at paper factory....	Espanola, Ont.....	" 23	41	Crushed by switch engine between car and wall.
Labourer with paper company..	Larchwood, Ont.....	" 26	18	Drowned.
Employee of paper mill.....	St. Catharines, Ont.....	" 30	47	Fell from a box car.
<b>PRINTING AND PUBLISHING:—</b>				
Stereotyper with newspaper company.....	Toronto, Ontario.....	June 8	55	Steam table burst.

## FATAL INDUSTRIAL ACCIDENTS DURING THE SECOND QUARTER OF 1920.—Continued.

Trade or Industry	Locality	Date	Age	Cause of fatality.
<b>WOODWORKING AND FURNITURE:</b>				
Packer at spool factory.....	Walkerton, Ont. ....	April 10	46	Fall. —
Helper at planing mill.....	Brampton, Ont. ....	" 15	62	Struck by belt.
Workman at furniture factory..	Hepworth, Ont. ....	" 20	17	Crushed by elevator. —
Labourer at planing mill.....	Kemptville, Ont. ....	May 5	..	Struck by board.
Workman at chair factory.....	Stratford, Ont. ....	" 10	32	Struck by machine guide bar. —
Labourer at furniture factory..	Napanee, Ont. ....	" 20	62	Crushed foot; infection.
Pipefitter at shingle mill.....	Swanson Bay, B.C. ....	" 24	22	Fell from conveyor.
Millwright at sawmill.....	Tenecape, N. S. ....	" 29	27	Struck head against saw. —
Employee at lath mill.....	Winnipeg, Man. ....	June 7	24	Struck by wood from saw. —
<b>LEATHER, BOOTS, SHOES AND RUBBERS:—</b>				
Rubber plant employee.....	Montreal, Que. ....	April 2	41	Fall of elevator, March 27, 1920.
Tanner.....	Quebec, Que. ....	May 4	67	Caught in machine.
Elevator operator at shoe factory.....	Perth, Ont. ....	June 1	..	Crushed by elevator.
<b>CLAY, GLASS AND STONE:—</b>				
Lime kiln worker.....	Montreal, Que. ....	April 27	49	Burned while sleeping near oven.
Employee at cement works....	Longue Pointe, Que. ....	June 2	15	Fell into hot chute.
<b>PAINTS, OILS, CHEMICALS AND EXPLOSIVES:—</b>				
Sweeper at cartridge plant....	Beloeil, Que. ....	" 27	47	Explosion.
Labourers (2).....	Beloeil, Que. ....	May 3	33-39	Explosion in neutralizer.
Labourer at starch works.....	Fort William, Ont. ....	" 5	65	Scalded hand; infection.
Fireman at sulphite mill.....	Hull, Que. ....	June 14	40	Struck by cap from boiler valve.
<b>STEAM RAILWAYS:—</b>				
Sectionman.....	Sault Ste. Marie, Ont. ...	April 3	50	Struck by engine.
Section foreman.....	Battleford, Sask. ....	" 12	..	Fell from car.
Foreman shunter.....	Truro, N. S. ....	" 10	65	Fell in front of engine.
Employee.....	Harling, Alta. ....	" 25	..	Derailment.
Bridgeman.....	Wetaskiwin, Alta. ....	" 28	53	Struck by engine.
Engineer.....	Sydney, N. S. ....	" 30	38	Collision.
Engineer.....	Toronto, Ont. ....	May 11	59	Struck by train while remedying injector.
Engineer.....	Grand Lake, N. S. ....	" 19	..	Collision.
Roundhouse employee.....	Brantford, Ont. ....	" 11	25	Crushed under engine.
Brakeman and driver (2).....	Nashwaak River, N. B. ...	" 17	..	Derailment.
Switchman.....	Edmonton, Alta. ....	" 21	..	Crushed between cars.
Employee.....	Dauphin, Man. ....	" 25	..	Fell between cars; died June 10, 1920.
Employee.....	Trancona, Man. ....	" 26	39	Struck by falling magnet.
Employee.....	Portage la Prairie, Man. ...	" 28	..	Cars jumped track.
Section foreman.....	Duff, Sask. ....	" 24	33	Derailment.
Section foreman.....	Memramcook Station, N. S. ....	" 24	..	Struck by train.
Watchman.....	Pickering Landing, Ont. ...	" 28	58	Struck by train.
Brakeman.....	Cobalt, Ont. ....	June 5	35	Run over by car.
Brakeman.....	Stellarton, N. S. ....	" 12	24	Fell from car.
Brakeman.....	Moncton, N. B. ....	" 16	32	Fell from train.
Brakeman.....	Depot Harbour, Ont. ....	" 29	..	Fell under car.
Employee.....	Graham, Man. ....	" 11	48	Derailment; died July 3, 1920.
Labourer.....	Hawthorne, Ont. ....	" 14	19	Fell from train.
Labourer.....	Cloister, B. C. ....	" 18	35	Struck by train.
Engineer.....	Port Arthur, Ont. ....	" 12	54	Derailment.
Engineer.....	McAdam, N. B. ....	" 28	32	Fell between cars.
<b>ELECTRIC RAILWAYS:—</b>				
Motorman.....	Lethbridge, Alta. ....	April 14	35	Fractured skull.
<b>MISCELLANEOUS TRANSPORT:—</b>				
Carter.....	Roberval, Que. ....	April 12	26	Horse ran away.
Drayman.....	Vancouver, B. C. ....	May 10	36	Kicked by horse.
Stevadore.....	Montreal, Que. ....	June 19	28	Cable broke and steel fell upending gangway.

## FATAL INDUSTRIAL ACCIDENTS DURING THE SECOND QUARTER OF 1920.—Continued.

Trade or Industry	Locality	Date	Age	Cause of fatality.
<b>NAVIGATION:—</b>				
Seaman.....	On Marila Maru, out from Victoria, B.C....	May 25	..	Struck by an iron bar.
Cook on steamship.....	Duluth, Minn.....	June 22	..	Drowned.
Seaman with oil transport.....	Broomfield, Ont.....	" 24	25	Drowned.
<b>MINING AND QUARRYING:—</b>				
Driller.....	Thetford Mines, Que....	April 3	33	Premature explosion of detonator.
Shotfirer.....	Caledonia, N. S.....	" 7	60	Bleeding; struck on leg by splinter of coal
Miner.....	Michel, B. C.....	" 10	over	Cave-in.
			21	
Miner.....	Bankhead, Alta.....	" 22	34	Suffocation.
Miner.....	South Wellington, B.C....	" 23	37	Fall of top coal.
Pusher.....	Nanaimo, B. C.....	" 10	over	Crushed between trip and prop.
			21	
Millman.....	Thetford Mines, Que....	" 17	30	Caught in belt.
Cage tender.....	Kirkland Lake, Ont.....	" 22	24	Fell from hoist down shaft.
Blasters (3).....	Timmins, Ont.....	" 28	22	Premature blast.
			23-39	
Traffic man.....	Thorburn, N.S.....	" 29	24	Struck by runaway rake.
Crusherman.....	Kimberley, B. C.....	" 23	21	Caught between belt and pulley.
Miner.....	Nickleton, Ont.....	May 2	29	Crushed by hoist.
Miner.....	Bell Island, Wabana.....	" 8	..	Struck by car.
Miner.....	No. 6, Galt Mine, Alta....	" 13	15	Run over by car.
Gold miner.....	Montague, N. S.....	" 11	24	Fell down mine shaft.
Brakeman.....	Copper Cliff, Ont.....	" 12	28	Fell under train.
			over	
Timber helper.....	Comox, B. C.....	" 20	21	Fall of rock.
Tableman.....	Cobalt, Ont.....	" 24	42	Struck by mill feeder.
Skiptender.....	Hedley, B. C.....	" 31	31	Struck by descending skip.
Car shop employee.....	Dominion, C.B.....	June 1	65	Struck by train.
Pumpman.....	Trail, B. C.....	" 6	over	Thrown from cage into shaft.
			21	
Repairman.....	Timmins, Ont.....	" 14	43	Fell from platform on top of waste bin.
Miner.....	Saunders, Alta.....	" 10	36	Falling timber and rock.
Miner.....	Coleman, Alta.....	" 10	49	Fall of rock.
Driver at coal mine.....	Taber, Alta.....	" 11	28	Fall of rock.
Drillers at mica mine (2).....	North Templeton, Que....	" 9	40-25	Asphyxiated by powder fumes.
Electrician.....	Glace Bay, N. S.....	" 14	29	Electrocuted.
Miner.....	Thetford Mines, Que....	" 16	..	Fall of rock.
<b>BUILDING AND CONSTRUCTION:—</b>				
Labourer.....	Toronto, Ont.....	April 14	42	Earth caved in.
Labourer with power commission.....	Stamford, Ont.....	" 25	40	Crushed by car.
Builder.....	Winnipeg, Man.....	" 22	40	Electrocuted when removing a detachable light.
Foreman.....	Guelph, Ont.....	" 23	45	Struck on head by timber.
Masons (2).....	Preston, Ont.....	" 30	27-46	Collapse of derrick caused fall.
Carpenter.....	Guelph, Ont.....	May 5	..	Struck by falling plank.
Carpenter.....	Oakville, Ont.....	" 19	22	Head crushed by beam.
Labourer.....	Cobourg, Ont.....	" 18	..	Fell off scaffold.
Superintendent.....	Quesnel, B. C.....	" 19	..	Crossing river on raft; drowned.
Framer.....	Pitt River Bridge, B.C....	" 22	45	Struck by train.
Watchman at dredging company.....	Ojibway, Ont.....	June 22	58	Struck by derrick.
Carpenter.....	Ganges, B. C.....	" 15	59	Thrown from bicycle.
Carpenter.....	Montreal, Que.....	" 23	58	Fall of elevator.
Painter.....	Halifax, N. S.....	" 17	22	Fell from ladder.
Scowman.....	Allanburg, Ont.....	" 22	26	Drowned.
Tinsmith.....	Napanee, Ont.....	" 24	55	Burned.
Labourer.....	Toronto, Ont.....	" 26	..	Earth caved in.
<b>LUMBERING:—</b>				
Chaser.....	Clover Lake, B. C.....	April 5	..	Struck by log.
Loader.....	Shawinigan Lake, B. C....	" 13	30	Drowned.
Sawyer.....	Kolapore, Ont.....	" 17	58	Carried with board on to saw.
River driver.....	Edmundston, N. B.....	" 16	22	Drowned.
Signalman.....	Port Moody, B. C.....	" 20	45	Struck by wood attached to pulley.
Signalman.....	Port Coquitlam, B. C....	" 20	50	Struck by falling tree.

Loader.....	Lombard, B. C.....	" 29	31	Struck by falling log.
Employee.....	Upsalquith, N. B.....	" 30	30	Crushed between car and deal.
Fishermen (2).....	Deep Cove Island.....	" 31	..	Drowned.

## WORKMEN'S COMPENSATION IN ALBERTA

---

**T**HE second annual report of the Workmen's Compensation Board of Alberta gives particulars of the administration of the Act during 1919, the first complete year of its operation. The Workmen's Compensation Act became effective on August 1, 1918, in so far as it applies to the mining industries; on January 1, 1919, in so far as it applies to the other industries provided for (except railways), and on May 18, 1919, to railways (excepting those specifically excluded by the Act). As the report states, practically all persons engaged in industries where manual labour is employed are now within the scope of the Act, with the exception of persons engaged in retail stores, farming, and the employees of the railways excluded by section 69 of the Act.

The total amount of the pay-rolls on which assessments were made during 1919 was \$26,363,546, the number of employers assessed being 2,153; the assessments made amounted to \$356,174 and the assessments collected totalled \$314,688, which, together with interest, and the balance of \$70,904 carried forward from 1918 amounted in all to \$392,612. Of this amount \$94,216 was expended in payment of claims, distributed as follows: fatal accidents (compensation paid \$3,477, and funeral expenses \$619), \$4,096; non-fatal accident, \$90,119; in administration of mine rescue work, \$13,558 and \$38,181 in payment of expenses and equipment, leaving a balance of \$246,656. Besides assessments on employers, the Board, in virtue

of an amendment to the Act in 1919, collected contributions from all employees who were not protected by a medical aid contract. These contributions were originally at the rate of 2 and 3 cents per day, according to the hazard of the worker's employment, but on August 1, the amounts were reduced to 1 and 2 cents per day respectively. The total thus contributed was \$33,847.

During the year ending December 31, 3,466 accidents, including 43 fatalities, were reported to the Board; compensation was paid in 2,804 cases, of which 1,594 claims were finally disposed of, and 708 claims were disposed of without compensation, while 192 accidents were reported and disposed of for which no applications for compensation were received; 73 accident applications were disposed of by payment of medical aid only; on 237 claims further payments still remain to be made, while 959 accidents, on which no payments had been made, were still under consideration at the close of the year. Accidents in and about mines were nearly half the total accidents, being 1,605 (including 22 deaths) compared with 1,861 (including 21 deaths) in other industries provided for. The time loss due to accidents was as follows: Due to permanent partial disability, 1,926 total days, or an average per worker injured of 60.19 days; due to temporary total disability, 33,835 total days, or an average per worker injured of 13.39 days. The average age of all workers injured was 32.09 years.

The Board acknowledges the cordial co-operation generally given by all parties concerned, but on several occasions it was compelled to take action against certain employers and others for failure to comply with the provisions of the Act. Information was sworn out against 202 employers; the charges against 77 were withdrawn; 123 were convicted, and in two cases convictions were not ob-

tained. One doctor was convicted for failure to comply with the provisions of the Act regarding reports.

Mine rescue work, by an act of the Legislature last year, is now administered by the Workmen's Compensation Board. At the same session the Electrical Workers' Protection Act of 1917 was repealed, and a new Electrical Protection Act was passed, its administration being placed under control of the Board.

### HAZARDS OF THE LUMBER INDUSTRY IN BRITISH COLUMBIA

THE lumber industry in British Columbia is not only the most important from the point of view of the aggregate of wages paid, it is also the most hazardous from an accident standpoint, according to a statement recently issued by the Workmen's Compensation Board of that province. During the first six months of the present year there were 39 fatalities in the lumber industry, or 44 per cent of the total number of all fatalities in all industries in the province. There were, in addition, 1996 non-fatal accidents resulting in temporary or permanent total disability.

From the beginning of 1917, when the British Columbia Workmen's Compensation Act came into force, until the end of June last, there have been 9,040 compensable accidents in the lumbering industry in its various branches. Of this number 152 proved fatal, and in seventy-three of the fatal cases pension awards were made to dependants of the deceased workmen. Accidents to workmen engaged in the lumbering industry during the three and a half years period have cost the industry \$974,723. Logging was responsible for the greater portion of this expenditure. The 4,301 accidents in logging cost the sum of \$495,820. In saw-milling there were 3,324 accidents, causing a total expenditure of \$308,870. Shingle mills caused 1,153

accidents and cost the funds \$106,829. Logging railways gave rise to 263 accidents, with an expenditure of \$63,203.

The average duration of incapacity due to accident was thirty-four days. Of the total 2,024 cases reported, 1,199 of the workmen were sufficiently recovered to return to work within a month of the accident; 284 more recovered before the end of the second month, while 188 took a longer period. Injuries to fingers and hands were the most common forms of accident coming under this heading. There were fifty-five accidents which resulted in loss of fingers. Injuries to the hand, other than fingers, number seven. The arm figured in eleven cases. The foot and ankle came in for fifteen of the accidents, and the leg and knee for eight more, the eye twelve, the back two. Another common accident was the breaking or injuring of ribs.

The lumbering industry, it is shown, uses men of a wide range of ages. The oldest man injured claimed to have passed his eighty-ninth birthday, while the youngest injured workman was but fifteen. There were fifty-six accidents to workmen over sixty and twenty-five accidents to boys under seventeen. The average age of the injured workman was thirty-seven years.

## MIGRATION AND SETTLEMENT DURING THE SECOND QUARTER OF 1920

**IMMIGRATION.**—The following statements compiled from information furnished by the Department of Immigration and Colonization give details as to the total immigration into Canada during the second quarter of 1920. For purposes of comparison the figures for the previous quarter and for the corresponding quarter in 1919 are also given:

STATEMENT OF IMMIGRATION TO CANADA DURING THE SECOND QUARTER OF 1920.

	British	From the U.S.A.	Other countries	Totals
1920				
April.....	6,229	6,324	734	13,287
May.....	12,414	5,353	1,844	19,611
June.....	9,844	4,720	1,780	16,344
	28,487	16,397	4,358	49,242
first quarter, 1920.....	8,774	8,786	2,055	19,615
second quarter, 1919.....	10,379	17,429	1,470	29,278

The table on page 1102 gives the nationality, sex and destination of all immigrants entering Canada during the second quarter of 1920.

**HOMESTEAD ENTRIES.**—During the second quarter of 1920 there were 1,612 homestead entries recorded in the Provinces of Manitoba, Saskatchewan, Alberta and British Columbia, as compared with 815 for the first quarter of 1920, and 2,253 for the corresponding quarter of 1919. The following opposite statement shows the number and nationality of those who took up homesteads in the various provinces during the second quarter of 1920.

HOMESTEAD ENTRIES BY PROVINCE AND NATIONALITY OF HOMESTEADERS DURING SECOND QUARTER OF 1920.

**LANDS PATENTED.**—According to information supplied by the Department of the Interior with respect to letters patent covering Dominion lands in Manitoba, Saskatchewan, Alberta, British Columbia and the Yukon Territory, the number of patents issued during the second quarter of 1920 was 4,574 and the number of acres was 700,789, as compared with 5,326 patents and 817,542 in the first quarter of 1920, and 4,493 patents and 707,318 acres in the corresponding quarter of 1919.

## RECENT LEGAL DECISIONS AFFECTING LABOUR

OF the four recent legal decisions summarized below, two refer to compensation for industrial accidents in the province of Quebec, one refers to the right of labour unions in Great Britain to expel its members and to

penalize other members who might thereafter work with such expelled members; and one is a decision of the Supreme Court of the State of New York with respect to picketing.

**Employer is responsible for inexcusable fault of his employees, and under Quebec law is liable to additional payment beyond what is required by law of Industrial Accidents**

The driver of an emergency wagon of the Montreal Tramways Company drove at full speed through the streets of Montreal on the way to repair a broken cable, when he collided with a street car at a crossing. The rear of the wagon was struck and an employee of the company was thrown off and was run over by the car. Both his legs were crushed and had to be amputated. He brought an action against the company claiming (1) an annual pension of \$345 equal to half his yearly wages up to \$600 plus one-quarter of his wages above \$600; (2) an additional sum on the ground that the accident was due to the inexcusable fault of the company, or the capital of this additional sum placed at \$15,000. The company admitted the first claim but disputed the second claim for an additional sum. Judgment in favour of the plaintiff was given in the Superior Court. The company appealed to the Court of King's Bench claiming that in the case of inexcusable fault the employer is responsible only for his personal fault or for the fault of those entrusted with the management of the business, not for the fault of his agents or ordinary employees. The court, however, held that since there was no clause in the Quebec law of industrial

accidents expressly abrogating the Common Law with regard to inexcusable fault, it must be guided by the Common Law which holds an employer responsible not only for the inexcusable fault of the persons placed in charge of the direction of the enterprise but of all employees acting within the scope of their employment. The court, therefore, declared the company guilty of inexcusable fault entitling the plaintiff to an increased indemnity. The claim of the plaintiff was, however, regarded as excessive inasmuch as it would produce a perpetual yearly return equal to the annual amount to which the workman was entitled during his lifetime, and in its judgment the company was condemned to pay the injured employee \$9,000 with interest and costs.

The company appealed to the Privy Council, which held that there was inexcusable fault on the part of the driver of the emergency wagon; that this inexcusable fault was imputable to the company, and under Article 7325 of the Quebec Civil Code an increase of the compensation payable under the Quebec Act relating to industrial accidents was justified.

The appeal was, therefore, dismissed with costs. (*Quebec—Montreal Tramways Company v. Savignac.*)

**Action in Court lapsed after discontinuance of suit for two years. Monthly payments under order from Court did not prevent lapsing of case**

In January, 1917, an employee of the Canadian Northern Railway Company, brought action for \$2,000 against the Company under the Quebec law of industrial accidents. After giving notice of the action he obtained an order from the Court for \$1 a day payable every fortnight while the case was pending. Before entering its plea the Company admitted judgment to the amount of \$500, with interest and costs, but this was rejected by the plaintiff. The Company then entered its plea, to which the plaintiff replied on April 26, 1917. Since then no further action had been taken in the Court. The Company continued to make the fortnightly payments to the defendant, at the rate of \$1 a day until May, 1919. The plaintiff sought to continue the suit in June, 1919, but a motion was made on behalf of the defendant company for a declaration that the case had lapsed owing to the discontinuance of the suit for two years. The plaintiff claimed that the judgment providing for a daily rate of pay and the fact that the payments had since been regularly made by virtue of this order, constituted a procedure that prevented the lapsing of the case.

It was held by the Superior Court that this judgment, and the payments made by virtue of the judgment, were indeed legal processes and acts made on occasion of the action and dependant on this action, but that the judgment and payments had no connection with the action itself, were independent of it, and did not and could not serve to promote and retard or hinder the progress of the case. They did not constitute in a legal sense a procedure useful to the litigation and process of law. It would appear at first sight abnormal to declare lapsed an action in which the defendant had admitted a liability of \$500, but if an action should be declared lapsed where the plaintiff has neglected to proceed with it, no matter how well founded it may be, the same rule ought to apply where liability has been admitted, when the plaintiff has not wished to avail himself of it and has taken no steps for the conservation of the rights which would accrue to him from this admission. In view of these facts the motion was therefore granted and the action was declared to have lapsed, each party paying their own cost. (*Quebec—Barry vs. Canadian Northern Railway Company.*)

**Local union upheld in expelling a member and in notifying employer that every member working with him would be treated as a non-member**

A musician in Cardiff, Wales, was expelled from the Amalgamated Musicians' Union for alleged violation of its rules. He brought an action against the Union for a declaration that the resolution purporting to expel him from membership was *ultra vires* and void, and for an injunction to restrain the Union from acting upon it. He brought a second action against the officials of the Cardiff branch for unlawfully procuring his employer to break the contract with him. According to the summing up of the Judge, the trouble arose from a letter written by the plaintiff to the

general secretary of the Union alleging the prevalence of a number of irregularities in the Cardiff branch. It was held by the Court that this letter contained serious personal charges against members of the Committee of the local branch and that it reflected on the good name of the branch. The court upheld the claim of the defendants that they were justified in expelling the plaintiff under Rule XVI (3) of their Constitution which provides that "It shall be competent for any branch at a special or quarterly meeting to fine... suspend or expel any member from the union,

upon satisfactory proof being given that such member has by his conduct brought the union into discredit... etc."

With regard to the second action, it was argued on behalf of the plaintiff that the passing of the resolution expelling him was an agreement or combination by the members who passed it to do an illegal act in that they thereby resolved that any member playing with the plaintiff after the date mentioned therein should be treated as a non-member. The court held, however, that in so resolving the members were again acting within their rights since it was at most but the expression of an intention on the part of its supporters so to treat members who disregarded the earlier part of the resolution expelling the plaintiff. The defendants, therefore, having resolved to adopt a line of con-

duct which they were lawfully entitled to adopt, the plaintiff to succeed would have to prove that to procure their object they had resorted to threats, coercion, or other illegal means. The only means the plaintiff alleged the defendants had employed was the communication to his employer and another person of the terms of the above-mentioned resolution. The court was of the opinion that a simple notification to an employer of an intention to do a lawful act could not properly be described as the use of illegal means. It was therefore declared that the plaintiff had failed to establish any cause of action against the defendants and the action was dismissed with costs. (*United Kingdom—Wolstenholme vs. Amalgamated Musicians' Union: Wolstenholme vs. Ariss et al.*)

**Injunction against picketing by unions in New York State made permanent and damages awarded employers**

An important legal decision with regard to picketing was recently delivered by Justice A. J. Rodenbeck in the Supreme Court of the State of New York. This case arose from a strike of the Amalgamated Clothing Workers of America against the Michaels-Stern Company of Buffalo which took place last year on account of the refusal of the company to recognize this organization as representative of their employees. When the company sought to fill the places of the strikers, having entered into an agreement with the United Garment Workers, a rival organization, the union picketed their factory. The company then brought action against the Amalgamated Clothing Workers and a temporary injunction was issued restraining their officers and members from intimidation and other illegal methods. Subsequently the company brought suit to have this injunction made permanent and claimed \$100,000 damages. According to the company's counsel, the sole issue raised was whether the law would protect the company and its employees from verbal

abuse, actual assaults and threats, and unlawful interference with its business. According to counsel for the union, the legal questions raised were whether the enforcement of collective bargaining was a legal object and whether the means to enforce it were lawful. The union contended that it sought to better the condition of its members by the enforcement of collective bargaining, and that "the strikes, incitement of strikes, picketing, and appeals to the public (insofar as they did not involve violence, fraud or defamation and similar tactics, which the defendants emphatically disavowed) were tactical means reasonably adopted to the achievement of the strategic objective of collective bargaining," and strictly within the law. In summing up the case, the Judge said in part "If the members in plaintiff's employ had quit and struck, and stopped there, no cause would have been presented for legal intervention, as the plaintiffs had the option of supplying the vacant places with other help, or if they could not do so of discontinuing business. But the... defendants...

set out to prevent plaintiffs from filling with others the places of those who left and to cause those who remained at work to leave plaintiffs' employ. The case turns upon the question as to whether or not force, or what is equivalent to force, was employed by the defendants to secure this recognition. If no threats, intimidation, force, violence or other coercive measures were employed, the defendants are not liable, for they were within their rights in seeking to compel recognition by calling a strike. The methods of picketing involved threats and intimidation. Picketing may be lawful or unlawful. The legitimate purpose of it is to inform the strikers and their union as to what is going on at the plants. When it unnecessarily goes beyond this, and is conducted with the design, and has the effect of, intimidating those who may desire to remain at work or seek employment, it infringes upon human freedom and liberty of action . . . Whatever number of pickets was necessary to secure the reasonable and lawful purpose of the union is sanctioned by law, but where the number is swelled to five or six hundred, and at times to a thousand, made up in part

of workers from other factories, the unnecessary and unlawful purpose to awe and intimidate by numbers is apparent. Intimidation may consist in numbers alone without any actual violence. The picketing was not 'peaceful'. Names were called. . . . There were actual assaults upon employees and interferences with and even attacks on the police. . . The use of force or its equivalent goes back to the beginning of the strike, and under the history and circumstances of the case, justifies a conclusion that such means were contemplated and intended when the strike was called. This purpose makes the strike illegal in its inception. A strike may be lawful or unlawful according to the motives or intention of the strikers. It may be an illegal conspiracy in its inception if it is a 'combination to do an illegal act by legal means, or any act by illegal means.'

The decision of the Court was in favour of the Company, the injunction was made permanent, and damages awarded the amount of which was to be determined later. (*United States—Michaels-Stern Company v. Amalgamated Clothing Workers of America.*)

# THE LABOUR GAZETTE

Prepared and edited in the Department of Labour, Ottawa

MINISTER—THE HONOURABLE GIDEON D. ROBERTSON.  
DEPUTY MINISTER—F. A. ACLAND.

Volume 20

SEPTEMBER, 1920

Number 9

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

### The month in brief

This issue of the LABOUR GAZETTE contains an informative article in which a comparison is made of the various provincial Minimum Wage laws in Canada.

The cost of the weekly family budget of staple foods showed a decline averaging \$16.42 at the middle of August as compared with \$16.84 in July, \$14.43 in August, 1919, and \$7.68 in August, 1914.

At the beginning of August, the percentage of unemployment among trade unions was 2.64 as compared with 2.48 at the beginning of July and 2.40 at the beginning of August, 1919. According to returns from over 5,000 firms, the volume of employment in Canada showed a slight average decline, due in part to employees being released for harvesting.

The time loss due to industrial disputes during August was less than during either June, 1920, or August, 1919. There were in existence during the month 23 strikes, involving about 4,812 workpeople, and resulting in a time loss of 79,482 working days. At the end of

the month there were on record 15 strikes involving about 744 workpeople.

### Proceedings under the Industrial Disputes Investigation Act

During August the Department received reports from six Boards of Conciliation and Investigation established to deal with disputes between (1) Various Manufacturers of Woodwork in general in Ottawa and certain of their employees, members of Local No. 646, United Brotherhood of Carpenters and Joiners of America; (2) Montreal Tramways Company and certain of its employees, being members of Division No. 790, Amalgamated Association of Street and Electric Railway Employees of America; (3) the following companies: (a) Toronto and Niagara Power Company; (b) Toronto Power Company, Toronto, (c) Toronto Power Company, Niagara Falls, Ontario, and (d) Toronto Street Railway Company, and certain of their employees, being members of the following trade unions, namely: (a) blacksmiths and helpers, members of Local 318. International Brotherhood of Blacksmiths and Helpers; (b) electrical workers and helpers, members of Local

353, Toronto, and Local 897, Niagara Falls, International Brotherhood of Electrical Workers; (c) woodworkers, members of Toronto District Council of Carpenters, and (d) machinists and helpers, members of District Lodge No. 46, International Association of Machinists, and Lodge No. 1296, Niagara Falls, Ontario, International Association of Machinists: (4) Grand Trunk Pacific Railway Company and certain of its employees, being 'longshoremen' at Prince Rupert, B.C.; (5) Hull Electric Company and certain of its employees, being members of Division No. 591, Amalgamated Association of Street and Electric Railway Employees of America, and (6) Vancouver and Victoria Gas Companies and certain of the employees of the said companies, being gas workers.

Three applications were received for the establishment of Boards and a Board was established in connection with an application which had been received during a previous month.

**First-aid for  
workers com-  
pulsory in  
Alberta and  
B.C.**

The Workmen's Compensation Board of Alberta has issued an order requiring all employers of labour within the province to main-

tain first-aid equipment at their working places after September 17. The nature and amount of equipment and supplies are regulated according to the number of employees in each establishment, and when the number exceeds fifty workers at least one man must hold a certificate of competency to render first-aid to the injured. Similar regulations issued by the Workmen's Compensation Board of British Columbia went into effect in that province on September 1. By these regulations every employer of over ten workmen must keep on hand a first-aid kit, and every employer of one hundred or more workpeople must have a first-aid room with prescribed equipment and supplies. Every employer of fifteen or more workmen employed more than five miles from a medical practitioner must have at the place of employment one person holding a certificate of first-aid.

**Meeting of  
Joint Confer-  
ence Board of  
Building In-  
dustries and  
Trades**

The National Joint Conference Board of the Canadian Building and Construction Industries and representatives of the building trades unions have decided to hold regular quarterly meetings. The first of these meetings was held at Ottawa on August 18, with Mr. J. Clark Reilly, secretary of the Association, as chairman. A committee which had been appointed to investigate the cement shortage reported that the Board of Railway Commissioners had promised that the construction industry should have full consideration with a view toward procuring an adequate supply of coal for the manufacture of cement. The committee stated that in Eastern Canada a good deal of work had been refused because of the uncertainty of the cement supply. A proposed standard apprenticeship agreement was submitted, but this was left over until further data had been procured. As a means of relieving the acute housing shortage, it was suggested that action might be taken to secure further loans from the government to be made to borrowers through the loan companies, supplementing the present housing plan.

**Statistics of  
Canadian Co-  
operative  
Societies for  
1919**

A recent issue of *The Canadian Co-operator* contains statistics of Canadian Co-operative Societies for the year 1919. Sixteen societies are given of which fifteen are distributive, and one, the United Grain Growers, Limited, Winnipeg, is both a marketing and distributive society.

Excluding the United Grain Growers, the remaining societies had a membership of 6,306, with two not given, a share capital of \$212,059, and a loan capital of \$148,773. The value of the stock in trade was \$370,676, while other assets amounted to \$205,221, with reserve funds of \$47,463. The year's sales were to the value of \$2,132,725, an increase of \$390,279 over the previous year. The rate of interest paid on

capital ranged from 5 to 8 per cent, and the dividends on purchases from 2 to 12½ per cent.

The United Grain Growers, Limited, of Winnipeg had a membership of 34,503, with a share capital of \$2,415,185. Its stock in trade amounted to \$1,589,502 and its other assets to \$6,330,766 with a reserve fund of \$1,756,429. Its 739 employees received in salaries and wages \$930,730. The sales for the year amounted to \$6,180,359, an increase of \$252,970 over the previous year, the net profits being \$148,549. The United Grain Growers, Limited, also handled 5,257 cars of live stock, an increase of 1,717 cars, and 22,203,007 bushels of grain, a decrease of 7,676,665 bushels compared with the previous year.

**Returned  
Soldiers' Insur-  
ance Act**

The Returned Soldiers' Insurance Act passed at the last session of parliament came into effect on September 1. The act provides that life insurance may be obtained by any returned soldier or sailor who served in the great war or who was domiciled and resident in Canada on August 4, 1914, and has served in any of His Majesty's forces, or in the forces of any of the allied or associated powers. The applicant must, at the time insurance is issued, be domiciled and resident in Canada. Widows of returned soldiers who have died after retirement or honourable discharge from the service and before the expiration of twelve months from the coming into force of the act, are also eligible for insurance under the scheme. Policies will be issued for a minimum of \$500 and in multiples of \$500 up to \$5,000. The act was framed primarily with the object of giving to the returned man whose physical condition, by reason of war service, prevents him from obtaining ordinary life insurance at normal rates, an opportunity to protect his dependents. It is open, however, to all returned men, whether of impaired physical condition or otherwise.

The government insurance policy is different in some respect from those issued by regular insurance companies as the object of the scheme is protection of the dependents of the insured. Only immediate dependents may be named as beneficiaries and no provision is made for policy loans. The insurance money is not subject to the claims of creditors of either the insured or the beneficiaries and cannot be assigned. Only one-fifth of the amount of the policy is payable at death in a lump sum, the balance to be applied as an annuity under various plans to be selected by the insured. An exceptional advantage of the scheme is the provision made for a disability benefit, not given elsewhere at such advantageous rates. Under this clause, should the policy holder become totally and permanently disabled, he is at once relieved from paying further premiums and the insurance is paid to him direct as an annuity of one-twentieth of the amount of his policy for a period of not exceeding twenty years. Should he not survive this period, the balance due is paid to his beneficiary. Policies may be taken out on several limited payment plans or for whole life, and premiums may be paid monthly, quarterly, half-yearly, or annually, according to the convenience of the insured.

**The Manchester  
Building Guild**

An article, in the April issue of the LABOUR GAZETTE, on the Building Trades Guild in Manchester, stated that the building materials for the houses that the Guild was to construct for the city of Manchester were to be purchased by the City Council and supplied to the Guild, as it was considered that during the present experimental stage the unavoidable difficulties and risks in getting materials could be better dealt with by a public body. The Co-operative Wholesale Society, however, have since agreed to give all the Guilds the assistance of their extensive organization, and it is thought that a satisfactory arrangement will be

reached. Since the Co-operative Wholesale Society is, next to the Government, the largest manufacturer and marketer of building materials in the United Kingdom, this move is expected to be of primary assistance to the Guilds. It will enable them to supply the materials as well as the labour and transfer the savings effected from buying from a non-profit making source to the wages of the workers.

#### Labour Co-operative Banks

As noted in a previous issue, a "labour bank," known as the Brotherhood of Locomotive Engineers' Co-operative Bank, will soon begin operations at Cleveland, Ohio, with a capital of one million dollars. A similar labour co-operative bank was opened in Rome, Italy, in April 1919, on the initiative of the Catholic credit institutions belonging to the Italian Banking Federation. The bank opened with a capital of three million lire, its object being to place credit at the service of the workers, with special regard to agricultural production and small industries, and particularly to finance co-operative societies of workers or consumers, to promote technical instruction, and to encourage thrift.

#### Child Labour in United States

According to a report of the director of the Vocational Guidance Bureau of Chicago, there has been a general increase in child labour in the Middle Western states of the Union. The Texas State Labour Commission reports an increase of 10 per cent over last year. Massachusetts, Wisconsin and New York City also report increases. Minnesota officials reported that child labour had nearly doubled in that State, the greatest increase being among the children of clerical workers. Specific reasons given for this increase are, economic pressure in the home, due to the high cost of living, a reason that in former times, it is stated, was less potent than has been supposed; and the discovery by em-

ployers that women and children can often take the place of men. It is also suggested that the laxity with respect to child labour during the war is still showing its effects in indifference and neglect.

#### "Vacation with pay" for factory workers

"Vacation with pay" for factory workers is slowly becoming an established practice in the United States, according to the *Outlook*. Out of 624 plants in various industries, including those in such industrial centres as Bridgeport, Philadelphia, Boston, Troy and Binghamton, about 18 per cent give their employees this privilege, which up to two or three years ago, with a very few isolated exceptions, was limited to office staffs working on monthly salary, without any overtime privileges. Recent figures show that the "shut-down" vacation has been adopted in four foundries, two clothing, two public utilities, two food products and five other establishments. In most factories the vacation is of one week's duration, sometimes continuous, and sometimes in single days determined by operation. But the length of the holiday is generally based on length and regularity of service, a full week being given where attendance has been regular—a condition particularly applicable, it is said, to women workers. As a sample of the rules governing vacations, the following plan adopted by a heavy machinery factory in the middle west, is quoted:

"(1) All employees continually in the service of this company for one year prior to May 1, 1920, are entitled to one week's vacation with pay. (2) Employees continually in our service for six months prior to May 1, 1920, are entitled to three days. (3) All new arrivals must be a year at work before getting a week's vacation. (4) Absence of more than one day's duration during a month, unless for sickness or death in family, reduces the vacation period for half a day for each extra day absent. (5) Seniority of service gives first choice

of time for vacation. (6) Pay for vacation period will be based on average earnings, minus overtime pay, for the preceding three months."

**Mr. Gompers on suspension of industrial operations**

Referring to the proposed action of the American Woollen Company to suspend operations, Mr. Samuel Gompers, president of the American Federation of Labour, has stated that "the action of corporations which lay off thousands of men is nothing less than a tremendous indictment of management and a heinous offence against a people in need of every ounce of production." "For months," he continued, "we have heard the cry, dinned and dinned into our ears, 'increased production.' How can a policy of increased production be accomplished under a policy of laying off thousands of workers? What is needed above everything else today is continuous operation of industry, fairness and honesty and intelligence upon the part of the employers that will make continuous operation possible." Mr. Gompers alleged that in 1919 the American Woollen Company had increased its net income 316 per cent over 1914, and its common stock earnings 531 per cent.

**"Open Shop" movement in United States**

A campaign for the "open shop" has lately been developed by manufacturers in the United States as a counter-movement to the labour assertion of the right to "collective bargaining," the issue which split the President's First Industrial Conference in October of last year (LABOUR GAZETTE, November, 1919, page 1306). Various open shop movements, principally in western cities, have organized a National Open Shop Association, with headquarters in San Antonio, Texas. The committee on labour of the Associated General Contractors of America, in a declaration of principles lately submitted to the members affirm (1) the right of every person to enter, indi-

dually or collectively, into any lawful contract of employment; (2) the right of employers to make 'open shop' agreements. The Citizen's Transportation Committee of New York City is stated by its chairman to be engaged in a movement for the 'open shop'—"so that you won't be dominated by any group or groups, but can go along consulting the law and the interests of your business for guidance." In a recent address to the Iron and Steel Institute Judge E. H. Gary, who, it is reported, is the leader in the 'open shop' movement, claimed that "it is perfectly clear that the whole argument as to collective bargaining returns to the main proposition of open or closed shop. In the President's conference there was no objection offered by any one to a form of collective bargaining as between employers and employees, provided both were free from outside representation and direction." Again he says: "We stand for the open shop, which permits a man to work when and where he pleases, on terms mutually agreed upon, whether he does or does not belong to a labour union." Commenting on the open shop movement *The Outlook* of New York, after pointing out that it is clear that the employers' chief motive is not an unselfish interest in maintaining a worker's freedom of contract, says that practically "the issue of the open shop resolves itself into the question whether employers will or will not deal with workers collectively through a representative organization of which the workers confidently believe that it is strong enough to bestow upon them an accretion of bargaining power sufficient to enable them to bargain upon equal terms with their employers."

**Labour conditions in Soviet Russia**

A report entitled "Labour Conditions in Soviet Russia" (published by Harrison and Sons, St. Martin's Lane, London, W.C. 2, price 7s. 6d. net) has been issued by the International Labour Office. The Report, according

to the British *Labour Gazette*, was prepared as a guide to the members of the Commission which the International Labour Office proposed to send to Russia. It is a compilation of information from such sources as exist in western Europe, including, however, translations of certain decrees and legislative enactments of the Soviet Government which have appeared in the Russian newspapers, or have been circulated by wireless. The report is arranged under the following headings: Hours of labour; wages; labour of women and children; protection of workers engaged in dangerous and unhealthy industries; unemployment; home work; social insurance (*i. e.* insurance against old age, sickness, disablement, etc.); compulsory labour; strikes; organization of Russian Labour Commissariat (*i. e.* Ministry of Labour); Trade Unions; nationalization of industry; material results of nationalization; workers' control; technical staff; condition of non-nationalized industries; Russian co-operative societies. There is also a detailed bibliography.

#### Jottings

The City of Winnipeg in co-operation with the province of Manitoba has inaugurated a survey to determine the best plan for systematically handling the employment of young workers. After questionnaires have been filled in and returned by employers and their juvenile employees, conferences will be held to formulate plans for aiding juveniles under eighteen years of age to secure the right kind of employment.

Arrangements are being made by the Ontario Safety League to hold a course of lectures on Safety Instruction in Toronto. The course will consist of a series of some twelve fortnightly lectures, on such subjects as "Design and Construction of Safeguards," "What the Foreman can do to Promote Safety," "Electrical Hazards," "First Aid," "Eye Protection," "Plant Sanitation," etc. Similar courses have been offered in other cities, where they are declared

to have been successful in helping to reduce the number of industrial accidents.

The Alberta government has appointed an advisory commission to investigate and report on the workings of the Factories Act in that province, and to determine the amount to be paid as a minimum wage to female employees under eighteen years of age in factories, shops and offices; the hours per week they shall work; and the proportion of employees who may be apprentices. The commission consists of Mr. H. Milton Martin, Edmonton, nominated by the Manufacturers' Association; Mr. J. A. Gaetz, Red Deer, nominated by the Retail Merchants' Association; Messrs. Walter Smitten, Calgary, and Robert McCreath, Edmonton, nominated by the Trades and Labour Council; with Mr. J. N. McLeod, chief factory inspector, as chairman.

In the June, 1920, issue of the LABOUR GAZETTE, mention was made of the American Federation of Teachers affiliated with the American Federation of Labour, a branch which had been formed at Montreal, Que. Since then an association, called the Canadian Teachers' Federation has been formed, comprising teachers in the five provinces west of Quebec, and it is thought that Quebec and the Maritime Provinces also may join the union later. The immediate aim of the federation is to secure salary increases upon such a scale as will raise the 1921 salaries to double the amounts received in 1914. The most far-reaching provision of the constitution of this union is that in matters of dispute all provincial organizations in the federation will act together. The first general meeting of the Canadian Teachers' Federation was held at Calgary last July.

The British Industrial Court has refused the application of the Amalgamated Engineering Union for an advance in wages. Fifty unions including workers in the engineering, shipbuilding, and

metal trades are affected. Union officials have referred the decision to district mass meetings.

A scheme recently drafted by the London Education Authority, England, provides, under the Education Act, 1918, for the establishment of new technical institutes, and the allocation of scholarships for intermediate technical training in engineering, building, chemical trades, printing, furniture trades, etc. Children of poor parents will be admitted free to secondary and junior technical schools on passing examinations, if their parents agree to keep them at school until they have completed their course.

A plan for the safety of workmen in building and construction has been introduced by Dwight P. Robinson and Company, Inc., a large engineering and construction organization at Middletown, Ohio. At a set time each week a committee of foremen, mechanics and labourers, inspects the entire job under construction and reports each inspection to a safety committee which considers and puts into effect its recommendations.

Steps are being taken by the International Ladies' Garment Workers' Union to establish factories in New York, Chicago, and Philadelphia, for the manufacture of garments. The workers will be selected by the Union and it is proposed to pay them higher wages than those paid by the employers in the garment industry and to give them a seven-hour working day, instead of the prevailing eight-hour day with Saturday half-holiday. Retail stores will also be established by the Union in which the product of their factories will be sold.

At the annual convention of the International Typographical Union which

met at Albany, New York, in August, the Secretary's report showed the membership to be 74,719, the total earnings of the members for the year ended May 31, last, \$32,130,091, an increase of 40 per cent over the previous year; and the total assets of the Union on July 31 as \$1,966,903. It was decided to increase the monthly per capita tax for the maintenance of the Union Printers' Home at Colorado Springs from 20 to 30 cents. Quebec was chosen for the 1921 convention.

A new collective agreement between the Fancy Leather Goods Workers' Union and the Associated Leather Goods Manufacturers of the United States provides, among other things, for a scientific study of piece work and time-work by a staff of experts, the relative values of the systems to be decided by the workers and employers in February, 1921; a joint board of sanitary control; plans for an employment bureau jointly supported and operated; and a wage increase of 10 per cent.

A teaching bonus has been established in the Joseph & Feiss Company's clothing shops at Cleveland, Ohio, the total bonus for sponsoring a new worker being \$8, of which \$3 is paid when a worker averages for five consecutive days 80 per cent of the operation; if the average is reached within the required time the regular bonus of \$5 is paid. When the pupil maintains the standard for five consecutive days the teacher receives another \$3.

Coal miners in Germany have agreed to work ten and a half hours a day and two Sundays a month, in consideration of certain concessions including better food, housing and social conditions, and an early report from the Socialization Commission on the nationalization of the coal industry.

## INDUSTRIAL CONDITIONS DURING AUGUST, 1920

### I.—General Review

Industrial employment throughout Canada showed a slightly downward tendency during the month of August as compared with the previous month. This was partly explained by the considerable movement of unskilled labour which was noted from industrial centres to the harvest fields. The metals, machinery and conveyances trades were still hampered to some extent, especially in Ontario, by the shortage of coal and steel; in British Columbia, however, increases were recorded during the first and last weeks of the month. Employment was well maintained in the food group, the flour mills being already active with the new crop. The textile industries continued to feel the effects of the usual seasonal inactivity but a shortage of female help was noted in some departments. The boot and shoe trades were still very slack, while other clothing industries were also quiet. Busy conditions continued to prevail in the pulp and paper manufacturing group. The woodworking, clay, glass and stone, and paint and varnish industries were all busy as the result of general activity in building; construction, however, was retarded in many places by a shortage of cement, and was still far behind housing requirements. The number of workers engaged in railway operation remained practically unchanged, but activity in railway construction was affected by the diversion of workers to harvesting. Mining (other than coal) and quarrying showed some improvement, but coal mining operations were less active, especially in Nova Scotia. The saw-mills were busy on the season's cut, and the logging camps were preparing to resume operations in the bush for the coming season.

The loss of time on account of industrial disputes was less during August than during July, 1920, or August, 1919.

#### Strikes

There were in existence at some time or other during the month 23 strike, involving about 4,812 workpeople, and resulting in a loss of 79,482 working days, as compared with 49 strikes, 6,754 workpeople and 80,221 working days in July, 1920; and 46 strikes, 24,511 workpeople and 365,062 working days in August, 1919. On August 1, there were on record 14 strikes, affecting 1,009 workpeople. Nine strikes were reported as having commenced during August, as compared with 20 in July. Four of the strikes commencing prior to August and four of those commencing during August were reported terminated, leaving 15 strikes involving about 744 workpeople on record at the end of the month.

In prices the movement was again downward, the index number of wholesale prices being lower at 330.2 for August as compared with 346.8 for

#### Prices

July, 349.3 for June, 356.6 for May, 1920, 301.1 for August, 1919, and 136.3 for August, 1914. The decrease for the month, approximately 5 per cent, was due chiefly to lower levels in the fruits and vegetables group, but also to decreases in grains, cattle, sheep, textiles, hides and leather, in some metals, and in raw furs, but there were slight decreases in some of the other groups. Increases occurred in the dairy group, in iron products, in coal, coke, and in petroleum products. In building materials some lines were up and some down, but there were considerable decreases in linseed oil, shellac,

and turpentine. In retail prices the average cost of a weekly family budget of staple foods in some sixty cities was \$16.42 at the middle of August as compared with \$16.84 in July, \$14.43 in August, 1919, and \$7.68 in August, 1914.

The decrease for the month was due chiefly to a drop in potatoes, but there were also slight decreases in meats, with increases in eggs, butter and sugar. In coal, wood and coal oil there were increases.

## II.—Industries and Trades.

SYDNEY reported increased production in the iron and steel industry during the month of August, the output of three blast furnaces being as follows: pig iron, 22,800 tons; ingots, 24,500 tons; blooms and billets, 15,500 tons; plates 4,300 tons; light rails, 750 tons; rods, 8,900 tons; wire, 1,075 tons; nails and staples, 1,300 tons; the metal roofing trade continued active. The output of four blast furnaces at SYDNEY MINES was 7,500 tons of iron, and 12,000 tons of steel. At HALIFAX the nut, bar, iron and skate industries continued steady, with good prospects for the future; stationary engine and boiler works showed increased activity both in construction and repairs. At WESTVILLE the structural steel industry was steady; engine and boiler, farm implement and tractor plants were busy; sheet metal and electrical workers were normally active. Steady conditions prevailed in the foundries and machine shops at AMHERST, but some scarcity was noted of materials and fuel. At CHARLOTTETOWN employment was good among iron moulders, iron workers, and helpers, machinists, electrical workers and blacksmiths. Foundries and machine shops at FREDERICTON had a busy month. At MONTREAL the strike of about thirty-four riveters resulted in the lock-out of about 3,000 men at the car foundry; the structural steel, farm implement, sheet metal and electrical industries were all fairly active. At QUEBEC employment was active in the architectural and structural steel, stove and furnace and metal roofing industries. THREE RIVERS reported the foundries regularly busy; farm implement makers were well employed. At

SHERBROOKE activity prevailed in the architectural and structural iron and steel factories and stationary and portable engine and boiler shops. St. HYACINTHE reported somewhat quieter conditions in the metal trades and machine shops than in the previous month, but repair work was active; new orders were plentiful, but owing to the shortage of certain kinds of iron and steel it was impossible to complete the engines, farm implements and threshing machines on hand. The metal trades at SOREL had an active month. OTTAWA and HULL reported a continued decline of activity at the foundries. At TORONTO the metal and machinery trades generally continued quiet on account of the shortage of coal and steel; a new sheet steel mill was practically completed at the close of the month and was ready to begin producing tinplate early in September, giving employment to about 800 men; electrical workers engaged on construction work were busy, but other branches of the trade were quiet; agricultural implement factories were active. HAMILTON reported fair activity throughout the metal group with some demand for help, but some iron industries closed down for two weeks. A shortage of labour was noted in the metal industries at NIAGARA FALLS, including machinists, brass polishers, press hands, wrappers (female) and factory labourers. Men were also in demand for the structural steel works at BRIDGEBURG. At St. CATHARINES the metal trades were well employed, and boiler makers and electrical workers were busy. At BROCKVILLE the stove and furnace, tin and sheet metal trades were fairly busy and tool and hardware plants were active. At BELLE-

VILLE steel workers were well employed; day and night shifts were worked at the rolling mills; hardware and lock factories had a busy month. The foundries at PETERBOROUGH worked to full capacity, with moulders and coremakers in demand; machine and electrical shops showed increased activity, the electric works employing about 1,200 hands and increasing their staffs. GALT reported very busy conditions in the pig iron and rolling mills and in the architectural and structural iron and steel plants, engine and boiler and electrical apparatus shops; help was required in the stove and furnace factories; activity was also reported at the convertors, and in the sheet metal plants, and all machine shops were busy. The machinery and farm implement shops at BRANTFORD were very busy, and the malleable iron factory worked night shifts in some departments; the stove and furnace, electrical fixture and motor factories and sheet metal works were also active. At KITCHENER, tinsmiths were in demand; machine shops and foundries were not rushed but worked full time; farm implement plants were still busy; and electrical fixture and fibre workers were steadily employed. Some time was lost by moulders at GUELPH on account of a strike in four of the foundries and at one foundry the workers were out until the end of the month; the stove factory was rather slack. STRATFORD reported good employment in all metal trades, and electrical workers fairly active. At OSHAWA moulders were in demand and metal workers were generally active. Help was required for the foundry at WOODSTOCK, moulders being especially in demand. At LONDON the stove and furnace foundries were active; engine and separator factories were busy on orders from the west; tin and enamelware workers were well employed. The structural steel industry at CHATHAM showed steady improvement, working day and night at full capacity. The bridge works at WINDSOR ran double shifts to keep up with orders; extra help was taken on at the steel plant; foundry workers were busy on stove parts and automobile

castings; machine shops had a busy month, but a shortage of tool and die makers resulted from the habit of Canadian workers leaving for Detroit to take advantage of the exchange rate in favour of the American money; the injector industry showed expansion during the month, moulders and bench hands being in demand. At OWEN SOUND machine shops and stove works were busy; the malleable iron plant discontinued the night shift, but increased the day staff. The steel mills at SAULT STE. MARIE took on additional men daily, running day and night shifts. Machinists were in demand at PORT ARTHUR and FORT WILLIAM. WINNIPEG reported metal and machinery workers continuing well employed during the month. The machine, engine and windmill factories at BRANDON had a busy month. At REGINA some demand was noted for blacksmiths and for telephone linemen and polemen. The rolling mill at MEDICINE HAT remained closed; skilled labour was in demand at the foundry and machine shops. At EDMONTON the moulders had not returned to work at the close of the month, though the strike was called off; machinists, blacksmiths and sheet metal workers were active. At NEW WESTMINSTER the engineering, sheet metal and electrical plants were steadily active. The structural steel and stove and furnace industries at VANCOUVER were fairly busy; electrical apparatus workers were also fairly well employed; sheet metal workers were busy. At VICTORIA iron foundries were fairly active.

Boat and ship-building and repairing continued to show activity at SYDNEY during the month. HALIFAX reported

<b>Vehicles (land and water)</b>	increased activity in the engine and boiler shops; the shipyards resumed work on the conclusion
----------------------------------	---

of the marine strike, about 1,400 men being steadily employed. At WESTVILLE the shipyards and engine shops were busy; automobile workers were well employed. The car factory and shipyards at TRENTON had a busy month. The car shops at AMHERST were busy in every de-

partment with a payroll of nearly 600 men exclusive of 150 at the malleable iron works, but there was an occasional shortage of material. At MONTREAL the shipbuilding yards were slack owing to lack of materials; automobile and tractor workers were fairly well employed. At QUEBEC a great falling off in activity was reported in boat and shipbuilding, about 1,700 men being laid off with no apparent likelihood of re-employment, this industry returning to its pre-war scale. At THREE RIVERS the shipbuilding yards had a busy month. Repair work was active in the shipyards at SOREL. OTTAWA and HULL reported a resumption of full activity at the car shops. At TORONTO the Dominion Shipbuilding plant closed down during the month, the company making an assignment in the first week, throwing several hundred men out of work; many skilled machinists and other metal workers left for the United States; the automobile and other vehicle industries were quiet, with many out of employment. HAMILTON reported activity in the locomotive and car shops and in the carriage, cycle and motor factories. The automobile accessory factory at NIAGARA FALLS required additional workers. Shipbuilding was active at WELLAND and BRIDGEBURG, with mechanics in demand. At BROCKVILLE, the motor boat, automobile and engine shops had a busy month. The locomotive works at KINGSTON were busy, with the average number of men employed; shipbuilding was normal with no shortage of labour. Engine and automobile part shops at BELLEVILLE were active. Motor and cycle workers at KITCHENER were busy throughout the month. Motor factories at OSHAWA were rather slack. WOODSTOCK reported activity in the wagon factories, with some demand for skilled help, including woodworkers and painters, but raw materials were scarce. At LONDON the automobile works were very busy assembling cars and tractors; steam engine and boiler shops were also active. The automobile industry at Chatham was very slack, about 200 men being laid off. All automobile plants at WINDSOR ran to full capacity and more wheelwrights and

lathe men were required at the accessory plants. Reduced activity in the automobile industry affected the carriage factory at ORILLIA, a number of men being laid off. At VANCOUVER the boat and shipbuilding yards, and automobile, cycle and motor engine repair shops were all busy. VICTORIA reported activity in the iron and wooden shipyards, about 300 men being employed at the latter.

Continued activity was noted throughout the food group at SYDNEY and HALIFAX, but a slight falling off occurred in the confectionery trade.

**Foods, liquors and tobacco**

CHARLOTTETOWN reported exceptional activity among bakers, butchers, and soft drink workers, but dairies and condensed milk factories were hampered by a scarcity of milk. WESTVILLE reported active conditions throughout the food group. The packing houses at FREDERICTON were rather slack, but other food industries were steadily active. MONTREAL reported activity in the flour and feed plants, abattoirs and meat packing houses; bakers and confectioners were busy; soft drink and brewery workers were well employed, but cigar makers were slack. At QUEBEC all branches of the food group were busy except tobacco products. General activity was also noted at SHERBROOKE, ST. HYACINTHE, THREE RIVERS, ST. JOHN'S, IBERVILLE, and SOREL. Employment continued good at OTTAWA and HULL in the abattoirs, bakeries, confectioneries and dairies. TORONTO reported activity in the flour, feed and cereal plants; abattoirs and packing houses were only fairly busy; bakers were active but confectioners were rather quiet; cannery workers were busy; soft drink and brewery employees were active; cigar workers were fairly well employed. HAMILTON reported activity general throughout the group. The canneries at NIAGARA FALLS worked to capacity. Employment was steady at ST. CATHARINES, BROCKVILLE, KINGSTON and BELLEVILLE. At PETERBOROUGH conditions were fairly steady, though the flour, feed and cereal mills worked short handed, and cigar makers were slack.

GALT reported good conditions during the month, especially among creamery and dairy workers. Activity was reported at BRANTFORD, especially in the canning industry. Help was in demand at KITCHENER for the candy factories, and butchers and meat cutters were required at the meat plant and sausage factories; the flour mills were increasingly active, the new wheat coming in; soft drink workers were rather slack. Brewery workers at WATERLOO were very busy, working overtime in some departments. STRATFORD, GUELPH and WOODSTOCK reported an active month throughout the food group. At CHATHAM the flour and feed, abattoirs, bakeries, confectionery and soft drink industries were all busy. LONDON reported the cereal plants working day and night shifts; confectionery plants were very busy, employing additional female help; soft drink workers had a record month's activity; cigar factories cut down their staffs, the men securing work at other trades, and the output of cigars decreased one-third owing, it was stated, to increased prices. The flour mills and packing house at ST. THOMAS were fairly busy. Cereal plants at WINDSOR increased their staffs; bakeries and breweries were extra busy; soft drink factories experienced a shortage of help and materials. OWEN SOUND reported a falling-off in supplies of milk at the creameries, due to the fall in price. At WINNIPEG conditions remained about normal throughout the food group without material change in staff; abattoirs and packing houses employed about the same number of workers; bakeries and confectioneries had a fair month, with some demand for bakers and chocolate dippers; vegetable canners had steady work; soft drink plants employed approximately the same staffs. BRANDON reported the flour mills busy, extending their plant; other departments of the food group were busy, excepting cigar-makers. The flour mills at MEDICINE HAT closed pending the arrival of new crop. Brewery workers at LETHBRIDGE worked continuous overtime. At CALGARY flour and feed plants, abattoirs and

packing houses were slack; bakers and confectioners were fairly active, and brewery and soft drink workers were busy. Biscuit bakers at EDMONTON continued active. At FERNIE confectionery workers were exceptionally busy; dairies were also busy and breweries worked an average of 18 hours a day. The fruit canning industry at NELSON and BRIL- LIANT was very busy. NEW WESTMINSTER reported activity throughout the food group. VANCOUVER reported activity in the flour and feed mills; the sugar refinery was more active than in the previous month; abattoirs were rather less active, but confectionery, canning, creamery and dairy, soft drink and brewery workers were all busy. At VICTORIA feed and cereal workers were fairly active; canneries, soft drink plants and breweries were busy, but cigar makers were quiet.

The rope and twine factory at HALIFAX continued steadily active. A strong demand for more help was reported for the woollen mills at

**Textiles,  
cordage and  
carpets**

TRURO. The cotton factory at MARYSVILLE, near FREDERICTON, ran steadily, with help in some demand. MONTREAL reported activity in the woollen and knitting mills, but tent and sail makers were quiet. The cotton mills and sail factories at QUEBEC had a busy month. At ST. HYCINTHE the woollen and knitting mills were rather less active. The cotton factory at THREE RIVERS gave steady work to more than 1,400 employees. SHERBROOKE reported busy conditions in the cotton and woollen mills, in the hosiery, underwear and knitted goods factories, and in the bleaching, dyeing, finishing and textile printing plants. At TORONTO the woollen, hosiery, underwear and knitted goods trades were busy especially on medium grade goods, with large export as well as domestic demand; carpet and rug workers were also busy, but tent and awning plants were less active. Textile workers at HAMILTON had an active month. At ST. CATHARINES a shortage

of help was noted in the woollen, knitting and silk mills. Tent and awning workers at BROCKVILLE were fairly active. The textile mills at KINGSTON were busier than for several years. At PETERBOROUGH the woollen mills were rather quiet, employing fewer hands than during the past few years; one factory, however, enlarged its plant. The cotton, woollen and silk mills at GALT were all very busy. At BRANTFORD the woollen mills were busy; female help was in demand for the hosiery and underwear factory, and more unskilled labour was required for the cordage plant; the silk factory was also busy. The felt factories at KITCHENER had an active month; and female help was in demand at the twine factory. GUELPH reported activity in the cotton and woollen spinning mills and hosiery and knitted goods factories; the linen mills were very busy, and carpet and rug workers were well employed. The hosiery, woollen and knitting mills at STRATFORD were active. At WOODSTOCK some slackness was noted in the textile industries, with prospects, however, of improvement; the knitting factories were busy, with female help in demand. A shortage of female help was also noted at LONDON for the hosiery factories, which all worked overtime; underwear makers were also very busy. The woollen and textile factories at CHATHAM ran full time with some overtime. The knitting factory at St. THOMAS had an active month. The woollen mills at OWEN SOUND were busy in spinning operations; knitting workers were well employed, but the tent and awning trade was quiet. The woollen mill at ORILLIA was busy, enlarging its capacity. Bag workers at WINNIPEG had a quiet month, but staffs were not reduced; the knitting factory slightly increased its staff; tent

and sail makers were active, but with no increase in employment. At VANCOUVER knitting mills and tent, sail and awning factories were busy.

SYDNEY reported increased activity in steam laundries. At HALIFAX improved conditions were noted in the ready-made clothing trade, though stocks were somewhat difficult to secure; laundries and dyeing plants had a busy month. At

**Clothing,  
boots, shoes  
and laundering**

WESTVILLE tailors and garment, boot and shoe workers had a good month. Boot and shoe workers at AMHERST were very slack owing to lack of orders. The hat and cap factories at TRURO worked full time, but without demand for more help. Tailors and garment workers at CHARLOTTETOWN were much busier than in the previous month; laundries and dyeing plants, and boot and shoe workers were actively engaged. Female help was in demand for the tailor shops at FREDERICTON; shoe and larrigan factories were busy. At MONTREAL the ready-made clothing, hat, cap and whitewear, and boot and shoe factories were quiet; laundries were fairly active. QUEBEC also reported quiet conditions in the ready-made clothing, shirt, glove and fur goods trades, and the boot and shoe industry was dull. SHERBROOKE reported activity in the ready-made clothing trade and in laundries and cleaning establishments. At St. HYACINTHE the woollen underwear plants were rather less active; sewing machine operators were in some demand for the ready-made clothing trade; laundry workers were very busy both there and at THREE RIVERS. Tailors at St. JOHN'S and IBERVILLE were less active. The shirt factory at SOREL had a very active month, employment showing an increase. OTTAWA and HULL reported a considerable falling-off in production of clothing on account of hot weather and holidays during the month. At TORONTO some shortage of female help was reported in the ready-made clothing, and hat and cap industries, but women's whitewear and fur factories were rather less active; steam laundries

had a busy month but cleaning plants were quiet; the boot and shoe industry was quiet, with many out of work. At HAMILTON the clothing trades were fairly well employed. The shoe-parts factory at NIAGARA FALLS required additional female labour. Rubber footwear workers at ST. CATHARINES were well employed. Hat, glove, fur and laundry workers were well employed at BROCKVILLE. KINGSTON reported the laundries very busy. The shirt factory at BELLEVILLE worked with the normal staff; laundries and cleaning workers were active. The women's whitewear factories and laundries at PETERBOROUGH were busy during the month. A shortage of help was reported at GALT for the shirt and collar factories; steam laundries were also very busy. BRANTFORD reported the underwear factory short of female help; garment makers were very busy and laundry workers fairly active. Sewing machine operators were in demand in the shirt and collar and button factories at KITCHENER; robe, clothing, glove and laundry workers were busy. GALT reported activity in the ready-made clothing trade, but hat makers were only fairly active; rubber factories were busy. At STRATFORD tailors, boot and shoe repairers and laundry workers had a busy month. LONDON reported activity in the clothing factories; shoe workers were slack, the factories running only part time. The shoe factories at ST. THOMAS also laid off men during the month. Help was in demand at the over-all factories at WINDSOR; laundries and cleaning plants were very busy. The whitewear factory at OWEN SOUND was quiet, raw material being scarce and high. The ready-made clothing factory at ORILLIA ran steadily with full staff. At WINNIPEG whitewear employees worked steadily; ready-to-wear clothing workers were quiet, but no employees were laid off; experienced operators were required at the shirt and glove factories; some workers were laid off at the cap factory; experienced pressers were required at the cleaning plants. Laundry work continued active at BRANDON, MEDICINE HAT and CALGARY. At ED-

MONTON garment workers had increased employment. VANCOUVER reported the ready-made clothing factories rather slack, but shirt, overall, and women's white-wear factories and steam laundries were busy; boot and shoe workers were quiet. At VICTORIA laundries and cleaning plants were busy, but shirt and over-all workers were only moderately active.

The pulp and paper mills in the Maritime provinces continued to operate steadily during the month, including the plants at CHATHAM, ST. JOHN, LIVERPOOL and

**Pulp, paper  
and fibre**

MURRAY. The pulp mill at BATHURST had another stop of three days during August owing to shortage of coal. In the province of Quebec increased employment was noted in the pulp mills at THREE RIVERS, SHAWINIGAN FALLS, and CHANDLER, and activity was well maintained at HULL, WINDSOR MILLS, DONNACONA, CAP MAGDELAINE, CHICOUTIMI, EAST ANGUS, KENOGAMI, LA TUQUE, and BAGOTVILLE. In Ontario increases were recorded in the pulp and paper mills at CORNWALL, ESPANOLA, HAWKESBURY, and SMOOTH ROCK FALLS; employment was steady at OTTAWA, IROQUOIS FALLS, STURGEON FALLS, and THOROLD, but a slight decline was noted at TORONTO. The felt and tarred paper industry at HAMILTON was active. ST. CATHARINES reported activity in the pulp and paper, beaver board and other pulp product factories. The pulp mill at SAULT STE MARIE ran day and night, employing about 800 men. The pulp mills at PORT ARTHUR and FORT WILLIAM had a busy month. VANCOUVER reported the pulp mills at OCEAN FALLS and POWELL RIVER as busy.

Active conditions continued during the month in the printing trades at SYDNEY and HALIFAX. At WESTVILLE and CHARLOTTETOWN some slackness was noted. Printers and bookbinders continued active at FREDERICTON. At MONTREAL printers,

**Printing,  
publishing  
and paper  
goods**

bookbinders, lithographers and box makers were well employed. Printers and bookbinders had a busy month at SHERBROOKE, ST. HYACINTHE, THREE RIVERS and SOREL. At OTTAWA and HULL newspaper and job printers were fairly active; lithographers were also well employed, but one firm closed its photo-engraving department through lack of orders. At TORONTO printing, book-binding and allied trades were normally active; paper box and bag factories were in steady operation, though prospects were not bright owing to the decline in the confectionery trade. At HAMILTON printers and binders were fairly busy, and engravers, lithographers and paper box makers were active. ST CATHARINES, BROCKVILLE, KINGSTON, BELLEVILLE, and PETERBOROUGH reported activity among newspaper and job printers and bookbinders. Printers and paper box makers at BRANTFORD, KITCHENER, GUELPH, and STRATFORD had a busy month. Steady conditions prevailed among printers at WOODSTOCK. At LONDON newspaper and job printers were slack during the month, but none were laid off; paper box makers were also quieter than in the previous month. Printers had a busy month at ST. THOMAS, and at CHATHAM and WOODSTOCK staffs were slightly increased, plants being enlarged at the latter point; paper box makers were normally active. Printers, bookbinders and box makers were busy at OWEN SOUND. At WINNIPEG newspaper and job shops continued well employed during the month without change in the number employed; bindery workers had a very quiet month with less employment; box makers were fairly active. Printers were fairly busy at BRANDON, but were reported rather slack at MEDICINE HAT. At CALGARY printers and bookbinders were very busy, and at EDMONTON they were fairly active. At VANCOUVER and VICTORIA printers, publishers and binders had a quiet month, lithographers were active and paper box makers fairly well employed.

Activity continued during the month in the sash and door factories and planing mills at SYDNEY, but at HALIFAX the mills were not so busy owing, it was stated, to the decline in private building caused by the difficulty of obtaining money loans. WESTVILLE reported fair activity in the planing mills and furniture factories. The mattress factory at TRURO ran full time, but without demand for more help. At CHARLOTTETOWN the planing mills and broom factories had a very busy month; upholsterers, varnishers and polishers were well employed. The sash, door and planing mills at FREDERICTON were rushed with work. At MONTREAL wooden box, furniture and piano workers had a fair month. QUEBEC reported very busy conditions in the sash and door factories and planing mills, but box and broom workers were slack. At SHERBROOKE and ST. HYACINTHE the planing mill and chair factory employees had an active month. THREE RIVERS also reported great activity in the sash, door and planing mills and wooden toy factory. The woodworking and furniture trades at SOREL had a quiet month. At OTTAWA and HULL the sash, door and planing mills and wooden box factories were busier than at any time this year. At TORONTO all branches of the woodworking, furniture and musical instrument trades were in full activity. Woodworkers were active at HAMILTON, and brush and broom makers were fairly well employed. Help was in demand at a sporting goods factory at NIAGARA FALLS and woodworking plants were busy there and at ST. CATHARINES and BROCKVILLE. Cooperage workers at SMITH'S FALLS were busy. At KINGSTON the woodworking industry was brisk and piano makers were normally active. Piano workers at OSHAWA were less busy. The woodworking trades were busy at BELLEVILLE, and PETERBOROUGH. At GALT and BRANTFORD the planing mills and furniture and chair factories had a very busy month, but cooperages were less

active. Sawyers and cabinet makers were in demand for the furniture factories at KITCHENER; sash and door and wooden box factories were very busy; toy, ladder, woodenware and cooperage workers were well employed, and the piano and brush and broom trades were fairly active. STRATFORD reported brisk conditions in the woodworking industries. Increased employment was reported in the furniture factory at WOODSTOCK, but the organ industry was quiet, the home demand for organs having fallen off. At LONDON the planing, wooden box and cooperage plants were rushed with work, and piano workers were also well employed. Cabinet makers at ST. THOMAS had an active month. Additional help was employed in the woodworking factories at CHATHAM. Mortise and sticker hands were in demand at the sash and door factories at WINDSOR; piano workers were active only on repair work. OWEN SOUND reported activity in the various woodworking industries, including the chair, basket, broom, cooperage and mattress factories. At ORILLIA the furniture industry was quiet. The sash and door factories and planing mills at WINNIPEG and BRANDON ran steadily throughout the month. Conditions were reported fair in the mills at MEDICINE HAT, CALGARY and FERNIE, though slackness in the building operations halted work to some extent. At VANCOUVER the sash, door and planing mills were not very busy, but were improving. Wooden box and furniture makers at NEW WESTMINSTER were active. VICTORIA reported moderate activity in the planing mills, but wooden box factories and cooperages were quiet.

Experienced help was much in demand for the trunk, bag and harness industry at HALIFAX. Harness makers and other leather workers at FREDERICTON were active. At MONTREAL the tanneries and trunk, bag and harness factories were fairly busy and rubber workers were

well employed. Tanneries at QUEBEC were very quiet, but at SOREL conditions were good. TORONTO reported trunk, leather bag and harness makers fairly well employed, but the rubber industry was quiet, with some establishments closed down. Tannery workers at KINGSTON were still very slack, about quarter of their number being unemployed. Leather workers and saddlers at PETERBOROUGH had a quiet month. The tanneries at KITCHENER were both busy; the rubber industry was less active, but female help was in demand at one or two plants. Tannery, harness and other leather workers at STRATFORD were fairly well employed. Employment conditions were slack in the tannery at LONDON. OWEN SOUND reported normal employment in the tannery and among harness and other leather workers. The tannery at ORILLIA ran to capacity. The tannery workers at BRANDON were busy and trunk makers were fairly active. The trunk, bag, harness and horse goods trades at CALGARY were normally active.

Stone and granite cutters at WESTVILLE were active, and brickyard and pottery workers were busy above normal. The Clay, glass, stone, cement, etc. glass factories at MONTREAL continued in steady operation. Stonecutters at QUEBEC had a very dull month, but brickmakers were busy. SHERBROOKE reported activity among granite and stone cutters and brickmakers. The artificial stone industry at THREE RIVERS was active, though hampered by lack of cement. At TORONTO brick, tile and sewer pipe production was active and glass workers had plenty of employment. Active conditions continued at HAMILTON in the stone, brick, cement and pottery works. Stone and granite cutters at BROCKVILLE were reported active; the corporation steadily operated the city brickyard. The BELLEVILLE pottery was steadily active in producing flower pots and tiles. The POINT ANN cement plant worked day

and night shifts. At KITCHENER stone and marble cutters worked full time, and brick, tile, sewer pipe and cement workers were busy. Brickyards workers at STRATFORD had a very good month. The stone works at LONDON were busy to capacity, and the brick and tile yards showed more activity than for several years. The brick and tile yards near CHATHAM were normally active. The cement block industry at WINDSOR was rushed with work. OWEN SOUND reported the local cement industry as dead, and the brick, tile and lime yards as very quiet. A new sewer pipe factory was under construction at ORILLIA, but will not be in operation before December. Help was in demand at MEDICINE HAT for the brick and tile yards; stoneware workers were rather slack. The REDCLIFF glass factory worked day and night shifts. At VICTORIA the brickyards were active, chiefly on orders for outside points, and cement workers were fairly active.

SYDNEY noted continued activity in the various oil, tar and chemical industries.

**Paints, oils,  
chemicals,  
explosives**

The oil factory at HALIFAX was rather quiet in its petroleum department, but the paint and varnish industry was active. At MONTREAL the paint and varnish and the chemical, drug and medicine factories were fairly busy. The cartridge factory at QUEBEC shut down during the month. SHERBROOKE reported activity in the manufacture of lubricating oils and greases, gunpowder, acids, extracts, drugs and medicines. The paint mills near THREE RIVERS were fairly active. At TORONTO employment was steady in the paint, varnish, chemical and medicine factories. Electro-chemical workers at NIAGARA FALLS were well employed throughout the month. The varnish and paint factory at BRANTFORD was busy. Oil and grease workers at KITCHENER had an active month. The paint works at WINDSOR were hampered by the difficulty of securing oil; the salt factory

was enlarged, but the acid and drug plants were quieter than usual. The varnish industry at OWEN SOUND was increasingly active. Day and night shifts were worked at MEDICINE HAT in the linseed oil mill. The acid plant at TRAIL was less active owing to structural alterations. VANCOUVER reported activity in the oil refinery at Ioco. The Paint and soap factories at VICTORIA were active. The powder and explosive factories on VANCOUVER ISLAND were moderately active.

The earnings of the Canadian Pacific Railway in July were \$17,375,760, as compared with \$14,720,362 in July, 1919. During August

**Railways,  
shipping and  
longshore work**

the number of persons employed by the Canadian Pacific, the Grand Trunk Railway and the Canadian National Railways on railway operation, including general offices, trainmen and engine crews, station employees, sleeping, parlour, and dining car employees showed a nominal change only at the end of August in comparison with the total at the end of July, the number of persons on pay-roll at both these dates being between 68,100 and 68,200. There was, however, a reduction of over 500 persons during the first week of the month but compensating additions were reported during each of the three following weeks. SYDNEY reported slightly less activity among longshoremen, but other transport workers were steadily engaged. At WESTVILLE satisfactory conditions continued. HALIFAX reported employment good among railway and other transport workers. Freight handlers at FREDERICTON were busy with both rail and water traffic. At MONTREAL railway men had an active month, and at QUEBEC freight and passenger traffic was very heavy; coastwise shipping, however, was not so brisk, though ship labourers and longshoremen were well employed; transfers and garages were very busy throughout the month. The same conditions prevailed in the transfer and railway services at

SHERBROOKE, THREE RIVERS and SOREL, the river traffic at the latter point being exceptionally heavy. TORONTO reported the railways busy with heavy freight and an unusual amount of passenger traffic; lake shipping was also active and all transportation workers were well employed. At HAMILTON the steamship lines were active and longshoremen were busy; carters, teamsters and motor transport workers being also active. Passenger traffic at NIAGARA FALLS by all rail and lake routes was very heavy; freight traffic was also steady, freight handlers and teamsters being in demand. Employment was reported good at St. CATHARINES. Railway traffic at BROCKVILLE was unusually heavy, 40 trains being despatched in 24 hours, and passenger traffic by train and boat being the best in years; longshoremen were busy unloading coal; transfers were unusually active on tourist traffic. Passenger and freight traffic was heavy at BELLEVILLE on all three lines. GALT and BRANTFORD reported continued activity on steam and electric railways and in transfers, liveries and garages. KITCHENER reported steam railways active, especially in the freight department; other transport workers were well employed. Railway and garage workers at STRATFORD had an active month. At LONDON both the Grand Trunk and Canadian Pacific railways were very busy, with train crews working considerable overtime, and extra men being employed to handle freight. Railway employees at St. THOMAS had a fairly busy month, with a demand for experienced brakemen and switchmen. Freight traffic was rather quiet at OWEN SOUND but passenger traffic was heavy. A demand was reported at FORT WILLIAM for deck hands, coal handlers, ship porters, firemen, etc. WINNIPEG reported activity on railways, without much change in operating staffs. Fair conditions prevailed at BRANDON, MEDICINE HAT, CALGARY and EDMONTON among transport workers, transfers and street railway workers being busy. VANCOUVER reported busy conditions on steam and electric railways, and in

transfers and garages; longshoremen were fairly busy. Longshore work was about normal at NEW WESTMINSTER. At VICTORIA transportation of all kinds was the heaviest on record during August; longshore work was fairly brisk.

Quarrying continued active at QUEBEC. SHERBROOKE reported chrome iron mining busy, but copper mining was quiet; in the non-metallic group asbestos production was good, and in quarrying the gravel pits were very busy and granite workers were well employed. The mica factory at SOREL had a satisfactory month. THETFORD MINES reported much activity in the asbestos mines, one mine exporting 75 carloads, but a shortage of cars hampered production to some extent. Unskilled and experienced labour was required for the nickel works at SUDBURY. At TIMMINS miners, muckers and timber men were in demand. COBALT reported labour steady and plentiful; ore shipments from the mines amounted to 37 cars, containing approximately 2,916,668 pounds of ore, as compared with 24 cars or 1,803,174 pounds of ore in July; bullion shipments amounted to 604 bars, containing 760,445 fine ounces of silver, as compared with 376,439 fine ounces in the previous month. Several silver properties recently resumed operations in the ELK LAKE district. Despite handicaps in recent years the gold fields at PORCUPINE and KIRKLAND LAKE have been well developed, production increasing since 1910 from \$35,539 to about a million dollars every month; new ore is said to be in sight to a value estimated at from 70 to 100 million dollars. SAULT-STE-MARIE reported men in demand for the Bruce nickel mines. About 300 tons of ore were sent daily from the Rossland mines to the smelter at TRAIL, and the amount would have been greater but for a shortage of machine operators; one copper and one lead furnace were working, the products going to the lead and copper electrolyte refinery which is only

partly in operation. CRANBROOK reported a demand for miners at the Sullivan mines, and a similar shortage was noted at GRAND FORKS.

The output of the Dominion Collieries at SYDNEY showed some reduction in the month of August on account of industrial disputes, 254,000 tons of coal being produced as compared with 269,000 tons (revised figure) in the previous month; the production of coke from 120 ovens was 35,400 tons. In the Nova Scotia Company's collieries at SYDNEY MINES 48,500 tons of coke were raised against 52,000 tons in July; 7,800 tons of coke was produced, 150 ovens being in operation, with 40 out of action for repairs. WESTVILLE reported all the mines in the district as busy throughout the month. Production of coal at the MINTO mines in New Brunswick was about normal. A demand for miners and labourers was reported at ESTEVAN and in other mine fields in the Prairie provinces. LETHBRIDGE reported steady activity in the mines, full time being worked all month in the Galt collieries with good prospects of continuance; the smaller mines were also active; work was hampered, however, at the lignite mines at Coalhurst by an industrial dispute about the middle of the month. CALGARY and EDMONTON reported a demand for skilled miners in Alberta. At FERNIE a shortage of mine labour was noted as limiting production, but activities were said to be increased by the inauguration of the closed shop agreement in favour of the United Mine Workers. NANAIMO reported a steady demand for certificated miners in Vancouver Island, the mines all working full time with good prospects of continuance.

The value of building permits issued in 56 cities during July amounted to \$13,125,560 as compared with \$13,316,041 in June. During the month of

**Building and construction**

August activity was reported at SYDNEY and HALIFAX in construction work, including buildings, streets and roads. Bricklayers and masons at CHARLOTTETOWN had a very quiet month, but carpenters, lathers and plasterers were active, while painters, plumbers and decorators were very busy. The building trades at FREDERICTON were reported well employed. At BATHURST the lumber company were carrying out their scheme for erecting a hundred houses. At MONTREAL increasing activity was noted in the building trades. QUEBEC reported the busiest month of the season for the building trades. Continued activity was reported at SHERBROOKE and THREE RIVERS in all classes of building, but some slackness was noted at SOREL. Labourers were in demand at St. JOHN'S and IBERVILLE. Building was more active at OTTAWA and HULL than in the previous month. THETFORD MINES reported a serious shortage of workmen's houses, to meet which the Provincial Government granted \$100,000 for building purposes. At TORONTO building was active on dwellings, commercial and industrial structures, with the prospect of continuance until the close of the season; a floating dry-dock 300 feet in length, large enough to accommodate the largest lake freighters, and costing over \$70,000 was being assembled in Asbridges Bay; construction was beginning at Sunnyside of a concrete bathing pavilion to cost \$200,000. HAMILTON reported the building trades all well employed, a greater number of houses being under construction than a year ago, while civic construction was also active. Employment conditions were good at NIAGARA FALLS but municipal work was retarded by scarcity of materials and labour. Construction was fairly active at St. CATHARINES, BELLEVILLE and KINGSTON and showed a gain at BROCKVILLE. At PETERBOROUGH and GALT few

dwellings were under construction, but several public and industrial buildings were in progress, unskilled labour being in demand; construction work continued on the Grand River line to Hespeler. At BRANTFORD there was little building going on, and work on the provincial highway to Hamilton was held up by want of cement. KITCHENER and GUELPH reported the building trades very busy, with help in demand. Employment was also good at BRANTFORD and WOODSTOCK. Extensive operations were in progress at LONDON, the Housing Commission expending \$200,000 on dwellings, while several large public, industrial and commercial buildings were in process of construction. Little building was going on at St. THOMAS, though houses were very scarce, but considerable street work was carried out. WINDSOR reported a continued rush of building activity in the border cities, about 200 houses being on the way to completion, besides public, business and manufacturing structures. OWEN SOUND reported only a small number of buildings in progress. Work on the Trent Canal near ORILLIA was slackening off, the appropriation being almost exhausted. At WINNIPEG all sections of the building industry continued to be well employed, practically every skilled mechanic being engaged. Conditions were fair at BRANDON, and an improvement was noted at LETHBRIDGE. CALGARY reported slackness in the building trades during the month, but activity was reported from EDMONTON. An increase in the building of dwellings and commercial houses occurred at VANCOUVER, with a fair amount of industrial construction. At NEW WESTMINSTER also considerable activity was noted. NANAIMO reported little building in progress, but contracts were let for twenty dwellings at the Lantzville colliery.

The number of persons employed by the Canadian Pacific Railway, Grand Trunk Railway and the Canadian National Railways, including maintenance of way, showed a decrease of about 2,600 persons during the month of Aug-

ust, the total at the end of the month being 43,000 as compared with 45,600 at the end of July. These reductions were for the most part made during the first two weeks of the month. The Canadian Pacific Railway reduced their staffs by about 1,500 persons and the Canadian National Railways by 1,000 persons.

Lumbering continued quiet during the month at CHARLOTTETOWN. The sawmills and lumber booms round FREDERICTON gave employment to large staffs. A shortage of

**Lumbering** men was reported at BATHURST in every department of the lumbering industry. The sawmills in QUEBEC district were busy to capacity, with little prospect of finishing this season's cut unless the weather holds out late. SHERBROOKE also reported activity in the lumber, tie and telegraph pole camps and in the saw and shingle mills. At OTTAWA and HULL the sawmills were fully busy, and bushmen were in demand for the camps. PETERBOROUGH reported the completion of a big drive and another starting; saw, shingle and lath mills were busy. At TIMMINS a demand was reported for pulpwood cutters and at PEMBROKE for lumber mill workers and bushmen. OWEN SOUND reported activity in the sawmills, and camps busy on the north shore of Georgian Bay. The annual demand for bushmen started in COBALT district, the season opening early, and for the pulp woods at ELK LAKE; help was also called for at the sawmills. NORTH BAY reported slack conditions in the labour market, but the opening of the lumber camps was expected soon to give relief. At SAULT-STE-MARIE lumbering operations, including pulpwood, ties, posts, saw-logs and hardwood, were very active, camps filling up as fast as men could be secured; the sawmills were busy, having some difficulty in securing enough labour in the yards as many men were away in the harvest fields. PORT ARTHUR and FORT WILLIAM reported a demand for men to stow pulpwood. PRINCE ALBERT and

EDMONTON reported a demand for bushmen and sawmill workers. FERNIE reported some curtailment in the expansion of lumbering operations due to unfavourable market conditions, but the local mills operated to the capacity of a one shift day; in the south district some mills were obliged to close temporarily and sent out fire fighting crews. At

CRANBROOK, NELSON, KAMLOOPS and VERNON fire-fighting crews caused some scarcity of labour at the mills. VANCOUVER reported a demand for men for the camps and sawmills. At NEW WESTMINSTER the saw and shingle mills had a very busy month. Loggers were in demand at PRINCE RUPERT. VICTORIA reported all branches of the lumber industry active at Vancouver Island.

## INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907

### PROCEEDINGS FOR THE MONTH OF AUGUST, 1920, WITH TEXTS OF BOARDS' REPORTS

**D**URING the month of August the Department received reports from six Boards of Conciliation and Investigation established to deal with disputes between (1) Various manufacturers of woodwork in general in Ottawa and certain of their employees, members of Local No. 646, United Brotherhood of Carpenters and Joiners of America, and Local No. 566 of the International Hod Carriers, Builders, and Common Labourers; (2) Montreal Tramways Company and certain of its employees, being members of Division No. 790, Amalgamated Association of Street and Electric Railway Employees of America; (3) the following companies: (a) Toronto and Niagara Power Company; (b) Toronto Power Company, Toronto; (c) Toronto Power Company, Niagara Falls, Ontario; and (d) Toronto Street Railway Company, and certain of their employees, being members of the following trade unions, namely: (a) blacksmiths and helpers, members of Local 318, International Brotherhood of Blacksmiths and Helpers; (b) electrical workers and helpers, members of Local 353, Toronto, and Local 897, Niagara Falls, International Brotherhood of Electrical Workers; (c) woodworkers, members of Toronto District Council of Carpenters, and (d) machinists and helpers, members of District Lodge No. 46, International Association of Machinists, and

Lodge No. 1296, Niagara Falls, Ontario, International Association of Machinists; (4) Grand Trunk Pacific Railway Company and certain of its employees, being longshoremen at Prince Rupert B.C.; (5) Hull Electric Company and certain of its employees, being members of Division No. 591, Amalgamated Association of Street and Electric Railway Employees of America, and (6) Vancouver and Victoria Gas Companies and certain of the employees of the said companies, being gas workers.

Three applications were received for the establishment of Boards, and a Board was established in connection with an application which had been received during a previous month.

#### Applications Received.

During the month of August applications for Boards were received as follows:

(1) From certain of the employees of the Algoma Steel Corporation, Sault Ste Marie, Ont., being members of Local No. 697, International Union of Steel and Operating Engineers. This industry did not fall within the direct scope of the Act and a Board could be established only upon the joint consent of both parties. The company granted their consent to Board procedure but

at the close of the month negotiations were in progress looking towards a settlement of the dispute without Board reference.

(2) From certain of the employees of the Corporation of the City of Fort William, being fire fighters, members of Local Union No. 193, International Association of Fire Fighters. The employer in this case being a municipality a Board could be established only upon the joint consent of the disputants. The city granted its consent and a Board was established composed as follows: Mr. N. M. Patterson, Fort William, chairman, appointed on the joint recommendation of the other two members, Messrs. W. A. Dowler, K. C., and J. R. Pattison, Fort William, nominees of the city and employees respectively.

(3) From the Canadian Press, Limited, concerning a dispute with their press telegraph operators, members of the Canadian Press System Division No. 52, Commercial Telegraphers Union of America. A Board was estab-

lished composed as follows: His Honour Judge R. D. Gunn, Ottawa, chairman, appointed on the joint recommendation of the other two members, Messrs. E. Norman Smith, Ottawa, and David Campbell, Winnipeg, nominees of the employer and employees respectively.

#### Other Proceedings under the Act.

During the month of August a Board was established in connection with the dispute between the Canadian Pacific Railway Company (Western Lines) and certain of its employees, being conductors, etc., members of the Order of Railway Conductors and the Brotherhood of Railway Trainmen, for which application had been received during the month of June. The Board was composed as follows: The Honourable Mr. Chief Justice T. G. Mathers, Winnipeg, appointed on the joint recommendation of the other two members, Messrs. Isaac Pitblado, K.C., and David Campbell, Winnipeg, nominees of the company and employees respectively.

#### Report of Board in dispute between various manufacturers of woodwork in general in Ottawa and certain of their employees

**A** REPORT was received from the

Board established to deal with the dispute between various manufacturers of woodwork in general in Ottawa and certain of their employees, members of Local No. 646, United Brotherhood of Carpenters and Joiners of America. The application for this Board had been received in April last, and the dispute was given attention at that time by officers of the Department. However, on June 12 a strike occurred, causing a great deal of inconvenience throughout the City, and in view of this the City made an application for a Board under Section 63A of the I.D.I. Act. A Board

was established composed as follows: His Honour Judge R. D. Gunn, Ottawa, chairman, appointed on the joint recommendation of the other two members, Messrs. Stewart McClenaghan and M. M. Maclean, Ottawa. Mr. Maclean was nominated by the City as representing the employees and Mr. McClenaghan was appointed by the Minister in the absence of a nomination from the companies. The report was signed by the chairman and Mr. McClenaghan and was accompanied by proposed schedules covering rates, rules, etc. Mr. Maclean did not concur in these findings and presented a minority report.

### Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and amendments, and of a dispute between the manufacturers of sash, door, interior finishing, cabinet and woodwork in general, in Ottawa, employers, and members of Local Union No. 646 of United Brotherhood of Carpenters and Joiners of America, and Local Union No. 566 of the International Hod Carriers, Builders, and Common Labourers, employees.

To the Honourable G. D. Robertson,  
Minister of Labour, Ottawa.

The Board of Conciliation and Investigation appointed to investigate and report upon the dispute outlined and defined in the application of His Worship Harold Fisher, Mayor of the City of Ottawa, founded upon a resolution of the municipal council of the same city, bearing date the 6th day of July, A.D., 1920, opened its proceedings at the Court House in the City of Ottawa on Tuesday, the 13th day of July, 1920, and were attended by Mr. Patrick Green, who represented the carpenters, and Mr. M. Ryan, who represented the labourers, members of Local Union 566 of the International, and their respective committees, who are included in the application and employed by same employers or some of them, but no one attended on behalf of the employers who refused or neglected to nominate a member of the Board, and had, after he was appointed, failed or refused to give him any instructions or information, making it apparent that each of them considered he had no direct interest in the proceedings.

From the statements and representations made at the first meeting before the Board it appeared that there were in or about 400 carpenters, employees, members of Local Union 646 of the United Brotherhood of Carpenters and Joiners of America, and 150 labourers, who laid down thier tools or abandoned their employment on or about the 12th

day of June 1920, and who were, or many of whom were out of employment at the opening of these proceedings on account of, principally, differences as to rates of wages and schedule of working rules.

The employers and the number of their employees covered by and included in the application, or intended to be, are as follows:

The W. C. Edwards Company.....	employing 150 men
The James Davidson & Sons.....	" 100 "
George M. Mason.....	" 32 "
McAuliffe Davis Company..	" 25 "
J. Oliver & Sons.....	" 25 "
M. C. Neate.....	" 15 "
Ottawa Stairs Company.....	" 12 "
James Hill.....	" 12 "
R. A. Sproule.....	" 12 "
Ottawa Car Company.....	" 12 "
Martin Orme Company.....	" 6 "
William Fraser, Barrett Brothers, M. C. Cummings....	Employing men of the unskilled class, only.

It was further stated at same meeting to the Board that the Local Unions embracing those employees had been established less than two years and no schedule covering rates and working rules had been agreed upon between the parties or any of them, though efforts had been made by the officers of the Local Unions interested to come to agreement with the employers, but the employers refused to discuss these matters with any one not in their employ. Many of the carpenters and labourers had been in the employ of the employers they served for many years and always arranged matters of wages and rules of service through the foreman over them or by direct application, and the originating difficulty breeding the dispute seemed to point to the employers' refusal to recognize or trust the Union, or grant conferences with the officers of the Union becoming active in the cause of the employees.

During the winter months last past, articles of agreement were prepared and submitted to the above named employers, setting out the rates, terms and conditions the employees proposed to the

employers, and in April last, the officers of the Local Unions sought strenuously to discuss the proposed agreement with the employers but met with no encouragement. Advances in rates were voluntarily made by the employers to their employees effective from May last.

The employees, through their officers, pressed for consultation and conference with the employers unsuccessfully until the 12th of June last, when the employees abandoned their work, went on strike and stayed out until these proceedings were instituted, though the best efforts known to the parties making same were made to reach settlement.

The action of so many employees going out on strike in the city formed the ground to base an application for this Board, which otherwise could not be legally constituted, and again emphasizes the wisdom of the amendment to the law providing for investigation in such circumstances.

The Board announced that its duty of investigation could not be satisfactorily performed if the employers maintained their attitude of indifference towards the investigation, and that it would be only respectful of constituted authority if the employers gave their assistance to the work of the Board, and that the member representing them on the Board should convey these instructions to the employers, which was done, and at the meeting held next day the employers named were in attendance and were represented until the Board concluded the hearing of the parties, lending all friendly assistance. After some explanation and negotiation the Board were enabled to have the employees return to their several employments on the terms existing prior to the trouble pending the Report of the Board on the matters in dispute.

The Board heard exhaustively the employees and had the benefit of the evidence of Mr. Thomas Moore, President of the Trades and Labour Congress, and also heard each of the employers who desired to make any representations or submit any information on the questions involved in the whole dispute.

It should be here stated that the employers have for many years pursued the course of fixing wages, rates of pay, and hours of service on their own individual plan, and have granted increases almost annually to those employees, and each employer maintained that he was paying as high and fair rates as paid by any class of employers engaged in the same trade in this or any locality bearing any reasonable comparison, and any further increase meant in some cases that the employees would be laid off and the business discontinued, and in others large reduction in staff.

There were also many objections to the other terms of the agreement submitted by the employees to regulate hours and service, some of which follow. The proposed agreement, amongst other things, covers rates of pay, requires the employers to hire only members of the Union, fixes an eight-hour day and forty-four hour week, with a minimum rate of 65 cents per hour for mechanics, and also overtime and holiday work by permit of the business agent of the Union, and use of Union Label on wares made in shop, and some other conditions not usually found in established working schedules. These conditions never prevailed in any of the factories named, which are all "open shops."

The employers stated their objections were not directed against any Union or effort to organize labour, but the prohibition proposed against all but Union members. It is the contention of the employers that they cannot possibly in all seasons establish an eight-hour day, and that the conditions compel a nine-hour day in many of the factories, and this has long been established without any organized or collective objection heretofore by the employees, though in some factories only eight hours are worked.

The question of overtime, according to the information and representations, is not serious, and created no outstanding abuse or grievance, and affects a very small number of the employees. There were some of the clauses in the

proposed agreement that the representatives did not seriously press, and were, on investigation, not material to either party.

The supreme difficulty facing the present demand is the long delay in reaching the present board. For many weeks negotiations were going on, and for over a month, during which all the increased rates of pay granted were paid and accepted by the employees, the business season passing and the future business of the parties having been based on these increased rates, and each employee making no protest or application to the employers for better terms except through the Union officers who were repeatedly denied conference, created conditions which do not lessen the difficulties.

The burden of proving a fair claim to the demand made for increased rates of pay, and a shorter or eight-hour day, lies upon the parties making it, and it is the opinion of the undersigned that, upon the representations and contentions forwarded, the rates paid and accepted after the first of May down to the strike were not lower than those paid in the locality of the dispute for similar services, though the increase over last year's rates did not entirely meet the increased cost of living, and in the best interests of all parties at this time we would recommend that they go into further negotiations with respect to rates, with a view to relieving any hardships or injustices where it can be done by either bonus or increase.

The inside woodworkers, while performing many classes of work, fall into three distinct groups, namely, skilled, semi-skilled and unskilled. The skilled mechanics are those who work at the bench, called bench hands or cabinet-makers, and those who operate and set up automatic machines. The semi-skilled are those who tail woodworking machines and help in the shop and mill. It was shown that employees in these two groups were not paid a uniform scale. The Board considers it desirable and would recommend that a minimum rate be set for each group to avoid griev-

ances that may arise from the present method of establishing the compensation of these classes, thereby securing better relations between the employer and employees.

The unskilled group is composed of those who haul wood and pile and handle lumber in the various yards. The employees in this group went on strike on the 19th June last on a dispute as to the rates of pay, and are members of Local No. 566, of the International Hod-Carriers, Builders and Common Labourers' Organization. They received an increase in pay on or about May 1st last, and are now receiving from 28c to 40c per hour generally. It is our opinion for the same reasons it would be desirable that a minimum rate should be established for this class of worker.

The undersigned would also recommend that as soon as practicable an eight-hour day and forty-four hour week should be put in force by the employer, as the day is past when any longer working hours can prevail for this class of employee if he objects thereto, and also that in view of the increased cost of living increased rates should be provided.

There are, in the opinion of the undersigned, some well-founded reasons for providing a working schedule in the interests of the employers and employees and after having given due consideration to all the representations made by both parties to the dispute, we recommend that Schedules A and B annexed hereto should be adopted by the parties, who may make such additions as to them seem advisable.

Dated this 10th day of August, 1920.

(Sgd.) R. D. GUNN,  
Chairman.

(Sgd.) S. McCLENAGHAN.

#### SCHEDULE A.

##### Clause 1.

The employers agree and declare that they shall not refuse to employ any member of the Brotherhood of Carpenters and Joiners of America, or discriminate against him at any time because of his membership therein.

## Clause 2.

In case of any dispute between any employee and employer or in the event of the dismissal of any employee for any cause, the employee may appeal to the employers for redress and may be accompanied by another employee selected by him or any officer of the Local Union at the hearing of such appeal if he desires.

## Clause 3.

The employers shall receive a committee of three or less employees at any conference between the employees and employers and in case such conference does not result in agreement the committee may call in an officer of the Local Union to any further conference with the employers.

## Clause 4.

Eight hours during the twenty-four shall constitute a day's work, between the hours of seven a.m. and six p.m. (allowing one hour for lunch) for the first five working days of the week and four hours on Saturday between seven a.m. and twelve noon.

All time worked in excess of eight hours per day shall be overtime and paid for at the rate of time and one-half, and all work performed on New Year's Day, Good Friday, Dominion Day, Labour Day, Thanksgiving Day and Christmas Day, shall be paid for at the same rate, but no employee shall be required to work on Labour Day except for the saving of life or property, or disciplined if he refuses.

## Clause 5.

Any employee required to work at outside work shall be paid the rates existing for such work then paid therefor.

## Clause 6.

For this clause the Board recommends the adoption of the apprentice system with fixed ratings for the first, second and third years, with the minimum rate to apply for the fourth year's service, also that provision should be made that no apprentice shall be engaged who has reached his 23rd year before entering or applying.

## Clause 7.

Any employee who is selected by the Local Union to attend to or discharge duties pertaining to the business of the Union shall on application be granted leave of absence from time to time for such purpose.

## Clause 8.

In case of reductions of staff, junior and unmarried employees shall be released in preference to senior and married employees.

## Clause 9.

Rates of Pay.

## Clause 10.

This Agreement shall remain in force and effect, subject to sixty days notice by either party.

## SCHEDULE B.

## Clause 1.

Same as Schedule A—changing the name of the Union.

## Clause 2.

Same as Schedule A.

## Clause 3. do.

## Clause 4. do.

## Clause 5.

Same as Clause 7, Schedule A.

## Clause 6.

Any employee under this Agreement who is incapacitated by old age, accident or other causes, may work for such rate as is mutually agreed upon between himself and his employer.

## Clause 7.

Same as Clause 10 of Schedule A.

## Minority Report

In the matter of the Industrial Disputes Investigation Act, 1907, and Amendments, and of a dispute between the Manufacturers of Sash, Door, Interior Finishing, Cabinet and Woodwork in General, in Ottawa, employers, and Members of Local Union No. 646 of United Brotherhood of Carpenters and Joiners of America, and Local Union No. 566 of the International Hod Carriers, Builders, and Common Labourers, employees.

To the Honourable

Senator G. D. Robertson,

Minister of Labour, Ottawa.

Sir,—

I concur in the report and recommendations made by His Honour Judge R. D. Gunn, Chairman, and Mr. Stewart W. McClenaghan, representing the employers, my colleagues on the Board of Conciliation and Investigation established in the above matter, except in one particular, namely:

In paragraph three, page five of such report it is stated: "..... The rates paid and accepted after the First of

May down to the strike were not lower than those paid in the locality of the dispute for similar services, though the increase over last year's rates did not entirely meet the increased cost of living, etc."

I cannot agree that the rates paid after the First of May were not lower than those paid to similar workers in the locality. So far as the skilled workers are concerned the only other workers with whom fair comparison could be made are the carpenters employed on construction work.

The evidence showed that by signed agreement their wages were eighty-five cents per hour.

Even after making allowance for this rate being possibly fixed somewhat higher on account of loss of time for reasons which do not to the same extent apply to carpenters employed in the factories, there is still a marked difference between the rates paid these two classes of similarly skilled workers.

Adding to this the further facts that the increases to the inside woodworkers

at May First did not entirely meet the increased cost of living as stated by my colleagues in their report, with whose statement in that respect I agree, I am justified in stating that the rates requested by such employees in their proposed agreement were fair and reasonable, and accordingly recommend that the minimum rate of the skilled group as defined in the majority report be set at sixty-five cents per hour.

With respect to the semi-skilled and unskilled workers involved in the dispute their present average rate is considerably lower than that of similar classes in other industries in the locality, permanency of employment being taken into consideration. I would recommend that the minimum rate of these classes be: Semi-skilled, as defined in the majority report, fifty-five cents per hour. Unskilled, as defined in the majority report, fifty-two and one-half cents per hour.

Respectfully submitted,

(Sgd.) M. M. MACLEAN.

### Report of Board in dispute between the Montreal Tramways Company and certain of its employees

**A** REPORT was received from the Board established to deal with the dispute between the Montreal Tramways Company and certain of its employees, being members of Division No. 790, Amalgamated Association of Street and Electric Railway Employees of America. The Board was composed as follows: His Honour Judge J. B. Archambault, Montreal, chairman, appointed by the Minister in the absence of a joint recommendation from the other two members, Messrs. E. W. Villeneuve and J. A. Woodward, Montreal, nominees of the company and employees respectively. The report was unanimous and contained proposed schedules and re-

commendations as to the settlement of the dispute.

#### Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Montreal Tramways Company, employer, and Division 790 of the Amalgamated Association of Electric Tramways' Employees of America, employees.

Montreal, August 3rd, 1920

To the Honourable G. D. Robertson,  
Minister of Labour, Ottawa.

The undersigned, J. B. Archambault,  
president of the Board, E. W. Ville-

neuve, representing the Company, and J. A. Woodward, representing the employees, have the honour to report as follows:

PREAMBLE:—The problem we are herein called upon to solve is rendered infinitely more difficult by the unprecedented social and economic conditions with which we have had to contend for a number of years.

On one side, the employees of the Tramways Company submit that their wages ought to be proportionate to the cost of living, to the difficulties and hard and trying nature of their work, to the experience, skill and knowledge demanded by that work, without taking into account either the resources of the company or the revenue produced by its enterprise. On the other hand, the company pretends that the wages actually paid have reached the limit that the enterprise will sustain in the conditions in which it is actually operated, and that an increase of wages would inevitably bring about an increase in the cost of transportation.

There is also a third party interested in this matter, equally as much as the other two, and whose interests must likewise be taken into account; we refer to the public.

It is a very delicate and difficult mission to hold the balance between these three contending parties and to assign to each its proper share of the burden and advantages. We cannot hope to find a solution which can be accepted by all as satisfactory, but we shall be happy if we are able to offer a "modus vivendi" sufficiently tolerable to enable the tramways enterprise in Montreal to pass through the present crisis in peace and harmony.

Before entering into an analysis of the facts which have been established before us, we consider that it is necessary to lay down the general principles which we intend shall guide us.

In the first place, we do not hesitate to recognize that the workman, the employee, the labourer, each has a right to be paid a wage sufficient to enable himself and his family to live. And live

how? For there are many ways of living, many degrees in the scale, from the extravagant luxury of the millionaire to the condition of extreme misery suffered by the poor. The workman has a right to receive in return for a fair day's work wages which will enable him to preserve his health, assure for his children the natural development of their physical forces, their intellectual faculties and their moral sense, and procure for all a degree of comfort and sane recreation that will put a little joy into their lives and make a man who is wise and reasonable appreciate existence as a benefit and not consider it a burden.

That is the abstract right of every workman, a right which every sociologist acknowledges belongs to him; he has a right to aspire and lay claim to it; it is what an ideal society should procure for him. That right belongs to all workers as well as to tramway employees. But, we must not forget we are not here to find a solution for the great social question which at the present time agitates and stirs the world, we are called upon to arbitrate a difference between a public utility company and its employees, within the limits of the powers that have been conferred upon us. We are dealing with a concrete, specific, local case, surrounded with its own circumstances and contingencies. We are bound to take into account those circumstances. If ideal solutions should be aimed at, never should we lose contact with the practical and real.

It is impossible to consider only the rights of the employees. We must also consider the rights of the company and, above all, those of the public; and if the enterprise, in the present state of things, cannot give to each of the three parties interested everything that they could legitimately expect from it, namely, to the public a service within range of its means, to the employees wages sufficient to give them a full measure of comfort, and to the company, a revenue which will maintain the enterprise on a paying basis; it seems to us that each should sacrifice something in order to prevent strike, failure and disorder, which would

be the worst for all. It is the eternal law of compromise which enjoins.

The Tramways undertaking has got to be maintained, and each of the interested parties ought to contribute its proportionate and equitable share of sacrifice towards that end.

It is with that object in view that we will now proceed to study the facts and arguments which have been submitted to us.

We will first consider the argument based on the trying nature of the work and the skill and knowledge it required.

#### NATURE OF THE WORK.

It has not been shown, and it cannot be conceived that the work of the conductors and motormen is more trying than that of other workmen engaged in outside occupations; on the contrary, it may be said that they are better protected against the rigors of the weather. However, we have to admit that they suffer to a certain degree from the inclemency of our climate, especially in winter time.

#### SKILL AND KNOWLEDGE.

While their work does not call for a long apprenticeship, and the knowledge required is not very extensive, that occupation requires intelligence, education, tact, a knowledge of the French and English languages, and good judgment. Nobody will deny that that should be taken into account, as well as the relative hardship of their work.

#### COST OF LIVING AND SUFFICIENCY OF WAGE.

These two questions are closely connected and must be examined together. Who can tell us just what it costs to live? We have studied what was submitted to us by the employees as a family budget; we have examined numerous statistics, and we confess that we have not been able to set down a figure about which we would be satisfied to say: "Here is what represents the cost of living." It seems to us that no speculative budget can cover all the contingencies of existence, and on the other hand, domestic economy

finds means to practice in all speculative budgets substantial retrenchments.

The cost of living that we have in view seems to us to be more approximately represented by the sum which people of the middle class living economically manage to live with. In our opinion, that ought to exclude luxury of every kind, but include comfort not far from the minimum, and provide for sane recreation. Of course, the worker legitimately aspires to greater comfort; at the same time he ought to make some sacrifice in the exceptional conditions under which we all, with few exceptions, are living at the present time.

Conductors' and motormen's present wages compare favourably with those of salaried people of the same social rank in Montreal, and who accomplish a task at least as trying and requiring equal skill and knowledge. In particular, they are better paid than policemen and firemen, and a large number of civic and civil employees. The graphic table which accompanies this report as Appendix "A" makes this very plain.

The evidence has shown that conductors and motormen have benefitted by the following increases in salary since 1918:

Classes	Cents per hour in May, 1918	Cents per hour since June 30 1918	Cents per hour since July, 1919	In- crease
First year...	25	31	37	48%
Second year...	25	31	40	60%
Third year...	26	33	44	70%
Fourth year...	26	33	48	85%
Fifth year...	26	35	48	85%
After 5 years.	29	37	48	65%

This increase covers the advance in the cost of living during the same period.

It is only fair to the public that due account should be taken of the fact that that increase in salaries has carried with it an advance in the car fares of which it feels the heavy burden.

Under present working conditions, the conductors and motormen earn a monthly wage which varies from \$90 to \$200, averaging \$128.74 per month. To this must be added the value of the uniform and the right of travelling on the tramways free. However, it must not be forgotten that since the last increase in salaries, namely, on June 1, 1919, the cost of living has considerably increased, and as a consequence they have had to submit to a diminution of comfort. For that reason, we consider that their demand to-day ought to be granted in the measure at least as the company's receipts will permit.

The operation of the system of the company has, by a long-term contract, under the authority of the Legislature of Quebec, been placed under the control of the Tramways Commission of Montreal. This commission is vested with power to determine the cost of transportation of passengers and freight, which are the sole revenues of the company. It is obliged to provide out of the receipts for the payment of certain fixed charges necessary to the maintenance of the enterprise, amongst others six per cent on the value of the material required for the operation of the system. The payment of these charges is an obligation which cannot be escaped. These charges naturally vary very little. It is different with the cost of operation, which is composed of salaries and cost of material, and which necessitates an increase in the cost of transportation in proportion as these costs advance.

After a study of the budget and the information obtained from the Tramways Commissioners, after discussing with the commissioners the financial situation, we have come to the conclusion that an increase in wages exceeding that which is found in our conclusions, would result in a substantial increase in the cost of transportation. To such an increase there is the very serious obstacle, already indicated, that the burden would fall on workers of all classes.

There is still more. We are of opinion that all substantial increase in street car

fares would be inefficacious in producing any increase in the total receipt. It appears to us that the Tramways Company has with its present rate of fares attained, pretty near, the maximum of its possible revenue. The Company makes a profit on short hauls, but loses money on long journeys. This is due to the fact that the tariff is uniform within a very extended area; but that uniformity is a condition of operation that cannot be changed.

Now, a new substantial increase in the tariff would surely produce a decrease in the number of trips; and, naturally, this decrease would be in the short trips, out of which the Company makes its profits. That is what happened at the last increase in fares. The diminution in the number of trips then brought about still persists.

We ask the conductors and motormen to bear well in mind that this decrease would be all to their disadvantage, because it would result in a corresponding decrease in the number of cars necessary to carry on the service and would deprive of their employment, totally or partially, a certain number of them.

#### CONDITIONS OF WORK.

In addition to an increase of wages, the employees demand an eight-hour working day, with fifty per cent additional pay for overtime.

Whatever we may think of the legitimacy of that demand, the principle of which has been recognized by certain tramways companies, the difficult period which we are passing does not make it opportune to make this change. It has been shown that it would bring about all kinds of inconveniences. We can say, to the credit of the employees, that they did not appear disposed to insist upon an immediate reduction in the number of working hours. In fact, the majority of them voluntarily work ten, eleven and twelve hours a day, and often seven days per week.

It should be observed, however, that they are paid for more hours than they actually work. This results from a tacit

understanding—fully appreciated by them—which applies in two cases:

1. The interval between the time the employee leaves one car and takes over another is credited to the employee, such credit not to exceed forty minutes.

2. To those serving on supplementary cars, called "extras" and "trippers," every fraction of an hour is counted as a full hour.

In this way it is seen that some men's names appear on the list of pay for 12, 13 and 14 hours, when in fact they have worked 10, 11 and 12 hours. So that their real pay is not 46 cents, but 50, 52 and up to 55 cents per hour. One will be able to appreciate to what extent they benefit by that way of counting the hours of work, tacitly accepted, by the following compilation made for four days, March 29, 30 and 31 and April 1, which were days of normal operation:

#### MONTREAL TRAMWAYS COMPANY

"Statement showing the actual time worked and supplementary time allowed to conductors and motormen for March 29, 30 and 31 and April 1, 1920:

Total number of men at work	1,907
Number of men receiving additional allowance . . . . .	1,134
Proportion . . . . .	59%

The total time paid for during the four days was 69,127 hours.

The total time paid to the 1,134 men receiving an additional allowance was 39,045 hours, being 56 per cent of 69,127 hours.

The 39,045 hours represent 34,036 hours of actual work, and 5,009 additional hours, or 13 per cent.

Time of 1,134 conductors and motormen receiving an additional allowance:

Tariff	Hours of actual work	Additional hours allowed	Time paid	Average tariff paid per hour for actual work
37.....	686	100	786	.424
40.....	3,090	369	3,459	.448
44.....	1,628	222	1,850	.500
48.....	28,632	4,318	32,950	.552
Totals..	34,036	5,009	39,045	.538

Additional time allowed:	
March 29, 30, 31, April 1, (4 days)	
5,009 hours . . . . .	\$ 2,354.92
For one day, April 1, 1,252 hours . . . . .	588.73
For 365 days, or one year, 457,071 hours . . . . .	214,886.45

#### CONDITIONS OF WORK.

The employees do not only ask for an increase in their salaries, but also for changes in their conditions of work. In the course of the discussion an understanding was reached between the company and the employees relative to a certain number of these changes. As to the others, the employees simply submitted them to us, without giving any reasons why they should be made. In favour of the existing conditions there is the test they have gone through, and nothing would justify us in modifying them beyond the understanding which has intervened between the parties.

#### CONCLUSIONS.

Before setting down the figures which we have decided upon, we wish to state that we have, to the best of our ability, analysed the evidence and weighed with care all the arguments submitted, with a desire to give to the employees the greatest possible measure of advantage compatible with the intangible rights of the public and the resources of the tramways enterprise.

For the above stated reasons, we recommend that the following scale of wages shall be adopted, with retroactive effect to the First of July last:

## FOR CONDUCTORS AND MOTORMEN

First year, 45 cents per hour instead of 37 cents.

Second year, 50 cents per hour instead of 40 cents.

After the second year, 55 cents per hour instead of 44 and 48 cents.

Under the existing scale of pay and conditions of work:

- 3½ per cent of the conductors and motormen earn 37 cents per hour;
- 11 2-5 per cent earn 40 cents;
- 7 4-5 per cent earn 44 cents.
- 77 3-10 per cent earn 4 cents.

Under the proposed scale:

- 3 5-10 per cent will earn 45 cents.
- 11 4-10 per cent will earn 50 cents;
- 85 1-10 per cent will earn 55 cents.

With regard to the other employees we recommend the following wages, which will represent a substantial increase for all of them.

## CAR SERVICE DEPARTMENT

## Inspectors and Instructors—

Per month.

Pass. Inspectors or Instructors, 1st year.....	\$160.00
Pass. Inspectors or Instructors, 2nd year.....	175.00
Freight Inspectors (2).....	175.00
Travelling Freight Inspectors.....	150.00

All other conditions to remain as under Agreement.

## Depot Clerks—

Per month.

Day Clerks.....	\$ 175.00
Night Clerks, 1st year.....	160.00
Night Clerks, 2nd year.....	170.00
Freight Clerk.....	145.00
Janitors—Depots.....	55.00

All other conditions to remain as under 1919 Agreements.

Signalmen, same as conductors and motormen.

Stable Foremen.....\$125.00 per month.

Stable Grooms.....30-35c per hr.

Chauffeur.....\$120.00 per month.

Hillmen.....35c per hour.

## POWER DEPARTMENT

Proposed rate.  
per hour.

Steam Engineer in charge.....	.65c.
Assistant engineer.....	.52c.
Boiler Room Foreman.....	.52c.
Boiler Room Helpers.....	.40c.
Coal Weigher.....	.40c.
Mechanics.....	.55c.
Boiler Repair Men.....	.50c.
Oilers.....	.47½c.
Firemen.....	.50c.
Sweepers.....	.35c.
Chief Operator, Hochelaga.....	.65c.

Proposed rate.  
per hour.

Switchboard Operator, 1st class.....	.61c.
Switchboard Operator, 2nd class.....	.59c.
Switchboard Operator, Sub. Stations.....	.55c.
Dynamo Tenders.....	.50c.
Foremen Electricians.....	.60c.
Electricians.....	.55c.
Electricians' Helpers.....	.50c.
Sweepers.....	.35c.

## OVERHEAD LINE

Sub-Foremen.....	.60c.
Linemen.....	.55c.
Groundmen.....	.52c.
Chauffeurs.....	.50c.
Motormen.....	Motormen's rate.

REMARKS.—Hours of duty and allowance for overtime to remain as under Agreement of May 28th, 1919.

## CONSTRUCTION DEPARTMENT

Proposed rate.

General Roadmaster.....	\$225.00
Roadmaster.....	195.00
Permanent Gang Foreman.....	.60c.
Assistant Foreman.....	.54c.
Permanent Suburban Track Foreman.....	.52c.
Permanent Checkers.....	.50c.
Temporary Checkers.....	.44c.
Trackmen (1st and 2nd class).....	.42c.-.47c.
Construction Watchman.....	.23½c.

(12 hrs.)

Carters.....	Prevailing rate
Messengers.....	.16c.
Permanent Clerks.....	.50c.
Emergency Men (12 hrs. Cote St.).....	.35c.
Inspector, Pavement.....	.50c.
Inspector, Excavations.....	.47c.
Inspector, Switches.....	.47c.
Switchmen.....	.35c.
Electric Welders.....	Motormen's rate.
Grinders.....	.42c.
Assistant Foreman Bonder.....	.55c.
Blacksmiths.....	.60c.
Machinists.....	.60c.
Helpers.....	.42c.
Bonders.....	.50c.
Carpenters.....	.60c.
Bricklayers.....	.60c.
Plumbers.....	.60c.
Painters.....	.55c.
Helpers.....	.42c.
Foreman Construction Shops.....	175.00
Checker in charge.....	135.00
Chauffeurs.....	120.00
Inspectors, Int. Plants, Day.....	125.00
Inspectors, Int. Plants, Nights.....	95.00
Foreman Electric Welder.....	165.00
Foreman Bonders.....	165.00
Foreman Carpenter.....	180.00

REMARKS.—Hours of duty and allowance for overtime to remain as under Agreement of May 28th, 1919.

Proposed Rate.  
Per month.

Foreman Bricklayer.....	\$175.00
Foreman Painter.....	140.00
Foreman Plumber.....	160.00
Foreman Watchman.....	31c per hr.
Labourers.....	Prevailing rate.

REMARKS.—Hours of duty and allowance for overtime to remain as under Agreement of May 28th, 1919.

## STORES DEPARTMENT CONSTRUCTIONS

## Proposed rate

Foreman in the yard.....	\$115.00 per month
Assistant Foreman in Yard . . .	.52 c. per hour
Freight handlers.....	Labourers' rate

REMARKS.—Hours of duty and allowance for overtime to remain as per Agreement dated May 28th, 1919.

## ROLLING STOCK DEPARTMENT.

## YOUVILLE SHOPS—

## CARPENTERS, PAINTERS AND MISCELLANEOUS—

Proposed Rate.  
Per hour.

Carpenter—1st Class.....	.54- .60
Carpenter—2nd Class.....	.46- .52
Machine men.....	.50- .60
Upholsterers.....	.50- .60
Pattern makers.....	.55- .65
Letterers.....	.55- .65
Painters—1st Class.....	.54- .60
Painters—2nd Class.....	.46- .52
Car Wash. Inspectors.....	.45
Car scrubbers.....	.40
Paint burners.....	.45
Painter apprentice.....	.40- .44
Shop cleaners.....	.35
Firemen.....	.42- .46

## MACHINE SHOP—

Machinist—1st Class.....	.60- .70
Machinist—2nd Class.....	.50- .58
Machine Operators.....	.42- .48
Fitters.....	.50- .55
Benchmen.....	.42- .48
Labourers (over 20 years).....	.40
Labourers (under 20 years).....	.34
Millwright.....	.50- .60
Tinsmith.....	.50- .60
Welders.....	.50- .60
Welders' apprentice.....	.40- .48
Tool maker.....	.60- .70
Brass finishers.....	.50- .60
Blacksmith.....	.50- .60
Blacksmiths' helpers.....	.42- .46

REMARKS. — Conditions regarding hours of work, allowance for overtime and allowance for Sundays and Holidays to remain as under Agreement of May 28th, 1919.

Proposed Rate.  
Per hour.

Armature winders.....	.50- .65
Field makers.....	.40- .55
Commutation builders.....	.50- .60
Heater repairers.....	.42- .45
Electricians.....	.50- .60
Electrical and mech. repair men..	.42- .48
Apprentice (over 20 years).....	.34- .40
Apprentice (under 20 years).....	.20- .32
Equipment repairer.....	.50- .60
Air brake men.....	.42- .55
Steam fitters.....	.50- .55
Pipe fitters.....	.42- .48
Plumbers.....	.55- .60
Toolsmiths.....	.50- .60
Assistant foreman overhauling department.....	.60

REMARKS. — Conditions regarding hours of work allowance for overtime and allowance for Sundays and Holidays to remain as under May 28th, 1919, Agreement.

## CAR BARN—

Proposed Rate.  
Per hour.

Chief inspector.....	.50-55½
Truck inspector.....	.42- .52
Brake inspector.....	.42- .52
Motor inspector.....	.42- .52
Electrical inspector.....	.42- .52
Fender and sand boxes.....	.42- .52
Emergency men.....	.42- .52
Pitmen.....	.42- .52
Carpenters.....	.42- .52
Helpers.....	.35- .40
Labourers.....	.35
Benchmen.....	.40- .50
Car starters.....	Motormen's Rate
Car cleaners.....	.35
Shop cleaners.....	.35
Car cleaners' inspectors.....	.40
Firemen.....	.40
Car starter helpers.....	.45

REMARKS.—Hours of duty and allowance for overtime and Sunday work to remain as per Agreement of May 28th, 1919.

## CASHIER'S DEPARTMENT.

## Proposed Rate.

Night cashiers depot..	\$115.00
Day cashiers.....	85.00-\$90.00-\$ 95.00
Emergency clerks.....	90.00- 95.00- 100.00
Fare box day clerks...	75.00- 80.00- 85.00
Fare box night clerks..	85.00- 75.00- 80.00

## FARE BOX REPAIR DEPARTMENT.

Men in charge.....	\$185.00
Assistant.....	110.00

REMARKS.—Hours of duty and other conditions to remain as at present.

We recommend further that the scale suggested above should be made to apply for the period of one year dating from July 1, 1920, to be renewed automatically for a period of another year by default of one or the other parties inter-

ested giving notice of its intention to put an end to it thirty days at least before the expiration.

**Report of Board in Dispute between Toronto and Niagara Power Company;  
Toronto Power Company, Toronto; Toronto Power Company, Niagara Falls;  
and Toronto Street Railway Company and certain of their employees**

**A** REPORT was received from the Board established to deal with the dispute between the following companies: (1) The Toronto and Niagara Power Company; (2) Toronto Power Company, Toronto; (3) Toronto Power Company, Niagara Falls, Ontario; and (4) Toronto Street Railway Company, and certain of their employees, being members of the following trade unions, namely: (1) blacksmiths and helpers, members of Local 318, International Brotherhood of Blacksmiths and Helpers; (2) electrical workers and helpers, members of Local 353, Toronto, and Local 897, Niagara Falls, International Brotherhood of Electrical Workers; (3) woodworkers, members of Toronto District Council of Carpenters, and (4) machinists and helpers, members of District Lodge No. 46, International Association of Machinists, and Lodge 1296, Niagara Falls, Ontario, International Association of Machinists. The Board was composed as follows: Mr. U. E. Gillen, Toronto, chairman, appointed by the Minister in the absence of a recommendation from the other two members, Messrs. W. H. Moore and Fred. Bancroft, Toronto, nominees of the companies and employees respectively. The report was signed by the chairman and Mr. Bancroft, and was accompanied by proposed schedules and recommendations as to settlement of the dispute. These findings, the Department was advised, were acceptable to the employees. It was understood that Mr. Moore intended to present a minority report,

but this had not been received at the close of the month.

**Report of Board**

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between (1) Toronto and Niagara Power Company, (2) Toronto Power Company, Toronto, (3) Toronto Power Company, Niagara Falls, Ontario, and (4) Toronto Street Railway Company, employers, and certain of their employees being members of the following trades unions, namely: (1) Blacksmiths and Helpers, members of Local 318, International Brotherhood of Blacksmiths and Helpers, (2) Electrical Workers and Helpers, members of Local 353, Toronto, and Local 897, Niagara Falls, International Brotherhood of Electrical Workers, (3) Woodworkers, members of Toronto District Council of Carpenters, and (4) Machinists and Helpers, members District Lodge No. 46, International Association of Machinists, and Lodge 1296, Niagara Falls, Ontario, International Association of Machinists, employees.

Hon. Senator G. D. Robertson,  
Minister of Labour, Ottawa.

Sir,—

The Board of Conciliation and Investigation appointed by you to enquire into the differences between the parties

mentioned above, and composed of Messrs. U. E. Gillen, Chairman, Fred. Bancroft and W. H. Moore, all of the City of Toronto, met on July 19, were duly sworn, discussed documents referred to Board, and made arrangements for public sittings. All the parties were notified by the Chairman, and on July 20, the public sittings commenced and were continued until all the evidence the parties desired to submit was completed.

The representatives who appeared before the Board at the public sittings were:

For the Employer: Mr. F. G. Clark, Chief Engineer of the Toronto and Niagara Power Company, The Toronto Power Company, and The Toronto Railway Company; Mr. F. L. Hubbard, Assistant Manager, The Toronto Railway Company; Mr. W. R. McRae, Master Mechanic, The Toronto Railway Company; Mr. D. C. Deacon, Foreman Machinist, The Toronto Railway Company; Mr. J. F. Neild, Superintendent of Operation, The Toronto Railway Company; Mr. O. V. Anderson, Superintendent of Distribution, The Toronto and Niagara Power Company; Mr. N. B. Ambler, Superintendent of the Toronto Power Company, Ltd., at Niagara Falls, Ontario.

For the Employees the representatives were: Mr. J. T. Gunn, Business Manager of the International Brotherhood of Electrical Workers, Local 353, Toronto; Mr. Phil. C. Thomas, Business Manager of the International Brotherhood of Electrical Workers, Local 897, Niagara Falls, Ontario; Mr. John Munro, Business Manager of the International Association of Machinists, District No. 46, Toronto; Mr. R. J. Nicholls, Business Manager of the District Council of Carpenters, Toronto; and Messrs. J. Black and W. Neelands, representatives of the International Brotherhood of Electrical Workers, and employees of the employer, and Mr. J. T. Gunn authorized to represent the International Brotherhood of Blacksmiths and Helpers, and Mr. A. Sanderson, Secretary of Local 318 of the Interna-

tional Brotherhood of Blacksmiths, Toronto.

Due to the extensive scope of the reference to the Board, involving three companies and four International Trades Unions, numerous witnesses were heard, some of whom were called by both parties, and a total of fifty-six separate exhibits filed with the Board, covering names of employees, hours worked and wages paid in various recent years, arguments on the cost of living, and practically a review in detail of all the employees involved; these exhibits of a voluminous character were filed by the various parties to the dispute.

The members of the Board found early in the proceedings that very little headway had been made by the parties toward a mutual adjustment of the differences before the Board was established, and it does seem to the members of the Board, from the evidence submitted, that previous to the establishment of the Board, a greater effort should have been made to reach an agreement. With this in mind, and with a view to affecting a harmonious settlement of the differences, the members of the Board urged the parties throughout the proceedings to hold conferences between themselves and try and reach an agreement. Many conferences were held between the various representatives and at times, while conferences were proceeding, the members of the Board continued with other phases of the dispute. The conferences were productive of agreements on classification for some men, and other minor conditions, but no agreement between the parties seemed possible on the major question of wages, main classification, and other important differences. The members of the Board, despite the continuous disagreement, endeavoured to bring the parties together, pointing out that the differences were so important as to have within them the elements of industrial dispute. Inasmuch as the nature of the service involved was of great public interest, the members of the Board tried every means to bring the parties together, feeling that a

mutual agreement would make for harmony in the service, and would be a protection to the public interests involved, and that a mutual agreement would be better than an award which may be accepted or rejected as the parties decide.

The members of the Board in fairness ought to point out that the men's representatives were at all times willing to negotiate with the Company, and did take out a number of clauses in the schedules as originally presented.

The machinists in their original presentation asked for ninety cents (90c) per hour, and the representatives of the machinists offered to accept eighty-five cents (85c), and it was rejected and no counter proposition made by the company, which meant any increase in wages.

The representatives of the Electrical Workers stated to the Company representatives before the Board that the men involved would accept the conditions and wages now in force for the electrical employees in the Bell Telephone Company, and a copy of that agreement was submitted to the Board. This was not accepted by the Employer, and the representatives of the Company did not suggest any increase in wages before the Board.

During the morning sitting on July 20, Assistant Manager, Mr. F. L. Hubbard of the Toronto Railway Company, read a letter from Mr. F. A. Acland, Deputy Minister of Labour, and Registrar, Ottawa, which was dated July 2, and addressed to Mr. R. J. Fleming, General Manager. The letter states:

I beg to acknowledge yours of the 30th ultimo, re this matter, and note that Mr. W. H. Moore has been nominated to represent the various companies on the Board or Boards which may be constituted. In reply I would state the Minister has thought it would be for the convenience and advantage of all parties and an economy in time and expenditure to have the several sections of the dispute referred to one Board, but there should be no difficulty in having the separate sections of the dispute dealt with separately, with separate reports and findings and a suggestion on

this point will be made to the Board when the same is constituted.

Immediately this letter was read the representatives of the employees objected to proceed with the hearing and asked the Board to adjourn for the balance of the day to enable them to communicate with the Minister, and consider the question of the letter further. The Board granted the adjournment asked for.

The next morning when the Board convened, Mr. Gunn advised that the representatives had been in touch with the Minister of Labour, and informed the Board that the Minister of Labour had stated he would communicate with the Chairman on this point.

The Chairman of the Board stated he had received a message from the Minister on the subject and read the telegram, which stated:

Mr. Gunn, on behalf of the Electrical Workers, affected by the dispute, which you are now investigating, represents that all four of the employing companies are virtually one and that the various disputes should be dealt with accordingly. I have advised him that it is quite within the discretion of the Board to exercise its own judgment in dealing with this question. It is obviously preferable that one Board should deal with several similar disputes rather than to have several Boards, who would, in all probability, differ in conclusions and fail to bring about any uniformity of results. Whatever the Board decides to be the most desirable procedure to follow will be satisfactory so far as the department is concerned.

The members of the Board had a private conference on the matter, and could not reach a unanimous decision on this point. The Chairman therefore announced that a final decision on this question would be left until all the evidence was submitted by the parties to the dispute; the representatives of the men stated that under these conditions they would proceed under protest; the enquiry was then resumed.

At the close of the public sittings, and when the members were analyzing the many exhibits and carefully reviewing the evidence as presented, the point as to what form the report or reports should take again came up. A majority of the

members of the Board, taking into consideration every viewpoint expressed on the matter, decided that the report should follow the form which is herein set out, namely:

Part (a) Schedule for Machinists, Helpers, etc.

(b) Schedule for Carpenters, Woodworkers, etc.

(c) Schedule for Blacksmiths, Helpers, etc.

(d) Schedule for Electrical Workers, Helpers, etc., at Niagara Falls.

(e) Schedule for Electrical Workers, Helpers, etc., at Toronto.

When the Board arrived at the consideration of the differences between the Blacksmiths, Helpers, etc., as outlined in the original presentation, Mr. Hubbard, Assistant Manager of the Toronto Railway Company, stated that the company had adjusted the differences and the matter was settled. This was contested by Mr. Gunn, who was authorized to represent the employees in the absence of Mr. Powesland, the International Officer whose name was on the application. Mr. Gunn promised to have the local Secretary of the Union, Mr. Sanderson, attend the proceedings. Mr. Hubbard then presented a letter signed by three men and a cross for another employee, indicating that they had agreed to accept an increase of five cents (5c) per hour. Representatives of the employees contended that the wording of the letter indicated that the men signing it were not the men referred to in the application. It was then agreed that both sides would, at next sitting, present further evidence and witnesses to support the various contentions.

On July 28, Mr. A. Sanderson, Secretary of Local 318, International Brotherhood of Blacksmiths and Helpers, appeared and gave evidence to the effect that Mr. Powesland had been called to Vancouver, and that he could not say when Mr. Powesland would be

able to attend, and that he, with Mr. Gunn, would attend for Local 318. Mr. Sanderson stated that the Schedule before the Board was presented to the employees by Mr. Powesland, and that the employees involved had agreed to the Schedule, and that no one was authorized, as far as the applicants for the Board were concerned, to sign the letter.

The letter filed by Mr. Hubbard, states as follows:

Toronto, Ont., July 13, 1920.

R. J. Fleming, Esq.,  
General Manager,  
Toronto Railway Co.,

DEPARTMENT "N" BLACKSMITHS AND HELPERS.  
TORONTO RAILWAY SHOPS.

This is to certify that the employees, Blacksmiths and Helpers, employed in the shops of the Toronto Railway Company, are satisfied to accept an increase of five cents per hour on our existing rates of pay. This and all other conditions of employment to remain as at present, and to continue until the end of the Toronto Railway Company's present franchise in Toronto; and further, we agree to dispense with the services of any Board of Conciliation or Arbitration, during the above mentioned period.

Signed on behalf of the employees.

Witnesses:

Wm. Smallwood.  
W. R. McRae.

HENRY HALLETT.  
JOS. STARK.  
WM. SHARP.

(His "X") WM. MCGILL.

After hearing witnesses who were employees involved, it would appear that after the Board was applied for, the foreman of the shop was asked by the Master Mechanic to feel the men out, and see if they would accept a five cent (5c) an hour increase. Apparently the men agreed to do so. The representatives of the Blacksmiths and Helpers before the Board claimed most strongly that this was a violation of the Industrial Disputes Act, and in any case it should not prejudice the applicants before the Board. One of the employees stated that the foreman asked him to get Mr. Powesland to call off the Board

after the men had accepted the five cent an hour increase.

It may be noticed that the Board of Conciliation was established before the letter was signed, which is dated July 13. After hearing all the witnesses and the evidence as to whether or not the case of the Blacksmiths and Helpers should be dealt with, the members of the Board could not reach a unanimous decision on the point and the Chairman decided to hear all the evidence in the case and decide that point after both sides had made their arguments on wages and conditions. The majority members of the Board have decided to deal with the Blacksmiths and Helpers Schedule, as referred to them by the Minister of Labour and as provided for in the Industrial Disputes Investigation Act.

As a result of the many conferences between the parties, and the evidence submitted to the Board, and the statements made before the Board, it appears that as far as the Blacksmiths and Helpers, Machinists and Helpers, and Carpenters or Woodworkers are concerned, there is not much difference of opinion as to rules and classification. This however is not the case as far as the electrical workers at Toronto are concerned, there being divergent views on classification and rules between employees and employer. As regards rates of pay there was no agreement at all between the parties.

Regarding classification of Electrical Workers. The company representatives claim that the present classification of the employees by the company is the proper one, and by that classification they are able to decide on what an employee's pay shall be. The representatives of the Electrical Workers argue that classification is a most important part of the Schedule, and say they should be classified as apprentices and journeymen, and that an employee after three years at any branch of the electrical work or at varied branches of the

electrical work, should be called a journeyman, and then have what is set as a journeyman's wage, further that this arrangement is in existence for the Bell Telephone employees, and that it was an award accepted by another power company in Toronto in 1914. Exhibits or Schedules of other companies were presented, both for and against the employment of men classified as apprentices and journeymen.

Remembering that Electrical Workers both at Toronto and Niagara Falls are parties to the application and that the men concerned at Niagara Falls are not asking for a classification that designates the employees as apprentices and journeymen, and having due regard to all evidence before the Board on the subject, we have decided not to make any recommendation for a change in present classification, but suggest that the representatives of the Employer and Employees at both Toronto and Niagara Falls confer with a view of reaching a satisfactory agreement on classification.

In Exhibit Twenty-five, filed by a representative of the company, it is stated: "Any increase granted by the Board, based upon the increased cost of living, should be an increase in cents per hour, and not a percentage increase based upon an employee's wage."

The representatives of the employees did not urge that an increase in pay be granted on a percentage basis, but did urge that an increase be granted sufficient to enable the men to live properly, having regard to present standards established in this community, and filed Exhibit No. 7, quoted below, showing the cost of living for a family of five in June, 1920.

## Yearly Cost of Living for Family of Five, compiled June 1, 1920

## EXHIBIT NO. 7.

Coal—

A representative of certain employees claimed that two employees granted an increase by a former award, did not receive the increase, although the Company accepted the award. It appears the increases referred to a classification and that seven men claimed the increase with the result that no one got it. The representatives of the Company submitted their file on the subject, but this Board declined to consider the matter as it was not enumerated in the application as one of the questions in dispute; reference is made to it here, as it was one of the reasons advanced for identifying the name with the rate of pay recommended by this Board, and is one explanation why names of employees appear in parts "A," "B," "C," "D" and "E" of this report.

Representatives of the Companies stated increases had been granted this year, to some of the employees represented in the application; it is also referred to in some of the exhibits filed with the Board, and without further reference to the evidence or exhibits, but with due regard to both and other matters pertaining to rules governing working conditions, and rates of pay and after visiting a number of the plants or places, where the men referred to in the application work, both at Toronto and Niagara Falls, we recommend as fair, equitable and just, and which should be accepted by the parties to the dispute, the rules and rates of pay recommended in parts "A," "B," "C," "D" and "E," annexed hereto.

The rates of pay recommended in Parts "A," "B," "C," "D" and "E" of this report, shall be regarded as the minimum rates for the various positions indicated and no further classes shall be established for the purpose of reducing the hourly, weekly or monthly rates of pay. Mr. Moore will make a separate report.

All of which is respectfully submitted.

(Signed) FRED. BANCROFT,  
Chairman.

(Signed) U. E. GILLEN,  
Toronto, August 18, 1920. Member.

## PART "A."

Rules and Rates of pay governing Machinists, Helpers, etc., employed by The Toronto Railway Company and The Toronto and Niagara Power Company.

Rule 1. Forty-four hours shall constitute a week's work, to be worked as follows: Eight hours per day for the first five days of the week, to be worked between the hours of 8 a.m. and 5 p.m., and four hours on Saturday, to be worked between 8 a.m. and 12 o'clock noon.

Rule 2. All time worked in excess of time specified in Rule One shall be paid at overtime rates as follows: For the first two hours time and one half and double time after two hours, and double time shall be paid for Sundays, all nationally proclaimed holidays and the following Statutory holidays: New Year's Day, Good Friday, Victoria Day, Dominion Day, Civil Holiday, Labour Day, Thanksgiving Day and Christmas Day and in cases when the holiday falls on Sunday, the overtime rates shall be paid for the day on which the holiday is observed.

Rule 3. When employees are called out to work after the close of the regular work day, they shall be paid not less than four hours, unless they be notified to return to work before leaving the plant. In such cases their time shall start not later than one hour after the close of the regular work day.

Rule 4. The men named and designated as Machinists in this report are admitted by the Companies' representatives to be qualified Machinists as generally understood by the trade, also that they are doing Machinists work and by mutual consent, this rule is substituted for Clause 7 in the Machinists' presentation.

Rule 5. No Machinist or Apprentice shall be required to operate more than one machine at any one time.

Rule 6. If any grievance arises between the parties to this schedule the Company agrees to receive a Committee of their employees and, if possible, to adjust such grievance. In case of a disagreement over the interpretation of this schedule, there shall be no cessation of work until the highest local representatives of both parties available at the time have failed to come to an understanding.

Rule 7. No discrimination shall be shown against the Shop Committees elected by the employees to transact their business.

Rule 8. No employee shall suffer a reduction through the adoption of the foregoing rates.

Rule 9. These rules and rates of pay shall apply on and from June 1, 1920, and remain in effect until terminated by either party, giving thirty (30) days notice in writing of a desired change.

## PART "C".

**RULES AND RATES OF PAY FOR BLACKSMITHS,  
DROP-FORGERS, HELPERS, ETC., EMPLOYED  
BY THE TORONTO RAILWAY COMPANY.**

Rule 1. Any man who has served an apprenticeship of four years or who has had four years general experience as a Blacksmith, and who, by his skill and knowledge of the trade, is able to complete a piece of work pertaining to the trade within a reasonable length of time, shall, under this agreement, be classified as a Blacksmith.

Rule 2. All forging, welding, straightening and bending of iron and steel; forging, tempering and dressing of tools; operating of forging and bolt-making machines, making and repairing of switches and frogs; acetylene and electric welding; and all work generally recognized as Blacksmith work.

Rule 3. Eight (8) hours a day shall constitute a day's work, between the hours of 8 a.m. and 12 noon, and from 1 p.m. to 5 p.m. from Monday to Friday inclusive; and from 8 a.m. to noon on Saturdays.

Rule 4. All time worked over the above hours, until 9 p.m. except on Saturdays, shall be paid for at the rate of time and one-half; after

that hour, double time will be paid. On Saturdays this rule will prevail after 1 p.m.

Rule 5. Double time shall be paid for Sundays, all Nationally proclaimed holidays, and the following statutory holidays: New Year's Day, Good Friday, Victoria Day, Dominion Day, Civic Holiday, Labour Day, Thanksgiving Day and Christmas Day, and in cases when the holiday falls on Sunday, the overtime rates shall be paid for the day on which the holiday is observed.

Rule 6. An employee who may consider that he has been unjustly dealt with, or discharged, shall upon application verbally or by letter to his immediate superior, shall within three days be given a fair impartial hearing. If found to have been unjustly dealt with, he shall be restored to his regular position, and paid for all time he may have lost.

Rule 7. When helpers are required to build fires, or light furnaces, or hammer drivers to prepare hammer before the regular starting time, they shall be paid thirty (30) minutes extra time per day.

Rule 8. These rules and rates of pay shall apply on and from June 16, 1920, and remain in effect until terminated by either party giving thirty (30) days notice in writing of a desired change.

## PART "D".

RULES AND RATES OF PAY GOVERNING ELEC-  
TRICAL WORKERS, HELPERS, ETC., EM-  
PLOYED BY THE TORONTO POWER  
COMPANY, LIMITED, NIAGARA  
FALLS, ONTARIO.

It is recognized that the business of these Companies is continuous, to the extent that they must be ready to serve their customers at any and all hours of each and every day, also that this continuous service requires the attention of certain employees, who relieve each other in such a way that there will, at all times, be on hand one or more employees to deal with those features of continuous service requiring attention from time to time; these employees are called "Shift Employees."

Also that there are other employees whose work can normally be performed during the hours corresponding with the "Shop Hours" of manufacturing establishments. These employees are named "Other Employees."

Rule 1. Shift employees or other employees required to regularly work seven days a week shall be allowed one day off each three weeks with pay.

Rule 2. Eight hours shall constitute a day's work for shift employees, except when shifts change over, and all time worked by shift employees over eight (8) hours each working day, whether on holidays, employees long shift off, or to take the place of another employee, while on vacation or at the Company's request, shall be paid at overtime rates. First four hours overtime shall be paid at the rate of time and one-half, the normal hourly rate; and double hourly rates thereafter until relieved.

Rule 3. One man on each shift shall be trained as a first aid man at the expense of the Company.

ELECTRICIANS CONDITIONS OR OTHER  
EMPLOYEES.

Rule 4. Nine (9) hours shall constitute a day, except on Saturday when five (5) hours shall constitute a day, making fifty hours a week.

Rule 5. Time and one-half shall be paid for all hours after nine, whether worked during one calendar day or not. All time worked on Saturday after 12 o'clock noon, shall be considered overtime.

Rule 6. The first four (4) hours of overtime actually worked after the completion of the normal working day, and providing it is worked within five (5) hours of time of completing the normal day's work, shall be counted as time and one-half. All other overtime, and all work on Sundays, any nationally proclaimed holidays and the following statutory holidays, New Year's Day, Good Friday, Victoria Day, Dominion Day, Civic Holiday, Labour Day, Thanksgiving Day, Christmas Day and cases when the holiday falls on Sunday, the overtime rates shall be paid for the day on which the holiday is observed.

GENERAL CONDITIONS.

Rule 7. A bulletin board will be placed at a convenient place for employees, where all general orders shall be posted.

Rule 8. Existing practices more favorable to the employees, (who are referred to in Part "D") and any other conditions not specifically covered by these rules and rates of pay shall be continued.

Rule 9. As between men of equal efficiency, seniority shall be the ground for promotion.

Rule 10. These rules and rates of pay shall apply on and from June 16, 1920, and remain

in effect until terminated by either party, giving thirty (30) days notice in writing of a desired change.

The names submitted above were agreed upon by the parties to the dispute. Should any employee or employees be inadvertently admitted who come within the reference to the Board, the employee or employees according to their classification as set out above shall receive a similar increase in cents per hour as the employee in the classification similar to their own.

During the visit of the members of the Board to the plant of the Toronto Power Company, Limited, at Niagara Falls, and after the members of the Board had left the Power House to visit the Transformer Station, Superintendent Ambler, informed the Chairman, that there were seven employees working on a penstock who desired to see the members of the Board. The Chairman asked the Superintendent for what purpose did they desire to see the members of the Board, and the Superintendent replied, it was regarding their wages. The members returned to the Power

House, and in the presence of the Superintendent and Master Mechanic Wilkie, heard the seven men, who all asked for increases in wages. Their names are Messrs, Walter Sheppard, D. Jowett, R. Jowett, A. H. Sheppard, Leslie Burke, Edward Sullivan and P. Smith. Members of the Board are of the opinion that these employees should have an increase in wages of five (5) cents per hour over present rates paid, regardless of whether these men are referred to in the application or not.

#### PART "E."

RULES AND RATES OF PAY GOVERNING ELECTRICAL WORKERS, HELPERS, ETC., EMPLOYED BY THE TORONTO AND NIAGARA POWER COMPANY, THE TORONTO POWER COMPANY, LIMITED, AND THE TORONTO RAILWAY COMPANY, ALL OF TORONTO.

#### WORKING CONDITIONS.

It is recognized that the business of these Companies is continuous to the extent that they must be ready to serve their customers at any

and all hours of each and every day. Also that this continuous service requires the attention of certain employees, who relieve each other in such a way that there will, at all times, be on hand, one or more employees to deal with these features of continuous service requiring attention from time to time. These employees are called "Shift Employees".

Also that there are other employees whose work can normally be performed during the hours corresponding with the "Shop Hours" of manufacturing establishments. These employees are named "Other Employees."

#### SHIFT EMPLOYEES.

Rule 1. Eight (8) hours shall constitute a normal day's work and forty-eight (48) hours a week's work and each employee shall be entitled to one day rest in seven.

Rule 2. Time and one-half shall be paid for the first five (5) hours of overtime, providing it be worked within six (6) hours of completing the normal day's work, and double time shall be paid for all other overtime, and this shall be irrespective of Sundays and the holidays hereinafter named.

Rule 3. When the Company allows employees to change shifts at their own request, no overtime shall be allowed.

#### OTHER EMPLOYEES.

Rule 1. The hours of labour shall be eight (8) hours on every day except Saturdays, Sundays and Nationally proclaimed holidays and the following statutory holidays, New Year's Day, Good Friday, Victoria Day, Dominion Day, Civic Holiday, Labour Day, Thanksgiving Day, Christmas Day and four (4) hours on Saturday, making a forty-four (44) hour normal week.

Rule 2. The normal working day shall be eight (8) hours of labour performed within eight and one-half (8½) or nine (9) hours from the time the employee starts work in the forenoon of every day, except Saturdays, Sundays and said holidays, and four (4) continuous hours from the time the employee starts work on Saturday.

Rule 3. The starting time for every day's work shall be not earlier than seven a.m. and not later than nine a.m. and the stopping time for every day except Saturdays, Sundays and said holidays, shall be not earlier than thirty p.m. and not later than six p.m., and on Saturdays not earlier than eleven a.m. and not later than one p.m.

Rule 4. All time worked after the normal stopping time shall be counted as overtime.

Rule 5. The first four (4) hours overtime actually worked after completion of the normal working day, as set forth above, and excepting Sundays and said holidays, and providing it is worked within five (5) hours from the time of

completing this normal day's work, shall be accounted as time and one-half. All other overtime and all work on Sundays and said holidays shall be accounted as double time.

#### GENERAL CONDITIONS.

Rule 1. Employees paid at a weekly or monthly rate are not entitled to overtime accounting, and in lieu thereof, shall, when they have been in the service of the Company one year or more, be entitled to holidays, not to exceed two weeks per year, no deduction in their pay is to be made therefor.

Rule 2. Employees shall not be asked to work outside in rainy, stormy or extreme cold weather, except in cases of absolute necessity.

Rule 3. The present practice of providing other work for outside men who are prevented from doing their ordinary work through rainy, stormy or extreme cold weather, shall be continued whenever possible.

Rule 4. As between men of equal efficiency, seniority shall be the ground for promotion. Seniority begins at the time the employees' pay starts and is based on length of service.

Rule 5. When staff is reduced, the senior men in the department capable of doing the work, shall be retained.

Rule 6. Employees laid off by reduction of staff who desire to retain their seniority rights, must file with the officer of the department who notifies them of reduction, their name and address so that officer may notify them when increasing staff.

Rule 7. Employees declining promotion shall not lose their seniority rights except to the employee promoted.

Rule 8. Employees disciplined or dismissed will be advised of the cause for such action.

Rule 9. If the charge against the employee is not sustained it shall be stricken from the record. If by reason of such unsustained charge, the employee has been removed from position held, reinstatement will be made and payment allowed for the assigned working hours actually lost, while out of the service of the Company, at not less than the rate of pay position formerly held, or for the difference in rate of pay earned if in the service.

Rule 10. Except as otherwise provided in these rules, employees notified or called to perform work not continuous with the regular work period, will be allowed a minimum of three (3) hours.

Rule 11. When an employee is dismissed he shall be paid by the Company forthwith, all money due to him.

Rule 12. When employees are required to deliver daily sheets to an office of the Company, they shall do so during regular working hours.

Rule 13. The Company shall deliver to the jobs where work is being done, all material required.

The names submitted above were agreed upon by the parties to the dispute. Should any employee or employees be inadvertently omitted, who come within the reference to the Board, the employee or employees, according to their classification as set out above, shall receive a similar increase in cents

per hour as the employee in the classification similar to their own.

We have not shown what the electrical workers employed by these Companies at Toronto asked for per hour or week, because their request was based on a new classification of employees, which divided them into apprentices and journeymen, and the present classification is not disturbed.

## Report of Board in dispute between the Grand Trunk Pacific Railway Company and its 'longshoremen at Prince Rupert, B.C.

A REPORT was received from the Board established to deal with the dispute between the Grand Trunk Pacific Railway Company and certain of its employees, being 'longshoremen at Prince Rupert, B.C. The employees in this case had gone on strike and the application was made by the City of Prince Rupert under authority of section 63a of the I.D.I. Act. A Board was established composed as follows: His Honour Judge F. McB. Young, Prince Rupert, appointed on the joint recommendation of the other two members, Mr. Fred Dawson, nominated by the company, and Mr. W. E. Thompson, Prince Rupert, nominated by the city as representing the employees concerned. The report of the Board was unanimous and was accompanied by a signed agreement between the parties concerned.

### Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of differences between The Grand Trunk Pacific Railway Company, employer, and certain members of its employees being members of the International Longshoremen's Association, Local 38-41, employees.

To the Honourable,  
G. D. Robertson,  
Minister of Labour, Ottawa.

The undersigned, members of the Board of Conciliation and Investigation appointed in the above matter beg respectfully to report as follows:

During the course of the reference of the dispute herein a settlement was arrived at by the parties. A memorandum of such settlement was drawn up, signed by the parties to the dispute, and is hereto attached.

All of which is respectfully submitted.

(Sgd.) F. McB. YOUNG,  
Chairman.

(Sgd.) WILLIAM E. THOMPSON,

(Sgd.) F. G. DAWSON,  
Members of the Board.

Dated at Prince Rupert, B.C., Aug. 6th., 1920.

THIS AGREEMENT made and entered into on the 3rd day of August, 1920, between: PACIFIC STEVEDORING & CONTRACTING COMPANY, GRAND TRUNK PACIFIC RAILWAY COMPANY, GRAND TRUNK PACIFIC COAST STEAMSHIP COMPANY LIMITED, AND THE INTERNATIONAL LONGSHOREMEN'S ASSOCIATION, LOCAL 38-41.

Pursuant to a communication received from the International Longshoremen's Association, Local 38-41, dated the 4th May, 1920, cancelling agreement entered into on the 3rd December, 1919, and specifying a new scale and conditions:

Agreeable with our mutual understanding the following rates of wages will apply as from the 16th July, 1920:—

General longshore work...	90c. per hour day time and \$1.10 overtime. Eight hours to constitute a day's work.
Coal and ore in bulk.....	\$1.00 per hour day time and \$1.20 overtime.
Cement in lots of over 25 tons.	\$1.00 per hour day time and \$1.20 overtime.
Fertilizer and plaster in lots of over 25 tons.	\$1.15 straight time.
Powder any quantity.....	\$1.10 straight time.
Sulphur in bulk any quantity .....	\$1.25 straight time.
Creosoted lumber and piles.....	\$1.10 straight time.
Double winch drivers.....	\$1.10 day time and \$1.50 overtime.

The following conditions will also govern:—

Eight hours namely:—8.00 a.m. to 12 noon and 1.00 p.m. to 5.00 p.m. will constitute a day's work. All time before 8.00 a.m. and after 5.00 p.m. and meal hours when worked will be considered overtime.

Longshoremen will line up at G.T.P. No. 2 shed each morning at 8.00 o'clock, remaining for one half hour. If men are not hired in that time, they may retire to Hall where they will be subject to call up to 11.00 a.m.

The men shall line up for work in the afternoon at 1.00 o'clock remaining for one half hour, when they shall then retire to the Hall, and will be subject to call up to 5.00 p.m.

The men required for night work shall be notified at the Hall not later than 5 p.m., when information as to requirements for night duty is possible to be obtained at that time.

In either cases if there are not sufficient men, either at Dock or Hall, the Union shall endeavour to supply the requisite number, and failing that the employer shall obtain men wherever available.

All men hired for night work and reporting for duty between the hours of 7.00 p.m. and midnight, shall be entitled to a minimum of two hours' pay at regular rates. After midnight up to 6.00 a.m. to four hours' pay, when boat fails to arrive at the time for which the men are ordered. If kept under orders for longer periods,

they shall receive regular rates for such further time they are kept under orders.

It is understood that these rates of wages and conditions will govern longshoremen employed on the docks at Prince Rupert, B.C., and shall be applicable to coastwise work only, subject to thirty days' notice of cancellation or revision from either party.

(Sgd.) P. G. GROVES,  
General Manager,  
Pacific Stevedoring and Contracting Co.

(Sgd.) A. KILPATRICK,  
Grand Trunk Pacific Railway Company.

(Sgd.) R. BEAUMONT,  
Grand Trunk Pacific Coast Steamship Co.

(Sgd.) W. E. DENNING,

(Sgd.) I. DIRECTOR,

(Sgd.) W. FERGUSON,

Intern. Longshoremen's Assoc., Local 38-41.

(Sgd.) F. McB. YOUNG,  
Chairman.

(Sgd.) W. E. THOMPSON,

(Sgd.) F. G. DAWSON,  
Members of Board.

## Report of Board in dispute between the Hull Electric Company and certain of its employees

**A** REPORT was received from the Board established to deal with the dispute between the Hull Electric Company and certain of its employees, being members of Division No. 591, Amalgamated Association of Street and Electric Railway Employees of America. The Board was composed as follows: Captain W. P. Grant, Ottawa, chairman, appointed by the Minister in the absence of a joint recommendation from the other two members, Messrs. Geo. D. Kelley, and Jos. Gibbons, Ottawa, nominees of the company and employees respectively. The award was signed by the chairman and Mr. Kelley and contained recommendations as to settlement of the dispute. An agreement was effected on the basis of the Board's recommendations and the threatened strike averted. Mr. Gibbons did not concur in the Board's findings and presented a minority report.

### Report of Board

In the matter of The Industrial Disputes Investigation Act, 1907, and of a dispute between The Hull Electric Company, Employer, and certain of its employees being members of Division No. 591, Amalgamated Association of Street and Electric Railway Employees of America, employees.

To the Honourable  
The Minister of Labour,  
Ottawa.

The Board of Conciliation consisting of Geo. D. Kelley, Ottawa, representing The Hull Electric Company, Joseph Gibbons, of Toronto, representing the employees of the Company with W. P. Grant, as Chairman, appointed to investigate the above dispute met in the Court House at Hull on August 3rd, 1920. There were also present Mr. Gordon Gale, General Manager of the Hull Electric Co. and Messrs. Jos. A. Noel, Jno. J. Gibeault and Wm. Sutherland, a committee representing the

employees. After having heard the representations of the employees for better wages and changed working and other conditions the Board suggested that the employees' committee and Mr. Gale meet together and agree, if possible, on as many of the thirty-four demands itemized in the employees' letter of May 28th and thus enable the Board to more easily reach the important points in the dispute. This was agreed to and the Board adjourned to meet the following day. When the sitting was resumed on the morning of August 4th the employees' committee had added Mr. Jennings, a Union Official, to their number. During the adjournment quite a number of items in dispute including in particular the claim of a fixed minimum wage for listed spare men (an entirely new demand) were conceded by the Company. The Board then proceeded to take up the wage question which of course was the outstanding feature of all the points in dispute, in fact other matters outside of the wage question were touched on so lightly as to lead your Board to the conclusion that, beyond the changes in present conditions agreed upon between Mr. Gale and the employees' committee, it would be inadvisable for us to further modify them, believing as we do that the disruption of the existing schedules under present conditions would but lead to inconvenience and confusion. Indeed we might say of the Hull Electric Employees as the Montreal Board of Conciliation in their recent report said of the Montreal Tramway Employees "To the credit of the employees be it said that they did not appear disposed to insist upon an immediate reduction in the number of working hours, in fact the majority of them voluntary work ten, eleven and twelve hours a day and often seven days a week."

It might be well at this time for your Board to express its appreciation of the courteous and fair spirit in which each side presented its case, and it is further noted with great pleasure the evident thoroughly good understanding and feeling that exist between the

officials of the Hull Electric Company and their employees.

The bulk of the discussion of the wage question centered on the scale to be adopted for the conductors and motormen, these being the large majority of the employees. Naturally their representatives in support of their demand for higher wages laid stress on the rates paid to street railway men in cities where the wage scale was considerably higher than Hull, but when it is considered that the maximum scale of wages paid to street railway motormen and conductors in different towns throughout Canada ranges from from 33c. to 72½c. an hour it is but fair to presume that the reason will be found in local conditions.

Taking this as our guide the next step was to determine what would be a fair increase over the existing rate. The increase last year had been from 36 cents an hour to 41 cents, practically 14 per cent. Adopting the same ratio this year would result in advancing the rate to 47 cents, an increase of 6 cents an hour. Your Board, however, felt that by deciding on a maximum rate of 48 cents an hour, an increase of 33 1-3 per cent over the pay of 1918-1919 and nearly 100 per cent over the pay of the year ending May 1st, 1918, they were making a decision that should be under existing conditions acceptable to both sides.

The following is our finding for all the different classifications of employees:

No. 1.—FREIGHT CREW—Ten-Hour Day.

	Per hour.
Conductors.....	.52
Motormen.....	.52
Brakemen.....	.43
Trolley men.....	.41

No. 2.—POWER PLANT EMPLOYEES—Eight-Hour Day.

Power house operators.....	.48
Substation operators.....	.45
Power house oilers.....	.42

No. 3.—TRACKMEN—Nine Hour Day.

Trackmen (first class).....	.43
Trackmen (second class).....	.40

No. 4.—NINE-HOUR DAY SHIFT, TEN-HOUR NIGHT SHIFT.

Machinist, first class.....	.60
Armature winder, first class.....	.53
Armature winder, second class.....	.43
Blacksmith.....	.47
Carpenter, first class.....	.54
Carpenter, second class.....	.47
Air brake fitter.....	.45
Day shift.	
Pitmen and troublemen, 1st class....	.49
Pitmen and troublemen, 2nd class....	.45
Night shift.	
Pitmen and troublemen, 1st class....	.47
Pitmen and troublemen, 2nd class....	.44
Car cleaners, 1st class.....	.42
Car cleaners, 2nd class.....	.40

No. 5.—Sweeper and snow plow work 3 cents in addition to schedule rate.

No. 6.—Flagmen or switchmen \$3.00 per day.

No. 7.—Aylmer station agent \$130.00 per month.

No. 8.—Conductors and Motormen:—	Per hour.
First six months.....	.41
Second six months.....	.44
Second year.....	.46
Third year and thereafter.....	.48

No. 9.—Nine Hour Day.—	Per hour.
Linemen first class.....	.52
Linemen second class.....	.46
Metermen first class.....	.42
Metermen second class.....	.40

No. 10.—Uniforms (One each year.)

Passenger motormen and conductors pay:  
First year, full cost; Second year, two-thirds; Third year, one third; Fourth year, nil.

Winter Trousers (one pair every second year.)

Passenger motormen and conductors pay:  
Full cost; two-thirds; one-third; nil.  
Winter Overcoats (one every third year.)

Passenger motormen and conductors: Full cost; two-thirds; one-third; nil.

No. 11.—Minimum of 2½ hours for trippers and trailers.

No. 12.—Tickets and change to conductors on main line \$60.00 and on other lines \$40.00.

No. 13.—Listed spare men reporting for duty three times each day shall be paid a minimum of \$30.00 per half month but if they work in excess of the hours to cover this amount they shall be paid at the schedule rate per hour.

No. 14.—When a man is compelled to work over schedule time, time and one half will be allowed until he is relieved from duty. If he is called before six hours rest has been allowed the overtime rate shall continue.

No. 15.—That it be permitted to post notices of meetings of employees in conductors' and motormen's rooms.

That all differences arising out of suspension, dismissal charges, accidents, wages, etc., may be

investigated by a committee selected of and by the employees.

That all other working conditions shall remain as at present.

The Board recommends that this agreement be retroactive from July 1st, 1920, and that it continue in force for a period of 12 months from the said date. All of which is respectfully submitted.

(Sgd.) W. P. GRANT,  
Chairman.

(Sgd.) GEORGE D. KELLEY,  
Member of Board.

Ottawa, Aug. 26, 1920.

Minority Report

In the matter of The Industrial Disputes Investigation Act, 1907, and of a dispute between The Hull Electric Company, employer, and certain of its employees, being members of Division No. 591, Amalgamated Association of Street and Electric Railway Employees of America, employees.

Hon. G. D. Robertson,  
Minister of Labour.

Sir,—

The Board of Conciliation appointed by you to enquire into the differences between the above mentioned parties, met in Mr. Kelley's office, on August 3rd, and made arrangements to meet the parties to the dispute on August 4th in the Court House in the City of Hull. The Board held public sessions on August 4th, 5th and 6th.

The Company was represented by Mr. Gordon Gale, General Manager of the Hull Electric Company. Mr. M. A. Meach, Superintendent, was also present.

The employees were represented by Messrs. Joseph Noel, W. A. Sutherland, J. J. Jibault and W. J. Jennings, International Vice-President of the Association.

The requests of the employees were set out in a schedule of 34 clauses, and

in effect was a request for an increase in wages and improved working conditions.

The representatives of the employees argued that the wages paid were inadequate to maintain a proper standard of living, due to the ever increasing cost of living. They submitted a cost of living based on a family of five which was far in excess of the wages received. They contended that working conditions could be improved without impairing the efficiency of the service.

The representatives of the company argued that the increase in wages the employees had received was greater than the cost of living and in support of their contentions submitted a chart purporting to represent the percentage of increase in wages and the increase in the cost of living since 1900.

After the hearing on August 4th, the Board advised the representatives of the Company and Employees to get together and report back on the following morning how many of the clauses they could agree upon. The representatives reported they had come to an understanding on sections, 10, 11, 13, 15, 18, 21, 22, 23, 24, 27 and 33, which I include in this recommendation under different numbers.

The wages of the employees in 1918 and 1919 were adjusted by Boards of Conciliation. In the case of the 1918 Board, the representative of the Company made a minority report and in 1919 the representative of the Employees made a minority report. It is worthy of note that the Officials of the Company increased the amount recommended by the majority report of 1919. The increases granted the employees since 1917 amounts to 16 cents per hour. In 1917 the fare on the main line from Ottawa to Aylmer was three tickets for 25c. This has been increased to 50c. for three tickets, which is double the fare of 1917, while the wages of the employees are far from double. Also, transfer privileges formerly enjoyed by the patrons of the road have been discontinued, further increasing the revenue of the Company.

The Board of Conciliation appointed in the London and Port Stanley and the Hamilton radials granted a maximum of 52 cents for motormen and conductors on passenger cars. The Guelph radial was settled on the same basis. While I consider these awards too low yet in the hope of bringing about a settlement of the dispute, I am recommending with a few variations, the same remuneration in the various classes.

#### RATES OF WAGES RECOMMENDED.

##### MOTORMEN AND CONDUCTORS.

First six months.....	45	cents.
Second six months.....	48	"
Second year men.....	50	"
Third year men.....	52	"

##### FREIGHT CREW.

Motormen and conductors.....	56½	"
Brakemen.....	47	"
Trolleyman.....	45	"

##### POWER PLANT EMPLOYEES.

Runners or operators.....	50	"
Oilers.....	44	"

##### TRACKMEN.

Trackmen.....	47	"
Labourers.....	47	"
Track foremen.....	50	"

##### MOTOR AND TRUCK REPAIR MEN.

First six months.....	45	"
Second six months.....	48	"
Second year.....	50	"
Third year.....	52	"

##### LINEMEN.

Linemen.....	52	"
Groundmen.....	48	"

##### MISCELLANEOUS.

Snow plow and sweeper work.....	57	"
Flagmen and switchmen.....	\$3.50	Per day.
		Per month.
Aylmer Station agent.....	\$140.00	

##### CAR BARN AND SHOP MEN.

Included are machinists, armature winders, carpenters, blacksmiths, air brake fitters, trouble men, car cleaners, helpers and metermen.

It is recommended that the employees in the car barns and shops as enumerated above be given an increase of 11 cents per hour all round over the present hourly rate.

1. The Company will not discriminate against any of its employees by reason of their being members of Division No. 591.

2. UNIFORMS.—The Company will pay one-third of the cost of uniforms of motormen and conductors who have been in their employ for one year. Two-thirds of the cost for those of two years and will furnish free uniforms for those in the service three years or over. Uniforms to consist of coat, vest, pants and cap each year. Winter pants every two years and overcoat every three years.

3. Men operating sweepers or snow plows to have the privilege of leaving same on siding at regular meal time. Should Company desire continuous operation they shall supply meals for men free.

4. If motormen or conductors [are] taken from their regular work to act as switchmen, they shall receive their regular wages while so engaged provided work would have been available as motormen or conductors.

5. All employees to receive time and one-quarter on Sundays and statutory holidays.

6. Conductors, both regular and relief, on main line shall be given \$60.00 change. On other lines, \$40.00 change.

7. Officers of the Association shall be granted leave of absence on Association business in so far as the regular operation of the service will permit.

8. The Officers of the Association to be permitted to post notices in the waiting rooms and barns.

These wages and conditions to be in force for one year from July 1st, 1920 to July 1st, 1921.

(Sgd.) JOSEPH GIBBONS.

### Report of Board in dispute between the Vancouver and Victoria Gas Companies and their gas workers

A REPORT was received from the Board established to deal with the dispute between the Vancouver and Victoria Gas Companies and certain of the employees of the said companies, being gas workers. The Board was composed as follows: Mr. Charles E. Tisdall, Vancouver, chairman, appointed on the joint recommendation of the other two members, Messrs. A. G. McCandless and Victor R. Midgley, Vancouver, nominees of the company and employees respectively. The report was signed by the chairman and Mr. McCandless and contained recommendations as to settlement of the dispute. Mr. Midgley did not concur in these findings and presented a minority report.

#### Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Vancouver and Victoria Gas Companies, employers, and certain employees of the said Companies being members of Gas Workers' Union, Vancouver, B.C., and Gas Workers' Union, Victoria, B.C., employees.

Vancouver, B.C., August 13th, 1920

Hon. G. D. Robertson,  
Minister of Labour,  
Ottawa, Ont.

Sir,

The undersigned Board of Conciliation and Investigation, to whom the above dispute was referred, beg to report as follows:

The Board, consisting of Charles E. Tisdall (Chairman) and Messrs. A. G. McCandless (employers) and Victor R. Midgley (employees), having been duly sworn in, held its first meeting on Monday, August 2nd, in the Court House, Vancouver. Regular sessions were also held on Wednesday, August 4th, Thursday, August 5th, Friday, August 6th, Monday, August 9th, Tuesday, August 10th, Wednesday, August 11th, Thursday, August 12th, and Friday, August 13th. One visit was also made to the Company's Vancouver plant. A session was convened for Tuesday, August 3rd, but owing to the absence of a material witness, dispersed without taking evidence.

The sessions of Monday, August 2nd, and Wednesday, August 4th, were devoted to obtaining information as to the

matters in dispute, and an attempt was made by the Board to get the parties to the dispute together and settle the differences themselves. We regret to say the attempt was ineffectual, and on Thursday the Board proceeded to receive formal evidence.

Messrs. William Saville, General Secretary for the British Columbia Electric Railway Company, John Keillor Manager, Vancouver Gas Company, and F. H. Hewlings, Superintendent, Victoria Gas Company, appeared for the employers and Messrs. J. W. Friend, President, Vancouver Gas Workers' Union, Arthur Watson, Secretary, Vancouver Gas Workers' Union, and R. Nugent, Committeeman, Vancouver Gas Workers' Union, together with A. J. W. Burbridge, President, Victoria Gas Workers' Union, and G. Leckie, Committeeman, Victoria Gas Workers' Union, both of Victoria, appeared for the employees. The principal points in dispute being an adjustment of wages, time and a half for Sunday work and Dominion holidays, and general working conditions.

The evidence given was thorough and disclosed a most commendable good feeling between employer and employees. After careful consideration of this evidence, and in view of the fact that the employees have received an increase of  $14\frac{1}{2}$  cents per hour either by way of increased wages or cost of living allowance during the year ending June 30th, 1920, the Gas Workers now being paid what we believe are the highest wages in Canada for the like work, we recommend for acceptance by both sides to the dispute the following settlement:

That the agreement entered into on July 10th, 1919, be continued to June 30th, 1921, except in the following respects.

That Section 1 be struck out, and that the following be inserted instead:

1. These rates to remain in effect from July 1st, 1920, to June 30th, 1921.

Section 7 to have added to it the following: "Shift workers taking the shifts from 7 a.m. to 3 p.m. and from 3 p.m. to 11 p.m. on Sundays, shall be paid  $12\frac{1}{2}$  per cent in addition to the regular rate of pay for such shift." The Gas Companies agreeing to eliminate for such shift Sunday work so far as it is possible, consistent with the proper operation of the plants.

Section 13 to be struck out and the following substituted:

13. The following shall be the rates of pay during the life of this agreement:

	Per hour.
Stoking machine operators.....	.69½
Stoking machine operators' helpers....	.67
Furnace men.....	.67
Retort house coke men.....	.67
Water gas operators.....	.69½
Water gas operators' helpers.....	.67
Works labourers.....	.59½
Works labourers when clinkering.....	.62
Coke shipper.....	.59½
Bricklayer and carpenter (jobbing work).....	.69½
Works fitter and derrick engineer....	.72
Blacksmith.....	.71½
Blacksmith and fitter helpers.....	.62
Boiler firemen.....	.67
Coal conveyor man.....	.67

#### DISTRIBUTION DEPARTMENT.

Leading gas fitter.....	.77
Gas fitters and meter setters.....	.72
Trouble men.....	.72
Light truck men.....	.62½
Mains and service fitters.....	.74½
Mains and service fitters' helpers.....	.62
Mains and service fitters labourers....	.59½
Syphon man.....	.62
Meter repairers.....	piece work.
Meter shop mechanic.....	.69½
Meter shop prover.....	.62
Meter shop helper.....	.62
Store keeper.....	.62

Section 14 to be struck out.

The rates of pay have been made on the basis of the present minimum rates plus the cost of living adjustment, which amounts to  $9\frac{1}{2}$  cents, with the exception of a few classifications which parties mutually agreed to prior to the meeting of this Board. The employees of the Victoria Gas Works to receive the same rates as at present, when such rates are not named in this award.

We regret to state that Mr. Victor R. Midgley does not agree with this award.

All of which is respectfully submitted.

(Sgd.) CHARLES E. TISDALL,  
Chairman.

(Sgd.) A. G. McCANDLESS.

#### Minority Report

In the matter of the Industrial Disputes Investigation Act, 1907, and a dispute between the Vancouver and

Victoria Gas Companies, employers, and certain employees of the said Companies being members of the Gas Workers' Unions of Vancouver and Victoria, employees.

Vancouver, B.C.,  
August 16th, 1920.

Minister of Labour,  
Ottawa, Ont.

Sir,

The undersigned member of the Board appointed to investigate the above dispute regrets his inability to agree with the majority, and reports as follows:

The employees' application for the Board set forth two points upon which they and the employers had been unable to agree.

The evidence of Mr. McCallum of the Provincial Department of Labour and the evidence of Mr. Kidd, General Manager of the B. C. Electric Railway Company, corroborated the statements of the men that when they returned to work after a short strike, there were only two points in dispute.

The two points demanded by the men were:

First: An adjustment of wages on the first of July, 1920, based on the cost of living.

Second: Time and one half for work performed between 7. a.m. and 11 p.m. by two shifts on Sundays and holidays.

The representatives of the employers, however, insisted upon reviewing all of the conditions of employment, and in addition to opposing the above mentioned points, also opposed a continuation of the clause which included an allowance for clothing in the cost of living adjustment.

The report of the majority abolishes the cost of living clause entirely. The 9½ cents per hour the men have obtained during the last year is added to the minimum rates, and the total has been made the standard rates for the coming year.

In other words the present rates of pay have been made fixed rates for the year without any cost of living adjustment. If there were any reduction in the cost of living this would be equal to an increase in wages, but with living costs steadily increasing the elimination of the cost of living clause will result in a reduction of *real* wages.

The other two members of the Board have conceded the principle of extra pay for shift work done on Sundays and holidays, but instead of the time and one-half that the men asked for have only allowed time and one-eighth, *i. e.*, one hour's extra pay.

The men's demand for time and one-half is based on the ground that a great deal, if not all, of the Sunday and holiday work could be eliminated, and they contended that only by the penalty of extra pay would the work done on these days be reduced to a minimum.

There are only some twenty or twenty-five men affected by the Sunday work, and in the opinion of the writer the one hour's extra pay is not sufficient penalty to ensure the reduction of Sunday work, and while only one section of the employees are slightly benefitted thereby, all of them are affected by the loss of the cost of living adjustment clause.

The Companies affected are subsidiaries of the B. C. Electric Railway Company. Mr. Saville, for the employers contended that there was not another gas company in Canada paying time and one-half for this class of work. The men while admitting that they did not know of any gas company granting this concession, countered by showing that some six hundred employees of the B. C. Electric Railway Company had secured time and one-half for shift work on Sundays.

In the opinion of the minority, the representatives of the men justified their demands for a cost of living adjustment dating from July 1st, 1920, and for time and one-half for shift work performed on Sundays and holidays.

(Sgd.) V. R. MIDGLEY.

## REPORT OF ROYAL COMMISSION TO DEAL WITH DISPUTES IN CONNECTION WITH COAL MINING OPERATIONS IN NOVA SCOTIA AND NEW BRUNSWICK

**A** REPORT of a Royal Commission, which was established in the month of July last to deal with various disputes in connection with coal mining operations in Nova Scotia and New Brunswick, was received in the Department on September 13 and on account of its importance is included in the present issue of the *LABOUR GAZETTE*. The report contained the unanimous recommendations of all three members of the Commission, which was composed as follows: Mr. E. McG. Quirk, Montreal, Sir William Stavert, Montreal, and Mr. W. P. Hutchinson, Moncton, N.B., Mr. Quirk being selected as chairman. The appointment of this Royal Commission was based on a recommendation made by a Board of Conciliation and Investigation established under the Industrial Disputes Investigation Act, 1907, to deal with a dispute between the Dominion Coal Company and its employees, in the month of July last. Demands had been made on behalf of employees of various mines for the readjustment of their wage scales. The above mentioned Board of Conciliation and Investigation reported that no public interest could be served by an investigation restricted to one company alone and that, whereas several Boards either meeting simultaneously or successively would find it almost impossible to arrive at a common agreement, and whereas the stability of industry and the conservation of the public interest are most desirable at the present time, the best course would be to appoint a Royal Commission "with full power to deal with the whole coal mining industry of Nova Scotia with a view to making such recommendations and findings as, in its judgment, will tend to stabilize the industry and to best conserve the interests of mine workers, the operators and the public."

Apart from questions affecting the coal mining industry of Nova Scotia the Board was empowered to deal also with

certain difficulties existing in connection with questions pertaining to the coal mining operations which are being carried on in the Minto District in the province of New Brunswick.

The three members of the Commission visited the different mining districts in Nova Scotia and New Brunswick, conferred extensively with operators and representatives of the men, and, as occasion served, with miners other than representatives, going down into and exploring the mines, and inspecting housing and other living conditions at most of the places visited. Sittings were also held at Glace Bay, Halifax, and Fredericton, at which the miners' claims and the companies' positions respectively were discussed. The demands of the men, based on their grievances are outlined by the Royal Commission in its report under three categories, as follows:

1. Incidentals appertaining to technical conditions in general, both underground and on the surface.
2. Housing and other living conditions.
3. Specific increases in remuneration.

The Commission has dealt first with Category One in a schedule attached to the report, where it will be found that the incidental demands, which are in detail and numerous, are set forth in their numerical order as presented, with the findings or replies of the Commission closely following in each case.

With regard to Category Two, the Commission has submitted a strong recommendation in favour of better housing and improvements in other living conditions. The Commission also recommended that the attention of the civil authorities, both provincial and municipal, should be drawn to the above findings to ensure the necessary steps being taken to ameliorate the deplorable conditions which were found to exist.

With reference to Category Three, the

Commission recommended that the demands of the men under this head should be met in full.

The Commission has also dealt in its report with the questions of output, equipment and interruptions of work, and has recommended the establishment of adjustment boards to deal with any disputes or grievances which may arise during the period of the next contract.

The report of the Commission was communicated by the Department of Labour to the companies and employees' representatives respectively concerned.

The full text of the report is as follows:

Sydney, N.S.,  
Sept. 9th, 1920.

To the Honourable  
The Minister of Labour,  
Ottawa, Canada.

The undersigned Commissioners appointed by Minutes of Council, approved by His Excellency the Governor General on 3rd July, 1920, to investigate coal mining operations in the Provinces of Nova Scotia and New Brunswick, have the honour to report that on assuming our duties we made Sydney our first objective. On arriving in that city we placed ourselves in communication with all the operators in Nova Scotia, with the recognized representatives of the men and later with operators and men in New Brunswick. We append a list of operators so communicated with and indicate on the list the names of the operating companies who responded and were represented at our conferences.

We have visited the principal mining districts in both Provinces, and spent considerable time at Glace Bay, the collieries in that district which are designated "Dominion," with varying numbers, Reserve, New Waterford, Sydney Mines, Inverness, Pictou, Stellarton, Westville, Springhill, Joggins and Minto, conferring extensively with operators and representatives of the men, and, as occasion served, with miners other than representatives, going

down in and exploring the mines, and inspecting housing and other living conditions at most of the places visited. During the time devoted to such investigations we placed ourselves in the hands of the representatives of the men and of the operators and, in the presence of both, investigated grievances, and representations of the men, with explanations of the Operators, at close range with the principal object of absorbing the viewpoints of the men and operators and arriving at an understanding knowledge of the grounds upon which the men make their demands.

We also held formal conferences first at Glace Bay, on the 20th and 21st July, at Halifax from 9th to 15th August, inclusive, and at Fredericton on 18th and 19th August. At these conferences the representatives of the men attended in force, some twenty all told, consisting of the President (Mr. Baxter), the Vice-President (Mr. Ryan) and the Secretary (Mr. McLachlan) of No. 26 District, and representatives from the different workmen's locals in the District. The operators were also largely represented. The procedure followed was the formal presentation of the demands of the men by Mr. Baxter, who supported the demands by extensive argument, and who, in turn, was supported by the Vice-President and Secretary, as well as by the representatives of the different locals. The demands are similar in all respects to demands placed in the hands of the operators, with one exception, by the representatives of the men in April last. The men had their case well prepared and it was presented in a capable and respectful manner. The representatives of the operators replied at length and presented their explanations of the grievances advanced by the men and their views of the demands put forward. Stenographic records of the proceedings of the different conferences were taken and will accompany this report in typewritten form, bound in volumes, together with the various exhibits which are referred to and which latter consist of statements and memoranda presented

by both sides in support of their arguments.

After considering the very great differences existing in conditions as between the Provinces of Nova Scotia and New Brunswick, the Commission has decided to deal separately, in some respects, with these Provinces in its findings and recommendations.

The demands of the men, based on their grievances, may be divided into three categories as follows:

I. Incidentals appertaining to technical conditions in general, both underground and on the surface.

II. Housing and other living conditions.

III. Specific increases in remuneration.

The Commission has dealt first with category one in a schedule attached to the report, where it will be found that the incidental demands, which are in detail and numerous, are set forth in their numerical order as presented, with the findings or replies of the Commission closely following in each case.

With regard to category two, Housing and other living conditions, we find:

That in view of the fact that the Housing, domestic surroundings and sanitary conditions of the miners are, with few exceptions, absolutely wretched, and that such conditions have a deterrent effect on the miners' ability to produce coal, and are a menace to themselves and families, and further, that children brought up in such an environment have not the same chance of life and health as children reared under better conditions, as proven by Government statistics as to infant mortality, it is therefore recommended that the Companies that own the houses put and keep them in proper repair and that a sewerage system be devised and inaugurated whereby surface closets will be eliminated, or that installation of a modern septic sewerage system be provided where it is found that the ordinary sewerage system is not feasible. Suitable kitchens should also be provided where they do not now exist.

In the matter of water facilities for the houses of the mine workers, your Commission recommend that an adequate supply be furnished and so conveniently located that the miners and their families may avail themselves of it. Pure water which is an essential, should be supplied each family in a quantity sufficient for all purposes of domestic use.

In making the foregoing recommendations the Commission is actuated by the conviction that, for humanitarian reasons, for the present and future well-being of the miners and their families (it being from the miners' families of today that the miners of tomorrow will be drawn) and to assure to the industry the necessary recruits to maintain the force required to achieve the success of the industry, it is essential that such improvements be effected.

It is also recommended that the attention of the civil authorities, both Provincial and Municipal, be drawn to the above finding to ensure the necessary steps being taken to ameliorate the deplorable conditions which we found to exist.

Seeing that rentals applying to miners' houses little more than cover repairs, if that, not to mention depreciation, and that the proposed improvements will occasion extra repairs, if only to the sanitary feature of the improvements, the Commission is of opinion that as and when the improvements recommended above are effected, an increased rental of 50c. per month per \$100 or fraction of \$100 expended in improvements, should apply to provide for such extraordinary repairs.

With reference to category three, the Commission in the process of carefully studying the principal demands of the miners, viz.: those in respect of the general increase, originally inclined to the adoption of a plan by which the demands would be met first, by a flat increase of one-third of the amounts named, and second by increased tonnage rates on a sliding scale to correspond with the increased output, the larger the output the greater the remuneration per ton, the benefit to be divided between all employees, the whole with a prospect of making it possible, without undue effort on the part of the men, to realize even larger remuneration than that demanded. The prospect of increased output was based on a plan of adjustment by which the numbers of

Contract men could be increased by transferring men now doing datal work, but capable of undertaking contract work, to such latter work, and by which the Contract men would receive such proportion of the benefits as would make their remuneration attractive. It however occurred to the Commission on more mature consideration that, for the reason that it would take some considerable time, preparation and study, on the part of both operators and men, to bring about the necessary adjustment, and that therefore the men would not realize the benefits, perhaps for a number of months, the Commission finally decided as follows:

It recommends subject to conditions as set out below and also subject to rights under existing contract, if any, a specimen of which is referred to elsewhere, that the demands of the men under this head be met in full as follows:

An increase of one dollar per day for all datal men, 24 cents per ton on all tonnage rates, and 25% on all local contracts, all yardage, deadwork and timbering, the increases to apply to all districts with the following exceptions, viz.:

In Pietou County the increase shall be 27% on tonnage rates.

In the mines of Nova Scotia Steel and Coal Company the present lowest tonnage rate to be increased 24c per ton and a like percentage of increase to be added to all other tonnage rates, for example, a ton rate is .81c, twenty-four cents added makes it \$1.05 or an increase of 29.5%. A lower height of coal is paid \$1.18. Twenty-nine point five per cent added to \$1.18 equals \$1.53, and so on.

Contract rates for trimmers shall be increased 27%.

Rates for coal shippers and other employees connected with the piers to be increased 27%.

The increases to date from or be retroactive to the time of the issue of the Commission, say 1st July last. The recommendation is however subject to the condition that it is to be distinctly understood and agreed that operators and men will agree to co-operate and bring about the adjustment referred to, and within twelve months, or say on or before 1st September, 1921, adopt the

partial advance and sliding scale scheme, the particulars of which are more fully set out below, together with examples of its working. The partial advance and sliding scale scheme may be put into effect at any time, by any Company at any mine previous to 1st September by mutual consent of operators and men.

Under the partial advance and sliding scale scheme the men will receive an advance upon their present rates of pay on the following basis, that is to say:

A flat increase of one-third of the increases demanded and allowed conditionally up to and including 31st August 1921, on the presently existing rates, and a further increase on the basis of increased output to be calculated and applied as follows:

By computation of man days for a stated period, any one month, divided into total output for the period in question, the average output per man per day is ascertained. Should there be an increase of output per man per day over and above the similar average of the mine or mines or company which shall come into question, for the first six months of the present year, the men are to be rewarded for such increase by there being set aside by the operators a sum to be calculated on the following scale:

For an increase up to and including

	1/10	tons	10	cents	per	ton	on	total	output.
2/10	"	19	"	"	"	"	"	"	"
3/10	"	29	"	"	"	"	"	"	"
4/10	"	40	"	"	"	"	"	"	"
5/10	"	52	"	"	"	"	"	"	"
6/10	"	65	"	"	"	"	"	"	"
7/10	"	79	"	"	"	"	"	"	"

The sum so set aside to be divided among and paid to the men monthly on the following basis, viz.:

The contract or producing men, as a body to receive \$2.00 for every \$1.00 to be paid the datal or non-producing men, inclusive of pier men, construction men, section men, but exempting such men as come under the McAdoo schedule, so called, as a body. In the subdivision the contract men to be paid in proportion to their regular earnings during the period in question and the datal and other men mentioned above, excepting McAdoo schedule men, to be paid equal amounts without reference to proportions. For example:

In case of a force all told of 1,000 men, 400 of which are contract men and 600 datal men and having a month's increased remuneration of \$21,000 to be divided, the Contract men as a body would receive \$12,000 and the Datal men would receive \$9,000. The \$12,-

000 would be distributed among the contract men in proportion to their regular earnings for the month, and the \$9,000 equally among the datal men, or say \$15 each.

In the case of a property selected for the purpose of illustration, should the suggested adjustment of datal men and contract men result in increasing the output per man per day to 2.4 tons, which is 20% in the case of that property, its present output being 2.00 tons per man per day, or say slightly over half of the difference between the output of 1914, which was 2.7, the percentage of increase paid the men would be approximately 85% of the demands for contract men and 57 per cent of the demands for datal men, which, together with the flat increase of 33⅓ per cent, would be approximately equal to the increase demanded, or if the adjustment should result in increasing the output per man per day to 2.7 tons, which was the output in 1914, the percentage of increase paid the men would be approximately 67% over and above the demands for contract men, and 34% over and above the demands for datal men, which together with the flat increase of 33⅓% would amount to considerably more than is demanded, or approximately an average of \$2.89 per day for contract men and \$1.67 per day for datal and other men referred to in that class, as against \$1.44 for contract men and \$1.00 per day for datal men, the increases demanded.

The increased output by tenths of a ton, together with the flat increase of 33⅓ per cent, will affect the men approximately according to the following table—an average output of 6 tons per day per Contract man being used in the calculation:

TABLE.

Tenths of a ton Increase.	Increase per day.	
	Contract Men.	Datal Men.
1 tenth.....	.78	.45
2 tenths.....	1.06	.57
3 tenths.....	1.36	.72
4 tenths.....	1.70	.90
5 tenths.....	2.06	1.11
6 tenths.....	2.46	1.37
7 tenths.....	2.89	1.67

The above calculations are based upon the adjustment plan referred to above,

which contemplates increasing output, and increasing producing men and proportionally decreasing Datal men, on a sliding scale.

The Adjustment Board provided for by the report should be able to arrange to mutual satisfaction any difficulties which may arise in giving effect to the plan providing for the sliding scale of increase, such as the basic output which should apply in respect of new mines, the percentage of increased output or other questions in respect of unusual or extraordinary conditions and the apportioning of Construction and other men used at a distance from the bank heads to the operation which may come in question or otherwise. The Commission therefore feels that by a liberal use of the Adjustment Board and of amicable co-operation, it will be found that disputes can be promptly settled to the mutual advantage of both operators and men.

It is recommended that all moneys accruing under the retroactive feature of the agreement shall be due and payable within sixty days of the signing of the agreement.

#### EQUIPMENT.

The Commission finds that at some points both operators and men are prejudiced by reason of inadequate equipment, that is to say, where want of pressure for radials or punching machines is complained of it is found that an insufficiency of power for the purposes of the mines exists. The necessary increase of power would result in greater output to the mutual benefit of operators and men. Similarly additional rakes should be provided, in some cases, to the same end. In some instances the wash houses are inadequate and unsanitary. The Commission is impressed with the grievances of the men on these scores, and recommends that the operators give special attention to those features of the equipment by enlargement, adjustment to modern systems and observance of rules governing sanitation where such is required.

## RADIALS.

In some places radial machines are being installed with good results so far as increased quantity and cost of production are concerned. After viewing the machines at work and on making comparison of their efficiency with the punching machines and hand picks, which we have also seen at work, we have concluded to recommend the more universal instalment of the radial machines in such places as they may be regarded as fitted for.

In making such improvements and additions as are above referred to, and in generally bringing equipment up to date, much needed relief will be afforded the men. The coal shortage will also be lessened, to the benefit of the public, and the operating companies will probably increase their margin of profits through reduction of percentage of overhead charges on greater production.

## ELECTRIC LAMPS.

The Commission recommends that where practicable electric lamps should be installed by the operators as a means to greater efficiency and larger production, instead of the so-called safety lamps, but the advisability of the collateral use of the safety lamps should be borne in mind for the purpose of detecting the presence of gas, that is to say, an occasional safety lamp should be available and easy of access to parties of men working in places where gas is likely to make its appearance, and that the advisability for making the tests should be kept prominently in mind.

## GENERAL.

On looking closely into the comparison between the percentages of the increased cost of living on the one hand and the percentages of increased remuneration paid on the other, together with the shortening of hours which has recently been enjoyed by the men, we find that by actual computation the cheap fuel and rent by which the men benefit has

the effect of reducing the percentage of increased cost of living from 146 per cent as shown by the *Labour Gazette*, to 100 per cent. We also find that the remuneration has been increased on the average by approximately 100 per cent. It may therefore be said that wages have been increased to correspond with the increased cost of living, and that the men's standard of living has been increased by the reduction in the hours worked, from ten hours to eight hours per day, a reduction which may be said to be an advantage enjoyed by the men in addition to having maintained their previous position relative to income and expenditure.

It is claimed for the men that to maintain their position relative to the increased cost of living is not sufficient for the reason that they had no margin of income over expenditure at the time of the previous date with which the present is compared, and that they wish for more money to spend and to improve their standard of living. That is a claim which is similar to many which have heretofore been made elsewhere, and which will many times be made again, and we are in sympathy with it, as may be seen in our findings regarding housing and other domestic conditions, and in our findings regarding other demands, including remuneration. We would, however, point out that whatever may be said on the score of improving standards, the present is not a time for increasing expenditure, but, in view of the requirements for reconstruction and repair of the damages of warfare, is rather a time for increased energy and carefully guarded thrift.

In contrasting working conditions and rates of wages paid to labour in various parts of Canada, in other industries, with those paid to datal men in the mining industry in Nova Scotia, and New Brunswick, and, having regard to the benefits enjoyed by the mining men by reason of cheap coal and rentals (which are referred to in another paragraph) to the actuarial percentages of danger to life and to the question of

comforts and discomforts in mining and other industries, to the permanency of employment and elimination of bad weather as a factor in the mining industry in Nova Scotia (the contrary being the case, viz., the substitution of a uniform temperature the year round so far as underground men are concerned, with a minor exception) we find that the men engaged in the coal mining industries do not greatly suffer by comparison. By the same process of reasoning we find that contract men are in a similarly favourable position as compared with highly skilled labourers in other industries, because of similar advantages.

It has been brought to the attention of the Commission that a prevalent custom exists among the miners of taking what they term a "holiday" or "vacation" on account or because of some minor grievance, thereby curtailing that production which is so necessary to the life of the country. The Commission recommends that the officers of the U. M. W. of A. take occasion to condemn and discourage such practices, believing that the Adjustment Board provided by this finding will eliminate the excuse for such "holidaying" or "vacationing."

The Commission was impressed with the apparent injustice suffered by fourteen men during the first week of July in the present year, in failing to obtain access to the Dominion Coal Company's No. 14 Mine at New Waterford after having presented themselves ready for the day's work. The particulars of the circumstances are set out in a presentation by Mr. Baxter as recorded on page 8 of the proceedings of the conference in Halifax on 14th August. The men in question are claiming indemnity for loss of time, but the matter could not be taken up by the Commission without prejudice to the prompt production of this report. It is therefore recommended that the Board which is provided for in this report, take the matter up as soon as possible, enquire carefully into the merits of the case and give a ruling.

Similar remarks to the above apply in the Crawford case, so-called, which is also presented by Mr. Baxter. Particulars may be found in the record following the presentation of the case of the fourteen men referred to above, where the case is further explained by Mr. Hays who represented the Springhill Lodge at the conference in Halifax.

#### OUTPUT IN THE UNITED STATES.

The Commission has noted that the output per man per day in the United States is greatly in excess of that produced in the Nova Scotia coal fields and have also noted that the cost of production per ton is much less in the United States than in Nova Scotia. Under these circumstances it takes occasion to observe that in a competitive market the United States coal operators have an advantage over the Nova Scotia operators. The attention of the miners in Nova Scotia therefore is called to the above conditions and the suggestion is made that efforts be put forward to remedy them as a matter of self preservation, and to assure to the industry the permanency which is so essential to the industrial welfare of the country and the uninterrupted continuance of work for the mine workers.

#### ADJUSTMENT BOARD.

Believing that disputes or grievances are likely to arise from time to time in matters of more or less importance which cannot be foreseen at the time of rendering this report, or which the Commission in making their finding could not anticipate and provide for, it is recommended that this finding constitute a contract between the Mine Operators and the United Mine Workers of America for the period ending 31st May, 1922, and thereafter until cancelled by thirty days' notice from either party. It is also recommended that, in order that no cessation of work may take place from strikes, lockouts, "vacations" or similar causes, an Adjustment Board of three be ap-

pointed by co-operation between operators and men, to determine all disputes which may occur during the life of the contract, such Board to consist of one member to be named by the Company or companies affected, and one member to be named by the Executive of the U. M. W. of A. these two to choose a Chairman, and failing to agree, such Chairman shall be named by the Federal Minister of Labour. The procedure—in case of disputes—to be as at present up to the point of the interview between the Executive of the U. M. W. of A., and the highest operating official of the Company concerned. Failure to agree will automatically call into action the services of the Adjustment Board whose finding shall be binding on the Company and the men. The expense of this Board shall be borne equally by the Company or companies affected and the U. M. W. of A., such expense to be in accordance with that Section of the Industrial Disputes and Investigation Act of 1907, and amendments, which refers to compensation. It is further recommended that the manager or official in charge of each Company designate a stated hour each week in which to meet the Men's Committee for the discussion of any grievances or other matters which may arise and which may affect the welfare of the Company and the men, if any.

In making the above recommendations providing for the formation of an Adjustment Board and periodical meetings between the operators and a committee of the workers, the Commission desire to disavow any intention of subscribing to "compulsory arbitration" but are firmly of the opinion that such a procedure during the life of the contract would be, with the co-operation of the companies and the men, the most effective and business-like method of settling any minor disputes that might arise.

It is therefore earnestly recommended to both men and operators that in acting upon these recommendations every effort towards amicable co-operation should be made.

#### DOMINION COAL COMPANY CLERKS.

The Commission has taken into consideration the case of the Dominion Coal Company's clerks, on representation of Mr. Baxter, and find that there is in existence an agreement dated July 15th, 1919, between the Dominion Coal Company and its clerical staff which provides machinery for the adjustment of grievances. It would also appear that the clerks have not taken advantage of this machinery although requested by the Chairman of the Commission to do so, on the understanding that, failing a settlement, the Commission would deal with the matter. It is therefore felt by the Commission that the terms of the contract should be carried out and it recommends that the Company and the representatives of the men should take the matter up and by co-operation endeavour to effect an amicable settlement. In the event of failing to do so, the Commission recommends that the parties interested have recourse to an Adjustment Board on the plan laid down in another paragraph in respect of the Nova Scotia Steel and Coal Company's clerks.

#### EXISTING CONTRACTS.

In making our finding subject to rights under existing contracts, if any, we refer above to a specimen which is dealt with as follows: The Commission has taken cognizance of the award of the MacKinnon Conciliation Board, so-called, in respect of the Dominion Coal Company and its employees, in which there is a clause providing for a revision of Schedule every four months period. This award is in effect as from January 1st, 1920, for one year. The men claim, and it has been conceded, that in April the demands which are before the Commission were submitted to the Dominion Coal Company and were not acted upon. Mr. McCann claims for the Dominion Coal Company that the contract is still in force as it originally existed, notwithstanding the notice which was filed with the officers of this Company at the end of the first four months period—

asking for a revision as provided in the award. The stenographic records will show Mr. McCann, when appearing at one of the conferences, as having expressed himself as follows:

The Dominion Coal Company is prepared to do everything within its means to ameliorate the condition of the workingmen. We are anxious to make life as easy as possible for everybody within reason.

In view of the men's claim that, having acted in respect of the four months' clause in the MacKinnon award, and of the Company having failed to respond, they are entitled to benefit by the finding of the Commission in respect of their demands, the Commission, while not attempting to decide a legal point, suggests that the claim referred to be allowed.

#### NOVA SCOTIA STEEL AND COAL COMPANY CLERKS.

The Commission was interviewed by a committee representing the clerical staff of the Nova Scotia Steel and Coal Company, but inasmuch as this staff was identified with the Steel industry solely in some cases and jointly with the Steel and Coal Industries in others, and as the mandate of the Commission was confined to industrial conditions as they affected the Coal Industry, the Commission realized that they could not, in justice to all concerned, deal with the question without exceeding their authority.

The Commission feels however that the Clerical Staff may have a cause for complaint, and recommends that in so far as the Colliery Clerks are concerned, the services of an Adjustment Board, similar to that outlined in another paragraph be created with the proviso that the appointment of representatives or members be by the Clerks' Union in one case and the Secretary of the Company in the other. The two so appointed to select a third, and failing to do so, the Federal Minister of Labour to so appoint a third. This Board to settle all

disputes under this head and their finding to be final.

#### MINTO DISTRICT, NEW BRUNSWICK.

The Commission intimated, earlier in the report, that it proposed to deal separately with mines and mining operations in the Provinces of New Brunswick and those in Nova Scotia. We find, however, on reaching this stage of our deliberations that most of our findings apply with equal force to conditions in both Provinces and we therefore confirm our recommendations accordingly. There are, however, some conditions which apply in particular to the operations at Minto, New Brunswick. They are set forth in the demands made for the miners by Mr. Baxter in his presentation of the case as reported on page two of the first day's conference at Fredericton, and may be dealt with seriatim as follows;

**DEMAND 1.** One dollar per day increase on all present day pay rates, and 27 per cent increase on all contract rates.

This has to do with the main question of increased remuneration which has been fully dealt with in another section of the report, and is intended to apply to conditions at Minto, but seeing that increases have occurred since 1st May, 1920, it is stipulated that these rates are to be regarded as being added to those in effect at that date.

**DEMAND 2.** Better ventilation of the mines. We recognize that perhaps because of mining at Minto being in its initial stages as compared with mining in Nova Scotia, the perfection in ventilation may leave much to be desired. It has been found, however, that the largest operator at Minto already has equipment at the spot and is proceeding with its installation. We also find that other operators at Minto recognize the importance of greater attention to this feature of the industry, and have expressed their intention of taking steps to improve conditions in that respect in the near future.

DEMAND 3. Check off of Union dues through pay office.

The Commission does not see its way to make any positive recommendation in this connection but would take occasion to observe that the practice has been adopted and is being followed by all the larger operators, and many of the smaller ones, in Nova Scotia, and the Commission suggests that the operators at Minto take into consideration the advisability of taking a favourable view of the request.

DEMAND 4. All pushing of boxes to be paid for.

The Commission finds that pushing of boxes cannot be as conveniently eliminated in the mines at Minto as in those of Nova Scotia, the principal reason being that head-room is not sufficient to permit of the use of horses. It may also be observed that distance of transportation underground is reduced by frequency of shafts, which is permissible by reason of the shallow over-burden, and that the proportion of cost on output which would be occasioned by the installation of mechanical haulage would be excessive. While, therefore, pushing cannot be eliminated or even largely reduced the Commission recommends that the cost of pushing should be included in the tonnage rate or be made the subject of negotiation in the different cases, between men and operators.

DEMAND 5. Better housing conditions; and adequate water supply for workmen.

The Commission has dealt with housing conditions and water supply elsewhere, and while it must admit that the Minto Mines do not appear to have the character of permanency which the Nova Scotia Mines have, it cannot greatly alter its recommendation in respect of Minto. It would, however, observe that because of a very much smaller degree of congestion, in respect of numbers of houses at any one point, the recommendation concerning systems for sewerage may for the present be waived.

DEMAND 6. Bell rope on both sides of shaft and a by-path to pass from one side of the shaft to the other.

The Commission finds that, where a bell rope is on only one side of the shaft, it is the simplest kind of an operation imaginable to attach a "bridle," making it possible to use the bell rope from either side of the shaft, and as the operators appear to be agreeable to provide a by-path to permit of passing from one side of the shaft to the other, the Commission does not feel that it is called upon to make any recommendation in this connection.

DEMAND 7. All workmen to be paid time and a half for overtime, and double time for Sundays and holidays.

The Commission would apply its findings as set out in this respect in other parts of the report to Minto, its decision being that the custom now prevailing be continued.

DEMAND 8. When a miner is taken from the working face to do shift work to be paid \$6.00 per day.

The Commission noted at the conference that the operators appeared to be willing to concede that when a miner is taken from the working face to do shift work he should receive his average rate of pay. The Commission considers this fair and recommends accordingly.

DEMAND 9. When a man reports for work he must be given work or a day's pay.

The Commission's reply to a similar demand included in the incidentals dealt with elsewhere is as follows: "The Companies have expressed willingness to place such men under such circumstances to the best advantage, recognizing the hardship and injustice to men so affected without consideration." As the operators at Minto seem to be in accord with the operators in Nova Scotia in this respect, the Commission does not feel called upon to take any definite action.

The attention of the Commission has been drawn to the absence of Coal Min-

ing Laws and Regulations in the Province of New Brunswick and recommends that the attention of the Provincial Department of Mines be brought there-to.

The following Minto operators were represented at the conference held at Fredericton, viz:

Harvey Welton, representing himself.

International Paper Company, represented by A. D. Taylor.

Rothwell Coal Company, represented by H. J. Evans and W. B. Evans.

Avon Coal Company, represented by Burton C. Wood.

John Henderson, representing himself.

Minto Coal Company, represented by Charles J. Coll and R. B. Hanson, K.C.

Grand Lake Coal Company, represented by J. A. Armstrong.

Before closing the report the Commission wish to state that they are deeply indebted to the officials of the operating companies and the Executive of the United Mine Workers of America and the various committee men, and others who interested themselves, for facilities extended to its members, and the cheerful manner in which co-operation was given. Such kindly consideration was of material assistance to the Commission. We also appreciate the courtesies of the Council of Glace Bay and those of the Governments of Nova Scotia and New Brunswick in so kindly placing at our disposal their Legislature Chambers in which to hold the Conference.

(Signed) E. MCG. QUIRK.  
W. E. STAVERT.  
W. P. HUTCHINSON.

List of operators communicated with by the Commission on instituting enquiries and investigations, those responding by attending the Conferences, or some of them, being distinguished by (A).

(A) Dominion Coal Company: H. J. McCann, Gen. Manager, Glace Bay, N.S., representing mines in Cape Breton and at Springhill.

(A) Nova Scotia Steel and Coal Company: T. J. Brown, Gen. Manager, Sydney Mines, C.B.

Indian Cove Coal Company: Thos. Hartigan, Gen. Manager, Sydney Mines, C.B.

Bras d'Or Coal Company: Geo. Burchell, Gen. Manager, Little Bras d'Or, C.B.

Inverness Railway & Coal Company: R. E. McLeod, Inverness, N.S.

Port Hood Collieries: Malcolm Beaton, Gen. Manager, New Glasgow, N.S.

Greenwood Coal Company: J. W. McLeod, Gen. Manager, New Glasgow, N.S.

Milford Coal Mining Company: Alex. Sutherland, New Glasgow, N.S.

(A) Acadia Coal Company: Felix Notebart, Gen. Manager, Stellarton, N.S.

(A) Maritime Coal, Railway & Power Company: Robert Bell, Gen. Manager, Joggins, N.S.

(A) International Coal Mining: William Maxwell, Gen. Manager, Westville, N.S.

(A) Minudie Coal Company: Geo. H. Sterne, Gen. Manager, Amherst, N.S.

Emmerson Coal Company: W. L. Barnes, Gen. Manager, River Hebert, N.S.

John T. Douglas, Glace Bay, N.S.

(A) Harvey Welton.

(A) International Paper Company: A. D. Taylor.

(A) Rothwell Coal Company: H. J. Evans and W. B. Evans.

(A) Avon Coal Company: Burton C. Wood.

(A) John Henderson.

(A) Minto Coal Company: Charles J. Coll and R. B. Hanson, K.C.

(A) Grand Lake Coal Company: J. A. Armstrong.

NOTE: The Inverness Railway and Coal Company, an operation of considerable size, being in the hands of a Receiver at the time when the Commission instituted enquiries and investigations, was not represented at the Conferences. The Commission took occasion, however, to visit the mines.

#### Schedule of Demands of District No. 29 United Mine Workers of America with replies by the Commission

##### GENERAL CONDITIONS UNDERGROUND.

1. All mining tools be sent into mine and stanchel at a convenient place on each landing and a man appointed to look after all tools and give to their owners.

Reply—

The Dominion Coal Company and the Nova Scotia Steel Company will place tools at the

top of working landing or within reasonable distance of the working places and will provide men to give out these tools.

Acadia Coal Company and Springhill now doing what is asked.

Intercolonial Coal Company will agree to stanchel tools at a reasonable place. In view of the favourable nature of the replies of the Companies quoted we do not hesitate to recommend that this demand be complied with so far as is possible and practicable.

2. A continuous service of riding rake after 12 o'clock noon where it does not interfere with the hoisting of coal.

*Reply—*

We recommend that present conditions be maintained or where possible or practicable improved by negotiation between operators and men.

3. Where a miner has a miss shot and loses coal that he be made up to his average day's pay.

*Reply—*

Where a miner has a miss shot and loses coal it is recommended that he be compensated for actual time lost while at the face, plus the cost of his explosives, and detonator.

4. That 25 feet be the maximum distance for shovelling down coal in pitching seams.

*Reply—*

The Commission recommends that the demand in this respect be complied with, and that where shovelling beyond 25 feet shall be required, the cost shall be a matter of negotiation between the men and the operators.

5. Where pushing boxes in pitching seams cannot be abolished that pushing boxes be paid for at the rate of five cents per ton, from 200 to 250 and an additional five cents for each fifty feet.

*Reply—*

We find that the operators recognize as we do the objections to excessive pushing, have undertaken to greatly eliminate it, and have already taken steps to that end. We also find that such pushing cannot be eliminated in all cases. Where it cannot be, the cost should be a matter of negotiation between operators and men.

6. When a man reports for work he must be employed and given work in an ordinary place or receive his average wage.

*Reply—*

The Companies have expressed willingness to place men under such circumstances to the best advantage, recognizing the hardship and injustice to men so affected without consideration.

7. All miners out of places receive \$5.50 per day.

*Reply—*

The operators' reply to this demand is that

in cases of men out of places and for whom there is work they shall get classification rate for such work. The Commission considers this fair.

8. That four rooms be given to all machine runners under-cutting in rooms and sufficient compressed air to supply all machines.

*Reply—*

The reply of the operators is as follows:—

Four places will be given to all machine runners under-cutting in rooms and sufficient compressed air to supply all machines.

The Commission considers this a satisfactory reply.

9. All local contracts now in force to be incorporated in the general agreement.

*Reply—*

It is the opinion of the Commission that present conditions governing local contracts at different points should be maintained as far as possible and practicable.

10. When men lose time on account of pressure that Companies pay for time lost at the regular rate paid miners out of places.

*Reply—*

The operators' reply that all reasonable effort will be made by the Companies to supply men with pressure. The Commission feels that more cannot well be demanded under present conditions of equipment, on which latter point the Commission has made a separate finding.

11. That not more than two miners be allowed to work in one place and the men have the right to select their own butties when double shift is required.

*Reply—*

It is recommended that the men's demand in this connection be complied with except under exceptional circumstances, which should be adjusted between the Manager and a committee of the men, provided however, that in cases of a heavy fall of coal or other emergency, more men may be employed.

12. Where a rake of men are employed on a new lift that the Company run the riding rake down night and morning.

*Reply—*

The Commission accepts the reply of the operators to the effect that where riding rakes are in use the Companies will endeavour to take the men as near their work as reasonably practicable. We would however add that there appears in some cases to be ground for complaint because of inadequate equipment and because rakes should exist where they do not now. It appears to the Commission that it is an economic point of some importance that by extension of rakes greater efficiency, with increased output, can be attained to the mutual benefit of men and operators.

13. Where the pit starts in the morning and stops before 11 a.m., all datal hands be paid one-half shift, and when pit runs up to 12.30 p.m. all datal hands to receive one shift.

*Reply—*

The Commission feels that it cannot recommend any variation from the present custom.

14. That all employees shall receive time and a half for over time and double time for Sundays and legal holidays.

*Reply—*

The Commission recommends that the custom now prevailing be continued.

15. Where any men report for work in or about the mine they must receive a job or be paid a day's pay.

*Reply—*

The operators' reply to this demand is to the effect that they cannot bind themselves to find employment for men where no work is available, and the Commission sympathizes with that view.

16. That men are being hired on at the different collieries, making a change possible that the principle of seniority of service be recognized when making such changes providing that said employees affected are capable of fulfilling the duties required of them.

*Reply—*

The operators' reply is as follows: If this applies to the collieries that the man is working in, we are agreeable as this is the system in vogue at present. The management should be the judge as to the fitness of the man for the position. The Commission while approving of this reply would take occasion to recommend that seniority and corresponding ability be preferred to other considerations.

17. Resolved that we protest against coal companies changing conditions after contract has been drawn up; and further we demand that any proposed changes be discussed when wage agreement is being drawn up.

*Reply—*

It should be unnecessary for the Commission to enjoin upon either operators or men the necessity for living up to the terms of agreements entered into. A case was cited in this connection which seems to be the cause for the creation of this demand but the Commission cannot feel that any finding possible in respect of this demand will prevent a recurrence of cases similar to that cited. We understand that the case cited is now in process of adjustment in a manner satisfactory to all concerned.

18. Where new work is being started and no rate set for it that the men receive six dollars a shift till there is a rate agreed to between the Company and the men.

*Reply—*

If this demand is regarded as applying to men

working at the face, the Commission is agreeable and recommends the allowance of the demand.

19. That all timber set by miners and roads laid by miners be paid for at schedule rate.

*Reply—*

The Commission finds that the cost of timber set and roads laid by miners in rooms is recognized as being included in the tonnage rate.

20. Men turning their own fans, tending their own donkey, or shovelling down their own coal, when they cannot get a man, be paid the rate of \$5.50 per day.

*Reply—*

It is recommended that men compelled to turn their own fans, tend their own donkey or shovel down coal, when they cannot get a man, be paid the classification rate of such work in addition to what they may earn at the face in connection with their contract.

21. When a shortage of men occurs and two men are compelled to do the work of three men that they receive time and a half.

*Reply—*

The operators reply that two men cannot do the work of three men. The Commission understands that it is but rarely that the operators call upon two men to do three men's work, and that when it is done the custom is to compensate the two men, and therefore recommends that practices as heretofore maintained at different points should be continued.

22. That each local Union shall have complete jurisdiction in Union matters, over the mine or plant where its members are employed, and may determine by vote of its members at any of its regular meetings whether any new employee shall become a member of their Local Union. The right of self determination shall not be abridged by officials of the Company interfering in any union affairs.

*Reply—*

The Commissions does not see its way to disturb conditions in this respect as they have hitherto existed.

23. One dollar flat rate of increase for all datal paid men, and twenty-four cents per ton increase on present ton rate.

*Reply—*

This demand is dealt with elsewhere.

24. All local contract, all yardage, dead work and timber be increased 25 per cent.

*Reply—*

This demand is dealt with elsewhere.

25. Double shifted places to receive seven cents extra over the regular ton rate.

26. A double shifted single place to receive fifteen cents per ton over regular rate.

27. Continuous night work to receive ten cents extra over regular ton rate.

28. Where an under-cutting machine is working week about the machine runner to receive two cents per ton extra.

*Reply—*

The Commission understands that these and similar demands are now complied with in whole or in part at various places, and recommends that all four demands should be subjects of separate negotiations between men and operators at the different points where questions may arise. It is impossible to make a ruling which will apply at all places alike.

#### SURFACE

1. One dollar flat rate for all datal paid men excepting as provided in the following conditions

*Reply—*

This demand is dealt with elsewhere.

2. Any man working at mechanical repair work for three years to be considered a first grade mechanic.

*Reply—*

A man working at mechanical repair work three years shall be considered a first grade mechanic, but is not to receive a first grade mechanic's wages until there is a vacancy in a first grade mechanic's position, in which case, if competent, the senior man should receive the appointment and be paid as such.

3. That all mechanics, carpenters, blacksmiths, and all surface laborers be given an eight hour work day with one hour for dinner.

*Reply—*

If this demand means that all mechanics, carpenters, blacksmiths, and all surface labourers be given a nine-hour work day less one hour for dinner, or in other words an eight-hour day with a nine-hour spread, the Commission recommends that it be allowed.

4. Men employed on a job that requires continuous service to be paid time and a half for Sundays and legal holidays, when working his regular shift.

*Reply—*

The Commission makes the same recommendation in respect of this demand as was made regarding demand No. 14 (General Conditions underground), viz:

That the custom now prevailing be continued.

5. Engineers operating an engine of 800 h.p. to be paid \$6.00 per day.

*Reply—*

The Commission regards this as an alteration in the schedule of classification rates for which there does not appear to be sufficient warrant.

6. All other employees to receive \$1.00 per day flat increase, except car shunters who are to receive the brakeman's rate.

*Reply—*

This demand is dealt with elsewhere.

7. All firemen be brought up to the standard including head firemen, and increases to be added to that standard.

*Reply—*

The Commission cannot recommend the allowance of this demand.

8. Construction carpenters now receiving less than standard rate of wages be given the standard rate paid at the machine shops and all other increases added.

*Reply—*

The Commission cannot recommend allowance of this demand. It would seem to it, having regard to the circumstances, that the participation of the men in the general increase recommended should be sufficient.

9. Demand six-hour day for sinkers and a rate of \$1.25 per hour and the abolishment of electric hoists in sinking shaft.

*Reply—*

The Commission regards this demand as a matter of negotiation as between operators and men, as occasion arises.

10. That where there is a new agreement put in operation and a disagreement arises out of said agreement, involving loss of work for mine committee, and in the event of the Company being in the wrong, then the Company shall pay committee's expenses.

*Reply—*

The Commission cannot recommend the allowance of this demand.

#### SHIPPERS AND TRIMMERS

Increase of 27 per cent on contract rates and on those new rates, coal to be trimmed not more than 25 feet from the hatch. Extra work to be paid by the hour.

*Reply—*

The question of increase is dealt with elsewhere. The Commission recommends that the limit of 25 feet be allowed and that extra work be a matter of negotiation.

Coal shippers rates to be increased 27 per cent. All holidays to be paid for.

*Reply—*

The question of increase is dealt with elsewhere. The Commission recommends that the question of payment for holidays be a matter of negotiation.

All other workmen connected with piers be increased 27 per cent; all overtime to be paid time and one-half. A guarantee of \$30.00 per week for all shippers and trimmers in district 26 U. M. W. of A.

*Reply—*

The question of increase is dealt with elsewhere. The Commission recommends that the question of guarantee be a matter of negotiation, but does not see its way to allow the demand in respect of time and a half.

GENERAL CONDITIONS APPLICABLE TO UNDERGROUND AND SURFACE EMPLOYEES.

1. All datal employees, including men who work on continuous jobs, shall receive double time for Sundays and legal holidays and time and one-half for overtime.

*Reply—*

The Commission makes the same recommendations in respect of this demand as was made regarding demand No. 14 (General Conditions Underground) and No. 4 (Surface); viz:

That the custom now prevailing be continued.

2. That rent of Coal Company houses be reduced 25 per cent and all Companies do sanitary work and have all dwellings fenced.

*Reply—*

The Commission is dealing with this demand elsewhere in the report.

3. That eight hours in twenty-four hours shall constitute a shift; that all work performed over eight hours in twenty-four in any one day, shall be paid for at the rate of time and a half, double time for Sundays, and legal holidays; this not to apply to continous work.

*Reply—*

The Commission recommends that this demand be allowed so far as eight hours in twenty-four hours constituting a shift is concerned but must make the same ruling in respect of the remaining part of the demand as has been made in respect of Demand No. 14 (General Conditions Underground) and No. 4 (Surface) and No. 1 (General Conditions Applicable to, Underground and Surface Employees) viz:

That the custom now prevailing be continued.

4. That all employees working on datal rate by night receive twenty-five cents extra over day rate.

*Reply—*

The Commission recommends adherence to present customs.

VARIATIONS.

1. That a schedule of rates for Birch Grove be drawn up to conform with the rates of other mines.

*Reply—*

The Commission cannot find any good reason for allowing this demand.

2. Cross cut work at Dominion No. 2 receive at present for the first fifteen feet forty-two cents, all the rest of cross cuts fifty-five cents per foot. Resolved that we demand fifty-five cents per foot for all of the cross cut.

*Reply—*

The Commission recommends that present rates continue to apply.

3. Railroad section men demand time and a half for overtime and double time for Sundays.

*Reply—*

We understand that certain customs presently maintained regarding remuneration to section men, called out for extra time and on Sundays. The Commission therefore feels that this demand should be treated in the same manner as decided with reference to No. 1 (General Conditions applicable to Underground and Surface Employees,) viz:

That the custom now prevailing be continued.

4. Resolved that Dominion No. 10 rates be brought up to conform with Jubilee mine in Sydney Mines.

*Reply—*

The Commission cannot find any good reason for allowing this demand.

5. That the granting of permits or certificates of competence to inexperienced men be abolished, except in the case of returned soldiers who are anxious to learn the work for which they are seeking.

*Reply—*

The Commission takes occasion to express disapproval of the issue of permits to inexperienced people and to the attempts to make permanent use of such permits and recommends strict adherence to Government regulations in respect of the issue of certificates.

6. That we make a demand for two places to work in instead of one and further that we demand 35 per cent increase for all handpick miners on or above all rates paid to cutters, shooters and loaders (Waterford)

*Reply—*

The Commission cannot recommend the allowance of this demand.

7. A demand for radial machines in Dominion No. 1 and some extra pay granted until radials are placed in mine.

*Reply—*

The Commission is favourable to this demand and deals with the desirability of installing radials when discussing General Equipment. As the Company has expressed its intention of installing radials in Dominion No. 1, forthwith, we do not see the advisability of allowing that part of the demand which refers to extra pay.

8. Waterford Power Plant be paid the same rate of pay as now paid at No. 2, Colliery Power Plant.

*Reply—*

The Commission is of the opinion that there is reason for the existence of slightly higher rates of pay at Dominion No. 2, than at Waterford, and therefore hesitates to recommend the demand.

9. Whereas there is much dissatisfaction amongst the road makers on account of the present rate and existing conditions, be it resolved that we demand \$7 per day for all datal road makers.

*Reply—*

The Commission considers that the best results in road making are achieved through contract work and is of the opinion that that system should apply where possible. It therefore withholds its recommendation for the allowance of this demand.

# MEMORANDUM.

A LOCAL CONTRACT OF WORKING CONDITIONS Between Dominion Coal Company and Local Union No. 4514 located at Springhill.

Clause 1. That the Company put a man at each lift to stand the picks and give them out on each shift, and the pick houses to be always kept locked.

*Reply—*

A similar demand is dealt with in our reply to demand No. 11 (General Conditions Underground).

Clause 2. That no more than two miners be allowed in a place at any one time and that the men have the right to select their own butty and his opposite shift when double shift is required.

*Reply—*

A similar demand is dealt with in our reply to demand No. 11 (General Conditions Underground).

Clause 3. That wherever a rake of men are employed on a new lift that the Company run the riding rake down night and morning.

*Reply—*

A similar demand is dealt with in our reply to demand No. 12 (General Conditions Underground).

Clause 4. When any new work is being started in which there is no price on, that the Company pay the men employed at that work \$6.00 per day until such time as the Local Union No. 4514 and the management can agree on a rate for said District.

*Reply—*

A similar demand is dealt with in our reply to demand No. 18 (General Conditions Underground).

Clause 5. That all timber set by miners and all road laid by miners be paid for at the schedule rate.

*Reply—*

A similar demand is dealt with in our reply to demand No. 19 (General Conditions Underground).

Clause 6. That the Company pay 10c. per ton extra for all double shifted places after June 1st, 1920, and 15c. per ton extra for the third shift.

*Reply—*

A similar demand is dealt with in our reply to demands Nos. 25 and 26 (General Conditions Underground).

Clause 7. That the distance for putting down coal by miners in close work be 21 ft. in high and low coal, and the distance for shovelling out coal in board or cross cuts be 12 ft. and in pillars the distance be 25 ft. from the box after the above mentioned distance in this clause, the Company to put down coal or pay the rate for common labour to miners doing it.

*Reply—*

The Commission allows this demand so far as distances in the different specifications are concerned, but recommends that the price for shovelling beyond the distances referred to in the different specifications be a matter of negotiation between the operators and the men.

Clause 8. That men turning their own fan or tending their own donkey or shovelling their own coal when they don't get a man, they be paid the rate of \$5.50 when taken out.

*Reply—*

A similar demand is dealt with in our reply to demand No. 20 (General Conditions Underground).

Clause 9. That when Company hands are required to go to another Company hand job when short of men that they must be paid time and a half for it. Due to shortage of men two men are compelled to do the work of three men that they receive time and a half.

*Reply—*

A demand similar to the latter part of this demand is dealt with in our reply to demand No. 21 (General Conditions Underground). The Commission feels that it must disallow the first part of the demand.

Clause 10. That when the pit starts in the morning and stops before 11 o'clock all Com-

pany hands must be paid a half shift, and if run up to 12.30 o'clock and then stop all Company hands must receive their full shift.

*Reply—*

A similar demand is dealt with in our reply to demand No. 13 (General Conditions Underground).

Clause 11. That all employed shall receive time and a half for over time and double time for Sundays and legal holidays. Double time from the time the pit stops on Saturdays and days before holidays.

*Reply—*

The Commission makes the same reply to this demand as it has made in respect of demand No. 14 (General Conditions Underground).

Clause 12. That when men report for work at lamp cabin and are let down the mine they must receive a job that day.

*Reply—*

A similar demand is dealt with in our reply to demand No. 15 (General Conditions Underground).

When making use of the terms "possible," "practicable," "reasonable" or other inflections of those words, the Commission have in mind that that which is governed or qualified by such terms will be determined, in case of dispute, between interested parties, by the Adjustment Board which is provided for in the report.

## PROCEEDINGS OF THE CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1

**T**HREE new decisions of the Canadian Railway Board of Adjustment No. 1 have been received by the Department. Case No. 85 has reference to the running of a crew of the Toronto, Hamilton and Buffalo Railway between Hamilton and Buffalo. Case No. 86 has reference to an overtime claim of two telegraphers of the Canadian National Railways, Eastern Lines. Case No. 87 relates to a claim of telegraph operators of the Canadian Pacific Railway with reference to working "split trick."

### **Case No. 85.—The Toronto, Hamilton and Buffalo Railway and the Order of Railway Conductors and the Brotherhood of Railroad Trainmen**

A crew of the Toronto, Hamilton and Buffalo Railway in assigned passenger service between Hamilton and Buffalo were sent to Buffalo on a Sunday, when they were off duty, to return to Hamilton with a special train. The portion of the line between Hamilton and Welland is operated by the Toronto, Hamilton and Buffalo Railway, and between Welland and Buffalo by the Michigan Central Railway. The crew were allowed one day for this service which was applied against their monthly guarantee. The employees contended that the crew were

engaged in handling regular passenger trains, and that the company was not privileged to use one of their crews for the purpose of running light to a foreign terminal such as Buffalo was regarded by them to be, to take work away from Michigan Central crews. An understanding was said to exist between the employees of the two railway companies that specials originating on the Michigan Central Railway be handled by Michigan Central crews, and those originating on the Toronto, Hamilton and Buffalo line be handled by Toronto, Hamilton and Buffalo crews. It was claimed that the Michigan Central Railway had a crew at Buffalo at the time that could have handled the train. Since the date when the run was made over which the dispute arose, officials of the two companies had been notified of this understanding, and the Michigan Central Railway had made arrangements to protect the interests of their employees accordingly. The employees realized that the company was privileged to use these men on their lay-off days to run light to any point on its own railway and to apply the earnings for the trip against the monthly guarantee. In this case, however, they held that the crew should be paid for actual mileage at through freight rates, and the trip

should not be used to make up the monthly guarantee.

The company contended that in sending this crew to Buffalo it was merely following a practice which had existed for many years. There was no understanding between the companies that the Michigan Central would handle specials originating on that road, and in this instance the Michigan Central Railway had requested it to furnish a crew.

The evidence was summed up by the Board in its general statement as follows:

The claim as submitted is that Conductor F— and crew should be paid for the turn-around trip in question at through freight rates, and that the payment should not apply against their monthly guarantee. It is admitted on behalf of the employees that the Company have the right to use regularly assigned passenger crews on their lay-off days on the Toronto, Hamilton and Buffalo Railway and apply their pay against monthly guarantees. It is likewise admitted that had the turn-around run required the handling of the train from Hamilton instead of from Buffalo, the payment therefor could properly have been applied against guarantees, the crew in its regular service being assigned to run between Hamilton and Buffalo. It is claimed by the employees that there is an understanding existing between the T. H. & B. and the M.C.R.R. employees that specials originating on the M.C.R.R. be handled by M. C.R.R. crews, and special originating on the T. H. & B. be handled by T.H. & B. crews. There was not, however, any evidence submitted to show that the companies were party to any such arrangement; indeed it is shown that the M.C.R.R. requested the T. H. & B. to furnish a crew for the train. Even if there were an agreement such as that mentioned between the companies and employees concerned, its violation would constitute a grievance on an entirely different basis to that on which the claim is submitted.

By decision of the Board, the claim of the employees was denied.

**Case No. 86.—The Canadian National Railways (Eastern Lines) and the Order of Railroad Telegraphers.**

An agent and a telegraph operator employed at a station of the Canadian National Railways each made a claim for 589 hours overtime from November 1, 1918, to December 18, 1919. The hours

of duty of these two employees were assigned in accordance with schedule requirements, but it was claimed by them that the work could not be performed within the assigned hours and that it was necessary to work overtime as they were held responsible for the work being kept up. The employees claimed that a request was made for help on December 15, 1918, and on June 19, 1919, the agent asked for an investigation on account of being overworked. On August 4, a travelling auditor sent to investigate the claim reported that it would require an average of 18 hours and 54 minutes daily for one man to keep up the work, and after a further investigation it was reported on November 21, that the work would require five hours overtime daily for one man, after the two men had worked their regular eight hours. On December 18, 1919, a third man was appointed to assist them. The railways contended that the schedule provided that the men would be notified when required to work overtime and would not be paid any overtime worked without proper authority.

The decision of the Board was as follows:

While the working of overtime without authority is not justified under the schedule, however, under the circumstances in this case the Board decides that overtime should be paid from June 19th, 1919, until December 18th, 1919, on the basis of five hours per working day, divided equally between the agent and operator.

**Case No. 87.—The Canadian Pacific Railway (Western Lines) and the Order of Railroad Telegraphers**

For a number of years prior to December 31, 1919, the night operator at Agassiz, B.C. had been working until 3 a.m. on week days except on Saturdays when he was relieved at midnight, completing the day by working from 1 a.m. to 3 a.m. on Monday morning. An operator who began duty on February 10, 1919, and worked these hours until December 31 of that year, claimed that he was entitled to "call" for the two hours worked by him each Monday morning during that period. It was contended that Clause A,

Article 20 of the schedule, providing that eight consecutive hours should constitute a day's work, was violated, as the operator had to come on duty twice to complete one day's work. The Company claimed that the keeping of these hours was an old practice, which continued until April 20, 1920, when a change was suggested by the Chief Dispatcher, without any complaint or suggestion having been received from the telegraphers.

In its general statement the Board declared:

It appears that the working of the split trick at Agassiz, and possibly at some other points on the Vancouver Division, had been in effect for some considerable time, and apparently accepted by both the Telegraphers and the Company's Officers concerned, as properly within the intent of the schedule, although it

is evident it was not so understood and applied elsewhere. . . . It is apparent that were the Monday morning hours paid for as special calls there would be some duplicate payment, inasmuch as only six hours' work was performed each Saturday. Therefore, while the working of the split trick as stated was not properly within the intent of the schedule, there was joint responsibility on the part of the Telegraphers and the Company's Officers concerned, for it being so worked.

The decision of the Board was as follows:

The Board decides that in view of the joint responsibility in the matter, and the other conditions as stated, 50 per cent of the calls claimed should be paid for, this carrying with it the understanding that the working of split tricks as previously in effect at Agassiz is not properly permissible within the intent of the schedule governing the service of Telegraphers.

## STRIKES AND LOCKOUTS IN CANADA DURING AUGUST, 1920

**N**INE strikes, involving 3,803 employees were reported as having commenced during August. There were in existence at some time or other during the month 23 strikes, involving about 4,812 workpeople. The total time loss on account of industrial disputes was estimated at 79,482 working days, as compared with 80,221 in July and 365,062 in August, 1919. The time loss occasioned by the 9 strikes which began in August was 56,600 working days, while a loss of 22,882 is charged to the 14 strikes that commenced prior to August. Termination was reported in

the case of 4 disputes which commenced prior to August. Four of the disputes which commenced during August terminated during the month, leaving the following 15 strikes affecting approximately 744 workpeople on record on August 31:—Building labourers, Hamilton; carpenters, Sherbrooke; engineers, Hamilton; machinists, Hamilton, St. John and Toronto; moulders, Amherst, Collingwood, Guelph, Hamilton, Montreal, New Glasgow and Toronto, and rolling mill employees and grain elevator workers at Montreal.

### Disputes by Industries

The following is a review of the disputes by industries in the order in which they appear in the statistical table. A brief summary is given of the more important strikes.

**LUMBERING.**—This group showed very little strike activity. The strike of pole and post makers at Meadows, B.C., terminated on August 23. The men struck against an increase of 25 cents per day in the boarding rate. The company claimed that the increase in the price of supplies necessitated this

action and continued to charge the increase.

**MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.**—Four strikes, involving 936 employees with a time loss of 11,912 working days, was the summary for this group. There were two strikes of coal miners in Alberta commencing during the month. At Coalhurst, 336 miners struck for payment of wages retroactive from April 1 and this resulted in a sympathetic strike of 220 miners at Drumheller. The employees' demands

## STRIKES AND LOCKOUTS DURING AUGUST, 1920

Industry or Occupation.	Particulars.	No. of employees affected.	Time loss in working days
<b>Strikes commencing prior to August, 1920</b>			
<b>LUMBERING—</b>			
Loggers, Simoon Sound, B.C.....	Commenced May 26. For better living conditions. Information received in the Department indicates this strike was terminated the latter part of June after a committee had investigated the camp conditions and found there had been no cause for striking.		
Pole and post makers, Meadows, B.C.....	Commenced June 16. Against increase in price of board per day and for increased wages. Settled by mediation; work resumed August 23.	35	630
<b>MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.—</b>			
Coal miners, Brule, Alta.....	Commenced July 1. Disagreement over wage schedule. Adjusted by negotiations; work resumed August 23.	250	4,500
Coal miners, Springhill, N.S.....	Commenced July 2. Against a reduction in wages. Settled by negotiations; work resumed August 23.	110	1,980
Pottery workers, St. Johns, Que.....	Commenced November, 1913. Against a reduction in wages. Information received in the Department indicates conditions are no longer affected.		
Stonecutters, Ottawa, Ont.....	Commenced July 7. For increased wages. Information recently received in the Department indicates this strike as terminated on July 17 with a wage increase.		
<b>BUILDING AND CONSTRUCTION.—</b>			
Carpenters, Campbellton, N.B.....	Commenced May 1. For increased wages. Information received in the Department indicates this strike was terminated some time ago when the strikers' demands were granted.		
Carpenters, Sherbrooke, Que.....	Commenced June 15. For increased wages. Unterminated.....	222	5,772
<b>METALS, MACHINERY AND CONVEYANCES—</b>			
Engineers, Hamilton, Ont.....	Commenced May 1. For increased wages and better conditions. Unterminated.	24	624
Machinists, St. John, N.B.....	Commenced January 26. For increased wages and shorter hours. Unterminated.	8	208
Machinists, Toronto, Ont. ....	Commenced July 26. Against discharge of employee. Unterminated.	24	624
Moulders, Amherst, N.S.....	Commenced June 22. For increased wages. Unterminated.....	17	442
Moulders, Collingwood, Ont.....	Commenced June 1. For increased wages. Unterminated.....	10	260
Moulders, Edmonton, Alta. ....	Commenced June 26. For increased wages and shorter hours. Settled by mediation of representatives of Trades and Labour Council; work resumed August 23.	24	432
Moulders, Hamilton, Ont.....	Commenced May 5, 1919. For increased wages and shorter hours. Unterminated.	17	442
Moulders, Montreal, Que.....	Commenced May 5. For increased wages and shorter hours. Unterminated.	18	468
Moulders, Toronto, Ont.....	Commenced May 1, 1919. For increased wages and shorter hours. Unterminated.		

## STRIKES AND LOCKOUTS DURING AUGUST, 1920.—Continued.

Industry or Occupation.	Particulars.	No. of employees affected.	Time loss in working days.
<b>METALS, MACHINERY &amp; CONVEYANCES.</b> —Continued.			
Rolling mill employees, Montreal, Que.....	Commenced July 15. For increased wages and better working conditions. Unterminated.	250	6,500
<b>FOODS LIQUORS AND TOBACCO—</b>			
Egg candlers, Montreal, Que.....	Commenced July 8 and 12. For increased wages. Information received indicates these strikes were terminated the latter part of July; work was resumed under the same conditions as existed prior to the strikes.		
Meat packers, Calgary, Alta.....	Commenced July 14. For increased wages and improved working conditions. Information received indicates this strike was terminated about July 28, when the employees returned to work under the same conditions as existed prior to the strike.		
<b>MISCELLANEOUS—</b>			
Glass workers, Hamilton, Ont.....	Commenced June 7. For increased wages and shorter hours. Information received in the Department indicates that conditions are no longer affected as the strikers have all secured employment elsewhere.		
<b>Strikes commencing during August, 1920.</b>			
<b>MINES, SMELTERS, QUARRIES, CLAY PRODUCTS.</b> ETC.—			
Coal miners Coalhurst, Alta.....	Commenced August 2. For payment of wages retroactive from April 1, 1920. Settled by negotiations; demands granted and work resumed August 16.	336	4,032
Coal miners, Drumheller, Alta.....	Commenced August 12. In sympathy with the Coalhurst miners. Settled on resumption of work of the Coalhurst strikers; work resumed August 17.	220	880
<b>BUILDING AND CONSTRUCTION—</b>			
Building labourers, Hamilton, Ont.....	Commenced August 13. For increased wages. Unterminated.....	50	800
<b>METALS, MACHINERY AND CONVEYANCES.—</b>			
Machinists, Hamilton, Ont.....	Commenced August 25. A sympathetic strike to assist the employees on strike in other branches of the American Can Company. Unterminated.	12	72
Moulders, Guelph, Ont.....	Commenced August 5. For increased wages. Settled by negotiations and work resumed in three establishments, August 17. One firm was still involved at the close of the month.	93	930
Moulders, New Glasgow, N.S.....	Commenced August 2. For increased wages and shorter hours. Unterminated.	20	520
Rivet heaters Montreal, Que.—.....	Commenced August 13. Strike and lockout. The dispute was caused by 34 rivet heaters striking for increased wages. The company then closed its plant, locking out 3,000 employees. Operations resumed August 31.	3,000	48,000
<b>TRANSPORTATION—</b>			
Coal carters, Quebec, Que.....	Commenced August 12. Against the use of 3-ton trucks for deliveries. Settled by negotiations; trucks being used only for deliveries outside of city; work resumed August 16.	22	66
Grain elevator employees, Montreal, Que....	Commenced August 2. For increased wages. Unterminated.....	50	1,300

were conceded and work was resumed on August 16. Strikes of coal miners at Brule, Alta., and Springhill, N.S., both commencing during the first week of July were terminated on August 23.

**BUILDING AND CONSTRUCTION.**—The strike of 222 carpenters at Sherbrooke, which commenced on June 15, was apparently in existence at the end of the month although the indications were that the chief firm involved was replacing the strikers by other workers. Fifty building labourers at Hamilton struck on August 13 for a wage increase of 5 cents per hour over their minimum of 50 cents per hour. The strike remained unterninated.

**METALS, MACHINERY AND CONVEYANCES.**—This group indicated greater strike activity than any other group during the month. It showed 14 strikes, involving 3,517 employees with a resultant time loss of 59,522 working days. The two chief disputes in this class from the standpoint of time loss and numbers involved were those of 250 rolling mill employees, and 3,000 car

shop employees, both occurring in Montreal. The former, which commenced on July 15, for a wage increase of 10 per cent, was unternminated. The dispute involving the car shop employees commenced as a strike but developed into a lockout. Thirty-four rivet heaters struck for a wage of 55 cents per hour, the existing rate being 44 cents per hour. The company closed its plant and locked out about 3,000 other employees. The Minister of Labour intervened with a personal letter to the firm and mediation was further hastened by the visit of the Assistant Deputy Minister to the locality of the dispute. Operations were resumed on August 31. Other strikes in this group commencing during the month were those of machinists at Hamilton and moulders at Guelph and New Glasgow.

**TRANSPORTATION.**—Twenty-two coal carters at Quebec struck because of the introduction of auto trucks for coal deliveries. A compromise was effected when the company agreed to use the auto trucks for rural deliveries only. Fifty grain elevator employees at Montreal struck for increased wages.

## STRIKES AND LOCKOUTS IN THE UNITED KINGDOM DURING JULY, 1920

**T**HE following details with regard to strikes and lockouts in the United Kingdom during July, 1920, based on returns from employers and workpeople, are taken from the July issue of the *British Labour Gazette*.

**NUMBER, MAGNITUDE AND DURATION.**—The number of trade disputes involving a stoppage of work reported to the Department as beginning in July was 147, as compared with 183 in the previous month and 126 in July, 1919. In these new disputes nearly 37,000 workpeople were directly, and about 6,000 indirectly involved (*i. e.*, thrown out of work at

the establishments where the disputes occurred, though not themselves parties to the disputes). In addition, over 47,000 workpeople were involved, either directly or indirectly, in 118 disputes which began before July, and were still in progress at the beginning of that month. The total number of disputes in progress in July was thus 265, involving over 90,000 workpeople, as compared with about 128,000 workpeople involved in disputes in progress in June, 1920, and about 839,000 in July, 1919.

The following table classifies the disputes by groups of trades, and indicates the number of workpeople involved

(whether directly or indirectly) at the establishments concerned, and the approximate time lost during July:

Groups of Trades	Number of Disputes			Number of workpeople involved in all disputes in July.	Aggregate loss of working days during July.
	Started before 1st July.	Started in July.	Total.		
Building.....	27	23	50	6,000	75,000
Mining and Quarrying.....	3	15	18	10,000	69,000
Metal, Engineering and Shipbuilding..	32	26	58	15,000	137,000
Textile and Clothing.	16	8	24	23,000	267,000
Woodworking and Furnishing.....	10	12	22	11,000	120,000
Other Trades.....	23	46	69	18,000	164,000
Employees of Public Authorities.....	7	17	24	7,000	76,000
Total, July, 1920....	118	147	265	90,000	908,000
Total, June, 1920....	95	183	278	128,000	1,257,000
Total, July, 1919....	101	126	227	839,000	8,018,000

Of the 908,000 working days lost in July by all disputes in progress, nearly

549,000 were lost by disputes which began before July and were still in progress at the beginning of that month, and over 359,000 by disputes which began in the month.

**CAUSES.**—Of the 147 new disputes, 102, directly involving nearly 26,000 workpeople, arose on demands for advances in wages; 12, directly involving nearly 3,000 workpeople, on other wages questions; 22, directly involving nearly 7,000 workpeople, on questions respecting the employment of particular classes or persons; and 11, directly involving about 1,000 workpeople, on other questions.

**RESULTS.**—During the month, settlements were effected in the case of 68 new disputes, directly involving nearly 18,000 workpeople, and 29 old disputes directly involving nearly 16,000 workpeople. Of these new and old disputes, 23, directly involving nearly 9,000 workpeople, were settled in favour of the workpeople; 38, directly involving nearly 7,000 workpeople, were settled in favour of the employers; and 36, directly involving about 18,000 workpeople, were compromised. In the case of 30 other disputes, directly involving over 18,000 workpeople, work was resumed pending negotiations.

## MINIMUM WAGE LEGISLATION IN CANADA

### A Comparison of the Various Provincial Laws on the Subject

#### Introductory

**T**HE advantage of that "uniformity in the laws relating to the welfare of those engaged in industrial work in the several provinces of Canada," which was unanimously endorsed by the National Industrial Conference of 1919, is now generally recognized and the matter is receiving the attention of federal and provincial authorities. It is, therefore,

of interest to examine some of those laws showing their points of agreement and divergence. The present article, which is the second of the series begun in the August issue of the *LABOUR GAZETTE*, will deal with the minimum wage.

The Committee appointed by the Commission on Uniformity of Labour Laws to consider this subject reported as follows: "We approve the principle of a

minimum wage for women and girls and recommend that a competent authority be created in each province in the Dominion to establish a minimum wage adequate to maintain self-support for women and girls, and such authority shall be empowered to fix the hours of employment for such women and girls not already provided for by legislation, and further recommend that such hours of employment should not exceed 48 per week, except of employees engaged in domestic or agricultural employment." (LABOUR GAZETTE, May 1920, p. 546.)

Unlike the laws relating to Workmen's Compensation, those providing a minimum wage for working women are of very recent date. The first step was taken in 1917 by the province of Alberta, which inserted a clause in the Factories Act of that year establishing a flat rate minimum wage of \$1.50 per shift for all employees covered by the Act, except apprentices who were to receive \$1.00 per shift. In 1918, the first minimum wage laws for women only were passed by Manitoba and British Columbia. These were followed the next year by Quebec and Saskatchewan, and in 1920 by Nova Scotia and Ontario. In this year also Alberta amended its law with special reference to women. The two remaining provinces of New Brunswick and Prince Edward Island have as yet taken no action in the matter.

#### Boards and Commissions

In Nova Scotia, Ontario, Manitoba and Saskatchewan the administration of the law is in the hands of a board of five members, two of whom are women, appointed by the Lieutenant-Governor in Council. In Manitoba the board must represent equally employers and employees, with a fifth disinterested person as chairman. The members are paid for their services in all these provinces except in Ontario, where a *per diem* allowance may be made during attendance at meetings and transaction of board business. The British Columbia board and the Quebec Commission consist of only

three members who are also unpaid. One member is the Deputy Minister of Labour, who is the Chairman, and one may be a woman.

Alberta has adopted a different system. No Minimum Wage act as such appears on her statute books, but a 1920 amendment to the Factories Act of 1917 provides for the appointment by the Lieutenant-Governor-in-Council of an advisory committee to deal with wages and hours of labour for women and young persons in all establishments to which the Act applies. This Committee, like the Minimum Wage boards of most of the provinces, consists of five members, and like that of Manitoba represents employers and employed equally. It differs from all other minimum wage bodies in the Dominion, however, in that no provision is made for the appointment of women as members. Another point of difference is that the fifth member is nominated by the Attorney-General instead of by the Lieutenant-Governor-in-Council. The Committee has the same powers with regard to examination of witnesses etc., as is given to the boards of the other provinces, and the members are paid for their services as in Manitoba, Nova Scotia and Saskatchewan.

With regard to the powers of these bodies, the jurisdiction of the boards in British Columbia, Manitoba, Nova Scotia, and Saskatchewan extends to hours and conditions of labour as well as to wages, but in the case of the two last named provinces any rules they may make concerning hours and sanitary requirements are subject to the provisions of the Factories Acts. In Alberta, on the contrary, the orders of the Minimum Wage Committee supersede the provisions of the Factories Act in case of conflict. In Ontario and Quebec the law refers to wages only.

#### Application of Laws

The application of the law is more or less restricted in all the provinces. In British Columbia all employed women,

except fruit pickers, farm labourers and domestic servants, are protected. These two latter classes are exempt in Ontario also. In Manitoba, Nova Scotia and Saskatchewan, all female employees in shops and factories in cities are included, and the boards may, at their discretion, extend the scope of the law to other parts of the province. The Quebec Act protects all women working in industrial establishments, and the Factories Act of Alberta, those in factories, shops, offices and office buildings.

In all the provinces except Alberta the board has power to issue special licenses in the case of apprentices or physically defective employees. In British Columbia and Quebec, girls under eighteen years of age, and in Ontario part-time employees are also entitled to special treatment. The Alberta Committee is empowered to fix hours and wages for all persons under eighteen years of age as well as for all female persons, who come under the Act. Special terms for apprentices are not mentioned, but the original Act of 1917 fixed a lower rate for this class than for experienced workers.

### Conferences

The laws of British Columbia, Ontario and Quebec authorize the board to summon a conference representing equally employees and employers in the industry or occupation to be considered. This conference may make recommendation to the board regarding wages, and in the case of British Columbia, hours and conditions of labour also. In Ontario the only disinterested member of the conference is the chairman who directs proceedings but has no vote. The other two provinces allow one or more representatives of the public to be included in the conference, but the British Columbia Act stipulates that these shall not exceed in numbers the representatives of the other parties. The Minimum Wage Board of Manitoba has called conferences of employers and employed, although not specifically bidden to do

so by law, the members of the Board presiding and arbitrating.

### Miscellaneous Provisions

All the provinces except Quebec and Ontario insert in the Minimum Wage Act a clause protecting from dismissal or adverse treatment any employee who may give evidence in any proceedings relative to the enforcement of the Act.

Regulations of the Minimum Wage boards of Ontario are effective on publication, and those of Nova Scotia on a date to be named in publication. In Manitoba one month, and in Saskatchewan thirty days must elapse before orders come into force, while in British Columbia and Quebec sixty days are allowed.

### Orders of Boards

The laws authorizing the appointment of Minimum Wage boards in Alberta, Ontario and Nova Scotia are of such recent date that there has been scarcely time for the setting up of the necessary machinery. The Quebec board has issued no orders as yet. In British Columbia, Manitoba and Saskatchewan, however, a number of regulations have been made. Workers in restaurants, laundries, factories and shops have been among those dealt with in each case.

Rules for restaurant employees provide, in all these provinces, for a 48-hour week, and in Manitoba and Saskatchewan for a ten-hour day. In the latter province a maximum of fifty-six hours per week is allowed in any restaurant which is open seven days a week, but all time in excess of forty-eight hours is regarded as overtime. Otherwise overtime is allowed in cases of emergency only, and in British Columbia is limited to four hours per week or 52 hours in all. In Saskatchewan and Manitoba a written permit is necessary for overtime. In British Columbia and Saskatchewan, overtime is paid at the rate of time and one half.

Provisions for apprentices vary considerably. In the regulations relating

to laundries, Saskatchewan has three periods of apprenticeship, each lasting six months. British Columbia and Manitoba draw a distinction between adult learners and those under eighteen years of age. In the former province the apprenticeship of miners is divided into six periods of four months each, and in the latter into three periods of six months each. For adult apprentices British Columbia has three periods of four months, and Manitoba two periods of six months each.

### Conclusion

From the foregoing account it will be seen that the majority of the Canadian

provinces have adopted the principle of a minimum wage for women. Approved by the Commission on the Unification of Provincial Labour Laws, seven provinces have minimum wage laws, five of them dealing with hours of employment as well. In all provinces except Alberta women are represented on the board or commission and special provision is made for handicapped workers. In the working-out of the Acts the three provinces whose boards have issued regulations have all fixed the 48-hour week for one or more industries, British Columbia recognizing it as the standard in all.

---

## LABOUR LEGISLATION IN NOVA SCOTIA IN 1920

THE Statutes of Nova Scotia, 1920, which have just been received at the Department, contained several Acts of interest to labour which were passed during the recent session ending on May 22, 1920.

The Commission appointed by an Act of 1919 to inquire into the hours of labour, wages and working conditions of women employed in industrial occupations in Nova Scotia, submitted its report in May, 1920, and one of its recommendations was that legislation should be passed providing for the establishment of minimum wages for women. In accordance with this report a Minimum Wage for Women Act was enacted providing for the appointment of a board of five members, two of whom must be women, to establish minimum rates of wages and maximum hours of labour for female employees in factories and shops. Licenses may be issued enabling the employment of physical defectives or of apprentices at a rate lower than that fixed for normal or experienced workers. Orders of the Minimum Wage Board are to be effective thirty days after publication.

The Employment Agencies Act prohibits the receiving of any compensation in connection with the procuring of employment for any person or the furnishing of workers for any employer, thus abolishing the private employment agency in Nova Scotia. Provision is made in the Act for the exemption from its operation of any person or class of persons named in a proclamation to that effect by the Lieutenant-Governor-in-Council.

The Workmen's Compensation Act of 1915 was considerably amended. In the case of the death of a worker from injury, the compensation to a widow or invalid widower, who is the sole dependant, is raised from \$20 to \$30 per month. Where the dependants are a widow or invalid widower and one or more children, the monthly payment of \$20 with \$5 for each child under 16 years of age, is raised to \$30 with \$7.50 for each child, the total amount of compensation permitted to be paid in such cases being increased from \$40 to \$60 per month. Where the dependants are children they receive \$15 each instead of \$10, the total not to exceed \$60. In case

of dependents other than the foregoing, the compensation is to be determined by the Board, but shall not exceed \$30 per month to a parent or parents, or \$45 per month in all. The payment for a child may not be increased because of the death of any person upon whom such child was wholly or partly dependent. The clause of the 1915 Act providing that, exclusive of the expenses of burial, compensation shall not exceed 55 per cent of the average earnings of the workman, except in the case of a widow or widower or children, is made applicable in case of a workman in the employ of any incorporated company, if such workman was at the time of the accident an officer and shareholder of the company, or if the majority of the shares of such company was owned at the time of the accident directly or indirectly by the workman and members of his family, or by either. A dependent widow who remarries is entitled to \$20 per month for 25 months, or at the discretion of the Board to an equivalent lump sum or sums.

The provisions regarding dependent widows, widowers or children come into force on October 1, 1920, and apply to all entitled to compensation after and immediately before that date. These provisions and that relating to shareholders of incorporated companies are the only ones which increase or decrease compensation to any one prior to October 1.

The clause limiting the time for application for compensation to fifteen months after the accident is amended so that this provision does not apply where death results from the injury.

In this case application must be made within one year and claim established within fifteen months.

Provision is made for continuing temporarily alternative arrangements for medical aid which have been in force since December 31, 1919, but the Board is not liable to furnish medical aid to workmen who are entitled to such aid under the alternative arrangement.

Where death results from injury, or after an injury from any cause, compensation payable for any part of the period between the date of the injury and the date of the death is made payable to the dependants as the Board may deem advisable.

In case of a principal employer becoming liable for injury to workmen working under a contractor or sub-contractor who has not been assessed with respect to such workmen by the Workmen's Compensation Board, the principal may recover from the contractor, and the contractor from the sub-contractor, his proper proportion of such assessment.

The Coal Mines Regulation Act is amended to authorize the granting of a special license to any person to operate a hoisting compressor or fan engine, provided the Board of Examiners is satisfied that the applicant is a fit person to operate such engine.

An amendment to the Fair Rent Act, 1919, forbids the eviction of any tenant who continues to pay a reasonable rental and perform other conditions of his tenancy. The Act is to continue in force until April 30, 1921.

### MINING OPERATIONS IN QUEBEC IN 1919

THE annual report of the Department of Colonization, Mines and Fisheries of the province of Quebec shows that the minerals produced during last year reached the value of \$20,813,670 or 11.3 per cent over the figure for 1918.

This gain in the province is the more remarkable as it compares with a decline of 18 per cent in the value of the total mineral production of Canada in the same period. The difference in favour of Quebec is attributed to the fact that

whereas the mining industry in other provinces experienced a "slump" on the cessation of the demand for war materials, Quebec was affected to a much less degree because the mineral substances produced in the province are mainly those used in peace industries, such as asbestos, mica and building materials. Measured, however, by volume rather than value, the increase in production is less pronounced, the prices obtained for minerals having shown marked advances in the second year; for instance, while the production of asbestos, the main mineral product of the province, made when reckoned in value, a gain of 279 per cent, the increase in tonnage was only 33 per cent greater than that of 1918; while a gain in the value of cement products of 33.6 per cent was even converted into a decline of 20.5 per cent when estimated on the basis of quantity produced. This consideration, however, while reducing the apparent increase in production as between 1918 and 1919, does not affect the favourable position occupied by Quebec as compared with the rest of Canada. In this connection, the report says: "It is a matter of congratulation to note that, on the whole, the Quebec mineral industry has felt the adverse effects of after-war conditions less than most other parts of North America. Our province has been comparatively free from the social and industrial disquiet which is so marked throughout most of Canada. There have not been labour troubles or strikes on such a scale that they paralyzed for months the production of certain minerals as in several of the other provinces." "It is not easy to determine why the province is more free of trouble," says Mr. Theodore C. Denis, provincial superintendent of mines, "but one of the contributory reasons is certainly the fact that the people of Quebec appear to have confidence in the judgment and advice of the 'directing' classes, and they seem to remain indifferent to the insinuating, and often plausible, urgings of theorists who have panaceas to bring about the

advent of utopian conditions and of the millennium."

The relative importance of the various minerals produced in Quebec is shown in the following table giving the number of workers, wages paid and quantities produced in 1919:

TABLE OF THE MINERAL PRODUCTION OF THE PROVINCE OF QUEBEC DURING 1919.

Substances.	No. of workmen.	Wages	Quantities
		\$	
Asbestos, tons.....	4,031	3,997,154	135,861
Asbestic, tons.....			23,827
Chromite, tons.....	183	165,175	8,184
Copper and sulphur ore, tons....	239	224,549	53,965
Feldspar and kaolin, tons.....	39	31,751	1,684
Gold, oz.....	43	15,920	1,446
Graphite, tons.....	24	7,196	20
Iron and Titaniferous iron ores, tons.....			
Magnesite, tons.....	181	95,263	9,940
Mica, lb.....	252	92,663	3,853,265
Mineral water, gals.....	18	4,260	30,519
Mineral paints (iron, oxide, ochre) tons.....	83	69,591	11,937
Molybdenite, lb.....	195	60,164	83,002
Peat, tons.....	14	3,832	486
Phosphate, tons.....			20
Quartz and silica, tons.....	91	25,800	15,055
Silver, oz.....			127,223
Zinc and lead ore, tons.....	170	160,100	5,318
BUILDING MATERIALS:—			
Brick thousands.....	746	499,949	94,312
Cement, barrels.....	526	647,227	2,259,152
Granite.....	229	186,779	
Lime, bushels.....	223	178,029	2,124,898
Limestone, tons.....	1,127	535,988	708,172
Marble, cubic feet.....	118	114,593	19,201
Sand, building, tons.....	189	54,670	486,877
Sandstone, tons.....	16	5,190	720
Slate, square.....	24	17,004	1,632
Tile, drain and sewer pipe, pottery, etc.....	169	149,372	
	8,930	7,341,619	

The wages paid in 1919 showed an advance of 19 per cent over the amount paid in 1918, the average wage per 300-day man being \$1,025 and \$968 for the two years respectively. In 1915 the miner's average yearly income was \$593. In the asbestos mines much of the work is done by contract.

The production of "war-minerals," such as pyrites, molybdenite, magnesite and chromite, was strongly affected by the close of hostilities. On the other hand asbestos, the most important mineral product of the province, was unaffected by peace, the quantity produced during 1919 showing a decline of only 4.6 per cent from the previous year, while the value increased by 20.2 per cent. Most of this material mined is exported in its unmanufactured state, the United States taking 89 per cent of the total. About seven per cent is exported direct to England and the balance goes to Italy, Japan, France, and other countries, leaving a very small proportion to be manufactured in Canada. The only Canadian plant, in fact, is that of the Asbestos Manufacturing Company at Lachine, where the manufacture is carried on of asbestos slates, shingles, sheeting for interior and exterior use, mill board, paper, corrugated asbestos sheet, and air-cell pipe coverings.

The gold and silver products of Quebec are derived from the treatment of the copper-sulphur ores of the Eastern townships and the zinc-lead ores of Portneuf county. Prospecting in Northern Quebec has declined owing to the fact that while the selling price of gold does not change, the cost of production has increased to a point at which only the mines operating under the most favourable conditions can now be worked at a profit. About 82 per cent of the total Canadian production of mica is derived from basins of the Gatineau and Lièvre rivers in Quebec. Production of mica increased during 1919, but statistics are hard to obtain owing to the difficulty of differentiating the various forms and qualities of this mineral.

In structural materials a considerable increase is recorded in the production of cement, lime, limestone and brick. Statistics of the production of peat, though not properly a mineral substance, are for the first time included in the report. This industry, however, is at

present in an elementary state in the province.

#### Statistics of Accidents

The number of workers in the mines and quarries of Quebec rose from 7,791 in 1918 to 8,930 in 1919; but as all miners did not work the full year, it is necessary, for the purpose of comparison, to secure statistical uniformity by reducing these figures to the basis of the 300-day worker, or the man-year. The number of accidents during 1919 are shown as follows:

	Number of men on 300 days' basis	ACCIDENTS		Per 1,000 employed
		Fatal	Non-fatal	
Mines.....	4,755	9	315	68.4
Quarries.....	2,406	3	19	9.2
Totals.....	7,161	12	334	48.3

About 43 per cent of the fatal and 37 per cent of the non-fatal accidents in the mines were due to rock falls and slides, and in the quarries 66.6 per cent of the fatalities were attributed to this cause. To cable derricks were attributed 43 per cent of the deaths in the mines, the balance, 14 per cent, being the result of the use of explosives. In the quarries, one-third of the deaths occurred on the railways, and in the annexed plants or concentrators, the fatalities were caused by the shafting and elevators.

In the underground mines, the report states, the accidents caused by rockfalls are attributable to negligence in sealing the roofs of drifts and stopes. The frequency of accidents in connection with the loading of ore by cable derrick is partly due, it is stated, to the employment of boys from 14 to 16 years of age as signallers on the derricks. Another cause of accidents is the drilling of holes in mines by inexperienced workmen, especially drifts and the breaking of large blocks. Several accidents are

attributed to the breaking of stones with a hammer, and the more frequent use of goggles and chipping masks is recommended. Among other recommendations as means to prevent accidents,

the report suggests more instruction of employees, especially in the loading and unloading of railway cars, and the fixing of sufficient guards round belts, pulleys, gears and shafts.

## THE GOVERNING BODY OF THE INTERNATIONAL LABOUR OFFICE

Fourth Meeting of the Governing Body held at Genoa, Italy, from June 8-12, 1920

THE Governing Body of the International Labour Office met at Genoa, Italy, on June 8, M. Arthur Fontaine, Chairman presiding. The Honourable G. D. Robertson, Minister of Labour for Canada, and the member of the Board representing the Dominion Government, being unable to be present, the Honourable Philippe Roy, Commissioner General for Canada at Paris had been appointed as substitute representative of the Dominion Government.

After formal and introductory proceedings the Board proceeded to the election of two Vice-Presidents, and appointed to the offices named Mr. Carlier, of Belgium, named by the Employers' Group, and Mr. Oudegast, of Holland, named by the Workmen's Group.

The Governing Body then proceeded to the consideration of the report of the Director on matters connected with the organization of the International Labour Office. The Director's report referred to difficulties which had been experienced in the development of some sections of the proposed work, particularly that respecting hygiene, in securing necessary assistance. It was mentioned also that no definite code of rules had been set up for the government of the staff which was being accumulated, but, following methods adopted both in many private undertakings "and in certain Government offices in France and England we have established regular relations with

the staff through a Staff Committee and a Joint Committee, which have already yielded appreciable results."

The Director referred to the daily press review which was being sent out from the International Labour Office to officials of the office and to members of the Governing Body. This review had not, however, yet assumed its final form. The Director indicated the intention of the International Labour Office also to publish a monthly magazine review "intended specially as propaganda to inform public opinion, and above all, the opinion of the workers, on the activity of the office and on all questions of international legislation." A further publication forecast was a scientific review of information as provided for in the Peace Treaty; this will be under the charge of Dr. Royal Meeker, for many years Chief of the Bureau of Statistics of the Department of Labour of the United States, and lately appointed Chief of the Scientific Division of the International Labour Office.

The Director referred to the action taken at the meeting of the Governing Body in March in the way of appointing a Commission to investigate industrial conditions under the Soviet Government in Russia; also in naming two persons, representative of employers and workmen respectively, for membership in the Commission appointed by the League of Nations to investigate political conditions

under the Soviet Government, the two delegates in question being in the nature of a liaison between the two Commissions. At the time at which M. Thomas' memorandum on the subject was under preparation, the appointments to the Labour Office Commission had not been completed, but it was hoped the vacancies would be filled shortly. With respect to the departure of the Commission to Russia, the Director reported that, no satisfactory response having been received from the Soviet Government to the request that the Commission might be allowed to enter Russia, Dr. Pardo, of the International Labour Office staff, had been directed to proceed to Copenhagen and "open prudent and discreet negotiations with M. Litvinoff and with M. Krassin, Commissary of the People, who were at that time in Denmark." M. Litvinoff had refused, however, to distinguish between the Commission of the League of Nations and that of the International Labour Office. Litvinoff had asked if the workers' delegates would be prepared to go to Russia without other members of the Commission, and Dr. Pardo had replied "that that seemed to him impossible." As a final result, permission had not been obtained for the Commission to visit Russia.

The Director discussed in a memorandum of some length the matter of the removal of the headquarters of the International Labour Office to Geneva. Some question had arisen between the International Labour Office and officials of the League of Nations as to whether or not it was desirable that the International Labour Office should establish itself at Geneva until the League of Nations had established its headquarters there, the Treaty of Versailles requiring that the two bodies should have their headquarters at the same place. The Director commented upon the rumour that an effort was being made to locate the headquarters of the League of Nations at Brussels instead of Geneva. M. Thomas argued somewhat against this course,

and submitted that, in any event, the International Labour Office was being compelled to vacate its offices in London at the close of the month of May, and, on the whole, it seemed in every way convenient and advantageous to proceed with the plan of locating at Geneva. The option, taken by the Governing Body on the thudicum property, expired on June 10, and he strongly recommended that the option should be taken up. The Director's memorandum was carefully considered, and M. Thomas was authorised to take the necessary action in taking up the option which entails the establishment of the offices of the International Labour Organization at Geneva.

Following out the recommendation of the Washington Conference for the appointment of an International Commission on unemployment "empowered to formulate recommendations upon the best methods to be adopted in each State for collection and publishing all information relative to the problem of unemployment, in such form and for such periods of time as may be internationally comparable," the Governing Body proceeded to the appointment of a Commission consisting of six members as follows, namely:—President M. Max Lazard, Secretary General of the International Association for Combating Unemployment, and delegate of the French Government to the Washington Conference. Sir William Beveridge, Director of the London School of Economics; Mr. H. W. Methorst, Director, Central Statistical Office of Holland, and Director of the International Institute of Statistics; Mr. Ricci, Director of the International Institute of Agriculture in Rome; Mr. N. Rygg, Director in Chief of the Central Statistical Office, Norway; Mr. George Zacher, Director of the German Statistical Office, and a specialist on Insurance. Mr. Louis Varlez, the officer of the International Employment Office charged with the section of Unemployment and Emigration, will act as Secretary to the Commission.

The Governing Body decided that its next meeting should be held on Tuesday,

October 5, at Geneva. It may be noted that Mr. R. C. Coats, Dominion Statistician, and for many years an officer of the Department of Labour, has been appointed as representative of the Government of Canada for the meeting in question, the Minister of Labour, who

is the official member of the Governing Body being unable to attend. Mr. Coats, it should be added, is visiting Europe also to participate in a conference of statisticians called under the auspices of the Council of the League of Nations, to be held at Brussels early in October.

## THE NEW UNEMPLOYMENT INSURANCE ACT OF GREAT BRITAIN

The new British Unemployment Insurance Act, which was assented to on August 9, 1920, will come into operation on November 8, next. A considerable amount of controversy centred round certain clauses of the original Bill to permit friendly societies and other similar associations to pay out State benefit to their members. At a special congress of British Trade Unionists, held in July last, a resolution was passed, practically unanimously, declaring opposition to the draft Unemployment Insurance Bill in so far as it made provision for the administration of unemployment benefit by friendly societies, and instructing the Parliamentary Committee to recommend to societies to ignore the Act unless the clauses objected to were removed. Subsequently, the House of Commons, by a large majority, voted to retain friendly societies in the machinery of the Bill, with, however, an amendment to make it imperative on any friendly society or other association wishing to operate under the Act to set up machinery which must be satisfactory to the Ministry of Labour, not only for safeguarding the payment of the benefit but also for placing workpeople in touch with employment. The friendly societies must, in short, be prepared to establish machinery which would do for their members what the government employment offices do for the general community.

The British *Labour Gazette*, August, 1920, summarizes the Act, as follows:

The act will extend compulsory insurance to substantially all persons for whom Health Insurance Contributions have now to be paid,

except outworkers and persons employed in agriculture and private domestic service. The employees of local authorities, railways and certain other public utility undertakings and persons with rights under a statutory superannuation scheme are also excepted if the Minister of Labour certifies that they are not subject to dismissal except for misconduct, and are employed under conditions which make insurance unnecessary, but generally the exceptions include only persons who are excepted from the Health Insurance Acts. A distinction from Health Insurance is that workpeople over 70 will be insurable except in the case of Old Age Pensioners, who are excluded both as regards contributions and benefits.

It is anticipated that the Act will bring into insurance against unemployment an additional 8,000,000 persons, making the total number insured about 12,000,000 persons, including non-manual workers in receipt of remuneration not exceeding in value £250 a year. It is expected that about 8,000,000 will be insured under the general scheme, and that ultimately about 4,000,000 will come under special schemes which may be set up by industries which contract out of the general scheme.

### THE GENERAL SCHEME.

#### (a) Contributions.

The general scheme provides for a weekly contribution at the following rates:

	From employer	From employee	Total
Men of 18 and over. . .	4d.	4d.	8d.
Women of 18 and over. . .	3½d.	3d.	6½d.
Boys of 16 and under 18. . .	2d.	2d.	4d.
Girls of 16 and under 18. . .	2d.	1½d.	3½d.

The payment will be made by the employer affixing special unemployment insurance stamps to unemployment books, which will be issued to employed persons through the Employment Exchanges. The books will be current for the period from 8th November, 1920, to 3rd July, 1921. For every contribution paid in respect of men and women the State will contribute 2d. and 1½d. respectively, and proportionate amounts in the case of boys and girls.

Workpeople insured under previous Acts will not be required to obtain new books, and their previous contributions will be treated as an equal number of contributions under the new Act.

If an employer or an employed person has any doubt whether contributions are payable in respect of any employed person, application should be made by either party or his representative to the Minister of Labour for a definite decision. Any person aggrieved by a decision given by the Minister of Labour may appeal to the High Court.

*(b) Benefits.*

Unemployment benefit will be at the rate of 15s. per week for men and 12s. per week for women. Contributors under 18 are entitled to half the full rate. No benefit is payable for the first three days of unemployment, which constitutes a "waiting period." Thereafter it is payable for a maximum of 15 weeks in any insurance year, subject to the limitation that the amount of benefit drawn must not exceed the proportion of one week for every six contributions.

In order that benefit may be paid, an insured contributor must fulfil certain statutory conditions and be free from certain qualifications.

The statutory conditions are:

- (1) That he proves that not less than 12 contributions have been paid in respect of him. (During the first twelve months of the Act, however, this condition may be satisfied by the payment of four contributions.)
- (2) That he has made application for unemployment benefit in the prescribed manner, and proves that since the date of the application he has been continuously unemployed.
- (3) That he is capable of and available for work, but unable to obtain suitable employment.
- (4) That he has not exhausted his right to unemployment benefit.
- (5) That, if he has been required to attend at an approved course of instruction, he proves that he duly attended.

It is provided, however, that an insured contributor shall not be deemed to have failed to fulfil the statutory conditions by reason only that he has declined:

- (a) an offer of employment in a situation vacant in consequence of a stoppage of work due to a trade dispute; or
- (b) an offer of employment in the district where he was last ordinarily employed at a rate of wage lower, or on conditions less favourable, than those which he habitually obtained in his usual employment in that district, or would have obtained had he continued to be so employed; or

- (c) an offer of employment in any other district at a rate of wage lower, or on conditions less favourable, than those generally observed in that district by agreement between associations of employers and of employees, or, failing any such agreement, than those generally recognised in that district by good employers.

The following are disqualified for unemployment benefit:

(1) An insured contributor who has lost employment by reason of a stoppage of work which was due to a trade dispute at the factory, workshop, or other premises at which he was employed.

(2) An insured contributor who loses his employment through his misconduct, or who voluntarily leaves his employment without just cause.

(3) An insured contributor who is an inmate of any prison or workhouse or who is resident outside the United Kingdom or is in receipt of sickness benefit or of an old age pension or benefit under a special scheme.

(4) Where no contributions are paid in respect of any person during any insurance year (unless the non-payment of contributions was due to his being sick), he is disqualified for receiving unemployment benefit until twelve contributions, exclusive of any contributions paid in respect of him before that year, have been paid in respect of him.

(5) A person in respect of whom no contributions have been paid during a period comprising five insurance years, if contributions are subsequently paid in respect of him, is treated as if he had not previously been an insured contributor.

*(c) Decisions on Claims.*

The decision on a direct claim to benefit is given in the first instant by an Insurance Officer. An insured contributor whose claim to benefit has been disallowed will have an appeal to a Court of Referees, and in certain cases a further appeal to the Umpire appointed by the Crown, whose decision is final.

*(d) Arrangements with Associations and*

*Societies.*

An association or society which provides unemployment benefit from its own funds, and has a system which in the opinion of the Minister of Labour is effective for obtaining and notifying to its members particulars of suitable vacancies may, subject to the approval of the Minister, make arrangements for paying out the State benefit to which their members become entitled. Persons who are not members of such associations will under the general scheme draw their benefit through the Unemployment Exchanges.

*(e) Return of Contributions at age of 60.*

Insured contributors who have made 500 contributions (or a smaller number if over the

age of 55 on entry into insurance) will, on reaching the age of 60, be entitled to a refund of the amount of their own contributions, less any benefit paid, together with interest.

*(f) Special Provision for H. M. Forces.*

Provision is made for persons serving in the Navy, Army or Air Forces under which they are credited on discharge with 90 contributions, in respect of which they will be entitled to draw 15 weeks' benefit during unemployment.

**SPECIAL SCHEMES FOR INDUSTRIES.**

Industries which are willing and able to do so may, with the approval of the Minister of Labour, contract out of the scheme of insurance described above, by setting up special schemes of their own, giving equal or superior advantages. Such schemes, when approved, will have statutory effect. As from the 8th November, 1920, Unemployment Insurance contributions will be payable in respect of all employed persons either under a special scheme for the particular industry, or if such a scheme has not been set up by an industry, under the general scheme. In the case of industries for which special schemes are proposed, but have not been actually set up by the 8th November, contributions under the general scheme paid during the current insurance year by the employers and employees concerned (less expen-

diture on benefit and administration), will subsequently be paid over to the special scheme, together with a State grant, provided the scheme is brought into operation not later than the 4th July, 1921. If desired, two or more industries may combine to set up a special scheme. Special schemes will be administered by a Joint Board of Managers representing employers and employed on behalf of the industry or industries concerned, and the form and amount of the contributions and benefits will be determined in the scheme itself, and need not be the same as those laid down in the general scheme.

**SUPPLEMENTARY SCHEMES.**

The Act further provides that an industry which does not contract out under a special scheme, but remains under the general scheme, may set up a supplementary scheme of contributions and benefits, with statutory effect, in order to provide additional benefits, including payment for short time and the three waiting days.

**GENERAL.**

Leaflets explaining the details of the Act will shortly be obtainable from any Employment Exchange or Branch Employment Office of the Ministry of Labour.

## EVOLUTION OF INSURANCE AGAINST UNEMPLOYMENT

### Summary of New Laws in Italy and Austria

**C**ONSIDERATION of the problem of casual labour has resulted in recent years in many plans for insurance against increasing risk to workers, under modern industrial conditions, of involuntary unemployment due to general economic causes. The four principal types of unemployment insurance may be generally described as: (1) Unassisted Trade Union Insurance; (2) Provided voluntary Insurance; (3) Subsidized autonomous Insurance; and (4) Compulsory State Insurance. These types are described below.

(1) Trade Unions, which first attempted to solve the unemployment problem, had the advantage of being in close touch with their insured members, among whom the incidence of risk was

evenly distributed. But as the whole cost of the scheme is laid on the wage-earners and as no provision is made for the large class of unorganized casual labourers outside the unions, this plan has proved during thirty years' practice to be burdensome and limited in operation.

(2) Unemployment insurance was next provided, about 25 years ago, by public or semi-public authorities, most of them municipal, in certain cities in Switzerland, Germany, and Italy. These schemes were found in practice to be merely modified forms of public relief for the few unemployed who had previously contributed to the unemployment fund, the bulk of this fund, however, being contributed in the form of

charity, by individuals or by the municipality. The schemes tend to become refuges for "bad risks," and are therefore costly, and require large subsidies, which ultimately tend to fall entirely on the municipality.

(3) The next experiment was the "Ghent" plan of 1900, by which public bodies came to the assistance of the trade unions in their voluntary insurance schemes described in paragraph (1). This plan was widely adopted throughout Europe, aid being granted by municipalities in many cities in Belgium, Finland, France, Germany, Holland, Italy and Switzerland; by provinces or departments in some parts of Belgium and France; and by State Governments in Belgium, Denmark, Finland, France, Great Britain,\* Holland, Norway, and Spain. The Ghent system had a marked degree of success, especially as carried out in Denmark, where in 1914 about 60 per cent of the workmen, of every type of employment, including a large number of unskilled workers, were thus protected against the risk of unemployment. The advantages of the Ghent system have been stated to be as follows: That use is made of existing organizations; that control is preserved over the accumulation of "bad risks"; that by means of mutual control the genuineness of unemployment is guaranteed; the expenses of administration are lower than under purely state or civic management; actuarial difficulties are avoided, since the rates of contribution and benefits are determined by the several associations, which are in immediate contact with the workers concerned; that friendly relations between the authorities and the workers are encouraged; that the organization and self-control of workers is a good disciplinary influence. On the other hand the defect of the Ghent system is stated to be that whereas the unorganized worker stands most in need of assistance, it is only the

organized worker who benefits under the plan. This objection is met in theory by supposition that unorganized workers would tend to form themselves into insurance societies in order to enjoy the benefits of the scheme; but in practice it is found that the only class benefiting by the Ghent system of insurance is that of organized trade unionists, and therefore, except in Denmark, no benefit has been conferred upon unskilled workers.

(4) The first experiment with compulsory State unemployment insurance was made at St. Gall in Switzerland in 1894. Under this measure workers were required to contribute to the insurance fund which was supplemented by voluntary donations and municipal appropriations, but employers were exempt from contributions. The workers who drew practically no benefits were hostile to the scheme, which in the minds of the people came to be associated with charitable relief. After about two years of operations the scheme was abandoned. Other similar schemes were proposed in Zurich and Basel, but were not adopted, and it was not until 1911, when the British National Insurance Act became law, that the principle of compulsory insurance against unemployment was carried into effect. Part 2 of the British National Insurance Act provided for (a) compulsory insurance in certain trades, known as "insured trades"; and (b) encouragement of voluntary insurance through subsidies to associations and workers. Amendments to Part 2 of the Act were passed in 1914 when certain administrative changes were introduced, and also in 1915, 1916, and 1918, when new trades were introduced and special provisions were made for conditions arising out of the war. The "insured trades" covered by section (a) of the Act of 1911 were the engineering, shipbuilding, building and constructional industries, these being the trades most subject to fluctuations in regard to employment. Contributions of 2½d. a week each were required from employer and workman. The State added a sub-

\*Part 2 of the National Insurance Act of 1911 provided for the payment of subsidies to associations giving unemployment benefits to members.

sidy equal to a third of the joint contribution of the employer and workman, a further grant being offered to any trade union providing voluntary unemployment benefit. The rate of benefit was 7 shillings a week for not more than fifteen weeks in any one year, workers being permitted to draw their benefit from their union, which was recouped in bulk by the State. In 1919 the rate of benefit was raised to 11 shillings a week on a report from the Government Actuary that the risk of unemployment had been overvalued. During the period of demobilization special grants were made in regard to unemployment and to discharged soldiers and sailors. But these grants having been exhausted, the Government early in the present year brought forward a new Unemployment Insurance Bill designed to make permanent provision for unemployment. This bill has since passed into law, and the new Act is described in a separate article on pages 1199-1201 in this issue.

No other country followed the example set by the British National Insurance Act of 1911 until March, 1918, when the Russian Soviet Government brought into operation a law establishing a system of compulsory insurance against unemployment. The Russian law differed from that of Great Britain in that the workers are not required to contribute, the burden of contributions resting entirely on the employers who are required to pay 4 per cent of their total wages bill, or 5 per cent for seasonal workers. Workers out of employment no less than four days receive benefits to an amount equal to four-fifths of their previous wages, but not more than the average customary wage paid in the industry in which they were employed.

In Switzerland a scheme of compulsory insurance, which came into force in 1919 as a temporary measure pending the enactment of a permanent law, provides relief amounting to 60 per cent of normal earnings (70 per cent for those with dependents), the cost of such relief being covered partly by grants from the Federal Government, the can-

tons and communes, and partly by contributions levied upon the employers.

In Queensland, Australia, an Unemployed Workers Bill was introduced in the Legislative Assembly in September 1919, providing for compulsory insurance against unemployment. The most notable feature of this bill is that the workers are not required to contribute to the fund from which unemployment benefits are drawn, the expenses being defrayed by an assessment levied upon employers, amounting to £2 per annum for each worker for the year 1919, and for subsequent years as determined by the Minister responsible. The amount of weekly benefits range according to districts from 17s. 6d. to 22s. 6d. for single male or female workers, and from 25s. to 35s. for workers with dependents, with an additional 4s. to 5s. for each child of a married worker, widower or widow, under 16 years of age living with and dependent on the worker.

Compulsory unemployment insurance has been discussed in Germany, but apart from an out-of-work donation scheme to meet post-war conditions no national scheme has so far been adopted.

### **New Laws in Italy and Austria**

In Italy and Austria, unemployment insurance laws have recently been enacted which are similar in many respects to the New British Unemployment Act described elsewhere in this issue.

In Italy a law was passed at the end of 1919 bringing compulsory insurance against unemployment into force during the present year. Under the new law the grants hitherto made to unemployed workers are abolished, and the scope of the Central and Provincial employment offices is extended to include the administration of a new insurance fund to cover unemployment risk. Each Provincial committee is composed of three employers and three employees' representatives (supported by two "under-studies" in each class), with a magistrate acting as chairman. Its duties are, to superintend subordinate insur-

ance and employment offices, and to transfer surplus labour to other fields.

The number of employees who will be subject to the obligation to insure against unemployment is estimated at not less than five millions. The receipts of direct contributions from employers and employees are expected to average 540,000 lire daily or about 13 million lire monthly, which with an annual contribution from the Government of 40 million lire would place at the disposal of the insurance organization an annual income of 200 millions of lire to provide against unemployment, a sum which is considered amply sufficient to provide for the permanent unemployment of one-tenth of the total number of the workers insured. This fund is administered ultimately by the Central Executive Employment Agency. Workmen and other employees who receive less than 350 lire a month are obliged to insure; but persons under 15 or 65, persons working at home, domestic servants, public employees and voluntary workers, are exempt from contributions. Since the risk of unemployment is not subject to any known mathematical law from which an "unemployed coefficient" of the number of insured persons can be determined the amount of contributions is for the present fixed only provisionally as follows: for a day worker receiving up to 4 lire a day, a weekly contribution of 0.35 lire; for a day worker receiving from 4 to 8 lire and over 8 lire daily the weekly contribution is respectively 0.70 and 1.05 lire. Part of the contributions assigned to the national fund direct, the remainder being administered (under central supervision) by local committees, which disburse daily unemployment grants in proportion to the contributions made by workers: for the first class 1.25 lire, for the second class 2.50 lire, and for the third class 3.75 lire, but in no case may the grant be more than half the daily wage. Grants are made from the eighth day of unemployment and for a maximum period of 120 days in the year. Seasonal

unemployment is compensated only where the workers so affected have made special contributions for this contingency; and unemployment due to industrial disputes is also excepted from the provisions of the Act. An unemployed worker is required to register as such on the day following his dismissal, unless however he has made on his own behalf during the two preceding years at least 24 fortnightly or equivalent numbers of daily or weekly contributions, he is not entitled to any grant. The scale of grant and contributions is as follows: for 24-36 fortnightly contributions, 90 days' grant, for over 36 contributions 120 days' grant. An unemployed worker who declines work in his own trade without just reason forfeits the right to a grant. Persons also who are declared by resolutions of the local committee to be lazy or intemperate are (subject to appeal to the Provincial Committee) to be ineligible for a grant.

Each worker is provided with a pass book in which the dates of his employment are entered by the employing firm. Among other provisions of the Act local communes may be given special grants to undertake public works to meet local unemployment, the law sanctioning state assistance or privileged loans from banks. Provision is also made for the forming of co-operative unemployment groups of workers by trades, and for their registration among the co-operative societies of the province.

In Austria, the special unemployment insurance Act in force during the period of demobilization was superseded, on March 24, 1920, by a new Act designated to cope with a normal volume of unemployment. The new Act created an insurance fund to which the state contributed one-third. The remainder is collected from the employers and employees along with sickness insurance contributions.

In order to benefit from the fund workers must have been employed for at least 20 weeks in the preceding year. Those who gave up their work arbitrarily

and without good reason forfeit their claim to benefit for four weeks. A worker who has been in receipt of benefit for eight weeks without prospect of obtaining employment at his own trade must accept employment in some occupation suited to his capacities, the necessary training being provided.

Benefits are not granted for more than 12 weeks in the year, with a special extension up to eight weeks in certain individual cases; and payment does not begin until the eighth day of unemployment. The benefit for unmarried workers, manual and non-manual, is 60 per cent, and for married workers 80 per cent of the daily sickness benefit due to the worker in the last employment in which he was compulsorily insured

against sickness. As a temporary measure, however, while present economic disturbances continue, unemployment benefits may amount to 100 per cent of the sickness benefit for unemployed persons with dependent families, and to 75 per cent for the others. Industries considered to be favorable in regard to employment conditions may be excluded altogether from the benefits of the Act.

The Insurance fund is administered by District Industrial Committees composed of employers and employed in equal numbers. These Committees nominate similar sub-committees to arbitrate complaints made by individuals at the several Employment Exchanges as to benefit receipts and other points causing dispute.

### REPORT OF THE INTERCHURCH WORLD MOVEMENT ON THE RECENT STRIKE OF EMPLOYEES OF THE UNITED STATES STEEL CORPORATION

**I**N April, 1919, over five hundred representatives of nearly all the chief protestant denominations in the United States met at Cleveland, Ohio, and set on foot the Interchurch World Movement for the following purposes: (1) To undertake a scientific survey of the world's needs from the standpoint of evangelical Christianity. (2) To project a co-operative community and world programme to meet the needs as revealed by the survey. (3) To discover and develop the resources of men, money and power necessary for the accomplishment of the programme. The conference further declared that the church should give a contribution to the solution of the definite social and industrial problems of the new day of readjustment and reconstruction.

Last October, in accordance with these aims the executive committee of the Movement appointed an Industrial Relations Commission to investigate the causes of a strike among employees of

the United States Steel Corporation. The members of the Commission comprised Bishop Francis J. McConnell, of the Methodist Episcopal Church, chairman; Dr. Daniel A. Poling, editor of the Christian Endeavour World, vice-chairman; Dr. Nicholas Van der Pyl, Oberlin; Mrs. Fred Bennett, New York; Dr. Alva W. Taylor, Missouri; George W. Coleman, Boston; Dr. John McDowell, New York; and Bishop William M. Bell, Harrisburg. A sum of \$12,000 was appropriated for the purpose of this investigation and a staff of industrial experts were employed to assist in the work. Four months were spent in studying the situation, and during the strike open hearings were held in Pittsburgh. Evidence was obtained from the Bureau of Applied Economics at Washington, from a firm of consulting engineers and from various other organizations and experts. The report of the Commission, a document of 100,000 words, was accepted by the Executive

Committee in May and it was referred to a sub-committee composed of Dr. H. B. Herring, Boston; Mrs. H. W. Peabody, New York; Bishop James Cannon of the Methodist Church South, Mr. John D. Rockefeller, jr., and Mr. Warren S. Stone, president of the Brotherhood of Locomotive Engineers. The report which was recently made public contained the following conclusions:

1. The conduct of the iron and steel industry was determined by the conditions of labour accepted by the 191,000 employees in the U.S. Steel Corporation's manufacturing plants.

2. These conditions of labour were fixed by the Corporation, without collective bargaining or any functioning means of conference; also without above-board means of conference; also without above-board means of learning how the decreed conditions affected the workers.

3. Ultimate control of the plants was vested in a small group of financiers whose relation to the producing force was remote. The financial group's machinery of control gave it full knowledge of output and dividends, but negligible information of working and living conditions.

4. The jobs in the five chief departments of the plants were organized in a pyramid divided roughly into thirds; the top third of skilled men, chiefly Americans, resting on a larger third of semi-skilled, all based on a fluctuating mass of common labour. Promotion was at pleasure of company representatives.

5. Rates of pay and other principal conditions were based on what was acceptable to common labour; the unskilled and semi-skilled force was largely immigrant labour.

6. The causes of the strike lay in the hours, wages and control of jobs and in the manner in which all these were fixed.

7. Hours: Approximately one-half the employees were subjected to the twelve-hour day. Approximately one-half of these in turn were subjected to the seven-day week. Much less than one-quarter had a working day of less than ten hours (sixty-hour week). The average week for all employees was 68.7 hours; these employees generally believed that a week of over sixty hours ceased to be a standard in other industries fifteen to twenty years ago. Schedules of hours for the chief classes of steel workers were from twelve to forty hours longer per week than in other basic industries near steel communities; the American steel average was over twenty hours longer than the British, which ran between forty-seven to forty-eight hours in 1919. Steel jobs were largely classed as heavy labour and hazardous. The steel companies professed to have restored practically pre-war conditions; the hours nevertheless were longer than in 1914 or 1910. Since 1910 the Steel Corporation has increased the percentage

of its twelve-hour workers. The only reason for the twelve-hour day, furnished by the companies, were found to be without adequate basis in fact. The increased hours were found to be a natural development of large scale production, which was not restricted by public sentiment or by organization among employees. The twelve-hour day made any attempt at "Americanization" or other civic or individual development for one-half of all immigrant steel workers arithmetically impossible.

8. Wages: The annual earnings of over one-third of all productive iron and steel workers were, and had been for years, below the level set by government experts as the *minimum of subsistence* standard for families of five. The annual earnings of 72 per cent of all workers were, and had been for years, below the level set by government experts as the *minimum of comfort* level for families of five. The second standard being the lowest which scientists are willing to term an "American standard of living," it follows that nearly three-quarters of the steel workers could not earn enough for an American standard of living. The bulk of unskilled steel labour earned less than enough for the average family's minimum subsistence; the bulk of semi-skilled labour earned less than enough for the average family's minimum comfort. Skilled steel labour was paid wages disproportionate to the earnings of the other two-thirds, thus binding the skilled class to the companies and creating divisions between the upper third and the rest of the force. Wage rates in the iron and steel industry as a whole are determined by the rates of the U. S. Steel Corporation. The Steel Corporation sets its wage rates, the same as its hour schedules, *without conference* (or collective bargaining) with its employees. Increases in wages during the war in no case were at a sacrifice of stockholders' dividends. Extreme congestion and unsanitary living conditions, prevalent in most Pennsylvania steel communities, were largely due to underpayment of semi-skilled and common labour.

9. Grievances: The Steel Corporation's arbitrary control of hours and wages extended to everything in individual steel jobs, resulting in daily grievances. The Corporation, committed to a non-union system, was as helpless as the workers to anticipate these grievances. The grievances, since there existed no working machinery of redress, weighed heavily in the industry, because they incessantly reminded the worker that he had no "say" whatever in steel. Discrimination against immigrant workers, based on rivalry of economic interests, was furthered by the present system of control and resulted in race divisions within the community.

10. Control: The arbitrary control of the Steel Corporation extended outside the plants, affecting the workers as citizens and the social institutions in the communities. The steel industry was under the domination of a policy

whose aim was to keep out labour unions. In pursuit of this policy, blacklists were used, workmen were discharged for union affiliation, "under-cover men" and "labour detectives" were employed, and efforts were made to influence the local press, pulpit and police authorities. In western Pennsylvania the civil rights of free speech and assembly were abrogated without just cause, both for individuals and labour organizations. Personal rights of strikers were violated by the state constabulary and sheriff's deputies. Federal authorities, in some cases, acted against groups of workmen on the instigation of employees of steel companies. In many places in western Pennsylvania, community authorities and institutions were subservient to the maintenance of one corporation's anti-union policies.

11. The organizing campaign of the workers and the strike were for the purpose of forcing a conference in an industry where no means of conference existed; this specific conference to set up trade union collective bargaining, particularly to abolish the twelve-hour day and arbitrary methods of handling employees.

12. No interpretation of the movement as a plot or conspiracy fits the facts; that is, it was a mass movement, in which leadership became of secondary importance.

13. Charges of bolshevism or of industrial radicalism in the conduct of the strike were without foundation.

14. The chief cause of the defeat of the strike was the size of the Steel Corporation, together with the strength of its active opposition and the support accorded it by employers generally, by governmental agencies and by organs of public opinion.

15. Causes of defeat, second in importance only to the fight waged by the Steel Corporation, lay in the organization and leadership, not so much of the strike itself, as of the American labour movement.

16. The immigrant steel worker was led to expect more from the twenty-four international unions of the A. F. of L. conducting the strike than they, through indifference, selfishness or narrow habit, were willing to give.

17. Racial differences among steel workers and an immigrant tendency toward industrial unionism, which was combated by the strike leadership, contributed to the disunity of the strikers.

18. The end of the strike was marked by slowly increasing disruption of the new unions; by bitterness between the "American" and "foreign" worker and by bitterness against the employer, such as to diminish production.

For the purpose of obtaining a permanent settlement of the causes of unrest among employees of the Steel Corporation, the Commission recommended (1) that the Federal Government set up

a commission representing both sides and the public to (a) Inaugurate immediate conferences between the Steel Corporation and its employees for the elimination of the 12-hour day and the 7-day week, and for the readjustment of wage rates; (b) Devise with both sides and establish an adequate plan of permanent free conferences to regulate the conduct of the industry in the future; (c) Continue and make nation-wide and exhaustive this inquiry into basic conditions in the industry. (2) That the Federal Government inaugurate full inquiry into the past and present state of civil liberties in western Pennsylvania and publish the same. (3) That the Federal Government institute investigation for the purpose of regulating labour detective agencies; and for the purpose of publishing what government departments or public moneys are utilized to co-operate with company "under-cover men." (4) That the proper Federal authorities be requested to make public two reports of recent investigations of conditions in the steel industry, in making which public money was spent, and to explain why these and similar reports have not hitherto been made public, and why reports which were printed have been limited to extremely small editions. (5) That the Industrial Relations Department of the Interchurch World Movement continue and supplement the present inquiry into the iron and steel industry with particular reference to (a) company unions and shop committees; (b) social, political and industrial beliefs of the immigrant worker; (c) present aims of production in the industry; (d) conduct of trade unions with reference to democracy and responsibility. (6) That immediate publication, in the most effective forms possible, be obtained for this report with its sub-reports.

One of the reports referred to above, that of the United States Senate Committee of Investigation of the strike at the mills of the United States Steel Corporation, was reviewed in the LABOUR GAZETTE, December 1919, at pages 1418-20.

## STANDARDIZED PRODUCTION APPROVED BY GARMENT WORKERS

### Biennial Convention of Amalgamated Clothing Workers of America

**T**HE plan of standardized production, under which the manufacturers and workers engaged in the garment industry in Cleveland, Ohio, recently agreed on a fixed weekly standard of pay for a fixed weekly standard of work, was described in the LABOUR GAZETTE for May, 1920. The unions taking part in that agreement were those affiliated with the International Ladies' Garment Workers' Union. The principle of standardization of work, both in regard to quantity and quality, was subsequently approved at the fourth biennial convention of the Amalgamated Clothing Workers of America, held in Boston in May, a resolution being passed by a vote of 2 to 1 favoring the establishment of a stipulated amount of work for each 44 hours of labour, the abolition of piece work and the adoption of the week-work system. The delegates from Montreal were among those who supported the resolution. The chief objection urged against work standards was that the manufacturers would attempt to set these standards too high, but it was decided that the union was strong enough to meet such a risk. In closing the debate, President Hill said: "With week-work and no standards you will lead the public to believe you are trying to grab everything you can get and do as little as possible for it, and I would not blame them for thinking so. There is no chance of a standard scale of wages

unless you have production standards. So, for the sake of the labour movement as a whole, when we say to employers and public that we want standards of health and of living, let us also say that we are ready to establish standards of production." The general executive board of the Union is now engaged in a study of the market conditions in each centre of the clothing industry, and is endeavouring to reach an understanding with the manufacturers as to a possible scale or standard of work which might be regarded as equivalent in value to the prevailing maximum rates of pay. A lower standard of efficiency will also be set to correspond with the lower wages earned by workers who are unable to reach the highest scale of production. The new plan is intended to provide an equally efficient substitute for piece work, to which the workers objected as tending to drive them beyond their natural capacity. It is claimed also that it meets the objections of the manufacturers to the system of time payments by the week, regardless of the amount of work performed. Both difficulties, it is believed, are met by the system of standardized production. The experience of a three-years' trial of the principle of standardized production in the Priestman Brothers' machinery plant in Hull, England, where the result was to bring a considerable increase in wages to the workers, was described in the last issue of the LABOUR GAZETTE (page 1021).

# "THE PRESENT NEED FOR PROPORTIONAL REPRESENTATION"

By Ronald Hooper

(Reprinted from the "Labour Day Review," 1920)

It is clear that proportional representation would help to increase confidence in representative institutions; and as that confidence is being shaken by election results on existing lines, it is in the national interest that proportional representation should meet with greater support.

Rt. Hon. J. R. Clynes, M.P.

The increasing adoption of the Proportional Representation method of election in democratic countries in recent years is a distinct sign of the times. The single member constituency, the block vote, and other "majority" methods of election served their purpose sufficiently well in the past when parliaments were engaged in dealing only with the general rights of the people, as, for example, freedom in religious beliefs, the right to trial by jury, and other questions which affected all classes equally. But now that our legislatures are increasingly giving consideration to economic questions, to the adjustment of differences between Capital and Labour, between rich and poor, it is conceivable that governments which operated equitably enough when universal rights only were concerned, might not operate fairly where there is a conflict between particular interests.

In view of the labour clauses of the Peace Treaty, it would appear as though industrial and political issues were destined to be more closely interwoven in the future. The question then arises, are our legislatures as composed at present, fitted to deal with these questions in a properly sympathetic manner, with a full understanding of the issues involved? Further, have they any real authority to do so? The main authority of a democratic parliament lies in its ability to interpret the will of the people. If our parliaments do not possess that authority, they have no more

real power to govern than any other indiscriminate gatherings of intelligent gentlemen.

At the last general election in the United Kingdom the Labour party polled in contested constituencies 2,292,102 votes. This entitled them to 120 seats in respect to the contested constituencies alone; but the total number of seats obtained, both contested and uncontested, was 59. The unrepresentative character of the new British parliament brought with it a realization of something akin to political impotency on the part of Labour, which was accentuated by the refusal of the Government to act in accordance with the findings of the Sankey Coal Commission. Thus a great impetus was given to the policy of the Direct Actionists. But at the British Trades Union Congress, held at Glasgow in September, 1919, the chairman, Mr. E. Stuart Bunning, in his opening speech declared himself against direct action on such issues as the nationalization of mines, in these words: "I do not believe in industrial strikes on political issues—in other words, I do not despair of constitutional methods. There is no political reform, however great and far-reaching, which the working people of this country could not obtain by the ballot box." That the great majority of the Congress shared this view and, further, that they recognized the changes necessary to be made in order that they might hope to achieve their purpose through constitutional means, is shown by the following resolution which was adopted almost unanimously: "That this Congress instructs the parliamentary committee to press for the following electoral reform . . . (c) The proportional representation of all opinions and interests by means of the single transferable vote, with constituencies returning at least five members." (The Congress

at the same time decided that in future its Parliamentary Committee should be elected by proportional representation, the miners, numbering one-eighth of the Trade Unionist body, being entirely unrepresented on the existing committee.)

Of those who did not support the above resolution, many frankly adopted a policy of opportunism. They contended that the injustices of the present electoral system, which so long operated against them, were now likely to swing in their favour and, to put it plainly, as a consequence they in their turn were likely in the future to receive more parliamentary representation than they were justly entitled to. But such an argument is double-edged. The immoderate system of election under which a few thousand extra votes could suddenly swing them into power could just as rapidly swing them out again. Australia affords many examples of this. To take but one instance: The Commonwealth Senate in 1914 was composed of 31 Labour representatives and 5 Liberals, although Labour had polled but 53 per cent of the total vote that elected them. But in 1917, when the term of office for one-half of the senators had expired, Labour, though polling 45 per cent of the vote, did not elect a single representative, and lost its majority of members. Under a system of proportional representation the Labour party would have elected 8 members and would have retained a majority of the seats.

It is not the purpose of this article to discuss proportional representation in detail. It will be sufficient to say that it is quite workable and that it gives reasonable justice to all contending parties. Both these assertions are proved by the recent provincial elections in

Manitoba, where the representatives for Winnipeg were elected under the system. The test was the most severe that has so far been made in any country. Forty-one candidates contended for 10 seats, and over 47,000 valid ballots were cast. The accuracy of the counting process was fully conceded both by the candidates and their agents and by the press. The candidates representing the two wings of the Labour party polled 42.5 per cent of first-choice votes and elected four of the ten members. The Labour party might conceivably have elected a fifth member had it not been for the fact that on some 2,000 of the ballots on which Labour candidates were marked as first choice, the second and further preferences, owing to a temporary political situation, were marked for other than Labour candidates.

A writer in the *Western Labour News*, in summing up the results of the Winnipeg election, stated: "There is no doubt at all but that the proportional system applied over the whole city greatly assisted the cause of Labour. It enabled Labour to present a solid front to the enemy. Differences within the ranks could express themselves in fights for position without prejudice to the general combat."

The general application of proportional representation to the federal and provincial elections of this country would be to the interest, not necessarily of any one or more of the political parties, but of the people of Canada as a whole. Our parliaments would then be more truly representative of the popular will, and thus the door would be more widely open to an orderly and peaceful progress that would preserve the good and remove the evil in things as they are.

## TWELFTH ANNUAL CONVENTION OF THE CANADIAN FEDERATION OF LABOUR

THE twelfth annual convention of the Canadian Federation of Labour was held at Hamilton on August 23-26. The President Mr. M. F. Tumpane, presided. There were present 50 delegates representing 40 unions with a membership of approximately 5,000. Mr. E. N. Compton, of the Dominion Department of Labour, was present by invitation.

The report of the secretary-treasurer showed that 19 charters had been issued and 1,500 members added as the result of extensive propaganda work during the year, and that the Federation was in a satisfactory condition financially, the revenue amounting to \$5,012, which was slightly more than the expenditure. It was announced that in its membership campaign the Federation had been successful among the building trades in Alberta, that it has branches in five provinces, and that plans are under way to take in several unions in Quebec province.

The delegates discussed ways and means to strengthen and expand the organization by seeking the affiliation of Canadian unions. Some amendments to the constitution were adopted. The opinion was expressed, and approved by the delegates generally, that the Canadian Federation of Labour is the only national organization of its kind in the Dominion, and that it should receive greater recognition from the federal Department of Labour. The Federation decided to identify itself with the political labour movement, and to affiliate with and give financial and moral support to the Ontario labour party. The secretary, Mr. Charles E. Clay, spoke on the alleged policy of international unions importing mechanics from the United States to take the jobs of national union men who did not support the American Federation of Labour. It

was felt that the Federation should impress on the federal government the need for recognition of all Canadian labour. The "check-off" system by which international union dues under agreement with certain of the mining companies in Western Canada are collected by the latter for the local union was under discussion, and in this connection a complaint was made that certain shops in Canada would not employ Canadian Federation of Labour members unless they agreed to pay international dues. A resolution was adopted "that the Canadian Federation of Labour protest to the Dominion Government against arrangements made whereby members of Canadian unions are compelled to pay tribute to an American Union." The convention criticized the federal government for not putting into force the eight-hour day in accordance with the declaration in the League of Nations covenant that this was the standard to be aimed at where it has not already been attained. It was decided to ask the Ontario government to increase the staff of factory inspectors at an early date. A motion was presented that the Ontario government should go ahead with the acquiring and building of roads for the Hydro radial, but this resolution was withdrawn, the opinion of some of the members being that the new government should be given a chance to get all possible information on big financial matters before committing itself.

Other resolutions were passed asking that the Ontario Hydro-Electric Commission consider the question of establishing a provincial telephone system; that the Ontario Government take steps to have the provincial Hydro-Electric Commission take over the telegraph system; and memorializing the federal government "to repatriate discharged Canadian soldiers in England, instead of importing alien labour."

It was decided to hold the next convention at Montreal.

The following officers were elected: President, M. F. Tumpane, Toronto (re-elected); Vice-president, J. Crowley,

Toronto; Second Vice-president, Bert-ram East, Toronto; Third Vice-President, H. S. Spry, Toronto; Fourth Vice-president, A. Brien, Montreal; Secretary-treasurer, Charles E. Clay, Toronto (re-elected).

## UNEMPLOYMENT IN TRADE UNIONS AT THE CLOSE OF JULY, 1920, AS REPORTED BY UNIONS MAKING RETURNS

THE present article on unemployment among the members of local trade unions deals with unemployment as at the end of July, 1920, and is based on returns received from 1,464 labour organizations with a total membership of 185,527. For all occupations reporting 2.64 per cent of the members were unemployed as compared with 2.48 per cent at the end of June, 1920, and with 2.40 per cent at the end of July, 1919. Unemployment as used here has reference to involuntary idleness due to economic causes. Persons occupied in work other than their own trades or who are idle because of sickness or as the direct result of strikes or lockouts, are not considered as unemployed. As the number of unions making returns varies from month to month with consequent variations in membership upon which the percentage of unemployment is based, it should be understood that the percentage of unemployment figures have reference only to those unions reporting.

That the percentage out of work at the end of July was slightly larger than in the preceding month was due to there having been slightly less activity in the manufacturing and mechanical industries, while the small increase in the number unemployed as compared with July, 1919, was caused by a nominal decrease in employment for transportation work-

ers and also in the building and construction group.

Table I on this page summarizes the returns by provinces. Nova Scotia and Prince Edward Island, New Brunswick, Ontario and Saskatchewan showed decreases in unemployment in comparison with the returns for both June, 1920, and July, 1919.

TABLE 1.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	Nova Scotia & Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada
Dec. 1915.....	.36	.7	9.9	8.1	3.2	7.0	4.3	14.3	8.01

nominal increases as compared with figures for the corresponding month of 1919. On the other hand, in Alberta the percentage out of work was somewhat larger than that reported at the end of June, but improvement was shown as compared with returns for July of last year. In British Columbia the percentage of unemployment was considerably larger than in either month used in this article for comparative purposes.

The percentage reported idle in the different groups of industries are indicated in Table II on this page.

Unemployment in the manufacturing and mechanical industries, as recorded by 369 unions having a combined membership of 50,373 was slightly more prevalent than at the end of June, 2.86 per cent of the members having been unemployed as compared with 2.17 per cent in the preceding month. In comparison

with the returns for July of last year, however, a decrease in unemployment was shown, the percentage out of work in that month having been 2.95. Workers in metals, machinery and conveyances, and printing, publishing and paper goods were not quite as fully engaged as at the end of June, but considerable improvement was registered as compared with returns for July, 1919, particularly in the case of the former group. On the other hand, the percentages out of work among tradesmen in the food, tobacco and liquors, clothing and laundering and glass groups were somewhat smaller than those reported during the previous month, but conditions were not as good as in the corresponding month of last year. In textiles, carpets and cordage, as reported by 9 unions, there were no members out of work as compared with nominal percentages of unemployment in both June, 1920, and July, 1919.

In woodworking, furniture, leather, boots, shoes and rubbers, jewellery, and oil refining, the percentages out of work were somewhat larger than in both months used in this article for comparison. Employment in the pulp, paper and fibre group as reported by 22 unions was well maintained, there having been no members reported as unemployed during July or June, 1920, as compared with a small percentage of unemployment in July of last year. Some short time was reported by unions of boiler-makers, machinists, printing pressmen, wood carvers, musical instrument makers, boots and shoe workers, jewellery workers, tailors, cigarmakers and glass workers.

Reports from 590 organizations of transportation workers, having a total membership of 72,979 persons, indicated that 2.52 per cent of the members were unemployed as compared with percentages of 2.49 in June, 1920, and 2.05 in July, 1919. Employment amongst steam railway employees (whose returns constituted over 72 per cent of the entire transportation membership reporting) showed considerably more activity than in the preceding month and also than in the corresponding month of last year. Street and electric railway employees and teamsters and chauffeurs registered slightly larger percentages of idleness than at the end of June, but in comparison with July of last year they both showed improvement. In the navigation sub-group, however, employment was not as active as in either month used in this article for comparative purposes. This slackness was largely the result of dullness in shipyards in British Columbia. Some short time was reported by unions of engineers, trainmen, railroad and steamship clerks, freight handlers and longshoremen.

In the mining, quarrying and refining of ores group returns were tabulated from 34 unions having an aggregate membership of 10,081 persons and show that .94 per cent of the members were out of work as compared with .38 per cent at the end of June and with .47 per

cent at the close of July, 1919. Miners were slightly less fully employed than in either month, while mill and smeltermen as reported by one union showed no unemployment in July or June, 1920, in comparison with an unemployed percentage of 1.75 in July, 1919.

The percentage out of work in the building and construction group, as reported by 264 organizations having a combined membership of 32,749 persons, was 3.99, as compared with unemployed percentages of 4.28 in June, 1920, and 3.88 in July of last year. Electrical workers, granite and stone cutters, painters, decorators, and paper hangers, plumbers and steam fitters, tile layers, lathers, and roofers and bridge and structural iron workers registered increased employment both as compared with the returns for the previous month and for July, 1919. The percentage out of work among bricklayers, masons, and plasterers was somewhat smaller than that reported at the end of June. It was, however, larger than the percentage for July, 1919. On the other hand, carpenters and joiners showed a slightly larger percentage of idleness than in June, but there was a small decline in unemployment as compared with the returns for July of last year. The percentages out of work among steam-shovel men and dredgemen, and hod carriers and building labourers, as reported by 2 and 8 unions, respectively, were larger than in either of the comparative months. Some short time was recorded by unions of carpenters and joiners, electrical workers and plumbers.

In the public employment group, as reported by 72 unions having a combined membership of 5,952 persons, the percentage unemployed was .03 as compared with no members out of work in both June, 1920, and July, 1919. Civic employees showed a nominal increase in unemployment as compared with the figures for the previous month, and also for July of last year.

Unemployment in the group of miscellaneous trades, as indicated by the returns received from 129 organizations

with 11, 291 members was less prevalent than in either month used in this article for comparative purposes, 1.84 per cent of the members having been reported as unemployed as compared with the percentages of 2.48 and 2.79 in June, 1920, and July, 1919, respectively. Stationary engineers and firemen, and unclassified workers showed smaller percentages of idleness than in both June, 1920, and July of last year. Retail clerks, as reported by 7 unions, were more fully engaged than in June, but the percentage

out of work was slightly larger than in July, 1919. The same is true also of barbers. On the other hand, musicians and theatre employees showed a small increase in the percentage out of work in comparison with the returns for June, 1920, with a decrease as compared with the figures for July, 1919. Employment among hotel and restaurant employees was not quite as well maintained as in June or July, 1919.

The tabular statement on pages 1214-15 presents the returns in some detail.

## REPORT OF THE EMPLOYMENT SERVICE OF CANADA FOR FOUR-WEEK PERIOD OF JULY 19 TO AUGUST 14, 1920

**R**EPORTS from Employment Offices to the Dominion Headquarters of the Employment Service of Canada show an increase in the number of placements during the four-week period July 19 to August 14, as compared with the preceding period. The reports indicate that the placements for the period under review totalled 35,368, while those for the period ended July 17, were 26,995. The greatest increase was reported in the latter part of the period and was due chiefly to the demand for farm labourers at the opening of the harvest season in the West.

During the period under review (July 19 to August 14) regular placements were reported by weeks as follows: For week ended July 24—7,267; week ended July 31—7,216; week ended August 7—7,635; week ended August 14—13,250. In addition 6,836 casual jobs (employment of a duration of less than one week) were supplied and were reported by weeks as follows: Week ended July 24—1,737; week ended June 31—1,558; week ended August 7—1,522; week ended August 14—2,019.

The accompanying chart shows graphically the number of applications and

vacancies registered as well as the number of placements made for the full period of the record. The chart indicates that since July 19 (previous periods having been reviewed in other issues of the LABOUR GAZETTE) the applications registered, vacancies notified, and placements reported have all increased notably. It will be observed that vacancies have increased to a much greater extent than applications, due largely to the demand of the Prairie provinces for farm labour. Applications, however, have increased considerably, and during the last week of the report reached the highest number yet recorded. Placements also show a record figure, being higher during the week of August 14 than during any preceding week since the organization of the Service.

The accompanying table shows in some detail the work of the offices for the four weeks' period ended August 14. The report indicates that at the beginning of the period (July 19) there were 3,660 applicants remaining unplaced, of which 2,810 were men and 850 were women, as compared with 2,893 men and 1,109 women, a total of 4,002 applicants unplaced at the end of the four weeks. The number of vacancies remaining unfilled on July 19 totalled 11,055, of which 7,479 were for men and 3,576 were for women, as compared with a total of 14,695 vacancies remaining unfilled at the end of the period. During the period under review employers notified the Service of 47,373 vacancies, of which 42,260 were for men and 5,113 were for women, while the number of

applicants registered at the offices totalled 44,036, of which 40,051 were men and 3,985 were women. This compared with 34,817 vacancies and 34,198 applications reported during the previous four weeks' period. The report shows also that placements in regular em-

ployment numbered 32,740 for men and 2,628 for women, as compared with 24,241 for men and 2,754 for women during the previous period. Placements in casual jobs totalled 6,836 as compared with 7,131 during the preceding period, a decrease of 295.

### EMPLOYMENT CONDITIONS IN CANADA DURING THE PERIOD JUNE 28 TO AUGUST 1, AS REPORTED BY EMPLOYERS

**W**EEKLY reports from employers to the Dominion Headquarters of the Employment Service of Canada, Department of Labour, during the five weeks from June 28 to August 1, inclusive, show fluctuations from week to week in the employment situation, sharp declines in the volume of employment being reported during three of the weeks with increases during the remaining two.

The change recorded for each of the weeks under review as compared with the preceding week was as follows:—

Week ending July 3, a decrease of 2,163 persons, or .3 per cent.

Week ending July 10, an increase of 5,187 persons, or .7 per cent.

Week ending July 17, a decrease of 1,310 persons, or .2 per cent.

Week ending July 24, an increase of 29 persons.

Week ending July 31, a decrease of 4,145 persons, or .6 per cent.

For the five-week period under review employment conditions varied somewhat in the different parts of Canada, declines in employment, however, occurring during one or more weeks in every district. In the Maritime Provinces, there were decreases in the weeks of July 3, 17 and 21 with increases in the remaining weeks. Firms in Quebec recorded increased employment only

during the week of July 10, while in Ontario there were gains for the periods ending July 10 and 17 with sharp declines in the other weeks. In the Prairie Provinces, conditions as reported by employers were better than in other sections of the country, steady increases occurring during the first four weeks of July, with a nominal decrease in the last. Establishments in British Columbia showed reductions in employment during the first and third weeks with additions in the second, fourth and fifth weeks, those registered on July 10 and 24 being especially large for this district. Decreases during one or more of the weeks under review were recorded by all provinces in both the Maritime and Prairie districts, with the exception of Alberta, where firms showed continued gains for the whole period.

A summary of the returns by industrial groups shows that Railway Construction and Telephone Operation, only, reported gains during each of the weeks under review. Building Construction, Pulp and Paper, Wood Distillates, Non-Metallic Minerals other than coal (quarrying), Telegraph Operation, Hotels and Restaurants, Railway and Water Transportation showed fluctuations from week to week with net gains during the period as a whole.

On the other hand; Logging; Edible Animal Products; Lumber and Its Products; Clay, Glass and Stone Products; Edible Plant Products; Fur Goods; Iron and Steel; Mineral Products, n.e.s.; Non-Ferrous Metal Products; Rubber Goods; Textiles; Miscellaneous Manufacturing Industries, (largely tobacco and chemicals); Coal Mining, Mining of Metallic Ores; Wholesale and Retail Trade; Personal Services (chiefly laundries); and Local Transportation reported declines taking the period as a whole with increases during one or more of the weeks under review. In Leather Goods only were there reductions in employment recorded during each week of the period.

As during the three preceding periods, reviewed in the LABOUR GAZETTE, the additions registered in the Railway Construction group were the most noteworthy, aggregating 2,804 persons. The increases in Hotels and Restaurants may be attributed to activity in summer hotels. Employment in Railway and Water Transportation, as shown by the reports, was well maintained. The declines in Edible Animal Products occurred to a considerable extent in the Maritime Provinces where the close of the fishing season caused reductions in this group. The most noteworthy fluctuations in Lumber and its Products were reported in British Columbia, but in other provinces declines, which have been attributed in some cases to the close of the sawing season for some mills, also occurred. In Edible Plant Products, the changes took place largely in the canning sub-group where employment fluctuated considerably, depending upon the harvesting and arrival of raw material. Most of the reductions in the Iron and

Steel group took place in the vehicle sub-group, in British Columbia and also in Ontario and Quebec. Shortage of fuel and curtailment of staffs for stock-taking purposes and holidays contributed to the net declines in this group. In Leather Goods, Rubber Products and Textiles the decreases in employment were the result of three causes, reductions for inventories, vacations, and seasonal inactivity. It may be noted with reference to the last named that the reductions in staffs during the five weeks under review for the first time caused declines in comparison with the base figures, employment to the end of June having been maintained at a high level as compared with returns from the same establishments for January 17, the base week.

The accompanying chart shows the weekly percentage of change in the number of persons on payrolls in comparison with the figures for the base week (January 17), as reported by those employers making returns, the number of firms averaging over 5,100. The returns for the week of January 17 are being taken as base figures. It had been the intention to use the week of January 1, but this was found impracticable because of the abnormal situation at that time, due to the annual inventory and holiday period and the consequent reductions in staffs. The week of January 17 coincides fairly closely with the termination of this season and accordingly reflects more normal conditions. The chart indicates percentage gains of varying size in the volume of employment during each of the weeks under review, as compared with the returns for the base week. The reports for July 31 show, for those employers making returns on that date, additions to staffs of 56,820 persons or 8.4 per

cent, as compared with the staff of these same firms on January 17. What, in all probability, will be the peak in employment for this year, as compared with the base figure, occurred on July 17, when 62,665 more persons were

employed by the firms reporting on that date than they had employed on January 17, the percentage increase standing at 9.1. During the weeks ending July 24 and 31, slight declines from this level were registered.

REPORTS ON CIVIC EMPLOYMENT IN FIFTEEN CITIES, JULY, 1920

**R**EPORTS from 15 cities showing the number of workers temporarily engaged and the wages paid these employees during the month of July, showed an increase of nearly 5 per cent in the number of workers and of not quite 7 per cent in the wages paid as compared with the preceding month. In July 1920, 11,601 persons were temporarily employed and the payrolls amounted to \$1,203,277 as compared with 11,091 employees and an aggregate payroll of \$1,127,293 in June.

In comparison with the same period in

1919 increases of slightly over 12 per cent in the number of employees and of not quite 38 per cent in the wages paid are indicated, there having been 10,322 employees with an aggregate payroll of \$873,190 in July, 1919.

Montreal, Toronto, Hamilton, Moose Jaw and Calgary, reported increases in the number of employees, both as compared with the preceding month, and also with July, 1919. St. John, Ottawa and Saskatoon reported increases as compared with returns for June, but

in comparison with figures for July of last year, declines were indicated. On the other hand, London, Winnipeg, Vancouver and Victoria reported reductions in the volume of employment offered as compared with June, but there were increases over July of last year. Brandon, Regina and Edmonton recorded reductions in both comparisons.

As to wages, St. John, Montreal, Ottawa, Toronto, Hamilton, London, Moose Jaw, Saskatoon, Vancouver and Victoria

reported increases both as compared with returns for June and also July, 1919.

Regina reported an increase as compared with the returns for the preceding month, but a decline as compared with figures of July of last year. Winnipeg and Calgary on the other hand, showed declines in comparison with the returns for June with increases over July of last year, while in Brandon and Edmonton, there were decreases in both comparisons.

EMPLOYMENT (BOTH CONTRACT AND MUNICIPAL WORK) AFFORDED WORKPEOPLE TEMPORARILY EMPLOYED BY FIFTEEN CITY CORPORATIONS, JULY, 1920, COMPARED WITH JUNE, 1920 AND WITH JULY, 1919.

### EMPLOYMENT IN THE BUILDING TRADES DURING JULY, 1920, AS INDICATED BY BUILDING PERMITS

**E**MPLOYMENT in the building trades as indicated by the value of building permits issued in 56 cities showed a slight decline during July as compared with preceding month, the total value of building permits falling

from \$13,316,041 in June to \$13,025,560 in July, a decrease of \$290,481 or slightly over 2 per cent. Prince Edward Island, New Brunswick, Quebec, Ontario and Manitoba registered decreases in this comparison, the decline of \$2,-

208,203 reported in Quebec being the largest. In Nova Scotia, Saskatchewan, Alberta and British Columbia, there were increases in the value of the permits issued, that of \$1,219,880 in Saskatchewan being the most noteworthy.

As compared with the figures for the corresponding month in 1919, there was an increase of \$3,751,435, or 40.5 per cent, in the building permits issued, the value for July, 1919, having been \$9,274,125. In this comparison Prince Edward Island, New Brunswick and Quebec reported declines, while of the increases registered in the remaining provinces that of \$1,293,905 in Saskatchewan was the most substantial.

Of the larger cities, Edmonton and Vancouver reported increases in the value of permits issued, both as compared with the figures for June, 1920, and for July, 1919. Toronto and Winnipeg showed decreases as compared with the returns for the preceding month, with increases over July of last year, while in Montreal there were declines in both comparisons.

Of the smaller centres, Halifax, Sydney, Fredericton, Westmount, Ottawa, Windsor, Moose Jaw, Saskatoon, Lethbridge and Victoria recorded substantial increases as compared with both June, 1920, and July, 1919.

The returns from 35 cities formerly used in this report, (which are distinguished by asterisks, and which are also tabulated separately for statistical purposes), show that the total value of building permits issued by these cities amounted to \$12,166,799 a decrease of \$94,130 or 8 per cent as compared with the returns for June. In comparison with the figures for July, 1919, however, an increase of \$3,890,635 or 47.3 per cent was registered.

ESTIMATED COST OF BUILDING WORK AS INDICATED BY BUILDING PERMITS.

## WAGES IN THE PAINT AND VARNISH INDUSTRY IN CANADA

**A** STUDY of the paint and varnish industry has been issued by the Dominion Bureau of Statistics as part of the detailed industrial census of Canada for 1918, the first year of the Bureau's operation. This industry, though relatively small in regard to the number of persons engaged in it, is of considerable importance in the value of its products, which for the year under review amounted to \$17,678,049. Of this amount \$9,203,530 is given as the cost of the materials used in manufacture, the balance of \$8,474,519 representing the value added to the materials by the process of manufacture. In the forty-five establishments making paints, varnishes or ingredient materials, the total value of assets invested, including operating and trading capital, was \$15,784,610. The average number of wage earners (as distinct from salaried workers) engaged in the industry during 1918, was 1388, and the total wages paid to these employees amounted to \$948,637, or \$684 per capita for the

year. Of these employees on wages 242 males and 134 females received less than \$10 per week; 134 males and 45 females received between \$10 and \$15 per week; 552 males and 7 females received between \$15 and \$20 per week and 325 males received over \$20 per week. In the salaried class 614 persons (451 males and 163 females) were employed, of which number 128 (126 males and 2 females) were officers, superintendents or managers, the remainder (325 males and 161 females) being clerks, stenographers, salesmen and others. The salaries of this class amounted to \$921,708, of which \$351,647 went to the officers and managers, and \$570,061 to clerks and the other salaried employees. The report refers to the importance of paint as a preservative which "should make for a considerable national economy in building materials." A survey of the industry for 1919, now in process of compilation, will, it is promised, review the industry in fuller detail than has been possible heretofore.

## MINIMUM WAGES FOR WOMEN IN SASKATCHEWAN

**T**HE Minimum Wage Board of Saskatchewan has amended Orders No. 1 and No. 4 referring respectively to shops and hotels, restaurants and refreshment rooms.\*

The Amendment to Order No. 1 refers to millinery and dressmaking establishments and provides for a minimum wage for apprentices in these trades. In the case of milliners the learner is allowed a period of six weeks' probation without pay, after which she is paid \$5, \$7 and \$10 per week respectively for three periods of six months

each. At the end of eighteen months she is considered an experienced worker and receives the minimum wage for shop employees of \$15 per week.

A dressmaking apprentice is to receive \$5, \$8 and \$12 respectively for the three six-month periods of her apprenticeship.

Order No. 4 governing hotels, restaurants and refreshment rooms fixed a forty-eight hour week. The amendment to this order permits a fifty-six hour week in the case of establishments open to the public on seven days a week. All work in excess of forty-eight

\*See LABOUR GAZETTE, October, 1919, p. 1240

hours is, however, regarded as overtime, which is paid at the rate of time and one-half.

The following table shows the hours and wages of each class of employees mentioned in these amendments.

TABLE OF WAGES AND HOURS FOR FEMALE EMPLOYEES IN SASKATCHEWAN

Industry.	Per day	Per Week.	MINIMUM WEEKLY WAGE				Remarks.

## RECENT INDUSTRIAL AGREEMENTS

THE following is a summary of the more important industrial agreements recently received by the Department. While the conclusion of every industrial agreement implies the acceptance, to a greater or less degree, of the principle of collective bargaining, it should not be overlooked that in a number of cases the agreement was reached only after the employees had been on strike. By verbal agreement is understood a schedule of rates and conditions agreed upon between the employees and the majority of the employers, and in effect although not signed. The agreements are arranged by industrial groups.

### Metals and Machinery

HAMILTON, ONT.—MASTER SHEET METAL WORKERS' SECTION OF BUILDERS' EXCHANGE OF CITY OF HAMILTON, AND SHEET METAL WORKERS' UNION

No. 61. Agreement in effect May 1, 1920 to April 30, 1921.

Hours of labour: eight per day; four hours on Saturdays.

Minimum rate: Per hour—from May 1, 1920, to October 31, 1920, 85 cents; from November 1, 1920, to April 30, 1921, 90 cents. Any member incapacitated by accident or by old age to work for such rate as may be mutually satisfactory to himself and his employer, subject to consent of the union.

Overtime; until midnight, time and one-half; thereafter and Sundays and holidays, double time. Members of local 61 not to work for employers excepting under this agreement.

Grievances to be referred to a joint Arbitration Board.

No employee to take a job on his own account while working for employers under this agreement.

EDMONTON, ALTA.—DIFFERENT FIRMS IN THE CITY OF EDMONTON EMPLOYING MOULDERS, AND MOULDERS' UNION OF NORTH AMERICA, No. 373. Agreement in effect from August 23, 1920, until August 20, 1921.

Minimum rate: Per hour—Moulders, 87½ cents; apprentices, 30 cents for first year; 5 cents per hour increase each six months of second year; and 10 cents per hour increase each following six months until completion of apprenticeship.

Hours of labour: eight per day; four on Saturday. Overtime, time and one-half; Sundays and holidays double time.

Apprentices: to serve four years, and to be advanced in all branches of the trade, one apprentice for the shop at large, and one for every five journeymen. Contract shops not to discriminate against Union members. Grievances to be referred to shop committee and management, failing an adjustment, to officials of Union.

In event of a strike, or where employees cease to work, no pay to be given for moulds made until there are enough to make a proper cast and same is poured by moulders that put up the moulds.

#### Foods, Liquors and Tobacco

MOOSE JAW, SASK.—SASKATCHEWAN CREAMERY COMPANY AT MOOSE JAW LIMITED, AND SASKATCHEWAN BROTHERHOOD OF STEAM AND OPERATING ENGINEERS, No. 2. Agreement in effect from July 4, 1920, until March 1, 1921.

Hours of labour: eight per day.

Wages: Per hour—fully qualified shift engineers, 65 cents. Overtime and Sundays, time and one-half.

In filling vacancies, seniority of service to be given preference.

#### Clothing

MONTREAL, QUE.—ALL CLOAK AND SUIT MANUFACTURERS OF MONTREAL INCLUDING THE ASSOCIATION, AND THE JOINT BOARD OF THE CLOAK AND SUIT

MANUFACTURERS' UNION OF MONTREAL. Agreement in effect from April 30, 1920, to April 30, 1921.

Firms to employ only union members, if possible; non-union employees to join after one week. Cutters, tailors, basters, operators, finishers, pressers, button and hook and eye sewers to work by week.

Hours of labour: forty-four per week.

No more than eight hours' overtime to be permitted in one week, except in emergency; overtime rate, time and one-half. No time to be regarded as overtime until the full week of 44 hours shall have been worked, unless in case of a holiday or lay-off on account of sickness. No overtime in shops where number of employees is not at full capacity, and as long as there are workers out of employment to fill the capacity of the shop, except where work has to be completed for immediate shipment. No lockouts or stoppage of work to take place. Employers not to work for firms outside of the Association against whom the union has declared a strike. No private agreements to be entered into. Special rules laid down for the making of samples and duplicates.

Permanent council to be appointed for settlement of disputes.

VANCOUVER B.C.—EMPLOYING FIRMS, AND JOURNEYMEN TAILORS' UNION OF AMERICA, No. 178. Agreement in effect from April 1, 1920.

Union shop to be maintained.

Minimum wage: Per week—tailors, \$36; helpers, \$25; "tailors" to include operators, pressers and tailors.

Apprentices to be employed only by special arrangement with the Union.

Hours of labour, forty-four per week. Not more than four hours' overtime in one week, nor than one hour on Saturday afternoon. Dominion Day, Labour Day and Christmas Day to be paid for. Other holidays, time and one-half.

Work to be equally divided in slack season, and always done on premises of employer.

### Printing and Publishing

MONTREAL, QUE. — LABOUR COMMITTEE OF GRAPHIC ARTS SECTION OF CANADIAN MANUFACTURERS' ASSOCIATION OF MONTREAL, AND INTERNATIONAL BROTHERHOOD OF BOOKBINDERS No. 91. Agreement in effect from July 1, 1919, until June 30, 1921.

In this agreement which was summarized in the LABOUR GAZETTE for February, 1920, on pages 173-4, an alteration was made in increasing the rates of wages by 12½ per cent from May 15.

TORONTO, ONT.—MASTER PRINTERS' AND BOOKBINDERS' ASSOCIATION OF TORONTO, AND INTERNATIONAL BROTHERHOOD OF BOOKBINDERS AND BINDERY WOMEN WORKERS, No. 28. Apprentices regulations, to be appended to agreement as published in the LABOUR GAZETTE for July, 1919, page 837. In effect from June 2, 1919, until May 31, 1921.

One apprentice to the first four journeymen, and one for each additional four or major fraction thereof. Joint apprenticeship committee to be formed to recommend instructions to be given to apprentice. Male apprenticeship agreement, for four years beginning June 1, 1919. Apprentices to be registered with Local 28. Apprentice to have every opportunity to become a practical mechanic.

Wage scale to be in effect until present agreement shall expire. Male: Per week—1st year, 1st 6 months, \$10.00; 2nd 6 months, \$12.00; 2nd year, \$14.00; and \$16.00; 3rd year, \$17.00 and \$19.00; 4th year, \$23.00 and \$26.00; thereafter, journeymen's wages. Female: first year, \$9.00 and \$11.00; second year, \$12.00 and \$13; 3rd year, 1st 6 months, \$14.00; thereafter, not less than \$15.00.

The master printers and bookbinders of Toronto in view of the high cost of living agree to pay from May 1, 1920, to May 31, 1921, to journeymen bookbinders and journeywomen and apprentice bindery women, a bonus of 10 per cent on current wage, to be paid weekly; to go into effect on May 1, 1920.

EDMONTON, ALTA.—EMPLOYING PRINTERS, AND EDMONTON BOOKBINDERS' UNION, No. 188. Agreement in effect from November 1, 1919, until October 31, 1920.

Minimum wages: Per hour—bookbinders and rulers, until April 30, 1920, 82 cents; from May 1 to October 31, 1920, 86 cents; women, 36½ cents. Forty-eight hours to constitute a week. Overtime, time and one-half for the first three hours; thereafter and Sundays and holidays, double time. Foreman to receive no less than \$2.00 per week over bookbinders' scales to be retroactive to February 14, 1920.

Members to work only in closed shops. No piece-work to be done. No work coming from non-union shop or shop in which strike is on to be executed in another shop. If possible, employer to employ only union members.

Apprentices: one to two men; two to four men; three to nine men; one to each additional five; provided that in case of two men and only one apprentice, an additional boy may work in shop when senior apprentice has entered his third year. Apprentices to serve five years, and to join Union in fifth year, and to receive at least two-thirds of journeymen's scale.

Apprentice scale: Per hour—1st year, 1st 6 months, 21 cents; 2nd 6 months, 24 cents; 2nd year, 27 and 30 cents; 3rd year, 33½ and 37 cents; 4th year, 40½ and 44 cents; 5th year, 48 and 52 cents; thereafter, the scale. Girl apprentices, serving three years: Per hour—1st year, 20 and 22 cents; 2nd year, 24 and 26 cents; 3rd year, 30 and 34 cents.

Disputes to be submitted to a Board of Arbitration having three members.

MONTREAL, QUE.—EMPLOYING PHOTO ENGRAVERS, AND MONTREAL PHOTO ENGRAVERS' UNION No. 9. Verbal agreement in effect from May 1, 1920, to May 1, 1921.

Employers to employ only Union men if possible. No work to be done by Union men in event of a strike or lock-

out. Foremen to be members of the Union.

Wages: Per week—Journeyman, \$40; no man to receive less than 10 per cent per week increase over scale of February 1, 1920. Night work, \$5 per week above day scale. Overtime, up to three hours in any one day, time and one-half; thereafter and Sundays and holidays, double time.

Hours of labour: forty-four per week, day work, forty per week, night work.

Apprentices: to serve not less than six years, beginning at sixteen or over; after medical examination to be indentured to both parties. One apprentice to be allowed to each five journeymen.

Wage scale for apprentices: Per week—First year, \$8.00; second year, \$10.00 and \$12.00; third year, \$14.00 and \$16.00; fourth year, \$18.00 and \$20.00; fifth year, \$24.00 and \$28.00; sixth year, \$32.00 and \$36.00.

Disputes to be submitted to an Arbitration Committee; during time of arbitration, no strikes or lockouts to be engaged in.

TORONTO, ONT.—EMPLOYING PHOTO-ENGRAVERS, AND INTERNATIONAL PHOTO-ENGRAVERS' UNION OF N. A., No. 35. Agreement in effect from May, 1920, to May, 1921.

Only union men to be employed. No work to be done by union members when such work is the result of a strike or lockout in which union members are concerned.

Minimum wage: Per week, Journeyman, \$38.00; each man to receive \$8.00 per week increase over and above wage of February 1, 1920, and further increase of \$2 per week in 6 months' time, *i. e.*, from November 1, 1920. Foremen to receive not less than \$5.00 per week over journeymen's rate. Overtime, for first four hours, time and one-half, thereafter and Sundays and holidays, double time. Hours of Labour, forty-four per week.

Apprentices: to serve six years in one shop, beginning at age of sixteen or

over. After medical examination, to be indentured to both parties. One apprentice to five journeymen.

Apprentice scale: Per week—First year, \$8; second year, \$10 and \$12; third year, \$14 and \$16; fourth year, \$18 and \$20; fifth year, \$24 and \$28; sixth year, \$32 and \$36.

Night work, forty hours per week. Minimum wage, \$5 per week above day scale.

Disputes to be submitted to an Arbitration Committee.

WINNIPEG, MAN.—NEWSPAPER PUBLISHERS OF THE CITY OF WINNIPEG, AND WINNIPEG WEB PRESSMEN'S UNION, No. 35, AND INTERNATIONAL PRINTING PRESS AND ASSISTANTS' UNION. Agreement in effect from May 1, 1920, to May 1, 1923. Wage scale to be subject to adjustment each year.

Disputes to be settled by conciliation or failing this, by an arbitration board.

All persons operating or working presses for the above publishers to be members of the local.

Eight hours to constitute a day's work; seven hours a night's. Work to be performed within specified hours, outside of which, work performed shall be overtime. Overtime and holidays' rate, time and one-half.

Each shift to have one apprentice, and thereafter the proportion of apprentices to journeymen in a shift to be one to ten or fraction thereof.

Crews for presses to be as follows: for a quad, man in charge, three journeymen, or two journeymen and one apprentice; for a sextuple four journeymen, or three journeymen and one apprentice; for an octuple, six journeymen, or five journeymen and one apprentice.

Wage scale, subject to readjustment each May: Per week—first year, \$20; second year, \$25; third year, \$30; fourth year, \$35; fifth year, \$40; journeymen, \$41; man in charge, \$48.50.

VICTORIA, B. C.—EMPLOYING JOB PRINTERS OF VICTORIA AND VICTORIA PRINTING PRESSMEN AND ASSISTANTS' UNION No. 79. Agreement in effect

from January 1, 1920 to December 31, 1920, and thereafter until a new contract is made.

**Wage scale:** Per week—cylinder and offset, journeymen pressmen, from March 1 to September 1, 1920, \$39; from September 1, to December 31, 1920, \$40.50; feeders, first period, \$23.50; second period, \$24.50; Platen, journeymen pressmen, first period, \$36; second period, \$37; feeders, first period, \$21.50; second period, \$22.50; night work, pressmen, 7 cents per hour over day rate; feeders and apprentices, 5 cents per hour over day rate.

When four or more pressmen are employed in any office, foreman scale of 75 cents per day to be paid.

Shops employing an apprentice pressman or one journeyman feeder or more to be entitled to an apprentice pressfeeder, to be a member of the Union, to receive \$12 per week after one year, and \$14 per week after eighteen months, or after one year if proving competent; after two years, apprentice, if eighteen years of age, to receive a journeyman feeder's card.

Learners on cylinder presses to be taken from platen presses and to receive platen scale. After one year, learners on cylinder presses to receive cylinder scale.

#### Transportation—Electric Railways

Double time for overtime.

Statutory holidays to be observed.

WESTERN CANADA, DISTRICT No. 6, WEST OF PORT ARTHUR AND FORT WILLIAM.—CONTRACTORS OF WESTERN CANADA, AND INTERNATIONAL BROTHERHOOD OF STEAM SHOVEL AND DREDGE MEN, No. 62. Verbal agreement, effective May 1, 1920.

Minimum wage for steam shovels, drag lines, dredges, orange peels, clam shells, locomotive cranes, ditchers and other excavating machines: Per calendar month—engineers, \$215 and board; cranemen, \$165 and board; firemen, \$125 and board; watchmen, \$100 and board.

Hours of labour: eight per day.

Public holidays to be observed.

When company agrees to work a regular 10-hour day, overtime first two hours to be *pro rata*, then time and one-half. Sundays and holidays double time.

WESTERN CANADA, DISTRICT No. 6, CONTRACTORS, AND INTERNATIONAL BROTHERHOOD OF STEAM SHOVEL AND DREDGE MEN, No. 75. Verbal agreement in effect May 1, 1920.

Minimum wage: Per calendar month—dinkey locomotive engineers and pump men, \$130 and board; pump men, \$100 and board.

Hours of labour: eight per day.

Public holidays to be observed.

Overtime as in previous agreement.

TORONTO, ONT.—EMPLOYING FIRM AND CANADIAN PORTABLE STEAM AND OPERATING ENGINEERS OF TORONTO. Agreement generally in force although signed by only one firm, from May 1, 1920 until December 31, 1920.

Hours of labour: sixty per week.

Wage rate: Per hour—for locomotive cranes, derricks with two or more drums with swingers and cableways, 85c.; pile drivers single or double cage hoists, air compressors, steam rollers, dinkey locomotives, pumps, syphons, trench machines, concrete mixers, 80 cents. Overtime, time and one-half; Sundays and holidays double time.

When pump, pulsometer or other machine is connected to same boiler in addition to hoist compressor or concrete mixer, engineer to be paid time and one-half or furnished a fireman.

Engineers to be paid for all time they are held on the job, whether working or not.

Members longest out of work to be given preference.

#### Civic Employment—(Not covered elsewhere)

LONDON, ONT.—CITY OF LONDON AND EMPLOYEES IN THE GARBAGE DEPARTMENT. Agreement in effect from March 1, 1920 to March 1, 1921.

Hours of labour, fifty-three per week, inclusive of cleaning up and attending to horses. Overtime up to fifty-seven hours, time and one-quarter; thereafter, time and one-half. Time lost by not working on legal holidays to be made up by overtime work at regular rate.

Wages: Per week—\$25.00 for fifty-three hours. Arranging of beats to be at the discretion of the City Engineer. No employee to enter cellars to remove garbage and ashes. No employee to collect, pick out or dispose of junk or waste; same to pass from householder to corporation.

MOOSE JAW, SASK.—CITY OF MOOSE JAW, ELECTRICAL DEPARTMENT, AND SASKATCHEWAN BROTHERHOOD OF STEAM AND OPERATING ENGINEERS, No. 2. Agreement in effect from February, 1, 1920 to February 28, 1921.

Hours of labour: eight per day. Overtime and Sundays and holidays, time and one-half.

Wages: Per hour—fully qualified shift engineers, 75 cents, payable weekly.

## FAIR WAGE CONTRACTS, AUGUST, 1920

**D**URING August the Department of Labour received for insertion in the LABOUR GAZETTE the following information relative to twenty fair wage contracts, of which seventeen were awarded by the Department of Public Works, and three by the Department of Railways and Canals. All the contracts contained the usual fair wage clause which provides for the prompt payment of such wages as are current in the district in which the work is to be performed, and for observance on the various works under contract of the prevailing hours of labour, and which otherwise prevents abuses and secures the legitimate rights of the labour employed.

A statement was also received as to supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, etc.

### DEPARTMENT OF PUBLIC WORKS.

Construction of poultry office building, Experimental Farm, Ottawa, Ont. Name of contractors, Charles Holbrook & Sons, Ottawa, Ont. Date of contract, August 9, 1920. Amount of contract, \$27,741, and for (earth) excavation per cu. yd., \$2, and for (rock) excavation per cu. yd., \$5, and addition in cost if ash is used in place of pine, \$590; and addition in cost if birch is used in place of pine, \$675.

Alterations and additions to Printing Bureau (over boiler room), Ottawa, Ont. Name of contractors, The Geo. C. Graves Construction Co., Ottawa, Ont. Date of contract, August 17, 1920. Amount of contract, \$89,103. Any increase in price of cement used for said works over \$3.75 per barrel up to \$4.39 net shall be added to amount of contract, and any decrease below \$3.75 per barrel to be deducted from amount of contract.

Restoration of Ross Park School,

Moose Jaw, Sask. Name of contractor, H. E. Forbes, Moose Jaw, Sask. Date of contract, August 20, 1920. Amount of contract, \$11,297.

Construction of floating wharf, Kuskonook, B.C. Name of contractors, Frederick Cogle & Henry Perryleake, Proctor, B.C. Date of contract, August 16, 1920. Amount of contract, \$7,950.

Conversion of existing building (Royal Canadian Mounted Police barracks) into garage and stores building, Fairmont, Vancouver, B.C. Name of contractors, E. Chrystal & Co., Ltd., Vancouver, B.C. Date of contract, August 17, 1920. Amount of contract, \$3,083.

Alterations and additions to main building (Royal Canadian Mounted Police barracks), Fairmont, Vancouver, B.C. Name of contractor, Jos. Wm. Bye, Vancouver, B.C. Date of contract, August 17, 1920. Amount of contract, \$4,917.

Supply and installation of gravity tank at Westminster Psychopathic Hospital, London, Ont. Name of contractors, Canadian Des Moines Steel Co. Ltd., Chatham, Ont. Date of contract, August 16, 1920. Amount of contract, \$13,280.

Repairs to landing pier, Pointe aux Trembles, Que. Name of contractor, Albert Giguère, Shawinigan Falls, Que. Date of contract, August 23, 1920. Amount of contract, schedule of prices.

Repairs and reconstruction of public wharf, Ste. Famille, Island of Orleans, Que. Name of contractor, Onésime Poliquin, Portneuf, Que. Date of contract, August 24, 1920. Amount of contract, schedule of prices.

Dredging, Cobourg, Ont. Name of contractors, The Frontenac Dredging Co., Ltd., Toronto, Ont. Date of contract, August 9, 1920. Amount of contract, Class "B" \$0.55 per cu. yd. (scow).

Dredging. Kingston, Ont. (above Cataraqui Bridge). Name of contractors, The Frontenac Dredging Co., Ltd., Toronto, Ont. Date of contract, August 9, 1920. Amount of contract, Class "B" \$0.50 per cu. yd. (in situ.).

Dredging. Kingston, Ont. (Harbour Front). Name of contractors, The Frontenac Dredging Co., Ltd., Toronto, Ont. Date of contract, August 9, 1920. Amount of contract, Class "B" \$0.50 per cu. yd. (in situ.).

Dredging. Port Hope, Ont. Name of contractors, The Frontenac Dredging Co., Ltd., Toronto, Ont. Date of contract, August 9, 1920. Amount of contract, Class "B" \$1.70 per cu. yd. (in situ.).

Dredging. Oakville, Ont. Name of contractors, The C. S. Boone Dredging & Construction Co., Ltd., Toronto, Ont. Date of contract, August 21, 1920. Amount of contract, Class "B" per cu. yd. \$0.65½ (in situ.).

Dredging. Whitby, Ont. Name of contractors, The C. S. Boone Dredging and Construction Co., Ltd., Toronto, Ont. Date of contract, August 21, 1920. Amount of contract, Class "B" per cu. yd. \$0.64½ (in situ.),

Dredging. Bowmanville, Ont. Name of contractors, The C. S. Boone Dredging & Construction Co. Ltd., Toronto, Ont. Date of contract, August 21, 1920. Amount of contract, Class "B" per cu. yd. \$0.64 (in situ.).

Dredging. Grande Anse, N.B. Name of contractors, Miramichi Dredging Co., Ltd., Newcastle, N.B. Date of contract, August 28, 1920. Amount of contract, Class "B" per cu. yd. \$0.63½ (on barge).

DEPARTMENT OF RAILWAYS AND CANALS.

Delivery of an additional quantity of 125,000 cu. yds. of clean, sharp coarse sand for the Welland Ship Canal, under contract No. 23444, dated September, 16, 1919. Name of contractors, The National Sand & Material Co., Ltd., of Welland, Ont. Date of Supplemental Agreement, August 20, 1920. Amount of Supplemental Agreement, 90c. per cu. yd.

Erection of a one-stall frame engine house at Albert, N.B. Name of contractors, Hillsboro Woodworking and Manufacturing Co., Ltd. Date of contract, August 27, 1920. Amount of contract, \$4,300.

Erection of a freight shed and platform at Hillsboro, County of Albert, N.B. Name of contractors, Hillsboro Woodworking & Manufacturing Co., Ltd. Date of contract, August 27, 1920. Amount of contract, \$2,825.

POST OFFICE DEPARTMENT.

The following is a statement of payments made in August for supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, and the performance of work under sanitary conditions:

Nature of Orders.	Amount of Orders.
Making metal dating stamps and type and other hand stamps and brass crown seals. ....	\$1,760.20
Making and repairing rubber stamps, daters, etc. ....	261.72
Supplying stamping material, pads and ink. ....	825.00
Supplying mail bag fittings. ....	6,196.40
Hampers and letter boxes repaired. ....	53.50
Making up and supplying letter carriers' uniforms, etc	42,332.02
Scales repaired. ....	431.45
Making and repairing miscellaneous articles. ....	4.50

## PRICES RETAIL AND WHOLESALE IN CANADA, AUGUST, 1920

THE prices movement was marked by a steep decline in potatoes, and there were also a number of decreases in other lines, particularly in grain, live stock (except hogs), fish, textiles, hides and leather, but there were increases in dairy products, iron goods, and in coal and petroleum products. In building materials some lines of lumber were lower and there were steep decreases in linseed oil, turpentine, shellac, and putty.

In retail prices the average cost of a weekly family budget of staple foods in some sixty cities was \$16.42 at the middle of August as compared with \$16.84 at the middle of July, \$14.43 in August, 1919, and \$7.68 in August, 1914. The decrease for the month was due chiefly to the drop in potatoes, and there were also slight decreases in meats, but eggs, butter, and sugar advanced. Coal, wood, and coal oil also showed increases.

In wholesale prices the index number fell to 330.2 for August as compared with 346.8 for July, 349.3 for June, 356.6 for May, 301.1 for August, 1919, and 136.3 for August, 1914. The decrease for the month was due chiefly to the decline in potatoes, but there were lower levels in other fruits and vegetables, and decreases in grain, cattle, sheep, fish, textiles, hides and leather, in some metals, in some building materials, and in raw furs. In other groups many slight decreases occurred. There were, however, increases in dairy products, in iron products, in fuel and lighting. Wool recovered somewhat in price and hogs were somewhat higher, while hay was also firmer.

The accompanying tables and notes give details as to the prices movement during the month and as compared with the same month in previous years.

The table of retail prices gives statistics for some 60 localities in Canada, having a population of approximately

10,000 or over. Quotations are obtained by the correspondents of the LABOUR GAZETTE, resident in each locality, from representative dealers doing a considerable trade with workingmen. All prices are for delivered goods. The exact quality for which the quotation is given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The list of commodities includes over one hundred staple foods and groceries, coal, wood and coal oil, the number of articles having been increased twice since January, 1910, when the regular publication of these statistics was begun.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts, with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central, without modern conveniences or with incomplete conveniences.

The weekly family budget calculated in terms of the average prices in the cities for which reports are received includes twenty-nine staple foods, laundry starch, coal, wood, coal oil, and rent, these being the items for which statistics have been obtained each month and published in the LABOUR GAZETTE since January, 1910. The quantities of each commodity included are modifications of those employed in similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance the only fruits are evaporated apples and

prunes, and the only fresh vegetable is potatoes. As market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportion of expenditure on the various foods therefore tends to be maintained.\* In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the difference in quality. It was estimated, when the budget was first published in 1912, that these calculations represented from sixty to eighty per cent of the expenditure of an ordinary family, according to the total income. For the average family of five the expenditure on these items of food, fuel, light, and rent would be perhaps two-thirds or about sixty-five per cent of the total income. While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province. The quantities of meats, dairy products, cereals, etc., included were designed to afford a liberal supply for the healthy family of a man at hard physical work. On the other hand an average family with an income sufficient to do so would buy less meat, etc., but more fruit, fresh and canned vegetables, etc.; so that the comparative expenditure would be little changed.

---

\*At times when the price of an article heavily weighted for this purpose rises (or falls) abnormally the increase (or decrease) in food prices so indicated is exaggerated and this should be taken into account in using the budget as an indicator of changes in the cost of living.

The index number of wholesale prices is based on the quotations for 271 commodities, and is the simple average of the percentages of current prices of the several commodities in relation to the average prices for the base period, 1890-1899, these being therefore made equal to 100. The quotations for most farm products are obtained weekly and averaged for the month, the quotations for other commodities are taken for the middle of the month. The table of index numbers shows the changes by groups and sub-groups for the previous month and for corresponding months back to 1913.

### Retail Prices

In beef, prices averaged slightly lower, slight increases in some cities being more than offset by decreases in others, but in most localities the prices were unchanged. In mutton there were also some decreases. Fresh roast pork averaged higher. Eggs were up 5c. per dozen in the average. Flour averaged slightly higher. Evaporated apples and prunes showed slight increases. Sugar averaged  $1\frac{1}{2}$ c. per pound higher. Potatoes declined \$2.00 per bag in the average, being lower in all the provinces, but prices were still high in New Brunswick, Northern Ontario and Manitoba. Coal averaged 50c. per ton higher. Wood and coal oil also advanced.

### Wholesale Prices

GRAINS AND FODDER.—The wheat market was freed from government control during August. Ontario winter wheat came on the market early in August at \$2.20-\$2.30 per bushel for No. 2, and advanced 10c. in the third week. The market for western wheat was opened in the fourth week, and Mani-

†See footnote, page 1243.

toba Northern No. 1 closed at \$2.71 $\frac{7}{8}$  at the end of the first day, and at \$2.77 $\frac{1}{2}$  a week later. No. 1 Northern Spring wheat at Minneapolis had risen to \$2.60-\$2.65 at the end of July, fell to \$2.35-\$2.40 in the first week of August, advancing during the next two weeks and reaching \$2.70-\$2.80 at the middle of the month. Toward the end of the month the price fell to \$2.45-\$2.52. Most of the other grains fluctuated in sympathy with the violent changes in wheat. Barley at Winnipeg had fallen 30c. towards the end of July and in the last week fell 14c., being as low as \$1.34 $\frac{1}{8}$  but recovered about 10c. by the next week and was thereafter relatively steady. Barley at Toronto fell from \$1.84 to \$1.20, but rose to \$1.35. Oats at Winnipeg fell from \$1.20 to 97c. in the last two weeks of July but changed little during August, being down to 96 $\frac{7}{8}$ c. at the end of the month. American corn at Toronto rose to \$2.49 at the beginning of August, fell to \$1.85 but rose to \$2.00. Flaxseed fell to \$3.42 $\frac{1}{2}$  but rose to \$3.50. Rye, No. 3, at Toronto fell from \$2.20 to \$1.75. Hay rose to \$31.00 per ton at Montreal and good grades were reported to be very scarce.

**ANIMALS AND MEATS.**—At Toronto, butcher cattle eased off \$1.00 from \$14.00-\$15.50, per hundred pounds, but recovered slightly at the end of the month. Beef, dressed hindquarters, fell from 28-34c. per pound to 27 $\frac{1}{2}$ -31 $\frac{1}{2}$ c. Forequarters also declined. Veal was firmer at 16-26c. per pound. Hogs eased off from \$21.00 per hundred to \$20.25 but rose to \$20.50 by the end of the month. Dressed hogs were firmer at 26-28c. per pound. Breakfast bacon advanced to 49-50c. per pound. Hams had risen to 43-44c. in July but declined

1c. in August. Mess pork was down to \$47.00 per barrel at Toronto and later fell to \$40.00 per barrel. Lard was 1c. lower at 26 $\frac{1}{2}$ -27c. per lb. Sheep fell from \$8.50-\$9.50 to \$7.00-\$8.00 per hundred. Dressed lamb was down to 25-32c. per pound.

**DAIRY PRODUCTS.**—Butter was nearly 2 cents lower at 56 $\frac{7}{8}$ c. per pound for finest creamery at Montreal, but rose to 59 $\frac{1}{2}$ c. Creamery prints at Toronto fell from 62-63c. to 59-61c. Cheese had fallen to 23 $\frac{1}{2}$ c. per pound at Montreal but rose to 27 $\frac{1}{2}$ c. Eggs rose from 68c. per dozen at Montreal to 72c.

**FISH.**—The export market for dried fish was reported to be very poor, there being surplus stocks both in Newfoundland and in Norway. The opening price of the summer catch at Lunenburg was down to \$9.25 per quintal. Dried cod was down to 9 $\frac{1}{2}$ c. per pound, and had-dock to 6 $\frac{1}{2}$ c. Salt mackerel was down to 7c. per pound.

**FRUITS AND VEGETABLES.**—Strawberries went off the market at Toronto at the end of July. Raspberries fell to 25-30c. per box at the beginning of August and were as low as 10-30c. at the middle of the month. Cherries were down to \$1.00-\$1.25 per eleven-quart basket at the beginning of August but rose to \$1.50-\$1.75. Early peaches came on at 50-75 per basket, and rose to 60c.-\$1.00. Pears were at the same prices as peaches. Plums came on at 35-75c. per six-quart basket but fell to 25-50c. per box. Valencia oranges were firmer. Potatoes were down to \$2.25 per bag at Montreal and Toronto. Fresh tomatoes were as high as \$2.50-\$3.75 per basket at the middle of July but were down to

\*Preliminary figures. †Seven commodities off the market, fruits, vegetables, etc.; one line of spelter was dropped in 1915.

65-85c. in the second week of August, and to 30-40c. in the last week.

**MISCELLANEOUS FOODS.**—Bread had risen to 10c. per 18 ounce loaf in Victoria, B.C., in July. Rolled oats were easier at \$6.00-\$6.50 per bag. Winter wheat flour was easier at \$12.50 per barrel, and lower prices for all flour were expected owing to the low wheat market. Rio and Santos coffee were from 1c. to 4c. per pound lower. Sugar declined 2c. per pound by the end of the month. Glucose declined 1c. per pound. Honey came on the market at 23-25c. per pound at Toronto. Maple sugar was lower at 25-28c per pound. Cream of tartar was 5c. per pound lower at 75-80c.

**TEXTILES.**—Prices for Canadian wool were firmer, fine wool being up to 60c. per pound and coarse wool up to 20c. Raw cotton was down to 36½c. per pound at New York at the middle of August as compared with 42½c. at the middle of July. Coloured cotton goods averaged higher. Raw silk was again lower, Japan filatures being down to \$5.90 per pound and Italian classical being down to \$8.30 for extra and \$7.30 for best. Spool silk was lower at 85c. per dozen and machine twist at \$22.75 per pound. Jute was slightly firmer, but hessians were again lower. Hemp rope was slightly higher at 60c. per pound.

**HIDES, LEATHER, BOOTS AND SHOES.**—No. 1 beef hides were down to 31c. per pound at Toronto. Calfskins were down to 15c. per pound. Leather was again lower in some grades. Prime slaughter

oak fell from 65c. per pound to 61-62c., smooth grain from 54c. to 51½c., harness leather from 94-95c. to 92-94c. Boots, women's dongolas, recovered from the drop in May.

**METALS AND IMPLEMENTS.**—Iron black sheets advanced. Steel bar was lower. Lead, quicksilver, solder and tin were lower. Horse shoes advanced.

**FUEL AND LIGHTING.**—Anthracite coal advanced 50c. per ton to \$14.00 at Montreal. Bituminous coal was higher on Vancouver Island. Foundry coke at Connellsville was again higher at \$18.00-\$20.00 per ton. Gasolene advanced from 38c. per gallon to 40c., and coal oil from 27½c. per gallon to 29½c.

**BUILDING MATERIALS.**—The demand for lumber for export was reported to have fallen off. Oak advanced, but British Columbia fir and shingles were lower. Flooring declined at Victoria, B.C. from \$80.00 per M to \$75.00. Roofing pitch, coal tar, red lead, cut nails, and copper wire advanced. Linseed oil, turpentine, shellac, and putty fell steeply but benzine advanced.

**HOUSE FURNISHINGS.**—Glass tumblers advanced 10 per cent at the end of the month. Brooms declined.

**DRUGS AND CHEMICALS.**—Bleaching powder and caustic soda were off the market.

**MISCELLANEOUS.**—In raw furs muskrat skins were down 25c. each. In pulp and paper, pulp was reported to be very scarce. Raw rubber fell to 31c. per pound.

## PRICES IN THE UNITED KINGDOM AND IN OTHER COUNTRIES

**T**HE accompanying tables and the following notes give the latest statistics available as to the movement of prices in the United Kingdom and in other countries.

### United Kingdom

In the British *Labour Gazette*, August, 1920, the Ministry of Labour reported the cost of food to have risen by the beginning of August to a level 162 per cent higher than in July, 1914, as compared with an advance of 158 per cent by the beginning of July. The advance was chiefly due to the rise in the prices of meats, following on the removal of the maximum retail prices on British beef and mutton on July 4. There was also an increase in the prices of eggs, but a decrease in potatoes. The increase in rent was estimated to have been between 15 per cent and 20 per cent, the increase in clothing 330 per cent, fuel and light, 130 per cent, miscellaneous items 120 per cent, and all items 155 per cent.

### Belgium

The *Revue du Travail*, published by the Belgian Government, reported that the general level of retail prices of foods and other necessities on May 15 in sixty-two localities indicated a rise of 2.1 per cent over prices in April and 371 per cent over prices in April, 1914.

### Italy

The Municipal Labour Office in Rome

reported the general level of food prices in June to be slightly higher than in May and 225 per cent higher than in 1914. Other household necessities were 211 per cent higher than in 1914. In Milan the Municipal Labour Office reported the cost of maintaining a family in July to be 1.6 per cent lower than in June, but 341 per cent higher than in 1914. Clothing had increased 492 per cent, heat and light 511 per cent, rent 8.3 per cent, and food 345 per cent over pre-war prices.

### Iceland

The Icelandic Statistical Department reported that the general level of prices of necessities, including food, washing materials, fuel, and oil, in April, 1920, had risen by 6 per cent over prices in January and 309 per cent over prices in July, 1914.

### United States

The Index numbers of wholesale prices calculated by various bodies showed decreases in August as compared with July, continuing the decline which set in about May. There were, however, increases in certain foods, and in some metals. The chief decreases were in meats, clothing, especially cotton goods, hides and leather, and oils, but there were increases in coal and coke. There were notable decreases in sugar, tea, coffee, and rice.

## RECENT LEGAL DECISIONS AFFECTING LABOUR

**O**F the three legal decisions summarized below, one refers to the rights of seamen on foreign vessels in the United States ports, as decided by the

Supreme Court of the United States, and the other two refer to the liability of employees for accidents in Alberta and Quebec respectively.

### **Foreign seaman landing at United States port may claim half the wages then earned notwithstanding contract signed abroad**

A British seaman sailing from Liverpool on the English vessel "Strathearn," on arriving at Pensacola, Florida, in July, 1916, brought an action against his employers claiming one-half the wages earned by him up to that time, although his contract bound him to complete the voyage back to Liverpool within three years when his wages would be paid. The action was based on a provision of the La Follette Seamen's Act of 1915 permitting seamen on foreign as well as American vessels to demand one-half of the wages earned by them at every port where the vessels load or discharge cargo. The case finally came before the Supreme Court of the United States. The defendants opposed the claim on the ground that a contract legally signed in a foreign country could not be cancelled in the United States. The Supreme Court pronounced in favour of the plaintiff.

In its decision the Court declared that the jurisdiction of the government of the United States over foreign merchant vessels in United States ports was such as to give authority to Congress to make provisions of the character then under consideration; that it was for this government to determine upon what terms and conditions vessels of other countries might be permitted to enter harbours of the United States and to impose conditions upon the shipment of sailors in their ports and make them applicable to foreign as well as domestic vessels. "We have no doubt as to the authority of Congress to pass a statute of this sort, applicable to foreign vessels in our ports and controlling the employment and payment of seamen as a condition of the right of such foreign vessels to enter and use the ports of the United States." (*United States—Dillon vs. The Strathearn Steamship Company.*)

### **Employer not liable if workmen voluntarily assumes risk when off duty**

A coal miner when off duty was injured by an explosion when helping to stop a fire on the premises where he worked. He brought an action for damages against his employers. The trial judge decided against the injured miner and he appealed to the Supreme Court of Alberta. The evidence showed that the fire was in a small lamphouse near the mine where sufficient explosives were stored every evening for the following day. The plaintiff claimed that he was ordered by superior officers of his

employers to go where he was in danger, in consequence of which he suffered the injury. It was held by the Court, however, that at the time of the accident the plaintiff was not subject to the orders of the defendants. The plaintiff knew of the risk and was warned and took precautions to avoid it, but afterwards when he thought the risk was over he voluntarily put himself in the place of danger. While the accident would not have resulted but for the defendant's act in putting the explosives

where they were, yet under the law it was held that a defendant is not liable if notwithstanding his negligence the plaintiff's own act is the immediate

cause of the injury. The appeal was, therefore, dismissed with costs. (*Alberta-Strapazon vs. Oliphant Munson Collieries, Limited*).

**Agreement signed by employed workman relieving employer from liability for compensation declared null and void**

A workman at a mine in Quebec received an injury when at work which rendered him totally incapacitated for more than six months. While he was still incapacitated, a representative of an insurance company persuaded him to sign an agreement for the sum of \$63 declaring that this sum was in final settlement of all claims in connection with the accident. The workman subsequently refused to accept the \$63 and brought action against the company claiming the sum of \$270 under the law

of industrial accidents and requesting that the agreement be declared null and void. The company did not invoke this settlement in defence but confined itself to a denial of the plaintiff's allegations.

The Superior Court awarded the plaintiff the sum of \$225 and declared the above mentioned agreement to be null and void as being prejudicial to the plaintiff and contrary to law. (*Quebec—Gagnon vs. The Asbestos Corporation of Canada*.)

# THE LABOUR GAZETTE

Prepared and edited in the Department of Labour, Ottawa

MINISTER—THE HONOURABLE GIDEON D. ROBERTSON.  
DEPUTY MINISTER—F. A. ACLAND.

Volume 20

OCTOBER, 1920

Number 10

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

### The month in brief

This issue of the LABOUR GAZETTE contains a full report of the annual convention of the Trades and Labour Congress of Canada which met in September at Windsor, Ont.; also reports of conventions of other labour organizations including the British Trades Union Congress. There is also a report of the Second International Labour Conference under the League of Nations, which met at Genoa, Italy, on June 15. A conference of the Employment Service Council of Canada, and the annual meeting of the International Association of Public Employment Services took place at Ottawa, and accounts of the proceedings of these meetings appear in this number. This issue also contains an article summarizing the various provincial laws relating to the regulation and inspection of factories in Canada.

The cost of the weekly family budget of staple foods showed a decline, averaging \$15.95 at the middle of September as compared with \$16.42 in August, \$14.33 in September, 1919, and \$7.83 in September, 1914.

At the beginning of September, the percentage of unemployment among trade unions was 3.16 as compared with 2.64 at the beginning of August and 2.33 at the beginning of September, 1919. According to returns from over 5,000 firms, the volume of employment in Canada showed a very slight decline during the

first half of the month with a recovery during the latter half.

The time loss due to industrial disputes during September was less than during either August, 1920, or September, 1919. There were in existence during the month 28 strikes, involving about 2,449 workpeople, and resulting in a time loss of 25,890 working days. At the end of the month there were on record 15 strikes involving about 521 workpeople.

### Proceedings under the Industrial Disputes Investigation Act

During September the Department received a report from the Board of Conciliation and Investigation established to deal with the dispute between the Canadian Press, Limited, and their press telegraph operators, members of the Canadian Press System Division No. 52, Commercial Telegraphers' Union of America.

One application was received for the establishment of a Board, and a Board was established in connection with a dispute for which the application had been received during a previous month.

### Programme of Third International Labour Conference

The third International Labour Conference, established under the League of Nations, will meet at Geneva, Switzerland, on April 4, 1921. The International Labour Office has an-

nounced the following agenda of this Conference: (1) Reform of constitution of the Governing Body of the International Labour Office. (2) Agricultural questions: (a) the adaptation of the Washington decisions to agricultural labour—(i) regulation of the hours of work, (ii) measures for the prevention of or providing against unemployment, (iii) the protection of women and children; (b) Technical agricultural education; (c) Living-in conditions of agricultural workers; (d) Guarantee of the rights of association and combination; and (e) Protection against accidents, sickness, invalidity and old age. (3) (a) Disinfection of wool infected with anthrax spores; (b) Prohibition of the use of white lead in painting. (4) The weekly rest day in industrial and commercial employment. (5) (a) The prohibition of the employment of any person under the age of 18 years as trimmer or stoker; and (b) Compulsory medical examination of all children employed on board ship. The Conference will also be furnished with a report from the International Commission on Emigration set up by the Governing Body in conformity with a resolution adopted by the Washington Conference; a report of the chairman of the Governing Body dealing with the work of the International Labour Office from the time of its creation after the Washington Conference, and a report of the Director of the International Labour Office dealing with the application of the draft conventions and recommendations adopted at that Conference.

#### **Employment Agencies Act, Nova Scotia**

The Employment Agencies Act, noted in the September issue of the LABOUR GAZETTE as having been passed at the last session of the Nova Scotia legislature, has been proclaimed in effect, October 1, 1920. Similar legislation is already in force in the provinces of British Columbia, Alberta, Saskatchewan and Manitoba, where the operation of commercial employment agencies is virtually prohib-

ited. This action on the part of the provincial authorities is in line with the recommendation of the International Labour Conference, which urged that all practicable measures be taken to abolish such agencies as soon as possible. (LABOUR GAZETTE, December, 1919, p. 1445.)

#### **Progress of "Mothers' Allowances" in Canada**

In the August issue of the LABOUR GAZETTE appeared the names of three of the five commissioners to administer the Ontario Mothers' Allowances Act. Since then Major Thomas J. Murphy of London and Mr. A. J. Reynolds of Hampton have been appointed to complete the personnel of the Board. The Board has decided to establish local committees or boards in each city, town, county and judicial district—about 89 in all—throughout the province, to receive the applications for pensions and pass upon them, guided by such information as they may secure themselves or from the provincial investigators. Each board will have five members nominated by the municipality and the provincial board, and will have its own staff of investigators who may later become supervisors of the work. The following temporary flat rate has been adopted by the Board: City: widow with five or more children, \$55 per month; with four children, \$50 per month; with three children, \$45 per month; and with two children \$40 per month. County: widow with five or more children, \$45 per month; with four children, \$40 per month; with three children, \$35 per month; with two children, \$30 per month. The payments which for any reason are delayed will be made retroactive to October 1.

Announcement has already been made of the appointment of a number of advisory boards, under the provisions of the Mothers' Pensions Act of British Columbia, whose duty it will be to co-operate in an advisory capacity with the superintendent in charge of the work of investigating claims for pensions. The report of these boards will,

to a large extent, be taken as the recommendation upon which the applicant will be brought under the benefit of the law. The Honourable J. W. de B. Farris, Attorney-General of British Columbia has charge of the administration of the Act.

#### **First conference of Association of Canadian Workmen's Compensation Boards**

The first annual meeting of the Association of Workmen's Compensation Boards (see LABOUR GAZETTE, January, 1920) was held in Toronto during October

4-6. Representatives were present from each of the various provincial boards, including in each case an officer of the Board and a medical officer from the district. Among the subjects discussed were the adoption of a uniform partial disability rating schedule, and the question of merit rating assessment so that the rating of employers who have no accidents, or a small number, will be reflected in their assessment. The delegates favoured the extension of the Workmen's Compensation Act to cover employees in all industries instead of the limited number which now come under the Act. A resolution was passed interpreting the Federal statute of 1918, which provides for compensation to employees of the Dominion government, as covering all branches of the Federal service, and asking that the act be amended to give effect to this interpretation. - Another resolution adopted favoured the placing of all accident prevention work under the jurisdiction of the various Workmen's Compensation Boards.

The following officers were elected: President, Mr. E. S. H. Winn, chairman of the British Columbia board; Vice-president, Mr. John A. Sinclair, chairman of the New Brunswick board; Member of the Executive, Mr. J. A. Kinney, commissioner of the Alberta board; and Secretary-treasurer, Mr. F. P. Archibald, chief-accountant of the British Columbia board.

#### **Safety regulations for power plants**

As a result of joint conferences held in Calgary and Edmonton between representative employers and workmen of municipal and privately owned electric light and power plants, the Workmen's Compensation Board of Alberta, in accordance with the Electrical Protection Act, have adopted certain tentative regulations which became effective on October 15. Among the points covered by these regulations are: the construction of electrical machinery so as to insure a maximum degree of safety; pole spacing in electrical construction; distance of spacing between wires; different size of wires; and other provisions which have the idea of giving maximum protection to workmen. Employers are required to protect machinery in such a way as to minimize the danger of accidents; to furnish rubber gloves and shields to all their employees engaged at work on wires having a potential of more than 250 volts, and a first-aid kit to all gangs of men engaged on electrical work having a potential of more than 250 volts, and to maintain and keep in order, and in readiness for use, a resuscitating device; all of which must be of patterns approved by the Board.

#### **Industrial value of moving pictures**

The Goodyear Tire and Rubber Company recently installed a moving picture equipment in the cafeteria of their plant at New Toronto, Ont., to ascertain to what extent educative films would be of value to their employees. The pictures were shown in the company's time, and two experiments were made; the first was a "safety first" demonstration showing comparisons of statistics and methods of accident prevention in other plants, and the other illustrated the methods used in the collecting and manufacturing of the rubber for tires. In order that they might make a tangible tabulation of results to justify the expenditure, the company asked each employee to submit a report giving a brief outline of the subjects covered in

the pictures and what he considered their instructive value both to himself and his fellow workmen. The following are extracts from some of the reports: "The pictures enable a man successfully to answer the questions from new men coming in his department." "There was no doubt that the majority of the men working in the factory had a very hazy idea of the natural history of rubber until these demonstrations took place." "Pictures of this nature are a blessing to the working man as they enable him to see foreign lands which could not otherwise be visited. These films are educative from every point of view and are an incentive to the workman to learn more of his business, promote an interest in his work and take pleasure in things well done." "I think the more knowledge a workman has relative to the materials in his department, the more intelligent his work will be."

**Industrial programme of clothing manufacturers in the United States**

An industrial programme, which will form the basis of negotiations for an agreement between the Clothing Manufacturers' Association of New York and the New York Joint Board of the Amalgamated Clothing Workers of America for the next lightweight manufacturing season, was recently adopted by the association. The resolution embodying their views states: "Now therefore, be it resolved that the following be submitted to the union and the impartial chairman as essential to establish competitive conditions which are fair to the New York clothing industry: (1) the right of the manufacturers to install piece-work; (2) scales prevailing in other clothing markets to be the base rates for New York workers; (3) the co-operation of workers in maintaining individual records of production in shops and cutting rooms; (4) individual standards of production for week-workers in shops and cutting rooms; (5) the right of the manufacturer to change contractors;

(6) adequate freedom to discipline and hire workers and to introduce improved machinery; (7) the agreement maintained by the union in other markets in which adjustment machinery is functioning successfully to be made the basis of relationship between the association and the union." This programme also states that arbitration and negotiation are the proper methods for reaching an agreement with the union.

Under a co-operative contracting plan to be operated by the Amalgamated Clothing Workers of America at Rochester, N. Y., the union will contract work from the manufacturers on the same basis as other contractors with whom they would compete; they will manufacture the garments in the union shops and receive the profits which now go to the contractor.

**Amendment to Constitution of Nebraska**

By an amendment to the constitution of the State of Nebraska, which was carried by vote of the electors on September 21, provision is made that "laws may be enacted providing for the investigation, submission, and determination of controversies between employers and employees in any business or vocation affected with a public interest; and for the prevention of unfair business practices and unconscionable gains in any business or vocation affecting the public welfare. An industrial commission may be created for the purpose of administering such laws, and appeals shall lie to the Supreme Court from the final orders and judgments of such commission." This amendment was opposed by the American Federation of Labour.

**Housing to have first claim on Building Trades in Great Britain**

A national agreement under which work on the various housing schemes in Great Britain will be accelerated has been under discussion during the past two months between the Housing Committee of the Cabinet and the Resettlement Committee of the National Industrial Council.

for the Building Industry. Progress on these schemes has been hampered hitherto by the prevailing shortage of skilled labour, stoppages of work, the prohibition by the unions of overtime work, and other causes. To remedy these conditions, the Government at first proposed that union rules in regard to apprentices and hours of labour in house-building should be relaxed, and that the Building Trades Council should provide guarantees against stoppages of work or strikes. The representatives of the Industrial Council replied that no such guarantee was possible, but agreed that the rule regarding overtime should be suspended in regard to housing; they maintained that the labour shortage was largely due to the lack of proper distribution of available labour; which they believed could be remedied by a proper distribution of contracts, and asserted that labour was deliberately diverted from housing operations by means of special inducements offered to the workers to engage on commercial buildings. A compromise was finally reached to the effect that, in future, housing schemes should have the first call on labour, to which end trade union organizers should prepare returns of all men willing to work on housing schemes in their own districts, and ascertain the extent of labour shortage on the various schemes. It was further agreed that steps should be taken to prevent the offer of extra inducements to workmen to abandon housing for commercial building. On the suggestion of the Building Industrial Council it was agreed that as labour objected to the principle of payment by results, the output of houses should be increased by augmenting the personnel of the trades, by the improvement of existing working conditions; and by payment for "wet time," or idle time due to weather. Increased personnel will be obtained by doubling the number of first-year apprentices at present allowed, and by fixing the apprenticeship term at three years for ex-service men, adult apprentices to receive a minimum wage for the first six months of indenture equal to 50 per cent

of the journeyman's wage, with successive advances, and with definite provision for the instruction of apprentices.

#### Jottings

The Dominion Fire Chiefs' Association has accepted an offer of the Federal Government for a fire training school at Ottawa. The offer provides for free training for six months to any person desirous of taking advantage of the course.

By an amendment to Section 52 of the Municipal Act, passed at the last session of the Ontario legislature, every person, irrespective of his financial status, who is a British subject and whose name appears on the last revised voters' list as qualified to vote at municipal elections, shall, irrespective of his financial status, be qualified to be elected as a member of a municipal council.

The Toronto local of the Painters' and Decorators' Union have under consideration the adoption of a co-operative contracting scheme by which they would tender for work in competition with members of the Master Painters' Association, if they fail to secure a working agreement satisfactory to them for next year. A committee of five has been appointed to make arrangements for independent action along these lines.

On August 1, about 9,000 employees of the Boomer-du Pont chain of hotels in the United States were affected by the inauguration of a six-day week system. It is reported that while this change has necessitated an increase in the working force, the benefits derived have given satisfaction to the management.

Following a decision of the New York Supreme Court to the effect that the State's Workmen's Compensation law did not extend to maritime workers, the Compensation Inspection Board, representing all the private insurance companies in the state which carry compensation insurance, have proposed new accident insurance policies for long-shoremen and other maritime workmen

by which they may be insured by employers at a reduced rate.

At the annual convention of the United Brotherhood of Carpenters and Joiners of America, held at Indianapolis recently, general officers of the brotherhood were empowered to make plans for old age pensions for its members. The matter will be submitted to a referendum vote of the organization.

Several New England locals of the International Brotherhood of Electrical Workers have voted to withdraw from that organization and to join the newly-formed International Brotherhood of Telephone Workers. This new union is not affiliated with the American Federation of Labour, their request for a charter having been refused by that body at the Montreal convention in May.

Announcement is made of the formation of the Amalgamated Engineering Union in Great Britain. Ten hitherto separate bodies, including the Amalgamated Society of Engineers, have be-

come merged in this union, the membership of which is over 470,000, with funds approaching £4,000,000.

Returns from twelve profit-sharing and labour co-partnership schemes in the textile trades in the year 1919, which have been submitted to the British Ministry of Labour, show that with 6,472 employees participating, the average amount of the bonus paid per head was £11. 17s. 2d. The average ratio of bonus to earnings was 12.8. It is reported that these results accord closely with those submitted for 1918.

A system of employee committees is being inaugurated on Japanese railways; election is by vote of all adult males who have been in the service one year or more. The committees will meet once in six months and will formulate suggestions and transmit them to the management; there will be a committee for each local district and members of each local committee will be chosen to form a regional committee.

---

## INDUSTRIAL CONDITIONS DURING SEPTEMBER, 1920

---

### I.—General Review

The downward tendency noted in August in the total average volume of industrial employment in Canada continued in the first week in September, but in the second week a recovery set in, the improvement becoming general in all provinces in the third week, and continuing to the close of the month. The Metals and Machinery group continued to be affected to some extent during the first week by the prevailing shortage of steel and coal, but after the middle of the month gains were recorded in all provinces, the most substantial being in Ontario. Activity in the Vehicles (land and water) group

showed similar fluctuations. In the Food group gains in the flour and milling sections following the harvesting of the new crop, and in the canning factories, were balanced by a decline of employment in dairies, packing factories and other animal product plants, especially in the fish canneries in British Columbia, the latter owing to the close of the salmon season. In the Textile and Clothing industries some recovery was apparent after the late slack season, and activity was fairly general in the second week of the month. The boot and shoe trades continued slack, and in other leather industries several factories were closed for inventory and stock-taking or

**The Labour  
Market**

owing to lack of orders. The Pulp and Paper industry continued to show increases in the general average volume of employment, although conditions in Quebec and Ontario were adversely affected by low water which hampered the movement of logs and reduced the power supply at the mills. Steady activity prevailed in the Woodworking, Clay, Glass and Stone, and Paint, Oil and Chemical groups, activity in many of these industries being affected by building demands. Building construction showed considerable fluctuations due to local causes, such as shortage of cement. Employment in railway construction showed a slightly upward tendency in all provinces during the month. Coal mining continued fairly steady with gains in the Maritime Provinces and British Columbia. In Logging substantial gains resulted from the opening of the new season in the bush; many of the sawmills were still busy on the past season's cut, while others had completed operations.

The loss of time on account of industrial disputes was less during September than during August, 1920, or September, 1919. There were in

#### Strikes

existence at some time or other during the month 28 strikes, involving about 2,449 workpeople, and resulting in a loss of 25,890 working days, as compared with 23 strikes, 4,812 workpeople and 79,482 working days in August, 1920; and 43 strikes, 14,917 workpeople and 197,286 working days in September, 1919. On September 1, there were on record 17 strikes, affecting 634 workpeople. Eleven strikes were reported as having commenced during September, as compared with 9 in August. Five of the strikes commencing prior to September and eight of those commencing during September were reported terminated, leaving 15 strikes involving about 521

workpeople on record at the end of the month.

The movement of prices continued downward during September, the index number of wholesale prices as well as the retail prices food budget

#### Prices

being again lower as compared with the preceding month. The chief decreases were seasonal, due to good crops and large supplies on the markets, but there was also a continuation of the downward movement in the prices of many materials. On the other hand some lines of manufactured goods were rising and some raw materials recovered slightly from previous declines. The Departmental index number of wholesale prices was down to 326.6 in September as compared with 330.2 for August, 346.8 for July, 349.3 for June, 356.6 for May, 301.5 for September, 1919, 385.3 for September, 1918, 141.3 for September, 1914 and 134.4 for September, 1913. The average cost of a list of 29 staple foods in terms of retail prices in some sixty cities in Canada at the middle of September was \$15.95 as compared with \$16.42 for August, \$16.84 for July, \$16.92 for June, \$14.33 for September, 1919, \$13.31 for September, 1918, and \$7.83 for September, 1914. Grains, cattle and beef, sheep and lamb, potatoes, onions, tomatoes, flour, sugar, molasses, glucose, coffee, cotton, silk, hides, leather, lead, quicksilver, tin, coke, some lines of lumber, linseed oil, turpentine, copperas, malt and raw rubber were down, but hog products, butter, cheese, eggs, milk, mackerel, bananas, oranges, salt, brass, chain, coal, gasoline, wooden pails and tubs were higher. In retail prices of foods the averages were lower for beef, lard, flour, rolled oats, sugar, and potatoes, but higher for pork, bacon, eggs and butter. Coal, wood and coal oil were higher and rent averaged slightly higher.

## II.—Industries and Trades.

Production in the iron and steel industry at SYDNEY was well maintained during the month of

### **Metals and machinery**

September, the output being as follows: pig iron, 21,780 tons; ingots, 25,300 tons; blooms and billets, 15,490 tons; rods, 8,950 tons; bars, 525 tons; pit rails, 782 tons; plates, 4,550 tons; wire, 1,045 tons; nails, 1,380 tons; three blast furnaces were in operation; stove, furnace and metal roofing workers continued steadily active. The output of the steel plants at SYDNEY MINES was 6,450 tons of iron and 11,000 tons of steel; all steel furnaces were in operation and the blast furnace worked to capacity, with 150 ovens operating. Structural steel, farm implements and electrical workers at WESTVILLE were busy, and the sheet metal trade was fairly active. The foundries and machine shops at AMHERST were steadily active. Employment continued good at CHARLOTTETOWN among iron moulders, iron-workers and machinists and helpers; electricians and linemen were busy, but blacksmiths had a quiet month. Sheet metal workers and tinsmiths at ST. JOHN'S were busy. Foundry workers at MONCTON were steadily employed; the wire fence factory closed down for two weeks owing to shortage of material. Machine shops and foundries were active at FREDERICTON. MONTREAL reported activity in the structural steel, sheet metal, engine and boiler trades; electrical workers were fairly well employed. At QUEBEC quiet conditions were noted in the architectural iron and steel and portable and stationary engine trades, but stove, furnace, and metal roofing workers were busy. SHERBROOKE reported activity in the architectural iron and steel and stationary and portable engine plants. The metal trades at ST. HYACINTHE were somewhat less active owing to shortage of material. Iron foundries at THREE RIVERS were busy, employing over 500 hands. The metal trades at SOREL were well employed. A shortage of

moulders was reported at OTTAWA and HULL; the Royal Mint was unusually busy working overtime to meet the heavy demand especially for copper coins required for new taxes. TORONTO reported the metal trades generally quiet with many men out of work, some recent arrivals from Great Britain being unable to obtain work; the farm implement industry was active, and toward the end of the month conditions in the machinery and machine tool industries showed improvement, and machinists were better employed. The steel and iron industries at HAMILTON continued active. Metal workers at NIAGARA FALLS were busy, with a demand for machinists, drill and press hands for the chain, can, cutlery and plating factories. At ST. CATHARINES the metal trades continued well employed though a slight decline was noticed towards the close of the month; in some factories the men were granted a week's holiday two or three at a time to take out the work and avoid laying off any of the staff; employment prospects in these lines however were stated to be rather dull. BROCKVILLE reported activity in the stove and furnace, sheet metal and tool and hardware industries. BELLEVILLE reported the metal trades busy for most of the month, but hampered at the close by lack of power due to drought. The foundries at OSHAWA were busy, but the sheet metal plants were quiet. At PETERBOROUGH moulders and coremakers were active, but there was no demand at the foundries for additional help; some machine shops worked night shifts; electrical machinery concerns were also very busy, increasing their staffs and plants. At GALT the metal trades were all active, with help in demand at the stove and furnace factories; a shortage of material was experienced at times in the rolling mills. BRANTFORD reported activity in the machinery, stove and furnace, electrical fixture and farm implement factories, with some shortage of unskilled help. KITCHENER reported

activity throughout the metal group, with a demand for sheet metal workers. At GUELPH the metal trades were active, but moulders in piano plates were quieter than in the preceding month; some men were laid off at the iron culvert works. The machine and repairs shops and all the metal trades at STRATFORD were active. Moulders and other skilled workers were in some demand at WOODSTOCK. At LONDON the rolling mills worked steadily, with all the furnaces in operation; other metal workers were also well employed, farm implement plants being specially busy. Moulders were in some demand at ST. THOMAS. The structural steel industry at CHATHAM ran steadily. At WINDSOR an exceptionally busy period was reported in the metal working industries. OWEN SOUND reported satisfactory conditions in the bolt and nail factory and stove and furnace foundry. The stove factory at ORILLIA was busy; farm implement workers were normally active; pattern makers were required for the sawmill machinery factory. The steel plant at SAULT STE. MARIE continued running day and night and the foundry was busy to capacity. All branches of the metals and machinery group at WINNIPEG were well employed, with a steady demand for skilled mechanics. Farm implement and machinery shops at BRANDON were busy. At REGINA metal and machinery plants had an active month, electrical workers being exceptionally busy. At MEDICINE HAT the rolling mills continued very slack, but machine shops and foundries were fairly active, with some demand for skilled mechanics. Structural steel and electrical workers at NEW WESTMINSTER were very busy and sheet metal workers were normally active. VANCOUVER reported active conditions in the pig iron and rolling mills and in the structural iron and steel, stove and furnace, metal roofing and sheet metal industries. At VICTORIA iron and stove foundries were active, and electrical plants were fairly brisk.

Boat and ship-building and repairing yards and railway repair shops at SYDNEY continued steadily active during the month. The shipyards at HALIFAX were reported to be working at capacity. Very active conditions were reported in the Canadian National Railway engine and repair shops at MONCTON, night shifts being worked. At WESTVILLE the carshops and automobile plants were active. Shipbuilders were busy at TRENTON. The carshops at AMHERST were very busy. At MONTREAL the shipyards were quiet, but railway repair shops had plenty of work. QUEBEC reported many men laid off at the shipbuilding yards, some 600 however being retained for repair work, with prospects of continued employment as steel for a new steamer arrives; railway repair shops were busy. The railway repair shops at SHERBROOKE had a busy month. The shipbuilding plants at THREE RIVERS ran full time, over 600 men working steadily. The shipbuilding yards at SOREL had a good month. The carshops at OTTAWA and HULL were active though hampered by shortage of steel. TORONTO reported continued slackness in the automobile industry; the construction of the two ships recently contracted for will proceed, giving employment for some months to several hundred men; railway repair shops had plenty of work. At HAMILTON the locomotive and car shops and shipyards were active. The motor industry at OSHAWA was slack. The iron shipbuilding yard at WELLAND, which had been reducing its staff for some time completed its last contract and was ready to close. BROCKVILLE reported fairly active conditions in the motorboat and car plants. The locomotive work at KINGSTON gave increased employment, having a staff of nearly 700 employees, with good prospects of continuance; about 300 workers were employed steadily at the shipyards. At BELLEVILLE makers of auto parts had a busy month. The iron works at BRANTFORD were very busy on an order

**Vehicles (land and water)**

for car parts for the Canadian Pacific Railway; tractor and carriage workers were well employed. The truck and cycle factories at KITCHENER had a good month. At GUELPH automobile and truck body makers were busy. STRATFORD reported a busy month at the railway repair shops, with fair activity in automobile repairing and making of parts. The wagon factories at WOODSTOCK were very busy, with help in demand. Tractor and automobile plants at LONDON were active, and a new truck factory was preparing to begin operations. The railway repair shops at ST. THOMAS were steadily active during the month. The wagon factory at CHATHAM ran full time. WINDSOR reported a slack period in the automobile factories, a large number of workers having come in from Detroit to seek positions, but the tractor factories had a busy month. At OWEN SOUND the cessation of several local shipbuilding plants practically stopped the marine machinery industry; carriage works were quiet, and the malleable iron plant was affected by the slump in automobiles. The carriage factory at ORILLIA was also slack owing to the same cause. Semi-skilled men were in demand in the shipyards and railway repair shops at PORT ARTHUR and FORT WILLIAM. Employment continued steady in the railway repair shops at WINNIPEG. The railway shops at PRINCE ALBERT were steadily active. At MEDICINE HAT the rolling mills continued very slack, but machine shops and foundries were fairly active, with some demand for skilled mechanics. Railway repair shops at CALGARY were normally active, and at EDMONTON fair conditions prevailed in the metal working trades, sheet metal workers being busy. VANCOUVER reported activity in the locomotive and carshops and in the shipyards, though the latter were somewhat hampered by shortage of steel; automobile and motor shops were also busy. Ironworkers at VICTORIA were fairly active outfitting the vessels recently launched. The shipyards at PRINCE RUPERT employed about 600 men, two vessels being under con-

struction for the Dominion government.

SYDNEY reported continued activity throughout the food group. At HALIFAX abattoir and meat packing houses were rather slack; bakers and confectioners were active, but soft drink factories experienced the usual seasonal decline. At WESTVILLE, the flour and feed plants, abattoirs and packing houses were steadily active, bakers, confectioners and soft drink workers were busy. The milk factory at TRURO ran full time but with no demand for help, the tobacco factory closed down indefinitely. At CHARLOTTETOWN the pork packing plants began to buy hogs and employed a fair number of semi-skilled men; milk factories were very slack owing to scarcity of milk; other workers in the food group were busy. ST. JOHN reported employment good in the flour and feed mills; the sugar refinery worked continuously, running three shifts daily; bakers and confectioners, creameries, dairies and breweries were normally active, but soft drinks plants slowed down. The flour mills at MONCTON were busy; staffs were increased at the biscuit factory, and bakers and confectioners were all busy; soft drink workers had increased employment. Bakers and confectioners at FREDERICTON were active and soft drink workers were very busy. At MONTREAL flour and feed plants were fairly active, abattoirs and meat packing houses were active; breweries were busy, but cigar makers were slack. QUEBEC reported normal conditions in packing houses; baking, confectionery and fruit preserving workers were very busy; creameries and dairies were active; soft drink plants and breweries were busy. SHERBROOKE reported busy conditions in all food industries, especially among brewery workers. The butter factories in the district of ST. HYACINTHE were very busy, the farmers laying in their winter supplies at this season; the flour mills worked full time; soft drink factories were rather less active. THREE RIVERS and SOREL also

reported general activity in all branches of the food group. At OTTAWA and HULL abattoirs, bakeries, confectionery plants and dairies continued active. TORONTO reported activity in the flour and cereal plants; abattoirs and meat packing houses found conditions somewhat improving; bakers and confectioners had steady work but with little increase of staffs; fruit and vegetable canners were busy; soft drink and cigar factories were quiet. At HAMILTON continued activity was noted in every department, hundreds of women being required for the canning plants. Fruit and vegetable canneries were running at maximum capacity at NIAGARA FALLS and labour was in demand; one plant was badly damaged by a storm; wine and grape juice factories were very busy. At St. CATHARINES workers were employed in the flour, feed and cereal product plants and in bakeries and confectioneries. BROCKVILLE reported activity in the mills, bakeries and creameries, and soft drink and cigar factories were fairly active. Active conditions were general at KINGSTON especially in soft drink plants and breweries; about 35 cigar makers were thrown out of work temporarily by the burning of a factory. Activity was also noted throughout the food group at BELLEVILLE. At PETERBOROUGH the flour and feed mills ran full time but with reduced staffs; meat packing plants were not working to capacity pending extensions and alterations; creameries and dairies were very busy. Activity was general at GALT and BRANTFORD. Female help was in demand for the biscuit factory at KITCHENER; the sugar factories were preparing for a busy season, the beet harvest being exceptionally heavy; flour mills, creameries and dairies had a good month, but soft drink and cigar workers were only fairly active; the brewery and distillery at WATERLOO were very busy. At GUELPH the flour and feed mills ran to capacity. The mills, bakeries and creameries of STRATFORD were all active. LONDON reported the flour mills running to capacity and biscuit and confectionery plants working overtime;

the cigar industry continued to decline, being less than half what it was a year ago. The abattoir and soft drink factory at CHATHAM ran full time, but the soft drink industry fell off. Activity continued at WINDSOR, except for a seasonal slackening in the soft drink industry. OWEN SOUND reported fair activity in the cereal mills and the fruit and vegetable canneries were busy but the milk cannery was quiet owing to short supplies. The brewery at SAULT STE. MARIE ran full time. An increase of staffs was reported at WINNIPEG in the confectionery plants, but the vegetable canneries showed a decline in employment; abattoirs and packing houses continued active without change in staffs; similar conditions prevailed in the breweries and soft drink plants. BRANDON reported busy conditions in all food industries, excepting the breweries and tobacco plants. The soft drink industry at REGINA showed a seasonal decline, but flour and feed plants, abattoirs and packing houses were fairly active. The flour mills at MEDICINE HAT resumed activity after being closed for several weeks; dairies were active but confectionery and soft drink plants and breweries were rather slack. The flour mills at LETHBRIDGE were very busy and the brewery worked overtime. CALGARY reported fair conditions in the flour and feed mills, abattoirs and packing houses, bakeries and confectionery plants, but soft drink factories and breweries were quiet. The meat packing plant at EDMONTON showed some improvement. Bakeries and confectioneries at FERNIE slowed down somewhat, but dairies, breweries and soft drink plants were very busy. At NEW WESTMINSTER the abattoirs and meat packing houses showed steady activity, soft drink plants and breweries had a busy month and the cigar factory worked to capacity. At VANCOUVER flour and feed mills, baking, confectionery and canning plants, creameries, dairies and breweries were all busy; the sugar refinery was fairly active, but abattoirs, packing houses and soft drink plants were less active. VICTORIA reported activity in the feed and cereal

plants, fruit and vegetable canneries and breweries, bakers and confectionery workers were well employed, but cigar makers were slack.

The cotton mills at St. JOHN had an active month. The woollen and underwear factories at MONCTON were also busy. **Textiles, cordage and carpets** The woollen mills at AMHERST were also busy

with good prospects of continuance. At TRURO the woollen mills ran full time, but without much demand for help. The cotton mill at MARYSVILLE ran to capacity. At MONTREAL woollen and knitting factories were active, but tent and sailmakers were quiet. The cotton mills at QUEBEC were busy, but tent, awning and sailmakers were slack. At SHELBROOKE busy conditions were reported in the cotton, woollen, hosiery, underwear and knitted goods, bleaching, dyeing, finishing, and printing textile plants. The woollen, cotton, knitting and underwear factories at St. HYACINTHE were active. The cotton factory at THREE RIVERS gave employment to about 1,300 workers. The textile factories at PEMBROKE were active, but with no demand for help. TORONTO reported the woollen, hosiery and knitted goods factories busy, especially on medium grade goods; the carpet industry was active, but tent and awning workers were slack. Female help was in demand for the cotton and knitting factories at HAMILTON. The woollen, knitting and silk mills at St. CATHARINES were busy, with some demand for female help. Textile workers at KINGSTON were busy with good prospects of continuance. Female help was in demand for an extension to the woollen mills at PETERBOROUGH; carpet weavers were active. Woollen and underwear workers at BRANTFORD were very busy, and the silk industry was fairly active; unskilled help was in demand for the cordage factory. The woollen factory at GALT imported 33 female workers from Ireland. Help was in demand in the twine factory at KITCHENER, and the felt factories also continued very

busy. Female spinners were in demand in the linen and worsted mills at GUELPH; the carpet factory also required weavers. The woollen and knitting factories at STRATFORD were busy. Textile workers at WOODSTOCK were well employed, and female help was in strong demand at the knitting factories. The textile factory at CHATHAM ran full time. LONDON reported increased employment in the hosiery and underwear factories with a demand for more help. Tent and awning makers at WINDSOR, were active providing temporary quarters for people waiting for houses. Textile workers at OWEN SOUND had a good month. The worsted yarn factory at ORILLIA added to its staff, employing over 100 workers. At WINNIPEG the bag factories increased their staff owing to improved business; knitting factory employees also had increased employment, but tent and awning factories were busy. Tent makers at REGINA had a quiet month. At VANCOUVER knitted goods, tent, awning and sail factories were fairly busy.

Steam laundries at SYDNEY showed steady activity. At HALIFAX ready-

**Clothing, boots, shoes and laundering**

made clothing and laundry workers were well employed. The boot and shoe industry at AMHERST continued very slack, but with signs of improvement. The cap factory at TRURO ran part overtime and the shirt factory ran full time with capacity help. Tailors and garment workers at CHARLOTTETOWN had steady employment and shoemakers had a very busy month; laundries, dyeing and cleaning workers were busy. An improvement was noted in the ready-made clothing factories at St. JOHN, and laundries continued active. Boot, shoe and larrigan makers at FREDERICTON were well employed, and garment workers were in demand; laundries and cleaning plants were active. Tailors, garment makers and milliners at MONCTON were very busy, with a shortage of experienced help; domestic seamstresses were especially in demand; laundries and dyeing work-

ers were well employed. At MONTREAL ready-made clothing factories were fairly busy; hat, cap and whitewear and laundry workers had fair employment; boot and shoe factories were quiet. Ready-made clothing workers at QUEBEC were rather slack, but glove makers, furriers and laundry workers were busy. At SHERBROOKE, clothing and laundry workers were busy. Laundry workers at ST. HYACINTHE and THREE RIVERS were well employed. Female help was in demand for the shirt and collar factories at ST. JOHN'S and IBERVILLE; and fur workers had a very active month. The shirt and shoe factories at SOREL had an active month. Clothing workers at OTTAWA and HULL worked to capacity, and laundries were busy. TORONTO reported quiet conditions in the ready-made clothing industry, some plants closing down owing, it was said, to unsettled market conditions; steam laundries and cleaning plants were normally active; shirt, overall and fur workers were well employed; but the boot and shoe trades continued quiet. Female help was in demand for laundry work at HAMILTON. The clothing industries at NIAGARA FALLS were active throughout the month. Boot and shoe, and hat and glove workers at BROCKVILLE were active, and furriers were unusually busy. The shirt factory at BELLEVILLE, which employs many female operatives, had a busy month; and the hat factory, a new industry, was also active. PETERBOROUGH reported activity in the factories of women's and children's clothing, but the boot and shoe industry was slack. Boot and shoe workers were also very quiet at GALT, with likelihood, however, of improved conditions; ready-made clothing and laundry workers were busy. Garment, overall and shirt makers were well employed at BRANTFORD. KITCHENER reported continued slackness in the boot and shoe industry, but with some signs of recovery; help was in demand in the button, shirt and collar factories; the robe and clothing and the glove factories ran full time; steam laundries were rather less active. Pant and hat and women's whitewear work-

ers were active at GUELPH. Tailoring, dressmaking and millinery shops at STRATFORD had a very busy month. At LONDON ready-to-wear clothing and dyeing and cleaning workers were well employed; female help was in demand in the overall and glove factories; shoe workers had a quiet month. The shoe factory at ST. THOMAS continued slack. Female help, especially machine hands, was required for the overall factory at WINDSOR; the shirt factory ran with full force; more help was required for laundries and cleaning plants. Women's whitewear workers at OWEN SOUND were active. The ready-made clothing plants at ORILLIA were quiet, part of the month being "sample time." At WINNIPEG an improvement was noted in the ready-to-wear trades, but without increase in staffs; shirt makers had slightly increased employment and whitewear and fur workers were in demand; glove makers were steadily employed; cleaning plants gave increased employment. The garment factory at EDMONTON continued fairly active, employing about 275 workers. At VANCOUVER the ready-made clothing trade was busy, and workers in men's clothing, overalls and shirts were well employed. Shirt and overall factories at VICTORIA were active, with skilled workers in demand.

The pulp and paper industry continued active in the Maritime provinces during September, increased employment being noted in the mills at MURRAY; a slight decline in staff was reported at LIVERPOOL. The pulp mill at BATHURST completed repairs and resumed running to its usual capacity of 100 tons daily. Steady conditions were maintained at ST. JOHN and CHATHAM. In the province of Quebec employment continued steady in the mills at THREE RIVERS, SAHWINIGAN FALLS, WINDSOR MILLS, CAP MAGDELAINE, CHANDLER, EAST ANGUS, LA TUQUE, and BAGOTVILLE, while increases occurred at HULL and KENOAGAMI, and slight declines at DONACONA and CHICOUTIMI. In Ontario

#### Pulp, paper and fibre

employment continued steady in the pulp and paper mills at CORNWALL, IROQUOIS FALLS, STURGEON FALLS, and THOROLD; staffs were increased at SAULT STE. MARIE, TORONTO, and ESPANOLA, while small reductions were noted at OTTAWA, HAWKESBURY and SMOOTH ROCK FALLS. VANCOUVER reported continued activity in the pulp and paper mills at OCEAN FALLS and POWELL RIVER. VICTORIA reported that a new pulp and paper mill began operations at BEAVER COVE.

Printers continued steadily employed throughout the month at SYDNEY, HALIFAX and WESTVILLE.

**Printing,  
publishing  
and paper  
goods**

Increased employment was noted at CHARLOTTETOWN. Printers were in demand at ST. JOHN and bookbinders and engravers had a good month. Steady conditions were reported in the printing and bookbinding industries at MONCTON, and FREDERICTON. MONTREAL reported employment steady among printers, bookbinders and lithographers. Conditions in these trades were also good at QUEBEC, and paper box and bag makers were well employed. Activity continued throughout the group at SHERBROOKE, ST. HYACINTHE and THREE RIVERS, but at SOREL the printing trade was dull. At OTTAWA and HULL the printing trades were slightly less active; engravers were busy and paper box makers worked to capacity. TORONTO reported printers, bookbinders and allied trades fairly well employed and paper box and bag makers active. Printers and binders were active at HAMILTON, NIAGARA FALLS, ST. CATHARINES, BROCKVILLE, KINGSTON, and BELLEVILLE. Printers and box makers at PETERBOROUGH, GALT, BRANTFORD and KITCHENER had a good month. Activity also continued among printers and allied trades at GUELPH, STRATFORD, WOODSTOCK, CHATHAM and LONDON. WINDSOR reported increased activity in all departments of printing, but the paper box industry had a sharp decline. At OWEN SOUND increased activity was noted in printing shops and

binderies. WINNIPEG reported printing and publishing establishments fairly active, with sufficient help to meet the demands; a slight demand for female help was noted in the binderies; paper box factories ran steadily without change of staffs. The printing and publishing trades were well employed at REGINA, MEDICINE HAT, LETHBRIDGE, CALGARY and EDMONTON. Printing and publishing plants were quiet at PRINCE RUPERT. VANCOUVER reported fair conditions in the printing and allied trades. VICTORIA reported fair activity in the print-int plants; engravers and lithographers were busy and paper box workers fairly well employed.

The sash and door factories and planing mills at SYDNEY continued active, but HALIFAX still reported a falling off. At

**Woodworking  
and furniture**

WESTVILLE, the planing mills and furniture factories were fairly active. Woodworkers at AMHERST were busy, including piano makers. The mattress factory at TRURO was busy. CHARLOTTETOWN reported a good month at the mills and broom factories; upholsterers and polishers were busy. Help was in demand for the wooden box, broom and brush factories at ST. JOHN; the planing mills were also very busy. The sash and door factories at MONCTON were busy supplying building requirements in the district; the cooperage plant was in steady operation. Woodworkers at FREDERICTON were well employed. At MONTREAL wooden box and furniture workers were fairly busy and the piano industry was active. QUEBEC reported activity in the sash and door, wooden box, broom and cooperage factories and planing mills, but chair factories were quiet. Activity was reported among woodworkers at SHERBROOKE, THREE RIVERS and ST. HYACINTHE, the organ factory at the latter point being very busy. The woodworking industries at SOREL were rather quiet. OTTAWA and HULL reported the sash, door and planing mills working under capacity owing to a decline in building activity. At TORONTO the

planing mills were actively meeting the needs of the building trades; the furniture, brush, piano and phonograph industries were all active. The wood-working trades at HAMILTON were active, but broom and brush factories were rather quiet. At NIAGARA FALLS, ST. CATHARINES and BROCKVILLE wood-working concerns were all busy. Conditions were also good at BELLEVILLE though the mills were compelled to close toward the end of the month owing to failure of electric power. The planing mills and box factories at PETERBOROUGH were fairly busy. At GALT the sash and door factories were still very busy; basket factories were also busy and furniture workers active. BRANTFORD reported activity in the planing mills and in the piano and victrola case factories. At KITCHENER some shortage of experienced help was noted in the furniture factories; the wooden box factory worked part overtime; the sash and door and woodenware and toy factories were busy, and the broom plant and piano and organ workers were fairly active. The cooperage at WATERLOO was still very busy. The planing mills at GUELPH were active and piano and sewing machine workers were fairly active. Skilled mechanics were in demand in the furniture factories at WOODSTOCK, but organ builders were rather slack. At LONDON conditions were good in the planing mills and wooden box and piano factories; cooperages were somewhat hampered by shortage of material. WINDSOR reported the planing mills running to capacity; piano workers were unusually busy on player-pianos and on repairs. Activity was noted at OWEN SOUND in the sash and door, wooden box and mattress factories, but furniture, chair, broom and brush factories were quiet. Some demand for men was reported in the planing mills at ORILLIA; furniture workers were rather slack, but box

and toy makers were busy. The planing mills at SAULT STE. MARIE were very busy. The sash, door and planing mills at BRANDON, REGINA and CALGARY had a busy month, but at MEDICINE HAT and EDMONTON woodworkers were rather quiet. The sash and door factory at FERNIE was inactive the slight improvement in August being temporary. VANCOUVER reported activity in the woodworking plants. Furniture workers at NEW WESTMINSTER had a busy month. VICTORIA and NANAIMO reported continued activity in the planing mills on Vancouver Island; wooden box factories were moderately busy.

Tannery workers at ST. JOHN had steady employment. Harness and

**Leather and  
rubber (other  
than clothing)**

leather workers at FREDERICTON had an active month. At MONTREAL tanneries, trunk, bag and harness plants were fairly active; rubber factories were busy. QUEBEC reported quiet conditions at the tanneries and trunk and bag factories. The tannery at ST. HYACINTHE was rather slack, but no workers were laid off. At SOREL leather workers were active. Trunk, bag and harness makers at TORONTO were only fairly active and rubber factories were quiet. Many tannery workers at KINGSTON were still unemployed. The tannery at OSHAWA had a quiet month. Saddlers and harness makers at PETERBOROUGH were very busy. The tanneries and trunk and bag factories at KITCHENER ran full time; the rubber tire factory was very slack, many men being laid off. Tannery and harness workers at STRATFORD had a satisfactory month. Slackness continued in the tannery at LONDON. Saddle and harness makers at WINDSOR were active on repair work. Tannery workers at OWEN SOUND were active and harness makers fairly busy. The tannery at ORILLIA worked to capacity. BRANDON reported busy conditions among tannery and trunk workers. CALGARY reported fair activity in the trunk, bag, harness and horse goods factories.

Stone and granite cutters at WESTVILLE were fairly active during September; the brickyards

**Clay, glass,  
stone, cement,  
etc.**

were all busy and pottery workers were steadily employed. Cement workers at MONCTON

were busy supplying blocks for building but were hampered to some extent by shortage of material. At MONTREAL the glass factories continued to operate steadily. The brickyards at QUEBEC were very busy, but stonecutters were slack. Stone and granite cutters and brickmakers at SHERBROOKE were reported busy. The artificial stone factories at THREE RIVERS were hampered by a shortage of labour. At OTTAWA and HULL the Roman stone industry was retarded by the shortage of cement, but an improvement was noted toward the close of the month. The mica factory at THETFORD MINES employed about 200 workers steadily. At TORONTO brickmakers were busy and glass workers were well employed. HAMILTON reported continued activity throughout the group. Stone and granite cutters at BROCKVILLE were fairly active; the municipal brickyard nearly finished its season's work. The cement plant at BELLEVILLE was very busy, running day and night shifts; brickmakers were well employed, and the pottery was active in the manufacture of smallware, tiles and sewer pipes. Stone and granite cutters at GALT had a quiet month. At KITCHENER stone and marble cutters worked full time; cement, brick, tile and sewer pipe workers were also busy. The cut stone factory at LONDON employed a larger staff than ever before, and the brickyards were also unusually busy. The brick and tile yards at CHATHAM ran steadily with full staffs. A shortage of labour was reported at REGINA in the brick, tile and sewerpipe plants. At MEDICINE HAT the brickyards and glass works were fairly active, and pottery workers were normally busy. VICTORIA reported activity in the brickyards; the cement plants were also very busy, large quantities of this product being exported.

Activity continued throughout the month in the various chemical industries

**Paints, oils,  
chemicals,  
explosives**

at SYDNEY. The paint and oil plants at HALIFAX had a good month. At MONTREAL the paint and varnish industry was

fairly active, and the chemical, drug and medicine plants were busy. A shortage of help was reported in the paint mills at THREE RIVERS. At TORONTO the soap works, paint and varnish factories and chemical plants were steady in operation. HAMILTON reported continued activity in the soap and drug industries; powder and cartridge factories were fairly active. The electro-chemical plants at NIAGARA FALLS were active. The paint and varnish industry at BRANTFORD was busy, though materials were difficult to secure. The oil, grease and glue factories at KITCHENER had a good month. At WINDSOR the paint factory was very quiet, but the drug and medicine plants were normally active. The paint factory at OWEN SOUND was fairly active. Soap makers at WINNIPEG were normally active. REGINA reported activity in the oil refinery; paint and varnish workers were normally active; the soap factory was preparing to extend its operations; cartridge and ammunition workers were slack. The linseed oil mills at MEDICINE HAT worked day and night shifts. The acid plant at TRAIL resumed activity after temporary closing for repairs. VANCOUVER reported the local oil refinery, and the paint and varnish factories busy. At VICTORIA the paint, varnish and soap factories were increasingly busy, but chemical and explosive plants were quiet.

The earnings of the Canadian Pacific Railway in August were \$17,994,768, as compared with \$15,283,653 in August 1919.

**Railways,  
shipping and  
longshore work**

During September the number of persons employed by the Canadian Pacific, Grand Trunk and Canadian National Railways on railway operation, including general offices, train-

men and engine crews, station employees, sleeping, parlour and dining-car employees showed an increase of about 1,300 persons during the month of September, the total at the end of the month being about 69,400 persons in comparison with 68,100 at the end of August. These increases were made, for the most part, towards the end of the month and are nearly all accounted for by additions to the C. N. R. staffs.

SYDNEY and HALIFAX reported fairly steady conditions among 'longshoremen, steam and electric railwaymen and transfer workers. Railwaymen at WESTVILLE were steadily employed, and at TRURO they worked full time. CHARLOTTETOWN reported employment in the freight and passenger departments; express and transfer men had a good month. At St. JOHN navigation was dull and 'longshore work slack; railway traffic was exceptionally heavy; transfers were busy with tourists. MONCTON reported heavy freight and passenger traffic, operating crews making much overtime. At FREDERICTON the railways and steamer services had a busy month. At MONTREAL 'longshoremen were very busy, and the railways increased their operating staffs. Longshoremen and ship labourers at QUEBEC were busier than during any other month in the year, low water in the channel preventing vessels from completing cargoes in Montreal; other transport workers were very busy. At SHERBROOKE, THREE RIVERS, St. JOHN's, IBERVILLE and SOREL general activity was noted among transport workers in all branches. Steam railway workers at TORONTO were less active than in the previous month, a number of engineers and firemen being laid off; navigation showed decreased activity as the end of the season approached; street railwaymen were well employed, and transfer and garage employees were generally active. At HAMILTON steam and electric railways were active with both freight and passenger traffic. Lake and other summer work ceased at KINGSTON, many workers going to other employment. NIAGARA FALLS reported a decline in traffic by lake

steamers and electric railways, but steam railwaymen had a busy month. At Sr. CATHARINES employment continued on all branches of the railway system. BROCKVILLE reported unusual activity in railway and transfer traffic, but 'longshore work was only fair, most of the coal for the season having been unloaded. BELLEVILLE reported one of the busiest months of the year in passenger and freight traffic, transfers being correspondingly active. Transportation workers at GALT and STRATFORD had a busy month. KITCHENER reported very heavy passenger traffic in the first part of the month, and the freight department was also very busy; street railwaymen and local transport workers were steadily active. At LONDON railwaymen on both systems had a busy month. St. THOMAS reported fairly steady conditions among railway employees. Transfer workers at WINDSOR had a very busy month. At OWEN SOUND railway workers were well employed during the month. During August 404,766 tons of freight passed through the ship canal as compared with 305,976 tons in August 1919. WINNIPEG reported help in demand for the street railway service for the coming season. Railway workers at BRANDON, REGINA and PRINCE ALBERT had a very busy month. At MEDICINE HAT passenger traffic fell off, but freight traffic continued heavy. Railway workers were reported fairly active at CALGARY. VANCOUVER reported employment fairly good on steam and electric railways, and in navigation and 'longshore work; transfers and garages were busy. 'Longshore work at PRINCE RUPERT was rather slack. VICTORIA reported fair activity among 'longshoremen.

FREDERICTON reported that operations at the antimony mines at Lake George were temporarily suspended. QUEBEC reported continued activity in quarrying operations. At SHERBROOKE the chrome iron industry was busy, but the copper mines were quiet; asbestos

**Mining (other  
than coal)  
smelting and  
quarrying**

workers were very busy; granite and especially gravel pit workers were well employed. The mica mines in the district north of OTTAWA and HULL were increasingly active. THETFORD MINES reported steady activity throughout the month. A demand continued at TIMMINS for miners and timberman. COBALT reported that during the month 38 cars, were shipped, containing approximately 3,009,898 pounds of ore as compared with 37 cars, containing approximately 2,916,668 pounds of ore in the previous month; bullion shipments amounted to 519 bars containing 700,338.60 fine ounces of silver; this compared with 604 bars containing 760,445.45 fine ounces in August; a general shortage of underground labour was reported at the mines, work being hampered from this cause but sufficient surface workers were available. The gold mines in PORCUPINE district also operated at a reduced rate owing to an acute shortage of labour, but it was hoped that an improvement would follow the close of harvesting. SAULT STE. MARIE reported a demand for miners and surface men at the Magpie mines. FORT WILLIAM reported a demand for men at North Pines, where work was steady, material being sent to Cleveland, Buffalo and Chicago for smelting. WINNIPEG reported a demand for quartz miners in the central districts, including THE PAS. A shortage of labour reported as seriously hampering metalliferous mining at FERNIE. The mines at ROSSLAND camp worked steadily, shipping ore to the smelter at TRAIL; the mine in the boundary district which closed down last March was reopened, employing about 50 men; new work also opened up in the SLOCAN district; the copper plant ran steadily and about 40 tons of refined electrolytic lead were turned out at the lead refinery; the zinc plant turned out over four million pounds of electrolytic zinc; one copper and one lead furnace were in operation. CRANBROOK reported a demand for men for the Kimberley mining and smelting plant. The Granby company's smelter at GRAND FORKS was dismantled, but a demand

for the mines was reported. PRINCE RUPERT reported activity in all mining and quarrying lines, especially at ANYOX, ALICE ARM and STEWART.

SYDNEY reported the production of coal in the Dominion Collieries at 263,500 tons as compared with 260,000 tons (revised figure) in the preceding month. At the Nova Scotia Company's collieries at SYDNEY MINES the output was 51,000 tons of coal and 8,000 tons of coke, as compared with 48,500 tons of coal and 7,800 tons of coke in the preceding month; 150 ovens were in operation. WESTVILLE reported activity continued throughout the month. Coal miners at MINTO continued steadily active. A strong demand for miners for the prairie coal-fields was reported from Winnipeg, Saskatoon, Calgary, Edmonton and other employment centres. LETHBRIDGE reported that full time was worked at Nos. 3 and 6 mines of the Galt collieries, with good prospects of continuance. At FERNIE the coal mines operated regularly. NANAIMO reported the mines on VANCOUVER ISLAND running steadily, with some demand for miners holding British Columbia certificates.

The value of the building permits in 56 cities during August amounted to

	\$9,439,807	as com-
<b>Building and</b>		pared with
<b>construction</b>	\$13,025,-	
	560 in July.	At SYD-
		NEY during the month

of September activity in the building trades was mostly in schools and churches. At HALIFAX work commenced on twenty dwellings for the Housing Commission; construction generally showed some decline, a shortage of cement being felt. The building trades at WESTVILLE were quiet, but some public improvements were in progress. Painters were in demand at TRURO, and carpenters were fairly busy. At CHARLOTTETOWN, carpenters, lathers, plasterers and painters were very busy; plumbers and steamfitters were fairly active, but bricklayers had a

dull month. ST. JOHN reported the building trades fairly active; dredging operations were in progress at West St. John. At MONCTON builders were active on private houses; 47 houses were completed during the year for the Housing Commission. Employment continued steady at FREDERICTON, except among painters. At MONTREAL the building trades were increasingly active. QUEBEC reported some new construction, but most of the activity throughout the past season was on repair work. SHERBROOKE reported busy conditions in the building and construction trades. At ST. HYACINTHE the Housing Commission's programme was delayed, the aldermen failing to agree to a site. Fair activity was noted at THREE RIVERS in the building trades; dredging operations were in progress in the St. Lawrence and St. Maurice Rivers. Conditions were reported good at ST. JOHN'S and IBERVILLE, but some slackness was noted at SOREL. Building was only fairly active at OTTAWA and HULL. At THETFORD MINES much construction work was in progress. TORONTO reported the building trades busy, especially in the erection of dwellings, with good prospects of continuance till late in the season; operations on some larger structures were considerably delayed by a strike of steel workers. At HAMILTON and NIAGARA FALLS the building trades were well employed; and at ST. CATHARINES conditions were fair. Progress at BROCKVILLE was somewhat delayed by a shortage of cement. KINGSTON reported general activity among builders, with bricklayers, carpenters, painters and electricians in demand. At BELLEVILLE extensive municipal construction work was in progress, and the building trades were well employed. Considerable demand was noted at OSHAWA for carpenters and bricklayers. Carpenters and painters were in some demand at PETERBOROUGH. Much construction work was in progress at GALT, but at BRANTFORD the building trades were slack. KITCHENER reported great activity in all classes of construction, with a shortage

of bricklayers and carpenters. At GUELPH more labour was required for municipal work, and the building trades were all reported active. Conditions were also good at STRATFORD and WOODSTOCK. At LONDON the building trades were very brisk during the month, with many swellings under construction; the Housing Commission had completed or were erecting 100 houses; several industrial, commercial and public buildings were also under construction. A shortage of carpenters, bricklayers and plasterers was reported at ST. THOMAS. Conditions at CHATHAM showed some improvement. WINDSOR reported great activity in construction work of all classes to keep pace with the growth of population, which was stated, increased by 5,000 in the past twelve months. At WINNIPEG building operations were steady during the month, with a constant demand for all classes of experienced help; municipal work employed much unskilled labour on road work. Active conditions were also reported from BRANDON, REGINA, MOOSE JAW, SASKATOON, CALGARY and EDMONTON. At VANCOUVER increased activity was reported in the construction of dwellings, commercial and industrial buildings. NEW WESTMINSTER also reported employment good in the building trades. At PRINCE RUPERT carpenters were in demand; the new ocean docks gave considerable employment. At VICTORIA the demand for labour of all kinds was dull. Considerable repair work was in progress at NA-NAIMO.

The number of persons employed by the Canadian Pacific, Grand Trunk and Canadian National Railways on railway construction, including maintenance of way, showed a decrease of about 800 persons during the month of September, the total at the end of the month being about 42,200 persons in comparison with 43,000 at the end of August. This reduction was made at the beginning of the month and reflects decreases in the Canadian Pacific Railway Staffs. This Company had a net decrease for the month of about 1,000 persons; the Grand Trunk, a nominal

reduction only, and the Canadian National an increase of about 300 persons.

CHARLOTTETOWN reported quiet conditions in the lumbering industry during September. At ST. JOHN the saw and shingle mills ran steadily. The **Lumbering** saw mills in the district of FREDERICTON ran to capacity. Lumber workers were in demand at BATHURST. Round QUEBEC the saw mills were still in full swing on the season's cut, and men were being sent into the bush to prepare for winter operations. The saw and shingle mills and tie camps at SHERBROOKE had a busy month. At OTTAWA and HULL several machines in one mill were closed down on account of shortage of water power, while at another about quarter of the men were laid off owing to difficulty in getting logs; generally, the saw and shingle mills were busy all month; men were in demand for bush operations. PETERBOROUGH reported a demand for men for the lumber camps; the drives on the river still continued and the saw mills were very busy. TIMMINS reported a shortage of bushmen, and at PEMBROKE bush and mill workers were in demand. At OWEN SOUND the saw mills were active, shingle mills worked part time, tie mills were quiet, and lumber camps were not very active, but were organizing for the winter's work. NORTH BAY reported a demand for saw mill hands and bush men along the North Ontario Railway. At COBALT bush men were in demand in the pulpwood work, causing some shortage in other camps. SAULT STE. MARIE reported a strong demand in the outlaying district for bush men, men being

brought in from outside points; the lumber yards and saw mills were also very busy. FORT WILLIAM and PORT ARTHUR reported a constant demand for mill workers from the surrounding district, with an increasing demand for bushmen. WINNIPEG reported a demand from northern Manitoba and Saskatchewan for bush men. At PRINCE ALBERT one mill suspended operations owing to the scarcity of men.—A demand for men for the bush and saw mills in Alberta was reported from CALGARY and EDMONTON. At FERNIE there were a considerable number of idle days in the mills owing to unsettled conditions in the lumber market, bad weather, and the diversion of labour to the prairie harvest fields; some of the smaller mills closed down. CRANBROOK also reported a shortage of men for the saw mills. At NELSON new saw mills were opening up, but a shortage of cars hampered work to some extent. Lumber workers were busy at GRAND FORKS. VANCOUVER reported the saw and shingle mills and lumbering as generally busy. The mills at NEW WESTMINSTER were also busy; a shortage of cars led to the temporary closing of mills in Eburne district. At PRINCE RUPERT the lumber camps and saw and shingle mills were very busy and workers were in demand; loggers were still required for camps on Graham Island, Moresby Island and Surf Inlet. VICTORIA reported continued activity in all branches of the lumber industry, and at NANAIMO employment was good, the mills on Vancouver Island mostly working full time, but some uncertainty was felt as to future orders owing, it was said to changes in the freight rates.

## INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907

### PROCEEDINGS FOR THE MONTH OF SEPTEMBER, 1920, WITH TEXT OF BOARD'S REPORTS

**D**URING the month of September the Department received a report from the Board established to deal with the dispute between the Canadian Press, Limited, and their press telegraph operators, members of the Canadian Press System Division No. 52, Commercial Telegraphers' Union of America.

One application was received for the establishment of a Board, and a Board was established in connection with a dispute for which the application had been received during a previous month.

#### Application received

During the month of September an application was received for the establishment of a Board from the employees of "La Presse" and "La Patrie" Publishing Companies, Montreal. This industry not being one falling within the scope of the Industrial Disputes Investigation Act, a Board could be established only upon receipt of the joint consent of the disputants. As the communications

received from the employing companies involved were to the effect that they were not favourable to Board procedure no further action was taken by the Department of Labour.

#### Other proceedings under the Act

During the month of September a Board was established in connection with the dispute between the Canadian Pacific Railway Company, the Grand Trunk Railway, the Canadian National Railways, and certain classes of their employees, being clerks, time-keepers, railway checkers, freight handlers, truckers, coopers, etc. The Board was composed as follows: Mr. E. McG. Quirk, Montreal, chairman, appointed by the Minister in the absence of a joint recommendation from the other two members, Mr. U. E. Gillen, Toronto, appointed by the Minister in the absence of a recommendation from the employing companies, and Mr. Adelard Laurendeau, M.P.P., Montreal, nominee of the employees.

### Report of Board in dispute between the Canadian Press, Limited, and their Press Telegraph Operators

**A** REPORT was received from the Board established to deal with the dispute between the Canadian Press, Limited, and their press telegraph operators, members of the Canadian Press System Division No. 52, Commercial Telegraphers' Union of America. The Board was composed as follows: His Honour Judge R. D. Gunn, Ottawa, chairman, appointed on the joint recommendation of the other two members, Messrs. E. Norman Smith, Ottawa, and David Campbell, Winnipeg, nominees of the employer and employees respective-

ly. The report was signed by the chairman and it is understood from a communication from Mr. Smith, a copy of which appears with the text of the Board's report, that he concurred in these findings. A minority report was presented by Mr. Campbell. Both the majority and minority reports contained recommendations as to settlement of the dispute. The findings of the majority report were accepted, with certain reservations, by the company, but rejected by the men, who were favourable to the findings of the minority report.

### Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Canadian Press Limited, employers, and the Press Telegraph Operators in their employ, members of Canadian Press System, Division No. 52, Commercial Telegraphers' Union of America, employees.

To the Honourable Mr. G. D. Robertson,  
Minister of Labour,  
Ottawa, Ontario.

On the 26th day of August, 1920, you were pleased to appoint a Board of Conciliation and Investigation upon the application of the above named employers, with the consent of the employees, to investigate and report upon a dispute involving the rates of pay and schedule of working rules to govern the service of the above named employees who were unable to come to agreement with their employers upon the same.

The Board fixed the 10th day of September, 1920, at the City of Toronto, to hear the representatives of the parties and were attended by Messrs. Frank A. Coyle, General Chairman, Thomas B. Murray, William G. Tobin, and Frank Gillis, Committee on behalf of the employees, and Mr. Fred. Livesay, General Manager, Mr. McLaughlin, Superintendent of the Canadian Press Limited, on behalf of the employers. The Board found that the employers are an incorporated co-operative association for the purpose of gathering news and information for the Press of Canada over leased wires, having offices in New York City, and the cities of the several provinces of Canada from Sydney to Vancouver, employing a highly skilled class of Morse Telegraph Operators numbering about ninety, working a continuous twenty-four hour service, and that the territory named is divided into two divisions, east of Ottawa being the Eastern, and west thereof being the Western Divisions, with the same number of operators in each division, and all governed

by a schedule of working rules and rates of pay settled by a board of conciliation in November, A.D. 1919, and terminated by notice from the employees on the 1st of September, 1920. The Board found that the employees had recently submitted a memorandum of agreement setting out an enlarged schedule of working rules and conditions including advances in rates of pay, for consideration and adoption by the employers, who having expressed their inability to accept the same in whole or in part promptly applied for the appointment of this Board, with the result mentioned.

The employers also submitted to the Board their proposed draft agreement of working rules to govern the service of the employees, but providing no advances in existing rates of pay.

The Board proceeded in the presence of the parties to revise the several draft agreements of working conditions, and after much labour had concluded to recommend that the Memorandum of Agreement in Schedule "A" hereto be put in force and remain in effect as the working conditions and rules governing the parties for the time mentioned therein, which agreement, if adopted, it is hoped will form the basis for and permit future negotiations looking towards the amendment thereof to make provision for new conditions that may arise in the service without the necessity of its entire cancellation.

The request or demand of the employees for increased rates of pay is based mainly, if not entirely, on the well-known ground of increased cost of living expenses during the past year and still existing, which will continue, and which is higher here than in the larger American cities owing to the different climatic conditions prevailing.

The employers contend and point out to the Board that the increases in the rates granted by the report of the former Board, hereinbefore mentioned, were recommended to and did fairly provide for the part the employers should bear of such increased cost of living for the past year and further

that the present rates of pay are equal to if not greater than, the rates paid by any comparable similar concern for like services.

It is also represented before the Board and cannot be denied that the other similar organizations on the American side have very recently made agreements for the coming year with their press operators doing the same class of service as the Employees at rates graded down from \$45.00 per week according to the density of population of the city wherein the offices are located.

It is not unjust or unfair to state here that the employers contend that they grant as favourable terms of employment with overtime, holidays and vacation pay, as any of the other similar organizations, and also claim that the overtime rates paid by them increase the cost of operations yearly for operators' services almost \$15,000, though that expenditure is not general but is confined largely to the employees in the Eastern Division, some of whom very materially increase their weekly wage rates in almost every month of the year.

The Board have had the benefit of very careful and exhaustive representations, statements and contentions of the representatives of the several parties, and have given the same the most serious and fullest consideration, and the undersigned concluded to recommend a flat increase of five dollars (\$5.00) per week be granted to each of the employees over and above his weekly rate fixed in the last schedule and be paid by the Employers and accepted by the Employees from the 1st day of September, 1920, to the 1st day of September, 1921, and during the existence of the agreement referred to Schedule "A" hereto, unless altered according to its terms.

The thanks of the Board are due to the Globe, for the excellent accommodation supplied for the Board and the representatives of the parties during the hearings of the dispute, and to the representatives of the parties for the very great assistance rendered the Board at

the same time.

Dated this 15th September, 1920.

(Sgd.) R. D. GUNN,  
Chairman.

#### SCHEDULE A.

THIS AGREEMENT made this \_\_\_\_\_ day of \_\_\_\_\_ A.D. 1920, between the CANADIAN PRESS LIMITED, hereinafter called the Company, through its authorized officials, Party of the First Part, and CANADIAN PRESS DIVISION NO. 52, COMMERCIAL TELEGRAPHERS' UNION OF AMERICA, hereinafter called the Union, through its authorised committee, Party of the Second Part,

WITNESSETH as follows:

1. IT IS AGREED that from and after the First day of September, 1920, the said party of the first part binds itself to the employment in the telegraph service of only competent telegraphers who are members of the Commercial Telegraphers' Union of America, provided such Union can furnish such competent Telegraphers as are necessary for the business of the said party of the first part and agrees to respect and observe the conditions and scale of wages of the aforesaid organization incorporated in this agreement.

2. IT IS AGREED by the Union that no telegrapher working under this Agreement shall participate in any sympathetic strike or walk-out of any nature, except as sanctioned by the International Officers of the Commercial Telegraphers' Union of America.

3. IT IS AGREED that the schedule of salaries paid to full time Morse leased wire telegraphers working under this Agreement, by the Company, shall be as follows, all salaries to be paid weekly by cheque, but overtime to be computed and paid twice monthly.

#### BUREAU OPERATORS—

Bureau offices to be at New York, Halifax, Ottawa, Toronto, Winnipeg, Calgary, Vancouver, Victoria and Seattle.

New York: Day \_\_\_\_\_ per week; Night \_\_\_\_\_ per week.

All other Bureaus: Day \_\_\_\_\_ per week;  
Night \_\_\_\_\_ per week.

#### LINE OPERATORS—

Maritime Circuits (including Sherbrooke, Que.): Day \_\_\_\_\_ per week; Night \_\_\_\_\_ per week.

Ontario and Quebec Circuits: Day \_\_\_\_\_ per week; Night \_\_\_\_\_ per week.

Western Circuits (including Head of the Lakes): Day \_\_\_\_\_ per week; Night \_\_\_\_\_ per week.

All extra Operators engaged exclusively in individual newspaper offices to be classified as Line Operators.

4. IT IS AGREED that eight hours' time, including thirty minutes for lunch by day and forty-five minutes for lunch at night, and two rest periods of not more than ten minutes each day and night, shall constitute a day's work or a night's work for telegraphers, and six days or six nights shall constitute one week. No trick shall be split more than once. Night telegraphers shall not be obliged to begin their work earlier than 6 p.m. (their local standard time) and day telegraphers shall not be obliged to begin their work earlier than 7 a.m. (their local standard time). If the system known as "Daylight Saving" is adopted officially by any municipality, province, or by the Dominion of Canada, such daylight saving time may be considered standard time in the meaning of this Clause and for the area affected by such official action.

5. IT IS AGREED that no telegrapher regularly employed by the Company shall be regularly engaged as a telegrapher by any other Company, and violation of this rule shall be considered sufficient cause for dismissal. Telegraphers regularly employed by Canadian Press Limited desiring to work emergency extra in other telegraph offices shall first notify the District Traffic Manager or Assistant Traffic Manager.

6. IT IS AGREED that where exigencies of newspaper publication permit one full holiday will be allowed on each of the following named holidays, to all operators: New Year's Day, Good Friday, May 24th, July 1st, Labour Day, Thanksgiving Day and Christmas Day. Operators who are called to work for any part of the day trick on such holidays shall be paid overtime for not less than three hours at the same rate per hour as their wage scale. Operators who are called to work for any part of the night trick on such holidays shall be paid overtime for not less than three hours at the same rate per hour as their wage scale.

7. IT IS AGREED that operators called to work on their seventh day or seventh night, whether this falls on Saturday or on Sunday, shall be paid overtime at the rate of double time for the actual time worked, with a minimum working time of two hours.

8. IT IS AGREED that all other overtime shall be ordinary overtime and shall be paid for on the basis of the operators hourly wage rate. For such overtime the rate shall be time and one-half before or after regular hours, each day's overtime being reckoned separately. Ten minutes or less shall be disregarded, but more than ten minutes shall be considered one half-hour.

9. IT IS AGREED that operators shall be responsible only to Traffic Managers or Assistant Traffic Managers, subject to appeal to the General Manager of the Company.

10. IT IS AGREED that vacancies in the telegraphic service of the Company shall be filled by promotion and, other things being equal, length of continuous service with the Company

shall be the deciding factor in making appointments to sending and receiving telegraphic position. Appointments of Traffic Managers and Assistant Managers shall be made by the Company and length of service with the Company shall not necessarily govern such appointments.

11. IT IS AGREED that a complete list of operators in the regular service of the Company, showing the period of each operator's latest continuous service with the Company, shall be mailed to each operator by the Company on December 31 and June 30. Errors, if any, in such lists shall be corrected on proper representation.

12. IT IS AGREED that an operator who wishes to resign from the Company's employ shall give at least ten days' notice to the Traffic Manager of the Assistant Traffic Manager of his Division, in default of which the Union shall cancel his Union card. The Company agrees to give ten days' wages or ten days' notice to any operator whose position is abolished through the suspension of the service at any point, or transfer him to another position if there is a vacancy, as hereinafter provided.

13. Two weeks' holidays with full pay, shall be granted each telegrapher who has been in the service at least one year. Telegraphers shall not be expected to take holidays before May 1 nor later than November 1. It is understood that such holidays are given to operators in order that they shall rest, and operators therefore are not permitted during their holidays to work as telegraphers for any other parties. If a telegrapher entitled to a vacation with pay is discharged, or resigns on proper notice, he shall be paid at his regular rate for the vacation. Vacation claims shall be in accordance with standing on seniority lists.

14. IT IS AGREED that suitable typewriters shall be provided by the Company or its members and maintained free of cost for operators' use. Where office facilities permit, operators in newspaper offices shall be provided with a separate room at least ten feet square, which shall have outside window, electric light and proper heating. Operators are not required to make up books, distribute copy or attend to battery jars.

15. IT IS AGREED that applications for positions in the telegraph service of the Company shall be made direct to the Traffic Manager or the Assistant Traffic Manager of the Division to which the applicant seeks appointment.

16. IT IS AGREED that in case of a reduction of staff the junior operator in length of continuous service with the Company in the Division where the reduction is to be made shall be first dispensed with. If for any reason a position at any point is abolished, and the operator working at such point is not the junior operator in the Division, the operator so displaced shall have the right to take the position held by the junior operator in the

Division. An operator who has transferred under such conditions shall have first claim on the position he has left should it be re-established; or if he refuses to take the position held by the junior operator and resigns from the service, he shall hold his seniority rights for twelve months. The junior operator so displaced also shall retain his seniority for twelve months.

17. IT IS AGREED that in case of sickness an operator working under this Agreement, on presentation to the Traffic Manager or the Assistant Traffic Manager of a doctor's certificate that he is unable to perform his duties, shall be granted leave of absence without pay but retaining full seniority rights for a period of not more than three months. Extension of this period with seniority rights may be granted at the discretion of the Traffic Manager or the Assistant Traffic Manager of the Division, subject to the approval of the General Chairman of the Union.

18. IT IS AGREED that vacancies in and appointments to the telegraph service shall be announced over the Company's wire by the Traffic Manager or the Assistant Traffic Manager of the Division in which they occur, and operators shall have a clear period of 60 hours from the time a vacancy is announced in which to file their applications for the position, should they wish to make such application. Traffic Managers and Assistant Traffic Managers in their discretion may delay announcing any appointment for a period of not more than ten days if it is considered desirable by them that the applicant should be given a trial in the new position.

19. IT IS AGREED that appointments shall be open only to operators in the Division in which the vacancy occurs, except as hereinafter provided. For this purpose there shall be two Divisions. The Western Division shall include the two operators in the Ottawa Bureau who are engaged in sending on the Winnipeg wire, and all operators in the employ of the Company and working west of Ottawa. The Eastern Division shall include all other operators in the employ of the Company. An operator who wishes to transfer from one Division to the other shall file with the Traffic Managers of the two Divisions a statement of his desire to so transfer, and reasons for his desire, after which he shall be eligible to make application for appointment as vacancies occur in the division to which he seeks admission, when his seniority standing in the Division to which he is transferring shall be governed by the certificate of the General Chairman.

20. IT IS AGREED that operators transferred at their own initiative shall pay their own travelling and incidental expenses. When transferred to suit the convenience of the Company their expenses will be paid by the Company.

21. No telegrapher covered by this Agreement shall be transferred, suspended or dis-

charged without just cause. If a telegrapher is transferred against his will, suspended or discharged for reasons which he may consider unjust, he may refer the matter for adjustment to the District Traffic Manager or such other official as the General Manager may direct, who shall hear his appeal immediately, either personally or in writing. If his case is presented in person, he may be accompanied by a fellow employee. If, upon investigation, the telegrapher is cleared of the charges made against him he shall be reinstated in his former position without prejudice of any kind, receive full pay for all time lost, and be reimbursed for any expense he may have been forced to incur in connection with the investigation of such charges. Failing in what the telegrapher considers a satisfactory adjustment, he may refer the case, either personally or through the general committee, to the General Manager. Failing in a satisfactory settlement between the General Manager and the general committee, the case shall be submitted to a Board of Arbitration as provided in this agreement.

22. IT IS AGREED that disputes or differences in regard to interpretation of clauses of this Agreement and all matters having to do with the relations between the parties which are not covered herein, shall be submitted to a Board of Arbitration whose decision shall be final and binding on both parties. Such Board shall consist of one representative of the Company, one representative of the Union, and a third member who shall be Chairman of the Board, and who shall be selected by the nominees of the parties to this Agreement; or, if they should be unable to agree upon a choice, by the Department of Labour of Canada. But such proceedings shall not be initiated until there has been a failure to affect a settlement of the matter or matters in question by negotiation; and such failure shall not be admitted unless, and until, the General Manager for the Company, and the General Chairman for the Union, by correspondence or by personal conference or both, shall have found it impossible to bring about an understanding satisfactory to both parties.

23. Telegraphers at sending points shall be required to transmit the news in readable Morse characters and at a rate of speed that will permit of accuracy on the part of receiving telegraphers, and be compatible with human endurance. Complaints of a sender's incompetency by receiving telegraphers or any circuit shall be made to the District Traffic Manager for investigation. If, after such investigation, the proof of the sender's incompetency is established, the sender shall be transferred to another position, as provided in the "Reduction of Staff" clause of this agreement. Telegraphers at sending points shall be obliged to spell out the date line and first five words of each new item and transmit all punctuations. Sending telegraphers shall be furnished properly edited copy to facilitate service.

24. IT IS AGREED FURTHER that each receiving operator shall copy in proper form the full report as transmitted over the wire on which he is working, unless he has authority in writing signed by the Traffic Manager of his Division to release him from the necessity of copying certain named market reports or other routine news.

25 Throughout this Agreement the words Operator and Telegrapher shall be synonymous; and the word Union shall mean Canadian Press Division No. 52, Commercial Telegraphers' Union of America; and the word Company shall mean Canadian Press Limited.

26. This agreement shall continue in full force and effect from the date of the signing to the first day of November, A.D. 1921, and thereafter unless notice is given of its termination by either party to the other party by registered mail at least sixty days in advance of the date of termination in any year. Such official notice shall be given by the General Manager of the Company to the General Chairman of the Union or by the General Chairman of the Union to the General Manager of the Company. Either party desiring to alter or amend the terms of this Agreement shall give sixty days' notice in writing setting forth the proposed alteration or amendment, but no such notice shall be given before August 31, 1921.

IN WITNESS WHEREOF we have hereunto affixed our hand and seal this First.

Honourable G. D. Robertson,  
Minister of Labour,  
Ottawa, Ont.

Sir,

Re the Canadian Press Limited and  
the Press Telegraph Operators  
in its employ.

His Honour, Judge Gunn, chairman  
of a Board of Conciliation appointed  
by you to consider the above dispute,

has to-day shown me, the representative  
of the Company on the said Board, the  
report which he is making to you, after  
an inquiry held by us in Toronto last  
week.

In drawing up a new working agree-  
ment, the Company has made a number  
of very important concessions to its  
employees in order that the utmost har-  
mony between employer and employee  
might continue to exist. On my recom-  
mendation, and after hearing the argu-  
ments presented by my colleagues on the  
Board, the Company is willing to accept  
the draft agreement presented by His  
Honour, Judge Gunn.

Having regard to the fact that the Com-  
pany is at present paying its employees  
rates equal to, or exceeding, those paid  
by other employers for similar work, the  
Company did not and does not feel that  
it should be called upon to pay any  
higher wages than those stipulated in  
the agreement of one year ago. How-  
ever, with a view to conciliation and  
continued harmony, I am willing to en-  
dorse the recommendation of His Hon-  
our, Judge Gunn, namely of "a flat in-  
crease of \$5.00 per week to each of the  
employees over and above his weekly rate  
fixed in the last schedule," the said in-  
crease to date from September 1, 1920,  
to September, 1921.

If the Company agrees to pay this  
increase, I am convinced it will be deal-  
ing very generously with the telegraph  
employees—an increase which will cost  
the Company approximately \$25,000  
during the year. The burden is going  
to be rather a heavy one to a number of  
the smaller daily newspapers who find  
the existing charges hard to carry. Any  
greater increase, I fear, would result in  
several communities being deprived of  
the very important news service which  
can be obtained only through Canadian  
Press, Limited.

I have the honour to be,

Sir,

Your obedient servant,

(Sgd.) E. NORMAN SMITH.

Ottawa, Canada, September 14, 1920.

[Mr. Smith's letter to the Minister, as above, is understood to signify the writer's acceptance of the report submitted over the signature of the Chairman. Mr. Smith had, however, left Ottawa for a few days, and it was impossible to have the report submitted to him for formal signature without causing delay in issuing certified copies to the parties respectively concerned.—F. A. Acland, Registrar.]

### Minority Report

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Canadian Press Limited, employers, and the Press Telegraph Operators in its employ, members of Canadian Press System Division No. 52, Commercial Telegraphers' Union of America, employees.

To The Hon. Mr. G. D. Robertson,  
Minister of Labour,  
Ottawa, Ontario.

On the 26th day of August, 1920, you were pleased to appoint a Board of Conciliation and Investigation upon the application of the above named employers, with the consent of the employees, to investigate and report upon a dispute which existed between the parties involving questions of rates of pay and working conditions.

The Board heard the parties at Toronto on September 10th and 11th, 1920, Messrs. Frank A. Coyle, General Chairman, Thomas B. Murray, William G. Tobin and Frank Gillis, representing the employees; and Mr. Fred Livesay, General Manager, and Mr. McLaughlin, Superintendent, representing the employers.

The employers are an incorporated co-operative association for the purpose of gathering and transmitting news to the newspapers of Canada, and have offices in New York and in all the im-

portant cities from coast to coast in Canada. The employees are the telegraph operators of the employers who receive and transmit by telegraph the various news items each day and night from and to their several offices. They are a very highly skilled class of telegraph operators, probably the most expert telegraphers in the Morse system of telegraphy.

A schedule of wages and working conditions was first agreed upon and adopted by the parties in 1915. This was amended by agreement and with the aid of a Board of Conciliation and Investigation in November, 1919. In addition to this some increases in wages have been made by the employers from time to time.

On July 18th, 1920, the employees through their General Chairman submitted a new schedule of wages and working conditions to the employers for adoption, accompanied by a letter in which it was pointed out that the specified rates of pay contained in the schedule were demanded by the employees generally, and could not be the subject of any compromise. The employers thereupon concluded that negotiation between the parties would be useless, and being unwilling to concede the rates of pay and certain conditions of employment, applied to your Department for the appointment of this Board. The employees consented to submitting the dispute to a Board and this present Board was established.

The Board was able to effect an agreement between the parties upon the working conditions, with the exception of a few points. The Board having unanimously decided upon these points, these working conditions were drawn up and are included in a Memorandum of Agreement hereunto annexed and marked "Schedule A" to this report. It will be noted, however, that the wages are to be specified in Clause 3 of the Agreement, and the Board being unable to come to a unanimous decision upon this question, this clause has been left blank as to wages specification and will no doubt

be added by each member or a majority or minority of the Board according to their respective decisions.

The present rates of pay range from \$33 per week for day work in the Maritime Provinces to \$45 per week in Ontario and Western Canada with a rate of one dollar per week higher for night work. The hours of service, including lunch and brief rest periods, are eight per day or night. The employees' demands would increase these rates to \$55.00 and \$57.50 per week for days and nights respectively without any distinction as to locality, or an increase ranging from 22 per cent to 51 per cent.

The employers, although admitting that the same service is required of their employees in the Maritime Provinces as elsewhere, and that their services were just as valuable, contended that to increase wages as demanded and to abolish the differences in the rates as between the East and West would result in forcing subscribing newspapers in cities like Moncton, New Brunswick, to withdraw from participation in the news service.

It seems to me, if this contention be well founded in fact, such publications could and do participate only at the expense or sacrifice of these employees, and this cannot be equitable. There was no denial, that, generally, it was as expensive to live in the East as in the West, and the service required of the employees being the same in every particular the differential in rates of pay as between East and West should be abolished.

It was also represented by the employers that in recent wage settlements made with employees of the United Press, the Universal News and the International News Service in the United States, rates very little, if any, in advance of the existing rates paid here had been adopted, and that these wages ought not to be higher here. Also that recent agreements made with the Canadian Pacific Railway Telegraph Company's employees, which had been the subject of decision by a Board of Con-

ciliation and Investigation, did not provide as large increases.

On the other hand the employees contended that the Associated Press in the United States was paying wages almost if not quite as high as their demands and that these other employing companies with which the employers sought to compare rates did not handle anything like the volume or class of business handled by the Canadian Press Limited, and that the cost of living in Canada was much higher generally than in the United States, and that the severity and length of our winters imposed greater financial burdens in fuel and clothing.

The employees also submitted figures showing that the employers here had, within recent months, conceded increases in wages of certain other of their employees much higher proportionately than their demands. They also contended that the cost of living since 1915, the date of their first wage agreement (although the employers then only operated in Western Canada) had increased far beyond the increase in their wages, so that they were now much worse off than at that time.

The employers' reply to the increased cost of living shown, was that the full burden of this should not be borne by the employers, who in turn would have to shift the burden of it upon their patrons and it would again constitute a factor in further increasing the cost of living for the employees—the "revolving of the vicious circle."

The *Labour Gazette* for July, 1920, produced by the employees, shows that the average cost per week of a family budget of staple foods, fuel and lighting and rent in terms of the average prices in sixty cities in Canada for the month of June 1915, was \$13.69 and for June, 1920, was \$26.81. This is an increase of 95.8 per cent and does not include items of clothing, boots and shoes, and many other necessary goods, the cost of which it is common knowledge and experience, has increased at least proportionately.

Taking the rates fixed by agreement between the parties in 1915, namely Day Bureau \$28 per week, Night Bureau men \$32.00 per week, and Day and Night Line men \$35.00 per week, and increasing them by 95.8 per cent and the figures are \$54.82, \$62.67 and \$68.53 respectively. Or basing it upon the average of these four rates, that is \$32.50, the average increase would be \$32.09 per week. Calculating it on either basis the rates would exceed those now demanded.

The idea of compromising upon a proposition or demand seems to have found favour with many Boards of Arbitration and Conciliation, as well as in negotiations between employers and employees generally. It was, however, originally adopted and practised at times when there were many important factors other than the increased cost of living to consider. So long as wage earners demand only enough or even less than enough to meet the well established increased cost of living, I am unable to see any equitable basis for a compromise. And it is also clear that to constantly depreciate the real wages, that is, purchasing power of wages, is to constantly reduce the standard of living, and promote their impoverishment.

I have been negotiating and dealing in a practical way with wage agreements for upwards of twenty years, and never once in all that time have I known the demand for increased wages to precede or equal the increased cost of living, so that the increased cost of living has been the cause or a cause of increased wages, and not the effect of it.

Permit me to point out at this time that to compromise demands that are just is but to lay up future trouble. Those with whom the workers deal in their purchase of the necessities of life, neither negotiate nor compromise upon the prices demanded. Nor does anyone

negotiate with the worker upon the increase in the price he sets upon his merchandise or the increased house rent demanded. These are *dictated* to the worker. To constantly dictate prices and conditions to him, and at the same time dicker and compromise on his fair demands, is, I fear, promoting revolution, perhaps not as rapidly, but more surely than has ever been done by any propagandist.

It is worth observing that in the case of these employees a Board of Conciliation functioned in settling their wage a year ago, and I in nowise criticise their good work, nor do I know the reasons for their decision or advice. And whatever compromise was finally agreed the representatives of the men were a party to it. But what is the result? It was shown that this demand was general by the whole body of men, and at the same time they instructed their Committee that they must not accept any compromise—a body of men, who despite their general conservatism and their goodwill toward their employers, are now determined to *dictate* if necessary.

With regard to fixing wages by comparison, this cannot be done unless we are sure the governing rates are fair and equitable and are established under similar conditions. There was no evidence submitted to the Board to support any of the comparisons made or to show the conditions under which the comparative rates were fixed.

In view of the foregoing reasons and considerations, I am impelled to the view that the wage scale proposed by the employees should be adopted as it stands and that clause 3 in the Agreement incorporate it accordingly.

All of which is respectfully submitted.

(Sgd.) D. CAMPBELL,

Representing the Employees.

[NOTE.—Schedule A, referred to above is given on pages 1283-1286.]

## FURTHER REGULATIONS AFFECTING WESTERN COAL MINERS

**N**INE new orders have been received from the Director of Coal Operations for Alberta and Eastern British Columbia.\* Orders No. 145, 146, 147 and 148 provide for advances in the selling price of bituminous coal, lignite, anthracite coal and coke respectively. Order No. 149 confirms the agreement between the United Mine Workers of America, District 18, and the Western Canada Coal Operators' Association as given in the *LABOUR GAZETTE* for August, 1920, on pages 1048 to 1053. Order No. 150 has reference to rates of wages and working conditions in connection with punching machines at the Jewel Collieries. Order No. 151 confirms an agreement reached with regard to the yardage clause in a contract of the International Coal and Coke Company. Order No. 152 relates to certain rates at the mines of the Blue Diamond Coal Company at Brule, Alberta. Order No. 153 confirms an agreement between the Hillcrest Collieries, Hillcrest, Alberta, and the United Mine Workers of America. Order No. 154 confirms an agreement between the Blue Diamond Coal Company and the United Mine Workers of America.

**ORDER No. 145.**—Consequent upon the increase in wages granted to coal miners in Alberta and South Eastern British Columbia, companies mining bituminous coal in areas east and west of the Crow's Nest Pass, West of Edmonton, Brazeau and Canmore are authorized to increase the price of their product 45 cents per ton. This has reference only to parties to the agreement between the Western Canada Coal Operators' Association and the United Mine Workers of America which was effected on June 10, 1920.

**ORDER No. 146.**—The price of lignite coal is authorized to be increased 45 cents per ton in the Drumheller area,

and 50 cents per ton in the Lethbridge area. This applies only to mines in these districts where the agreement between the Western Coal Operators' Association and the United Mine Workers of America was in force.

**ORDER No. 147.**—The selling price of anthracite coal in the mines of Alberta and South Eastern British Columbia is authorized to be increased 87½ cents per ton by companies which are parties to the agreement mentioned above.

**ORDER No. 148.**—The selling price of coke in Alberta and South Eastern British Columbia is authorized to be increased 70 cents per ton.

**ORDER No. 150.**—The following rates and conditions regarding punching machines are made to apply to the Jewel Collieries, Limited, Wayne, Alberta.

**Loaders:** The rates are the same as those provided for radial machines, except that in haulage entries where the cutting is 16 inches below the coal over the clay band, \$2.30 yardage to be paid, where cuttings are loaded out. In counter entries and entry cross-cuts where the cutting does not exceed 14 inches from the bottom of the coal to the floor, \$1.92 yardage is to be paid, where the cuttings are loaded out. Where V sets are used in entries and two sets put up, the price of three entry sets shall be paid. Where sets of timber are ordered to be put up on the gob side in rooms, the same is to be paid for at the usual rate.

**Machine Men:** In entries and entry cross-cuts, men are to be paid 52½ cents per ton 9 feet or under. In rooms they are to be paid 42½ cents per ton, 20 feet wide. The foregoing rates for machine men are to be divided upon the basis of 4/7 for the cutter and 3/7 for the scraper. Cutting in haulage entries is to be 16 inches below the coal. All cuttings are to be cleaned by scraper and in entries they are to be shovelled back

\*For details of previous orders see *LABOUR GAZETTE*, February, 1920, p. 177, and various preceding issues.

not less than four feet from the face. In rooms, cuttings are to be shovelled into the gob by the scraper. Air pressure is to be not less than eighty pounds at the receiver in the mine. Machine picks are to be delivered to the working face when demanded. Machine wrenches are to be furnished by the company free of charge, but in case the machine man loses his wrench or is not able to return it, same shall be chargeable to him at cost.

ORDER No. 151.—This order confirms a clause which had been mutually agreed upon by the International Coal and Coke Company, Limited, of Coleman, Alberta, and its employees. The new clause is added to the end of the yardage clause referring to No. 2 Seam, and is as follows: "In places such as No. 2 Seam "B" Level inside where pillars other than barriers are widened by skipping alternate rooms making pillars about 110 feet wide, cross cuts over 25 feet and up to 50 feet yardage, 72 cents extra per lineal yard. Over 50 feet and up to 60 feet yardage, \$2.00 per lineal yard."

ORDER No. 152.—A dispute arose at

the mines of the Blue Diamond Coal Company, Limited, Brule, Alberta, regarding the tonnage rate for angles and breasts up the pitch and the yardage rate for raises. It was directed that the rate for angles and breasts should be 95 cents per ton, and that the yardage rate for raises should be \$2.46 per lineal yard in addition to the tonnage rate of 89 cents agreed upon between the company and its employees.

ORDER No. 153.—This order confirms an agreement between the Hillcrest Collieries, Limited, Hillcrest, Alberta, and the United Mine Workers of America, dated July 27, 1920. The agreement is similar to the one made between the United Mine Workers and the members of the Coal Operators' Association which was given in full in the LABOUR GAZETTE for August, 1920, and is to be in force up to March 31, 1922.

ORDER No. 154.—This order confirms an agreement between the Blue Diamond Coal Company, Limited, Brule Mines, Alberta, and the United Mine Workers of America, dated August 19, 1920, which is to be in force until March 31, 1922.

## STRIKES AND LOCKOUTS IN CANADA DURING SEPTEMBER, 1920

**E**LEVEN strikes, involving 1,815 employees were reported as having commenced during September. There were in existence at some time or other during the month 28 strikes, involving about 2,449 worpeople. The total time loss on account of industrial disputes was estimated at 25,890 working days, as compared with 79,482 in August, and 197,286 in September, 1919. The time loss occasioned by the 11 strikes which began in September was 13,399 working days, while a loss of 12,491 is charged to the 17 strikes that commenced prior to Sep-

tember. Termination was reported in the case of 5 disputes which commenced prior to September. Eight of the disputes which commenced during September terminated during the month, leaving the following 15 strikes affecting 521 workpeople on record on September 30: carpenters, Saskatoon; engineers, Hamilton; machinists, St. John and Toronto; moulders, Collingwood, Guelph, Hamilton, Montreal, New Glasgow, Preston and Toronto; rolling mill employees, Montreal; textile workers, Stratford; grain elevator employees, Montreal, and jewellery workers at Vancouver.

## STRIKES AND LOCKOUTS DURING SEPTEMBER, 1920

Industry or occupation.	Particulars.	No. of employees affected	Time loss in working days
<b>Strikes commencing prior to September, 1920</b>			
<b>MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, Etc.—</b>			
Coal miners, Commerce, Alta. ....	Commenced August 19. Refusal to agree to sign U. M. W. of A. check-off, although previously signing same to obtain retroactive pay. Settled by negotiations; work resumed September 7 under same conditions as existed prior to strike.	90	450
<b>BUILDING AND CONSTRUCTION—</b>			
Carpenters, Sherbrooke, Que. ....	Commenced June 15. For increased wages. Information received in the Department indicates conditions no longer affected as strikers have all secured work elsewhere.		
Building labourers, Hamilton, Ont. ....	Commenced August 13. For increased wages. Settled by negotiations; work was resumed the latter part of August pending a final decision by the Industrial Council.		
<b>METALS, MACHINERY AND CONVEYANCES—</b>			
Engineers, Hamilton, Ont. ....	Commenced May 1. For increased wages and better conditions. Unterminated.	24	576
Machinists, Hamilton, Ont. ....	Commenced August 25. A sympathetic strike to assist the employees on strike in other branches of the firm. Men resumed work September 13.	12	120
Machinists, St. John, N.B. ....	Commenced January 26. For increased wages and shorter hours. Unterminated.	10	240
Machinists, Toronto, Ont. ....	Commenced July 26. Against discharge of employee. Unterminated.	24	576
Moulders, Amherst, N.S. ....	Commenced June 22. For increased wages. Settled by negotiations; partial increase granted; work resumed September 21.	51	867
Moulders, Collingwood, Ont. ....	Commenced June 1. For increased wages. Unterminated. ....	10	240
Moulders, Guelph, Ont. ....	Commenced August 5. For increased wages. Unterminated. ....	4	96

STRIKES AND LOCKOUTS DURING SEPTEMBER, 1920—*Continued*

Industry or occupation.	Particulars.	No. of employees affected	Time loss in working days
<b>TRANSPORTATION—</b>			
Grain elevator employees, Montreal, Que.....	Commenced August 2. For increased wages. Unterminated.....	50	1,200
<b>MISCELLANEOUS—</b>			
Grave diggers, Hamilton, Ont.....	Commenced August 30. For increased wages. Settled by negotiations; most of the old employees returned at rates existing prior to strike. Work resumed September 10.	20	160
Musicians, Edmonton, Alta.....	Commenced August 31. For increased wages. Settled by negotiations; partial increase granted. Work resumed September 23.	34	646
<b>Strikes commencing during September, 1920</b>			
<b>LUMBERING—</b>			
Loggers, Ocean Falls, B.C.....	Commenced September 8. Against discharge of employee. Settled by negotiations; men decided to abide by decision of Company. Work resumed September 28.	70	1,120
<b>MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.—</b>			
Coal miners, Drumheller, Alta.....	Commenced September 20. Objected to a new screen. Settled by negotiations; men resumed work under conditions existing previous to strike. Work resumed September 22.	120	240
Coal miners, Wayne, Alta.....	Commenced September 2. Against discharge of employee and refusal to sign U. M. W. of A. check-off. Settled by negotiations; men returned to work under same conditions as existed previous to strike. Work resumed September 14.	190	1,900
<b>BUILDING AND CONSTRUCTION—</b>			
Carpenters, Saskatoon, Sask.....	Commenced September 23. For increased wages. Unterminated.....		
<b>METALS, MACHINERY AND CONVEYANCES—</b>			
Saw workers, Galt, Ont.....	Commenced September 9. Against reduction in wages. Settled by negotiations; men returned on employers' terms. Work resumed September 20.	75	675
Steel and iron workers, Toronto, Ont.....	Commenced September 3. For increased wages and recognition of Union. Settled by negotiations; work resumed September 22.	60	960
<b>TEXTILES—</b>			
Textile workers, Stratford, Ont.....	Commenced September 1. For increased wages and recognition of Union. Unterminated.	34	816
<b>TRANSPORTATION—</b>			
Seamen, Great Lakes.....	Commenced September 15. For increased wages. Some strikers returned to work others places filled. Work resumed September 19	1,000	3,500
<b>PUBLIC UTILITIES—</b>			
Hydro-electric employees, Queenston-Chippewa, Ont.	Commenced September 20. Refusal of company to pay wages awarded by the Board of Conciliation. Settled by negotiations; work resumed September 25.	60	300
Gas workers, Vancouver and Victoria, B.C....	Commenced September 8. For increased wages. Settled by replacement of strikers and work resumed September 29.	146	2,628
<b>MISCELLANEOUS—</b>			
Jewelry workers, Vancouver, B.C.....	Commenced September 7. For increased wages. Unterminated.....	60	1,260

### Disputes by Industries

The following is a review of the disputes by industries in the order in which they appear in the statistical table. A brief summary is given of the more important strikes.

**LUMBERING.**—Seventy loggers at Ocean Falls, B.C., were on strike as a protest against the discharge of an employee, but after being out for three weeks they resumed work on the employers' terms.

**MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.**—The principal dispute in this group occurred in the District 18 Coal field. In two strikes, that of 90 miners at Commerce and 190 miners at Wayne, the underlying cause of the strikes was the signing of the U.M.W. of A. check-off. In the former case work was resumed on September 7, and in the latter on September 14. There was also a two-day strike of 120 mines at Drumheller over the use of a new screen.

**BUILDING AND CONSTRUCTION.**—The carpenters in Saskatoon declared a strike on September 23, following the failure of civic and provincial mediation. The carpenters were seeking an arbitration board to adjust their working conditions.

**METALS, MACHINERY AND CONVEYANCES.**—Fifteen strikes, involving 575 employees and estimated time loss of 11,670 working days, was the summary for this group. The chief strike in this class from the point of view of time loss and numbers involved was that of 250 rolling mill employees, which commenced on July 15 at Montreal. It was untermminated at the end of the month. Other untermminated strikes in this group were of

moulders at Toronto, Preston, New Glasgow, Montreal, Guelph, Hamilton, Collingwood and Amherst; and machinists at Toronto, St. John and Hamilton. Seventy-five employees in a saw manufacturing establishment at Galt struck because of a slight reduction in their working day, with corresponding reduction in wages. Work was resumed on September 20, after a strike lasting ten days. Striking to secure union recognition and a wage increase to \$1 per hour, 60 structural steel workers, in Toronto, were off work for about three weeks.

**TRANSPORTATION.**—One thousand seamen at the Great Lakes' ports were on strike demanding a 20 per cent increase in salary. Work was resumed on September 19, after four days of strike conditions, the employees returning to duty on the companies' offer of a \$10 per month increase.

**PUBLIC UTILITIES.**—Because the Hydro-Electric Power Commission were alleged to have refused to pay the 77 cents per hour as awarded by a Conciliation Board, 60 linemen on the Queenston-Chippewa canal construction were on strike for four days. Work was resumed on September 25, the Commission conceding an advance of 5 cents per hour. Gas employees of the Vancouver and Victoria Gas Companies to the number of 146 struck because of refusal of their demands, which included the establishing of a minimum rate, overtime pay for shift men, and a quarterly adjustment of wages based on any increase in the cost of living. The strike was settled on September 29, most of the strikers having been replaced.

### STRIKES AND LOCKOUTS IN THE UNITED KINGDOM DURING AUGUST, 1920

**T**HE following details with regard to strikes and lockouts in the United Kingdom during August, 1920, based on returns from employers and workpeople, are taken from the September issue of the British *Labour Gazette*.

**NUMBER, MAGNITUDE AND DURATION.**—The number of trade disputes, involving a stoppage of work, reported to the Department as beginning in August was 139, as compared with 147 in the previous month, and 91 in August, 1919.

In these new disputes over 38,000 workpeople were directly, and nearly 4,000 indirectly involved (i.e., thrown out of work at the establishments where the disputes occurred, though not themselves parties to the disputes). In addition, nearly 44,000 workpeople were involved, either directly or indirectly, in 123 disputes which began before August, and were still in progress at the beginning of that month. The total number of disputes in progress in August was thus 262, involving about 86,000 workpeople, as compared with over 90,000 workpeople involved in disputes in progress in July, 1920, and about 272,000 in August, 1919, when a dispute was in progress in the Yorkshire coal mining industry, involving 150,000 workpeople.

**CAUSES.**—Of the 139 new disputes, 81 directly involving nearly 22,000 workpeople, arose on demands for advances in wages; 19, directly involving about 6,000 workpeople, on other wages questions; 20, directly involving over 6,000 workpeople, on questions respecting the employment of particular classes or persons; 6, directly involving over 2,000 workpeople, on details of working arrangements; and 13, directly involving over 2,000 workpeople, on other questions.

**RESULTS.**—During the month settlements were effected in the case of 75 new disputes, directly involving over 24,000 workpeople, and 46 old disputes, directly involving nearly 7,000 workpeople. Of these new and old disputes, 19, directly involving nearly 3,000 workpeople, were settled in favour of the workpeople; 38, directly involving over 11,000 workpeople, were settled in favour

of the employers; and 64, directly involving nearly 17,000 workpeople, were compromised. In the case of 22 other disputes, directly involving over 6,000 workpeople, work was resumed pending negotiations.

The following table classifies the disputes by groups of trades, and indicates the number of workpeople involved (whether directly or indirectly) at the establishments concerned, and the approximate time lost by these workpeople during August:—

Groups of Trades	Number of Disputes			Number of workpeople involved in all disputes in August.	Aggregate loss of working days during August.
	Started before 1st August.	Started in August.	Total.		
Building.....	24	19	43	3,900	39,000
Mining and Quarrying.....	7	20	27	16,000	124,000
Metal, Engineering and Shipbuilding..	25	24	49	12,000	109,000
Textile and Clothing.....	17	13	30	24,000	244,000
Woodworking and Furnishing.....	15	7	22	3,000	36,000
Other Trades.....	25	38	63	22,000	176,000
Employees of Public Authorities.....	10	18	28	6,000	40,000
Total, August, 1920..	123	139	262	86,000	768,000
Total, July, 1920....	118	147	265	90,000	938,000
Total, August, 1919..	101	91	192	272,000	3,292,000

Of the 768,000 working days lost in August by all disputes in progress, about 546,000 were lost by disputes which began before August, and were still in progress at the beginning of that month, and about 222,000 by disputes which began in the month.

## LEGISLATION RELATING TO THE REGULATION AND INSPECTION OF FACTORIES IN CANADA

### A Comparison of the Various Provincial Laws on the Subject

#### Introduction

**T**HIS article, which is the third of a series comprising a comparison of the provincial labour laws of Canada, deals with the subject of factory legislation, examining the Acts in force in the several provinces and noting the points of similarity and difference; noting also how far they approach the standards which were recommended by the Dominion-Provincial Commission on Uniformity of Labour Laws last spring (LABOUR GAZETTE, May, 1920, p. 544). This Commission, it will be remembered, reported as follows:

1. In view of the limitation, in certain Provinces, of the operations of the Factories Act to the Industrial establishments where not less than a certain number of persons are employed we would recommend:

All industrial establishments in which one or more persons are employed where articles are manufactured, altered, cleaned, repaired, ornamented, finished, adapted for sale, broken up or demolished, or in which materials are transformed, shall be subject to inspection.

2. Employment of boys and girls: No boy under fourteen years, or no girl under fifteen years shall be employed in an industrial establishment.

3. Hours of employment for boys, girls and women: In keeping with the draft convention of the Washington Conference limiting the hours of labour, we recommend that women, girls and boys shall not be employed for more than 48 hours in any one week, nor before six o'clock in the morning nor later than ten o'clock in the evening, nor more than ten hours in any one day, *including overtime*. Boy shall mean a male person between the ages of fourteen and sixteen years.

4. That all laws at present existing in any Province dealing with the improvement of sanitation or the protection of life should be made general to such other industries as may be possible throughout the Dominion.

Protection of employees in factories and workshops is one of the oldest forms of labour legislation. Even before the first Factory Act was passed in England in 1802, isolated attempts had been made to deal by regulation with such questions as hours of labour, wages and conditions of apprenticeship.

Each new invention beginning with the introduction of steam power, brought its own menace to the health and safety of the industrial worker, requiring to be met by new safeguards. From the small beginning of a few simple rules as to cleanliness, ventilation and a measure of protection for pauper apprentices, the laws have become constantly more detailed and more scientifically directed, until, to quote an eminent economist, "the range of factory legislation has, in fact, in one country and another, become co-extensive with the conditions of industrial employment, no class of manual-working wage-earners, no item in the wage-contract, no age, no sex, no trade or occupation is now beyond its scope."

All the Canadian Provinces except Prince Edward Island have laws providing for the inspection and regulation of factories, but the definition of a factory varies considerably. The laws of Ontario and the four western provinces include any building, workshop or premises where mechanical power is used, or where manual labour is exercised under control of an employer, in manufacturing, repairing, etc., any article for trade or sale; also all premises described in Schedule A of the Acts together with any others which may from time to time be declared by proclamation of the Lieutenant-Governor in Council to be factories within the meaning of the Act. The Quebec law covers all manufactories,

works, workshops, work-yards and mills of every kind, but not domestic workshops where only members of a family are employed, unless dangerous or unwholesome work is done therein or steam boilers or other motors are used. New Brunswick excludes all buildings in course of erection and temporary workshops or sheds for workmen engaged thereon, as well as all lobster, fish and fruit canning establishments. The Nova Scotia law applies only to premises where mechanical power is used. British Columbia brings all laundries within the scope of the Act, and Ontario and Alberta all except those in which a woman does custom work in her own dwelling. Manitoba includes all Chinese laundries. In Alberta and Ontario, shops, bake shops, offices and office buildings are governed by the factory law, but in the former province its application to these premises is limited to towns having a population of over 5,000; a shop in Alberta includes a restaurant, but exception is made in the case of chemists' shops. In Ontario an office building includes municipal, school and corporation buildings. Very small establishments are unaffected by the laws of many of the provinces. In British Columbia, Saskatchewan and Manitoba those employing less than three persons do not come within the scope of the Act, although in British Columbia this does not apply to laundries. The two first-named provinces also exempt private dwellings where children, girls or women are employed at home, and no steam or mechanical power is used. Ontario exempts factories employing not more than five persons, provided no power other than hand power is used, while New Brunswick excludes the same class of factories employing less than ten persons.

#### Administration

The appointment of factory inspectors is in all cases in the hands of the Lieutenant-Governor in Council. In New Brunswick these officers are recommended by the Workmen's Compens-

ation Board. In all provinces except Quebec, provision is made that at least one female inspector shall be chosen. Quebec allows one or more sanitary physicians to be appointed to supervise the execution of the sanitary regulations. Any of these officers may enter and examine establishments at all reasonable times, demand the production of registers, certificates and any documents required by the Act, and may question witnesses. In all provinces except Quebec he may obtain a written authority from the Lieutenant-Governor in Council or a warrant from a Justice of the Peace or Magistrate to enter without the consent of the occupant any place which is used as a dwelling as well as a factory. In Nova Scotia, New Brunswick, Quebec, Ontario, Saskatchewan, Manitoba and British Columbia he may take a constable with him into a factory where he has reason to expect to be obstructed in the discharge of his duty. In Ontario any constable acting in the locality must assist him in carrying out his inspection and putting down resistance or obstruction. In Alberta every inspector has himself the powers of a constable.

Ontario, Saskatchewan and Alberta direct that the inspector may take with him wherever he thinks necessary a fully qualified medical practitioner, medical officer of health, or sanitary inspector. In case of a fire or accident in an industrial establishment in Quebec Province, the inspector may be present at inquests or inquiries of the Fire Commissioners of Quebec and Montreal, and examine witnesses with a view to ascertaining the cause of such fire or accident. In Ontario any inspector who is called as a witness may refuse by the direction or on behalf of the Attorney-General or a member of the Executive Council, to give evidence as to any premises inspected by him in the course of his duty. Another clause in the law of the same province rules that the factory inspector must assist in the enforcement of the Stationary and Hoisting Engineers' Act, reporting violations thereof to the Board, and must furnish information as

to the conduct and capability of applicants for certificates. The Alberta Act states that the factory inspector may require employers to keep a pay roll.

In all provinces every person must, within one month after he begins to occupy a factory, give notice in writing to the inspector, or, in the case of New Brunswick, to the Workmen's Compensation Board, stating the name and situation of the factory, the address to which he desires his letters to be sent, the nature of the work and the nature and amount of motive power to be used.

The Manitoba law requires the owner to give fifteen days' notice before beginning to operate a factory for the first time, and no operations can be commenced until a permit and a certificate of inspection are received. Ontario and Alberta require that before erecting any building or altering any existing building to be used as a factory, the owner must submit plans to the inspector who must certify his approval before work is proceeded with. The owner, proprietor, or manager of any factory must receive a certificate of inspection and a permit to operate before beginning operations. Ontario passed in 1918 an amendment to these clauses which makes them applicable to all buildings over two stories which are to be used as shops or office buildings.

All provinces require the employer to post in a conspicuous place such notice of the provisions of the Act and regulations thereunder as the inspector may direct, and Nova Scotia, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia, a notice as to the clock, if any, by which hours of work are measured.

#### Employment of Children

Child labour below a specified age limit is prohibited by the Factory Acts of all provinces, except New Brunswick, although in several cases exceptions are made in favour of certain occupations in the busy seasons. The clause in the old New Brunswick law which forbade the employment of persons under four-

teen years of age has been omitted from the 1919 Act, but the School Attendance Act of 1906 provides that no child under the age of thirteen years shall at any time be employed in any mechanical, manufacturing or mercantile establishment. The Workmen's Compensation Board is empowered to issue orders prohibiting the employment of girls under eighteen and boys under fourteen years of age in dangerous and unwholesome occupations. In case of an accident in a factory which causes the death of or injury to a girl under sixteen or a boy under fourteen years of age, the employer is individually liable to the same extent as the Board would be for a girl of sixteen or boy of fourteen years of age, unless he can show that the offence due to which the accident arose was committed without his knowledge or consent.

Ontario fixes a limit of fourteen years for both boys and girls for factories and twelve years for shops, but a child of any age who is employed in a shop during school hours must furnish a certificate in accordance with the provisions of the School Attendance Act, and such certificate must be kept on file by the employer. In Nova Scotia, Saskatchewan and Quebec the fourteen year standard also obtains, the last-named province, however, inserts the proviso that if a child is unable to read and write fluently he or she may not be employed in an industrial establishment until the age of sixteen. In a 1919 amendment to the Industrial Establishments Act this section was expanded to forbid the employment of children under sixteen in any capacity if they are unable to read and write readily. The prohibition extends to employment in hotels and restaurants, or by telegraph companies as messengers, or by printers or agents to distribute handbills, and also to the selling of papers and carrying on of any street trade. The inspector may, however, authorize children attending night school to continue their occupation. In Alberta any person under fifteen years of age is a child in the eyes of the law and may not work

in any factory, shop or office building. Manitoba and British Columbia have adopted the fourteen year standard for boys, but have raised the employable age of girls to fifteen years. Nova Scotia, New Brunswick and Manitoba require the employer to keep a birth certificate or affidavit giving the age of all employees under sixteen years, and Quebec demands such certificate for all boys and girls.

With regard to the exceptions which are made in certain cases to the rule forbidding the employment of children, British Columbia makes such exception in favour of the fish canning and curing and the fruit packing industries during their respective seasons. Nova Scotia allows boys and girls under fourteen years of age to be employed during the months from July to October inclusive in the gathering and preparing of fruits and vegetables for canning and dessicating purposes, but they must work in a room separate from that in which the business of cooking, canning or dessicating is being carried on, and their hours of labour are limited to eight per day and four on Saturdays, with at least one hour for a noon day meal. If the inspector so directs no child may take meals in a room where a manufacturing process is carried on, and the employer may be required to provide a separate room at his own expense for children, girls and women.

In all provinces which allow children to be employed, the law requires the employer to keep a register which shall be open to the inspector at all times. All the provinces insert a clause in the Factory Act providing a penalty for the parent or guardian of any child who allows or connives at the employment of such child in a manner contrary to law.

#### Women and Young Persons

All the factory laws have sections relating to the protection of women, the provisions in most cases applying also to young persons who are no longer children, but who are under the age of eighteen years.

British Columbia has adopted the eight-hour day and forty-eight hour week for women and young girls; Manitoba fixes a nine-hour day and a fifty-four hour week; while New Brunswick, Quebec and Ontario allow a maximum of ten hours a day and sixty hours per week. The two latter provinces include youth as well as young girls and women in the provisions regarding hours, as does also Saskatchewan where a nine-hour day and a fifty-hour week are permitted. Quebec inserts a special clause referring to cotton mills which forbids the employment therein of any boy under eighteen or any girl or woman for more than ten hours per day or fifty-five per week. In every case a different apportionment of hours per day may be made in order to give a shorter day's work on Saturday. Alberta has during the present year passed an amendment providing for the appointment of a committee under the Factories Act which shall have power to fix hours of labour for all employees as well as minimum wages for women in the establishments to which the Act applies. The Nova Scotia law does not fix maximum hours for women, but forbids the employment of any girl or boy under the age of sixteen for more than eight hours per day and four hours on Saturday, and of any girl under eighteen for more than nine hours per day. The Minimum Wage Act passed at the last session of the Legislature, however, empowers the Minimum Wage Board to fix hours of employment for women in factories where not inconsistent with the Factories Act.

In every province the employer must allow women and young persons at least one hour for a mid-day meal, but such hour is not to be counted as a part of the working time.

All the acts permit the factory inspector to make exemptions in regard to hours where he is satisfied that an accident or occurrence beyond the control of the employer, or the customs or exigencies of any trade render overtime work necessary. The amount of overtime is, however, usually limited.

British Columbia permits a maximum of nine hours per day and fifty-four hours per week in cases of emergency, and Manitoba and Quebec twelve hours per day and sixty and seventy-two hours per week respectively. Ontario, Nova Scotia and Saskatchewan provide for twelve and one-half hours per day, the two former provinces fixing seventy-two hours, and the latter seventy-two and one-half hours per week, while New Brunswick allows thirteen and one-half hours per day and eighty-one hours per week. In Quebec the period of exemption is limited to six weeks, and in the other provinces to thirty-six days in one year. In Manitoba no exemption is permitted in the case of any person under the age of seventeen years. In Quebec the employer must allow at least thirty minutes for an evening meal to all employees working overtime; in New Brunswick, one hour and in the other provinces forty-five minutes must be given.

Nova Scotia provides for special exemption during the months from July to October inclusive for women and young persons engaged in preparing, drying or canning fruit and vegetables, but such exemption is for twenty days only. British Columbia makes special provision for overtime work during fruit seasons and fish runs for those engaged in packing fruit or canning or curing fish.

A section of the Ontario law provides that no youth, young girl or woman who has been previously, on any day, employed in any factory or shop for the permitted number of hours, shall, to the knowledge of the employer, be employed on the same day in any other factory or shop, and no person who has been employed for a shorter time shall be employed for a longer period than will complete such number of hours. Alberta has a similar provision applying to all employees.

In Quebec, girls and women may not do any operations connected with belting or other modes of transmission, while in the other provinces they are forbidden to clean such machinery as mill-gearing

while it is in motion. In British Columbia, Saskatchewan and Manitoba, no girl may clean any part of the machinery in a factory while it is in operation, or work between the fixed and traversing part of any machine. The latter provision also appears in the laws of New Brunswick, Nova Scotia and Ontario, and in the case of the first-named province it applies to women also.

The Ontario law forbids any person to contract for the employment of girls or women at any occupation requiring them to lodge or work in a camp until he has obtained a permit from the Deputy Minister of Labour. This permit is conditional upon compliance with regulations governing sanitary conditions, seasons and hours of labour, proper supervision, including physical and moral protection, drainage, pure food and water, proper washing facilities, bedding and flooring.

In Manitoba, Saskatchewan and British Columbia any employer who has served notice of his intention to conduct his factory on the system of not employing children or young persons therein, must give notice to the inspector before changing that system, and such change may not be made oftener than once in three months, except for some special cause allowed in writing by the inspector.

All provinces require the employer to keep a register of women and girls and their employment. In New Brunswick this is only done in case of overtime work. In Alberta all employees must be entered on the register.

The laws of Alberta and Ontario direct that the employer in any shop must provide a suitable chair for every woman employee and must allow her to use it whenever possible. In Quebec chairs must be furnished for all employees whose work permits them to be seated.

New Brunswick, Quebec, Ontario, Saskatchewan and Alberta compel all women working in factories to wear their hair closely plaited or confined in a cap to avoid contact with machinery. British Columbia, Saskat-

chewan and Manitoba, as well as the two eastern provinces, make it illegal to employ any girl or woman so that her health is likely to be permanently injured. In Quebec the Act forbids the employment of boys under sixteen and girls under eighteen in establishments which are classed as dangerous, unwholesome or incommodious. In New Brunswick this matter is left to the Workmen's Compensation Board, and in all the other provinces except Alberta, to the Lieutenant-Governor in Council to make regulations regarding such employment of young persons. In all provinces except New Brunswick the inspector may forbid women and girls to take their meals in any room where a manufacturing process is being carried on. Saskatchewan and Alberta have each a similar provision, the former province including youths, and the latter all workers within its scope. In Ontario and the four western provinces the employer must provide a dining-room for his employees at his own expense, should the inspector so direct, and in Quebec he must provide a place where food can be warmed and eaten under shelter. The laws of Ontario and Alberta forbid the taking of food into any room where paint, varnish, dye or any other poisonous substance is exposed or where deleterious fumes, dust or gases are known to be present.

In Alberta the employer in any factory where thirty-five or more girls or women are employed must provide suitable dressing and eating rooms for them with a matron or attendant in charge.

With regard to night work the Ontario Act states that no woman, youth or young girl may work in a shop between the hours of six p.m. and seven a.m., or in a factory between six-thirty p.m. and seven a.m., but an exception in the case of shops is made on Saturdays, the day before a statutory holiday, and the period between December 14 and December 24, at which times such employment is permitted up to ten p.m. Saskatchewan fixes six-thirty p.m. as the closing hour and forbids employment after that time

except by special permit, and where exemption is granted in case of emergency the hours must not be earlier than seven a.m. nor later than ten p.m. British Columbia provides that hours between which women and girls may be employed shall be fixed by regulation and posted in a conspicuous place, but even in case of exemption in emergencies, no work may be performed between the hours of eight p.m. and seven a.m. Nova Scotia and Quebec prohibit the employment of girls and women between nine p.m. and six a.m., except in the former province during the fruit-canning season. The New Brunswick law does not fix any regular working hours for normal times but states that when exemption is granted the hours from ten-thirty p.m. to six a.m. must be left free. The Manitoba Act rules that no woman or girl may work later than ten p.m. or earlier than seven a.m., and Alberta prohibits all labour by these classes of employees between eleven p.m. and seven a.m., except by special permission.

#### Health and Safety

The laws of all the provinces require that sanitary conveniences must be provided, that all drains, plumbing, etc., be kept in good repair, and premises kept clean and well ventilated. Overcrowding is strictly forbidden, New Brunswick, Ontario, Saskatchewan and Alberta fixing a standard of 300 cubic feet of room space for each employee, and the Quebec regulations 400 cubic feet during the winter months. The Industrial Establishments Act of this province demands that the employer furnish the inspector with a certificate from a health officer that his establishment fulfils the required conditions as to health and sanitation. Nova Scotia, Manitoba and British Columbia prohibit such overcrowding as would prove injurious to health, and in the two latter provinces a notice must be posted in every room specifying the number of employees who may work therein. The laws of all provinces except New Brunswick state that all work rooms must be

ventilated in such a manner as will keep the air reasonably pure and render harmless as far as possible all gases, vapours, dust or other impurities generated in the course of work. In those establishments where injurious dust is generated and inhaled by the workers, the inspector may direct the installation of any available mechanical contrivance for preventing or partially preventing such inhalation. In Ontario, Quebec, Saskatchewan and Alberta the above measures must be taken in any factory where grinding, buffing or polishing is carried on, without regard to the number of persons employed therein. The laws of Alberta and British Columbia insert an additional clause relating to printing offices where there are three or more type-setting machines, and requiring such offices to be provided with the proper means of carrying off all noxious fumes, gases, etc., generated in the course of operation. In the former provinces composing and stereotyping rooms may not be situated in a basement except with the approval of the inspector. Proper drainage of floors which become wet in the course of any manufacturing process is required by the Factory Acts of Alberta and Ontario. Nova Scotia, Ontario and Alberta provide that where two or more employers occupy the same room or premises employing in the aggregate six persons or more, but no one of them employing as many as six, each is held responsible for the carrying out of all requirements as to sanitation, ventilation, overcrowding, etc. British Columbia, Manitoba, and Saskatchewan insert similar clauses, the two former provinces allowing an aggregate of four employees, while Saskatchewan fixes a limit of five.

In Ontario, Alberta and Saskatchewan no stable may be under the same roof as a factory unless there is between them a sufficient brick wall approved by the inspector. The two former provinces include bakeshops also in this provision. Proper heating is required by the laws of Ontario, Saskatchewan, British Columbia and by the regulations in Quebec, a minimum temperature of 60

degrees Fahrenheit being in each case the standard to be maintained wherever possible.

Ontario, Alberta and Saskatchewan direct the employer in any factory to provide a supply of pure drinking water and drinking cups. The two former provinces make this provision with regard to shops also, and in addition require wash rooms, clean towels and soap to be placed at the disposal of employees. They also forbid the employment in a factory or shop handling food or food products, of any person affected with certain specified communicable diseases. In Alberta, Saskatchewan and Ontario, no room in a factory may be used as a bedroom without the written consent of the inspector, although in the latter province this does not apply to a laundry in which not more than five persons are employed. In Saskatchewan no sleeping place may be on the same floor as a shop or bake-house. Ontario and Alberta forbid the doing of public laundry work in a room used for cooking or preparing meals, except where a woman does custom laundry work in her own home for a regular family trade. These two provinces devote a section of the Act to offices and make rules respecting cleanliness, ventilation, sanitary conveniences, heating, lighting and the provision of towels, soap, drinking cups and pure water. Alberta has a special clause inserted by an amendment of 1918 stating that a factory, shop or office building must be kept properly lighted during working hours so as to insure the health, safety and comfort of persons working therein.

Alberta and Ontario have special provisions with regard to lighting, heating, ventilation and drainage of bake-shops. They must be kept in a clean and sanitary condition and all employees must be provided with proper washing facilities as in the case of factories. The factory regulations relating to the employment of persons with certain communicable diseases also apply. No bake-shop shall be in any part of a building below the level of the street, and no person shall sleep therein. The Ontario

law further provides that no one may sell bread or buns manufactured outside the Province of Ontario without written permission from the inspector.

Nova Scotia and Quebec make special provisions for brass, iron and steel foundries. In both provinces the entrances and windows must be so constructed as to minimize draughts, and the premises properly lighted and heated. The use of heaters discharging smoke or gas into workrooms is forbidden, and any smoke, steam or gases generated in the course of work must be effectively removed; if the inspector so directs exhaust fans must be installed and operated. In Nova Scotia the milling and cleaning of casting must be done in rooms not otherwise used during the process of milling or cleaning, and sanitary washrooms adequately heated and properly equipped with hot and cold water service must be provided in all foundries where five or more moulders are employed. There must be means of drying the workers' clothing and lockers and for keeping it in safety. Passageways used by employees must be protected from outdoor atmospheres. Quebec and Nova Scotia require that passageways must be kept free from obstruction during hours of casting, and that hot water be supplied to employees for washing purposes. In foundries employing over fifty persons there must be proper equipment, including shower-bath rooms with hot and cold water and cement floors with proper drainage. The Factory Acts of Ontario and Alberta also require shower baths to be installed in foundries. Nova Scotia requires that all apparatus for transporting molten metal shall be maintained in proper condition, and no defective tools used until properly repaired. In both Nova Scotia and Quebec proper first-aid remedies for burns and other accidents must be kept in all foundries.

The laws of all provinces make provision for the fencing and guarding of dangerous machinery such as mill gearing, wheel races, shafting, etc., and also any place which the inspector, in writing, may indicate as unsafe. In Quebec

workmen are forbidden to clean machinery in motion unless directed to do so by the foreman, while in the other provinces the inspector may direct that no machinery other than steam engines may be cleaned while in motion. The Ontario, New Brunswick, Saskatchewan and Alberta Acts direct that certain explosive, inflammable and combustible materials be stored in a separate building or in a fireproof compartment of the factory. A 1918 amendment to the Ontario Act provides that the inspector shall give notice in writing of anything in a factory which he considers dangerous to health and safety and prescribe such measures as he may consider adequate for the protection of persons employed in such factory.

#### Clothing Manufacture

Alberta, British Columbia, Manitoba and Ontario make special regulations regarding clothing manufacture. An employer in these provinces who contracts for the manufacture, alteration, etc., of any garment, or gives out material from which articles of clothing are to be made up or completed, must keep a written register of all such work and the location of the premises where it is being performed. This register must be open to the inspector at all times. In Alberta and Ontario no person may offer for sale any clothing made in a dwelling or tenement house without a permit from the inspector stating that the place of manufacture is in a sanitary condition and specifying the number of employees who may work therein. A 1919 amendment to the Ontario Act forbids any person in cities having a population of over 50,000 to receive for manufacture, alteration, etc., any garment or material unless he has first obtained a permit, and no one may let a contract for such work until he has ascertained that the person to whom it is let has received a permit. Both provinces require the inspector to seize any articles made under unsanitary conditions or on unregistered premises, and label them un-

sanitary, notifying the local Board of Health, who shall disinfect such articles at the expense of the owner. Where the inspector finds unhealthy conditions or infectious disease present in any workshop, tenement or dwelling he must report the matter to the Board of Health who may destroy any articles made or altered or being made or altered on such premises, or take any action necessary in the interest of public health. New Brunswick, Nova Scotia, Quebec and Saskatchewan have no provisions on this subject in the laws relating to factories.

#### Elevators and Hoists

Certain requirements regarding elevators and hoists are common to all the factory acts. All cars must be provided with a suitable mechanical device for holding them securely in case of accident to the rope, and all openings to elevators and hatchways must be protected by trap doors, or self-closing hatches. The inspector is empowered to prescribe any other safety measures which he may consider necessary.

Ontario, Saskatchewan and Alberta make additional rules. In these three provinces an elevator operated by hand power shall have automatically closing gates at least three feet high, and the sides not protected by gates must be enclosed to a height of four feet in a manner approved by the inspector. An elevator not operated by hand power must have gates not less than five feet six inches high which close automatically. The sides of the shafts on all floors, including the basement, when not guarded by gates must be protected by enclosures at least six feet high, of a pattern approved by the inspector. A sign bearing the word "Dangerous" clearly painted in letters at least four inches in height must be affixed to the bottom rail of every gate in such a manner as to be plainly visible from the outside. In Ontario and Alberta the Lieutenant-Governor in Council is empowered to make any regulations in addition to or in substitution for the foregoing. In Ontario no elevator or hoist

constructed upon the principle of an endless belt or similar contrivance may be used in any factory unless it is equipped with a brake or other device for stopping the belt and an automatic device for stopping it at the top. This rule does not, however, apply to an escalator or similar contrivance if it be fitted with handrails and not otherwise enclosed, and if the chief inspector has certified that it may be operated without danger. The speed of an endless belt, etc., is limited to seventy-five feet per minute.

No person under the age of eighteen years is allowed to regularly operate an elevator in any factory, shop or office building in Ontario, while in New Brunswick no child may be in charge of an elevator. The British Columbia law states that no person may operate an elevator unless he holds a license which can be obtained only by a British subject eighteen years of age or over who has complied with the rules laid down by the Lieutenant-Governor in Council. In the other provinces the licensing of elevator operators is governed by special acts.

Quebec and British Columbia make provision for the periodical inspection of all elevators and hoists and empower the inspector to prohibit the operation of those found to be unsafe. In the former province the inspection is made by the engineer of the establishment, except in cities where there is a municipal inspection service. The inspector of industrial establishments may at any time require the employer to show his certificate. In British Columbia the inspection of elevators is in the hands of the factory inspector.

#### Fire Prevention and Protection

There is very little difference in the provincial laws with regard to safety provisions in case of fire. All require that factories shall be provided with such extinguishers as the inspector may direct and that all main doors must open outwardly. In New Brunswick the latter rule applies only to buildings over one storey in height. All doors leading

to or being the principal entrance to a factory, as well as all entrances to towers, stairways and fire escapes must be left unbolted during working hours. This regulation in the Ontario and Alberta Acts is only made applicable to establishments employing fifteen persons or more, but it governs shops and office buildings as well as factories. A sufficient number of iron or other non-inflammable fire-escapes or tower stairways is required in all provinces. In New Brunswick, Saskatchewan, Ontario and Alberta this rule applies to all buildings over two stories in height, and, wherever the inspector deems necessary, to buildings over one storey. In the other four provinces it applies to buildings three stories and over where persons are employed above the second storey. British Columbia, Manitoba and Nova Scotia also require that in factories over two stories in height there must be provided in all windows indicated by the inspector a wire or other suitable rope securely fastened and long enough to reach the ground.

#### Reports of Accidents and Explosions

Nova Scotia, Ontario, Saskatchewan, Alberta and British Columbia have the same rules with regard to reporting of accidents. Wherever a fire or accident occurs causing such injury to any workman that he is prevented from working for more than six days, a notice in writing must be sent to the inspector at the end of this period. An explosion must be reported within twenty-four hours, whether anyone is injured or not, and the same time limit is fixed for the notification of any accident in which a workman is killed or fatally injured. In Manitoba the Bureau of Labour is authorized to receive reports of industrial accidents, and must be notified within twenty-four hours of a fire or any occurrence which has caused bodily injury. Notice of an accident that has proved or is likely to prove fatal, must be sent immediately by telephone, telegraph or messenger. The Quebec law requires that the inspector be apprised

within forty-eight hours of any accident which causes the death of a workman or serious bodily injury which prevents him from working. The address of the victim must be given and also the place to which he has been removed. The New Brunswick Act does not contain any provisions on this subject.

#### Miscellaneous

The Factories Act of Ontario contains a section relating to barber shops which forbids the proprietor of any such shop to keep his establishment open or permit his employees to work on Sunday.

The Alberta Act directs that all wages must be paid semi-monthly and fixes a minimum wage of \$1.50 per shift for all employees except apprentices who are to be paid \$1.00 per shift. In case an apprentice leaves his service the employer must give a certificate stating the length of time such apprentice has been employed in any particular line of work. Workers on day shifts may not be employed before seven a.m. or after six p.m., and the night shift is limited to eight hours. No person may be employed for more than one shift per day, except by special permit. No employee who has been employed on any day for the permitted number of hours may, to the knowledge of an employer, be employed on the same day in any other factory or shop, and no person who has been so employed for less than eight hours shall be employed in any other factory or shop on the same day for a longer period than will complete such number of hours.

The British Columbia law allows the employer an appeal to the Lieutenant-Governor in Council in case he is directed by the inspector to make alterations in his factory or the operations carried on therein which he considers unnecessary within the spirit of the Act.

Another clause in the British Columbia Act makes it illegal to open any factory or employ any person therein on a holiday unless special permission is obtained from the inspector.

The factory laws of New Brunswick, Quebec and Ontario contain sections dealing with the inspection and regulation of steam boilers, but as the other provinces deal with this matter in special Acts, and as the Commission on the Uniformity of Labour Laws did not take up the question, any consideration of boiler inspection is omitted from this survey. Similarly, no attempt is made to compare the regulations laid down in the Ontario Factory, Shops and Office Building Act with regard to the early closing of shops, with those laws in the other provinces which deal solely with that subject.

### Conclusion

Although the scope of the laws is continually widening, it will be noted that many of the provinces do not yet accept the definition of a factory recommended by the Dominion-Provincial Commission. Two provinces fix an age limit of fourteen years for boys and fifteen for girls, and one has raised the employable age for boys also to fifteen years. There is a large measure of uniformity in the provisions of the several laws relating to health and safety, but considerable variation in those which refer to working hours.

### APPRENTICE COUNCILS SUGGESTED FOR CANADA

**"A**PPRENTICE Councils" in each industry, supported by joint district councils and ultimately by a Dominion Council, are proposed by Mr. W. Baugh, President of the Metal Trades Council of Montreal, as a solution of the problem of the training of young workers. In an article contributed to the *Canadian Railroader* Mr. Baugh points out the defects in present methods of obtaining industrial recruits and describes the benefits that would result from the Apprentice Council plan to the boys themselves, to the craft, and to the whole community. "These Councils," he says, "would either legislate direct for the system, or produce recommendations leading to equitable legislation. The Council in the industry would take care of the boy on the job. The Local Councils would study the situation generally discovering needs and ways and means to meet them. They might find it a good plan to get the opinions and inclinations of the boys in the last six months of the elementary school course, see that the boys were in-

formed about the trades and that parents were given information that would help them in deciding what to counsel their boys to do. They would see that well-informed men really interested in the progress of boys were kept in touch with the boys. They might form evening classes or they might draw up schedules of training and examination for the work in the shops. If they found that a boy did not like the trade he was apprenticed to, they would try to fit him into the trade where he would be most likely to adapt himself and feel ambitious. These joint Councils would also see to it that the boy got the proper recreation and was taught to be a real man in every way. A beginning could be made in the industry I am connected with, the largest in the country. I would like very much to see the thing discussed and I feel sure that it is one important matter, at least, on which employers and employees could co-operate in a thoroughly friendly way, as Canadian citizens, independent of their economic relations."

In industrial agreements, hitherto, the apprenticeship question has been approached, Mr. Baugh points out, only from the standpoint of immediate economic results to the workers or to the employers; the former desiring a "square deal" for apprentices in so far that their own wages and conditions are not lowered thereby and the latter tending to regard apprentices merely as cheap workers and as a source of new labour supply. Individually, no doubt, the average employer or employee, "wants to see the apprentice treated right, first for his own sake as a boy starting out in the world," also for the sake of his craft, but "collectively we seem to divide up into two economic camps, employees on the one side and employers on the other, and the apprentice the bone of contention in between. Neither camp is able to wholly regard the apprentice question as a question of the boys, the industry and the community." The lack of agreement is not due, in Mr. Baugh's opinion, to any real want of consideration for young workers on the part of the unions, since "the apprentices are of our own class, often our own sons and brothers, and if any persons have an interest in their progress and happiness we are most likely to have it." Existing agreements, in fact, represent not what the unions desire for the apprentice, but rather their demands, "less what the employer has objected to and plus what he has insisted on having." For example, agreements generally provide that boys under 16 years of age cannot be admitted to a trade, although most boys are ready to go to work at 14 years, and two years are thus occupied in "dead-end" or positively injurious jobs. Again, according to some agreements, foremen and jour-

neymen are depended upon to instruct apprentices although the main business of a foreman is to produce goods, his instruction of the apprentice being necessarily subject to this interest in production, while the journeyman, in his turn, generally "thinks it judicious to side with the foreman." Moreover, where staffs are reduced, a proportionate number of learners are often dismissed, and even where the apprentice is indentured he may be thrown out on the foreman's word at the end of six months. Often he has no opportunity of learning his job before he becomes a journeyman. The term of apprenticeship varies from three to five years, and the general conditions of apprenticeship show a similar lack of uniformity throughout.

Mr. Baugh criticises the remedy offered by "vocational training" as not applying to "the many boys who must start to earn money when they leave elementary school, and whose parents cannot afford to pay fees and other school expenses, and keep economically idle a boy who needs as much food, clothing and pleasure as a man. As an apprentice in a shop the boy is helping to pay his way at least." A better plan in his opinion, is that of Sir James McKechnie, Chairman of Vickers, Ltd., who said recently: "Apprentices should be trained during the first year of their work so that they would be really trained and not be mere helpers to the skilled workers. Train your boys so that they will be skilled workmen. Make it compulsory that employers so train them that in the future the Dominion will have a crop of skilled workers growing out of the younger generation of apprentices. That will be the means of securing the future of Canadian industries."

## VOCATIONAL OPPORTUNITIES FOR YOUNG WORKERS IN THE INDUSTRIES OF ONTARIO

Bulletins issued by the Ontario Department of Labour

**T**HE Ontario Department of Labour has lately inaugurated a series of bulletins on "Vocational Opportunities in the Industries of Ontario," of which series three have already been published. Bulletin No. 1, which consists of a general introduction to the series, states that the experience of Government Employment Bureaus has revealed the necessity of providing definite "vocational guidance" for young persons of both sexes who have left school and are ready to become industrial workers. To supply this need the Labour Department of Ontario, supported by the Dominion Council of Women, the Home and School Council, and the Dominion Council of Girl Guides, has undertaken a survey of the industries of the province. Bulletins Nos. 2 and 3 deal, respectively, with surveys already made of Department and Notion Stores and Dressmaking and Millinery Establishments.

The survey was authorized by the Provincial Government early in 1918, and the work of investigation continued through the following year, employers, workers and other persons being required to supply information concerning rates, wages, hours of work, regularity of employment and other relevant matters.

Difficulties had to be overcome in ascertaining the numbers of juvenile workers, the hours of labour of piece workers, and other important points on which few plants kept complete records, but results were finally reached which are here represented for the first time in statistical form. The need for systematic research and responsible supervision of juvenile employment is proved by the waste of capacity and dissatisfaction which result from the drifting of boys and girls into "blind alley" occupations without regard to their present aptitudes or future development. In a group of young workers it was found that less

than one-fourth chose their occupation because they liked it; a larger number were attracted, either by the immediate return in the form of wages, or because their relatives or friends worked in the same plant, or because it was the nearest to their home, or because a job happened to lie open, and the worker knew of nothing else. The technical schools are found to discharge a useful function by affording the students facilities for tentative practical experience in various lines of skilled work, and thus assist them in forming a preference for some particular industry. It is at the point where the young workers manifest such a preference that further "vocational counsel" should be available to fit them into industrial life. This important work is being done more and more by Bureaus of Placement, and upon these it is hoped the parental function will fall of placing the boys and girls in the plants best suited to their taste and capacity. In foreshadowing this policy, Ontario is following the example of Great Britain, where the Juvenile Department of the Labour Exchange have behind them special Advisory Committees, which, in turn, are supported by voluntary organizations. Thus the Board of Trade of Great Britain has established in forty-four districts Advisory Committees for Juvenile Employment, besides special committees in London district, and committees established by local education authorities in fifty-eight districts, whose duty it is to make "every effort to find for each child the most suitable and permanent employment."

Young persons are found to be unduly influenced in choosing a trade by the initial wages offered notwithstanding the fact that the larger proportion of highly paid workers receive low wages at the start. Much stress is laid on future prospects in the choosing of a calling. It is

pointed out, for instance, that in manufacturing plants, highly paid mechanics are relatively more numerous than highly paid office workers, while the latter have an advantage in the initial stages of employment over workers in department stores, who, in their turn advance to higher positions in greater numbers. Information should be available for beginners as to the regularity of employment in various trades, which is shown to range for male workers from 68.5 per cent of full employment in the cotton industry to 97.8 in men's factory clothing; and for female workers, from 48.3 per cent in the tool and implement industry to 95.6 in stationery factories. Owing to regularity of employment, it is stated, "clerks, stenographers and salesmen are in most industries paid somewhat more on the average in the year than the wage earners," and in some industries much more, but in certain industries where the productive work is very heavy or requires a considerable amount of skill, as in steel furnaces and rolling mills, the yearly average is decidedly higher among the wage earners, in spite of the fact that about 75 per cent of the office workers are male."

#### APPRENTICESHIP.

On the apprenticeship problem the manager of a highly "skilled" factory is quoted as saying that "factories do not teach trades any more." In the industries investigated, the apprenticeship system was found to exist in 26.9 per cent; in 10 per cent of the others the duty of instruction was assigned to the foreman; while in the remainder the new employees were at first shown by experienced workers what to do and left to become proficient by routine. In certain "tramp trades" such as biscuit and confectionery manufacture workers are obliged to gain the necessary experience by wandering from factory to factory. As to opportunities for promotion it is stated that while in a few industries, such as millinery, a definite line of advance lies open for a large number of factory workers, the only improvement offered is increased wages for higher effi-

ciency. In Ontario at the present time, the foremen are mostly those who have an all-round knowledge of the industry. When, however, new foremen are sought in the future it is anticipated that qualified men will be hard to find, for in spite of all educational efforts recently made, the scarcity of really skilled workers is becoming more pronounced.

#### DEPARTMENT STORES.

Bulletin No. 2 deals specifically with vocational opportunities in Department and Notion Stores. In these the great majority of employees are of Canadian or British nationality. In the stores examined in the course of the inquiry 40 per cent of the employees were males, the proportion of men increasing with the size of the store. The higher appointments are filled for the most part by promotion from inferior grades. Practically all managers prefer young workers with a high school training and mark them out for promotion. Work is said to be regular throughout the year for 75 per cent of the force of workers. The proportion of workers receiving over \$30 a week is between 4 and 5 per cent and about 41 per cent of the men and 2 per cent of the women receive \$20 or over, and 35 per cent of the women receive \$12 or over.

#### DRESSMAKING AND MILLINERY.

Bulletin No. 3 contains full information of interest to young workers who contemplate entering the Dressmaking and Millinery trades. Among the advantages of the former are that the skill acquired in the factory can be used with advantage at home or elsewhere, that employment is well regularized, that while the general level of wages is low, the chances of earning \$25 weekly are good as compared with other employments open to women, and that the work is pleasant for those who have the necessary aptitude or artistic taste. The same inducements exist in the Millinery trade in which the proportion of workers receiving \$15, \$20, \$25 and \$30 a week and over, compares favourably with those in other callings.

**REPORT FOR 1919 OF FACTORY INSPECTOR FOR NEW BRUNSWICK**

**T**HE annual report for 1919 of the Factory Inspector for New Brunswick gives the total number of accidents reported during the year as 104, of which 6 were fatal. In 1918 the fatalities were 12 out of a total casualty list of 102. The victim of one of the fatal accidents was a boy, 14 years of age, employed at a sawmill. Commenting on the frequency of accidents the inspector attributes more to carelessness on the part of the worker than such material defects as unprotected places or unguarded machinery. "Careless practice, such as the disobeying of warning signs, should," he states, "be penalized. A few examples made of offenders along this line and we would have our cautions heeded. Not until we have the people educated up to their own personal responsibility for their own good behaviour along this line—not until then shall we have fewer accidents." Some slackness is noted among manufacturers in regard to the notification of industrial accidents, although the law of New Brunswick requires, under a penalty of \$25, that every accident involving disability for more than six days should be reported to the Factory Inspector (in the case of a fatality, within 24 hours). One gratifying fact

noted is the "increasing tendency on the part of most manufacturers to improve the working conditions of their employees as regards safety, health and comfort." To this improvement, however, there are some exceptions, some employers neglecting to afford workers the protection they have a right to expect in regard to the proper safeguarding of machinery, ventilation, and sanitation. As to child labour the age limit of the young workers should, in the inspector's opinion, be raised from 14 to 15 years. Some laxness in this respect was tolerated during the war, but this, he states, should not be allowed to continue as "from the standpoint of public health the child under 15 years must be kept out of industry." The report notes a considerable improvement in safety conditions in the portable sawmills, of which 146 are scattered throughout New Brunswick. Seven-eighths of all the boilers in the Province are insured against accident, resulting in a thorough system of inspection by insurance agents. Working conditions in stores have been improved by the amendment made in 1916 to the Factories Act of 1905, requiring that female attendants be provided with chairs when not actively engaged in their duties.

**A COAL MINER'S YEARLY AND DAILY PRODUCTION**

**A**N estimate of a miner's average yearly and daily output of coal in 1918 and previous years is given in a report recently issued by the Mines Bureau of the United States Department of the Interior (Serial No. 2145). A statistical comparison is made between the periodical production of workers in the various coal-producing countries of the world, showing that the daily average of the United States miner

is considerably in excess of that of the workers in other countries. The report points out, however, that in considering such comparisons allowance should be made for the folded and faulted condition of the coal beds in some countries, the thinness and depths of the seams, and the adaptability to the coal-bed of available mining machines and equipment. To these factors may possibly be added some divergence in the methods in use in the several countries of

estimating the number of men classed as miners working underground. These considerations lessen in a large measure the value of the statistics regarded as a basis of comparison between the efficiency of the workers in the various countries for which figures are given. On the other hand, those figures which show the variation from year to year of the individual output in the same

country are more significant, although the progressive adoption of improved mining machinery is a factor to be considered in this connection. The annual and daily production of coal per man employed underground, expressed in tons of 2,000 pounds, for the various countries in order of amounts produced per miner is given in the following table:

	1901		1911		1913		1917		1918

## JOINT INDUSTRIAL COUNCILS IN THE UNITED KINGDOM

### A General Review

(Reprinted from "The Month's Work of the Ministry of Labour," August, 1920.)

IT will perhaps be considered appropriate if, in the last number of this journal, a general review of the progress and work of the Joint Industrial Councils is given.

#### Progress

The Whitley scheme was approved by the Cabinet and its application taken in

hand by the Ministry of Labour in October, 1917. In 1918, 20, in 1919, 31, and in 1920 (to date), 10, or altogether 61 Joint Industrial Councils have been formed. Of the 61 Councils, four are in abeyance; but, allowing for these, it is estimated that the total number of work-people represented by the remaining 57 Councils is approximately 3,500,000.

Practically the whole field of Government and municipal employment is now covered by Joint Industrial Councils—the former by the National Council and the Councils for the Government Industrial Establishments (of which accounts were given in *The Month's Work* for March and April last); and the latter by the six Councils of which an account was given in *The Month's Work* for June, 1920.

Under the National Councils, upwards of 200 District and Civil Service Departmental Councils have been established, and the setting up of Works Committees in 33 industries is proceeding.

### Wage Agreements

All except six of the Councils deal with wages. Over 80 national wage agreements (apart from local adjustments) have been concluded and put into practice; and many of these agreements also included a standardisation of the normal working week at 48, 47 or 44 hours, and a scheme for paid holidays.

The settlement of wages and hours has, of course, bulked largely in the work of the Councils; but these two questions by no means exhaust their functions. Much valuable work has been done in other directions. No more than a slight indication of the results achieved by the Councils on some of these questions can be given here. In addition, the suggestions and advice of the Councils on questions such as unemployment insurance and workmen's compensation on which further legislation was in contemplation, have been sought by the Government Departments concerned.

### Conciliation and Arbitration

One of the most interesting and valuable chapters in the history of Whitleyism, when it comes to be written, will be that devoted to the work of the Councils in connection with conciliation and the settlement of disputes. Every Council at one time or another has been confronted with this problem of the settle-

ment of differences between the two sides. In fact, every wage agreement concluded—and, as has been said, they have been many—is an example of the joint solution of a difference. But wages, although the most salient, are not the only factor of dispute; and, while the general principle of a Whitley Council is, of course, to set joint arbitrament in place of conflict the general trend of development is to make the joint arbitrament of the Council a specific, and in the case of one Council, at least, an honourable obligation. Some Councils have gone farther than the recognition of this obligation, and have either devised machinery for dealing with disputes or have created *ad hoc* arbitration committees.

### Education and Apprenticeship

A summary of the reports on Education adopted by the Building and Pottery Councils appeared in *The Month's Work* for May. This question, which, in view of the Education Act of 1918, vitally concerns all such national bodies as Joint Industrial Councils, is also being considered by Committees of the China Clay, Cooperage, Electrical Contracting, Gas, Heating and Domestic Engineering, Silk, Vehicle Building and Wool Councils.

The summary of the reports on education as published in *The Month's Work* for May is as follows:—

Two noteworthy reports on education have lately been adopted by the Building and Pottery Councils respectively.

#### BUILDING JOINT INDUSTRIAL COUNCIL.

As early as October, 1918, the Building Trades Council appointed an Education and Apprenticeship Committee of twenty members to consider the question of education as it affected the industry and as it was affected by the Education Act of 1918. The report now issued by this Committee and adopted unanimously by the Council, is of considerable interest generally, as well as to the industry itself. Briefly, the report may be said first to criticise the present system of education, and secondly, to set forth a scheme of improvements. The Committee is dissatisfied

with the morale of the elementary schools; and it thinks that too many subjects are taught. The Report advocates a thorough grounding, in the elementary schools, in reading, writing and arithmetic, as the basis of further training, from the age of twelve onwards, at a centralised school for more advanced instruction. At the age of fourteen a boy should be transferred to a technical, commercial or secondary school, according as to whether he is intended for a trade, commercial, or a more or less scholastic career. Facilities for passing on to the Universities should be provided.

The Committee lays special stress on physical training at all stages of school life, and on the need for improvement in the methods of teaching art. It would have the leaving age raised to sixteen years, with optional leaving at fifteen, State aid in the form of scholarships and bursaries being given; and it recommends that curricula be drawn up in consultation with representatives of joint bodies drawn from employers' and operatives' organizations.

As regards the transfer from school life to industry, and, more particularly, to the building industry, the Committee is in favour of the establishment of Juvenile Advisory Committees at every Juvenile Employment Exchange throughout the country; and it recommends, further, that the associations of employers and workpeople in the building industry should be directly represented on these Committees, and that each Juvenile Advisory Committee should have a Building Trades Apprenticeship Sub-Committee, with direct representation of employers and operatives from each craft in the industry. The functions of this Sub-Committee would be advisory, in the sense that it would assist youths leaving school in the choice of a craft, and that it would be in touch with the local education authority; executive, in the sense that it would select suitable youths to become indentured apprentices to suitable employers, and administrative, in the sense that it would serve as a medium between employers and apprentices. It would also act as a welfare committee, and its chairman is proposed as a fourth party to indentures.

#### POTTERY JOINT INDUSTRIAL COUNCIL.

The Research, Inventions and Designs Committee of this Council has devoted much time and attention to the question of education.

Like the Building Industry's Education Committee, the Pottery Industry's Committee is dissatisfied with the product of the elementary schools. The Committee makes eleven recommendations, among which may be mentioned those referring to physical training, medical service, and the provision of meals. The Committee emphasises the importance of practical work.

So far as continued education between the ages of fourteen and sixteen is concerned, the Committee recommends, as regards boys and girls employed in the pottery industry, that it should be non-vocational, and that instruction should be given for seven hours per day.

The aim of the Committee in its first report is the general development of the boy or girl under instruction. In its second report, it advocates the supplementing of the compulsory part-time education by voluntary education of a reasonably vocational type in evening continuation schools for four hours each week, spread over two evenings. Three courses, commercial, industrial, and art, are suggested. The second report also goes very fully into the question of full-time education up to the age of sixteen, and it recommends certain courses in technical schools, commercial schools and schools of art. It also recommends part-time day courses continuing education beyond the age of sixteen, in anticipation of the compulsory attendance up to the age of eighteen under the Education Act of 1918.

The question of apprenticeship is closely related to that of education, and 15 Councils have the subject under consideration, either as a separate matter or as part of an education scheme. Some of these Councils, *e.g.*, Building, Heating and Domestic Engineering and Vehicle Building, have completed their apprenticeship schemes.

#### Welfare and Safety

Welfare and safety problems are engaging the attention of the Boot and Shoe, Building, Electricity Supply, Flour Milling, Gas, Glass, Paint and Varnish, Pottery, Printing, Quarrying, and Wire Councils, many of them working in conjunction with the Home Office. The Boot and Shoe, Building and Pottery Councils especially have drawn up recommendations which will in practice effect great improvements for the welfare and safety of the workers.

#### Research, Organisation and Statistics

Much has been done, but for lack of space little can be said about research, organisation and statistics. The report of the National Council for the Civil Service on the reorganization of the ser-

vice is too well known for further comment. Mention may be made of the code of regulations for the whole industry, and the scheme of democratic control presented by a Committee of the Building Council. In connection with the recent wages claims of the workers, the Tramway Council completed an exhaustive survey of the cost of living in relation to the wages paid in the industry. In connection with the Government Industrial Establishments, the organisation of Trade Joint Councils of the four principal labour groups employed, *i.e.*, engineering, shipbuilding, building and general labour, is being proceeded with as rapidly as possible.

### Works Committees

A word may be said about Works Committees, the third step in the Whitley scheme, and a most important part of it, if the true spirit of the scheme is to be developed. In addition to their activities in connection with such matters as the investigation of complaints and the settlement of personal grievances, the management of canteens, lavatories, etc., and the supervision of works conditions generally, the Committees have proved capable of valuable constructive work, such as, to quote typical examples, an investigation into foundry costs and methods of production, an improved system of issuing tools, the obtaining of an adequate water supply to the works in a case of dispute between two urban areas as to which should give the supply, and the arranging with the railway and tramway authorities for improved travelling facilities.

### Interim Industrial Reconstruction Committees

This general review would be incomplete without a reference to the work of the Interim Industrial Reconstruction Committees, which, like the Joint Indus-

trial Councils, are bodies representative of both employers and employed. There are 22 of these Committees, representing approximately 500,000 workers. They were set up during the War by the Ministry of Reconstruction, as a temporary expedient, to facilitate the transition in industry from war to peace conditions. Several of the original committees have since been converted into Joint Industrial Councils—recent examples being Glass and Cooperage. Of the remainder, some are in industries where the degree of organization is scarcely such as to warrant a Joint Industrial Council; and, in other cases, there have been difficulties of demarcation and inter-union troubles.

In view of these circumstances, the opportunities for useful work afforded by an Interim Industrial Reconstruction Committee are scarcely so great as in the case of a Joint Industrial Council. Nevertheless, some of the Committees have performed extremely useful functions. Mention may be made of the Basket Making, Clay, Cocoa and Confectionery, Furniture, Warehousing and Removing, Gas Mantles, Gloves, Lead Polish, Stationery Artificial Stone and Sugar Refining Committees, which have recently concluded national wages agreements, many of them of a comprehensive character.

These Committees have also dealt with such questions as the setting up of machinery for settling disputes, apprenticeship, welfare and safety, unemployment insurance, and merchandise marks. The scheme of technical training for apprentices, partly in workshops and partly in technical institutions, devised by the Optical Instruments Committee, deserves special mention.

It is more than likely that some of these Committees will ultimately become Joint Industrial Councils. In the meantime, they are performing useful work of a kind which was not possible before the era of joint deliberation.

## SOVIET GOVERNMENT DENIES ADMISSION INTO RUSSIA OF INTERNATIONAL MISSION OF INQUIRY

REFERENCE was made in the September issue of the **LABOUR GAZETTE**, at page 1197, to the action taken by the Governing Body of the International Labour Office in the appointment of a commission to investigate industrial conditions under the Soviet Government in Russia, and it was stated that up to the time of the fourth meeting of the Governing Body, held in June last, permission had not been obtained from the Soviet Government for the commission to visit Russia.

According to a statement recently issued by Mr. Ernest Greenwood of Washington, United States Correspondent of the International Labour Office, the Soviet Government has now definitely refused entry into Russia of the Mission of Inquiry. Mr. Greenwood's statement reads as follows:

"The Soviet Government of Russia has refused to permit the Mission of Inquiry organized by the International Labour Office to enter Russia, according to a dispatch from the Office of Director Albert Thomas received at the office of Ernest Greenwood. The only reasons given are that Russia is not a member of the League of Nations and that, at the present time the Soviet Government is at war with Poland.

It is interesting to note that the first suggestion of making an inquiry into conditions of employment in Soviet Russia came from M. Sokol, the Polish Government delegate on the Governing Body of the International Labour Office. His proposal was adopted at the urgent request of the workers' representatives on the Governing Body, who laid particular stress on the consideration that a large portion of the unrest amongst the working classes throughout the world is perhaps due to complete ignorance of what is happening in Russia, asserting that workers who are suffering more and more of economic and

social disorder caused by the war, are fascinated by the mirage of Bolshevik Paradise. The Governing Body decided that the personnel of its Mission should be made up of five employers, five workers, and two government delegates, feeling that with such a composition, its work would be conducted on an absolutely scientific basis and its report be impartial. Dr. G. Pardo, head of the inquiry into Russia, was immediately instructed to get together all the documentary evidence available in Western Europe. The fullest and most systematic research work was undertaken in Paris and London, with supplementary investigation in Switzerland, Sweden, Italy and Germany. The result of this work supplied the material for a preliminary report on labour conditions in Soviet Russia, which while it lays no claim to be anything more than a systematic questionnaire and bibliography, designed to serve as a guide for the members of the Mission, clearly indicates that the net result of the Lenine-Trotsky regime in Russia has been the absolute ruin of industry and the enslavement of labour under an autocracy that goes far beyond anything in the history of governments.

This preliminary report studiously avoids drawing any conclusions, each chapter being completed with a statement of missing evidence and questions yet unanswered. The International Labour Office makes it clear that the work is absolutely scientific and that the Mission of Inquiry will arrive at no conclusion until after all the documents embodied in the preliminary report can be considered in Russia. For the present all sources of information in Western Europe have been exhausted and the further inquiry will have to rest in abeyance until the Soviet Government of Russia concludes to permit the International Labour Office to test the accuracy of these sources."

## LEAGUE OF NATIONS SECOND INTERNATIONAL LABOUR CONFERENCE

Seamen's Conference held at Genoa, Italy, June 15, 1920

**P**REVIOUS issues of the LABOUR GAZETTE have contained references to the Seamen's Conference, called by the Governing Body of the International Labour Office, to be held at Genoa, Italy, on June 15 last. As is now generally understood, each member of the International Labour Organization is, under the terms of the Labour Sections of the Treaty of Peace, entitled to four representatives, two as representing the Government and one each to be appointed as representing employers and workmen respectively, it being required that the employer and workmen delegates shall be named in agreement with the organizations (when such exist) most representative of the classes respectively concerned.

The Canadian delegation to the Genoa Conference was composed as follows:

Government delegates—The Honourable Philippe Roy, Commissioner General of Canada at Paris, France.

Mr. G. J. Desbarats, C.M.G., Ottawa, Deputy Minister of Naval Affairs.

Employers' delegate—Mr. Thomas Robb, Montreal, Secretary of the Shipping Federation of Canada.

Workmen's delegate—M. J. C. Gauthier, Montreal, President, Sailors, Firemen and Cooks' Union of Canada.

The regulations permitted the appointment also of technical advisers to the delegates, but this privilege was not exercised in the case of Canada.

The Minister of Labour has received from Mr. Desbarats, one of the Government delegates, a report of the proceedings of the Conference. The material portions of this report, together with the text of the various draft conventions, recommendations and resolutions, passed by the Conference, are included in the present article.

### Mr. Desbarat's Report

This Conference was the second meeting of the International Labour Conference established under Part XIII of the Peace Treaty. The first meeting was held at Washington in November, 1919, and discussed general labour conditions on land. Matters relating to seamen were reserved for a second Conference and the Genoa Conference was called for this purpose.

It was fitting that this Conference, which was called to adopt means of regulating the shipping industry, should be held in the City of Genoa, the seat of one of the most ancient maritime organizations of the world, a locality which had been the centre of marine activity in the Roman period and is to-day one of the large shipping ports of the world and the distributing centre for the western side of Italy and for a large section of central Europe.

The representatives of the Government of Italy and of the port of Genoa extended the hospitality of the City to the delegation. The Conference was welcomed by Mr. Poggi (Prefect of Genoa), representing the Italian Government, by Senator Ronco (President of the Harbour Commission of Genoa), and by Mr. Massone (Mayor of Genoa). Accommodations were provided for the Conference in the Palazzo San Giorgio which is the office of the Harbour Commission of Genoa, and in the Istituto degli Scambi Internazionali, a building containing an exhibit of Italian manufactures of various kinds.

The International Labour Office moved its staff to Genoa and they were installed in the Palais Royal. The Genoa Conference was the first International Labour Conference held since

peace was signed and since the International Labour Office was formally organized, the Washington Conference having been held before the signature of peace. The International Labour Office, which had been temporarily installed in London, has acquired offices in Geneva which will be its permanent site; and the staff was moved to Genoa for the Conference, after which it took possession of the offices at Geneva. It was a great advantage to have the full staff of the bureau in Genoa during the Conference as it enabled the office and routine work to be handled much more rapidly, and all the expert members of the bureau were available during the Conference for consultation or for general purposes.

The Conference opened on Tuesday, June 15, and closed on Saturday, July 10. It sat for four weeks.

Twenty-seven countries were represented by eighty-six voting delegates and one hundred and fifty-eight technical advisers, or a total of two hundred and forty-four official representatives. Besides this, most of the countries had translators and secretaries attached to their staffs.

The following is a list of the countries represented at the Conference: Argentine, Australia, Belgium, Canada, Chili, Czecho-Slovakia, Denmark, Finland, France, Germany, Great Britain, Greece, India, Italy, Japan, Netherlands, Norway, Poland, Portugal, Roumania, Kingdom of Serbs, Croats and Slovenes, Siam, Spain, Sweden, Switzerland, Uruguay, Venezuela.

The Conference elected as chairman Baron Mayor des Planches (Italy) and as Vice-Presidents Messrs. Arthur Fontaine (Government delegate, France), P. Nijgh (Owner delegate, Netherlands) and Havelock Wilson (Seamen delegate, Great Britain).

The chairman presided with great tact and skill at almost all the sittings of the Conference, and filled a very difficult position with great ability and to the distinct satisfaction of the members of the Conference.

The agenda of the Conference provided four subjects for consideration:

Item 1. Hours of labour and their effect on manning and accommodation. Item 2. Unemployment, including facilities for finding employment for seamen and insurance against unemployment. Item 3. Employment of children at sea. Item 4. Seamen's codes.

The International Labour Office had circularized all the members of the League of Nations some time before the meeting and had received from them information regarding the questions on the agenda. This information was extracted and published in four pamphlets, each one relating to one of the items on the agenda.

Four special commissions were named by the Conference to study the four points on the agenda, and another commission was appointed to consider questions relating to inland navigation. A guiding commission was also named to direct the general work of the Conference. Canada was represented on all these commissions except the commission on minimum age of children at sea, which was a very small one and had to handle a subject which was not controversial. Mr. Thomas Robb was chosen chairman of the commission on inland navigation.

As a result of the discussions and the work of the Conference, conventions were agreed to concerning: (1) Facilities for finding employment for seamen. (2) Minimum age of employment of children on board ship. (3) Unemployment indemnity in case of loss or foundering of ship.

Recommendations were adopted regarding: (1) Hours of work in inland navigation. (2) Hours of work on board fishing vessels. (3) Unemployment insurance for seamen. (4) Establishment of national seamen's codes.

Resolutions were also adopted for the instruction and guidance of the International Labour Office concerning: (1) Prevention and treatment of venereal disease in the mercantile marine. (2) Insurance against unemployment. (3) Special clauses in Articles of Agreement

and seamen's codes. (4) The education of children or apprenticed seamen.

The Conference discussed the following questions and resolved that they should come up for final decision at the next Conference. (1) Prohibition of the employment of any person under the age of 18 as a trimmer or stoker. (2) Medical examination of children before being employed on board ship. (3) Education of children.

The Conference elected a joint committee of owners and seamen to advise the International Labour Office whenever needed, and as a consulting body which would be an aid to the Office. The composition of this committee was as follows: Owners—Messrs. Nordborg (Sweden), Deckers (Belgium), Hori (Japan), Robb (Canada), Cuthbert Laws (Great Britain). Seamen—Messrs. Havelock Wilson (Great Britain), Rivelli (France), Giulietti (Italy), Doring (Germany), Nilson (Norway).

It was provided that the members of this committee could delegate their powers if they were unable to attend any particular meeting.

It will be seen from this that the Conference reached agreements and conclusions on all the subjects of the agenda with the exception of the item concerning hours of labour. It also considered other subjects related to the agenda, and discussed some further subjects of interest to seamen, which will come up for final decision at future conferences. Two draft conventions regarding hours of labour were presented to the Conference, but neither of these proposals obtained the necessary two-thirds majority, and the Conference therefore did not agree to any convention or recommendation on this subject. The other recommendations and conventions were passed by practically a unanimous vote, and were the result of long discussion, and generally represented a compromise of the views of the different sections of the Conference.

At a meeting of this kind, in which labour and employers are equally represented, it is evident that very different views will be held by these two sections,

and that any proposal which is approved must recommend itself to both of these groups and must also be supported by the Government representatives. The fact that agreement was reached on so many points is a testimony to the moderation and good sense of the delegates, and shows the readiness of the different sections to appreciate the arguments advanced and to modify their views accordingly, and their willingness to adopt measures tending to harmony and to the best interests of the shipping industry.

At the opening of the Conference the question was raised as to how far this Conference was bound by the decisions reached at the first Conference at Washington, which adopted conventions and resolutions regarding conditions of labour on land. While no formal decision was reached on this question, it seemed to be agreed that the questions to be discussed by the Conference regarding conditions of labour at sea and on board ship, that the conditions governing this labour were entirely different from those which prevailed on land, and that the resolutions adopted at Washington did not refer to labour at sea and should not be taken as applying to seaman in any way. The clauses of the Treaty of Peace relating to labour were taken as determining the principles which should guide the Conference and prompt its resolutions. It was recognized that the laws relating to seamen labour should be along the same lines as those adopted for land labour and should be modified to meet the special conditions existing at sea.

When the committees of the Conference were being selected it was suggested that one-half the membership of these committees should go to the principal nations. The Canadian representatives objected to the list drawn up, which was confined to Europe with the exception of Japan, and urged Canada's claim to be considered one of the principal nations on the ground that she had 46,000 men employed on ships. After some discussion this was agreed to, and as a result Canada was well re-

presented, generally by two members on all the principal committees.

In accordance with a resolution of the Washington Conference Germany was recognized as a full member of the Genoa Conference and was represented by four voting members and a complete staff of technical advisers. Finland was given a standing similar to that provided at Washington and was represented by two Government delegates. While these members took part in the discussions they did not vote on any of the controversial points as their country had not yet been admitted to the League of Nations.

Objections were raised by some of the seamen delegates to Germany's seaman representative. The objection was raised on two points (1) that the part taken by this representative in the maritime war was objectionable to the seamen of the allied countries, (2) that he was not a seaman and therefore not a proper representative of the seamen of his country. The first point raised a bitter discussion in the committees and in the Conference, and it was finally smoothed over by the German representative submitting a statement on behalf of his Government acknowledging responsibilities for reparations for injury caused by the submarine warfare. In discussing the second point it was urged by the seamen's delegates that all seamen representatives from the different countries should be seamen with proper experience and should be selected after conference with labour organizations, and that the representatives chosen should not merely be labour officers or chiefs but should be practical seamen also.

The United States, not having joined the League of Nations, was not represented at the Conference. This left the Canadian delegation as the only representatives from North America and made their position a delicate one in many cases. Many of the questions relating to the employment of seamen affect Canada and the United States in a similar manner, and on the Great Lakes and the boundary waters their

interests are similar, and it would be difficult for Canada to adhere to a convention which would obligate it to conditions which would not be recognized by the United States. The argument was admitted by the Conference and the resolutions regarding inland waters have been drafted with a view to meeting this situation.

The text of the various draft conventions, resolutions and motions adopted by the Conference are appended to this report. They cover the work done by the Conference and the subjects submitted for its consideration, with the exception of the question of the hours of labour on which no agreement was reached.

#### **Convention for Establishing Facilities for Finding Employment for Seamen.**

The convention on facilities for finding employment for seamen was one of the main subjects up for discussion and was carefully studied by the committee appointed for this purpose. The object of this convention is to do away with the practice of crimping, which is still prevalent in many countries. The convention provides for the suppression of any organization carrying on the business of finding employment for seamen for pecuniary gain. It prohibits the charging of any fees to the seamen for finding employment. It provides that each country shall organize a proper system of public employment offices, which offices shall be either entirely administered by the State or shall be administered by representatives of the owners and the seamen under the control of a central authority. Great difference of opinion existed in the Conference regarding the setting up of these offices. A number of the central European nations asked to have these offices set up as State institutions but with proper representation of the owners and seamen. The British Government representatives were also of this opinion but the British owners and seamen opposed this view vigorously. The owners wanted the work done by joint

organization of owners and seamen without any State control, and the seamen wished to have the business of finding employment for sailors controlled entirely by the trade unions of the different classes of seamen. This last proposal was objected to because it would practically exclude every one but the members of the union, and the resolution is therefore much wider but allows considerable latitude in the organization of the offices. A point which was much debated was as to whether these offices should provide employment for other than citizens of their own countries. It was finally agreed that the public offices should provide facilities for finding employment for seamen of all the countries ratifying this convention providing their industrial conditions were similar.

**Convention fixing Minimum Age of Admission of Children for Employment at Sea**

This convention was adopted with very little discussion and fixes the minimum age of children to be employed on ships at fourteen years. This is the same limit as is provided for children working in factories on shore.

Further points were raised regarding limitation of age for special employment and as to further conditions regarding children on board ships, and it was decided to insert in the agenda of the next International Labour Conference the following subjects: (1) The prohibition of the employment of any person under the age of 18 years as trimmer or stoker. (2) The question of compulsory medical examination to which all children employed on board ship should be subjected. (3) Education of children.

**Convention Concerning Unemployment Indemnity in case of Loss or Foundering of the Ship**

In most countries the practice which now prevails is that in case of shipwreck the wages of the seamen cease when the ship is abandoned. It was agreed that this practice was an unreasonable hard-

ship on the seamen, and the convention provides that in case of shipwreck or loss of the vessel the wages of the seamen shall be continued until they can obtain other employment. This time is, however, limited to two months.

**Recommendation for Limiting Hours of Work in Inland Navigation.**

The subject of inland navigation, which seemed at first a very simple one, proved a rather difficult one to handle at the Conference. The conditions of inland navigation in the various countries are so different and cover such a wide range that the Conference was unable to adopt general rules which would apply. Great difficulty was found in defining inland navigation or of obtaining a general definition of the point at which sea navigation ceased and inland navigation began. It was finally recognized that it would be better to leave to each country the regulation of its inland navigation and the definition of the limits within which the regulations should apply. The question of inland navigation was complicated by the fact that the inland waterways were frequently boundaries between two countries. Both of these countries might be members of the League of Nations or possibly only one of the countries would be a member. This introduced special difficulties, and it was recommended that an agreement should be entered into by nations having boundary waters, so that their regulations should be uniform. In all cases these regulations should follow on the general lines of the labour sections of the Peace Treaty and of the resolutions adopted at Genoa.

**Draft Recommendation for Limiting Hours of Work in Fishing Industry**

The Conference agreed after very little discussion that it would not be practical to adopt international regulations for the guidance of the fishing industry, as the conditions of this industry varied in different countries, and that, owing to the fact that in the fish-

ing industry the fishermen were largely owners of their crafts or financially interested in their operation, it would not be advisable for the Conference to put forward a convention regarding the hours of labour in this industry, and that each country should legislate as the needs of the service required.

#### **Recommendation concerning Unemployment Insurance for Seamen**

This recommends the establishment by each country of an effective system of insurance against unemployment arising out of ship-wreck or any other cause. This recommendation follows the same lines as a similar one adopted at the Washington Conference regarding unemployment insurance in shore industries.

The Conference also passed a resolution asking that the joint committee appointed in connection with the International Labour Office should take this whole question of unemployment insurance into consideration, and should make a report on the subject at an early date.

#### **Recommendation concerning the Establishment of National Seamen's Codes**

The Conference decided that it was advisable to have an international code drawn up which would apply to all the maritime nations. This code should contain in the first place all the laws which are common to the maritime nations and should, besides, contain further clauses on which it would be possible for the nations to agree. The first step to be taken was to ascertain what laws were in force in the different countries, and the Conference recommended that each country proceed to a codification of the laws relating to the employment of seamen. The Conference then passed a resolution requesting the International Labour Office to gather all the information necessary for the establishment of an International Code along the lines recommended in the report of the committee appointed on this subject, and that the bureau should

submit a report on this subject, at the Conference of 1921. The Conference expressed the hope that the work would be sufficiently advanced at that time to enable the next Conference to take up this question and adopt the necessary conventions or resolutions. It was recognized that an international code should be very elastic so as to allow the different nations to adopt supplementary legislation, but that it should cover the general conditions of employment of seamen and should tend to unify conditions of employment throughout the maritime world. The principal points to be covered by this international code would be: Article of Agreement, Accommodation of seamen on shipboard, Discipline, Methods of conciliation between seamen and ship owners, Insurance for seamen and the possibility of international reciprocal arrangements regarding insurance.

While the Conference agreed that it would be very difficult to draw up an international code, it considered the project feasible and hoped that the International Labour Office would be able to prepare suggestions for the next Conference.

The Conference passed a resolution regarding the Articles of Agreement, recognizing, that these contracts contained two kinds of clauses—those which were inserted in the public interest, and those which were inserted in the private interests of ship owners or seamen, or both. The Conference expressed the view that the clauses of a public character should so far as possible be the same in the different countries, that the owners and the seamen should be placed on a footing of equality as regards their legal rights and that violation of the private clauses of the contracts should not be dealt with as criminal offences. The object of this resolution is to do away with the possibility of seamen being convicted and sent to jail for violating civil clauses in their contracts and to give them the right to sue the masters or owners for violation of these clauses. Violation of the clauses of public interest would, however, remain as now (as

criminal offences) and be dealt with in the usual manner.

### Hours of Labour

Besides adopting the various conventions, recommendations and resolutions, the Conference discussed at length the question of hours of labour on board ship, with special reference to the question of the eight-hour day and the forty-eight-hour week. After circularizing the different countries and receiving their opinion on this subject the International Labour Office had prepared a draft convention dealing with this question. This proposed convention laid down the general principle as contained in the Peace Treaty (that the eight-hour day or forty-eight-hour week was the object to be aimed at). It also indicated that there were great difficulties in the application of this principle to ships. It provided that on vessels of over 2,500 tons the work should be organized in three watches and the working hours should not be more than eight hours per day or fifty-six hours per week when the vessel is at sea, nor more than eight hours per day and forty-eight hours per week when it is in port. The question of applying similar principles to vessels between 700 and 2,500 tons was left to each country. For vessels under 700 tons similar arrangements were recommended, but with great latitude.

The Conference appointed a special committee to examine these proposals. This Committee was composed of thirty members (ten from the Government group, ten from the Owners' group and ten from the Seamen's group). Canada was represented on the committee by Mr. Robb and Mr. Gauthier. It soon became evident that the committee would have great difficulty in agreeing on a report, and after a few votes the committee came to a deadlock. A sub-committee was appointed to endeavour to come to an understanding, as discussion proved difficult in such a large committee, and this sub-committee after long sittings reported agreement on a few points, and disagreed on others. Finally,

the committee by a very narrow majority passed a report recommending the adoption of a forty-eight-hour week, but providing that the crew should work on the seventh day and receive extra compensation. While the proposal carried in the Conference on the preliminary vote, it seemed probable that it would not receive the necessary two-thirds majority, and the British Government delegates moved a compromise resolution which, while recognizing the principle of the eight-hour day or forty-eight-hour week, proposed that the hours of labour on board ships at sea should be, for deck forty-eight hours per week, for deck hands fifty-six hours per week, and for stewards not to exceed ten hours in any one day; in port the working hours not to exceed forty-eight hours per week for all ratings. This agreement failed to carry, and when the final vote of the convention on hours of labour was taken the two-thirds majority was not obtained, and no agreement was reached.

In the discussion on this proposal the owners generally were against the forty-eight hours proposal and the seamen favoured it. The owners from France, the Argentine and the Netherlands supported the forty-eight hour proposal as their Governments had already passed legislation in this sense and they were naturally anxious to have other countries on the same basis. The French delegates from the three groups made a very strong fight on this point. The Government delegates generally supported the forty-eight hour proposal. The Governments of Denmark, Spain, Great Britain, Japan, Norway, Portugal and Siam voted against the proposal. The Governments voting against the proposal include the largest maritime nations and those owning the largest ocean tonnage.

One of the features of all the conventions and recommendations adopted by the Conference is that in every case it is stipulated that no measures will be taken by any country and no legislation passed without preliminary consultation with the owners and the seamen, and in carrying out the recommendations of the Conference it is always provided that use

should be made when possible of the joint committees of owners and seamen. This measure will undoubtedly tend to more harmonious relations between the employers and employees and will assist greatly in the carrying out of laws and regulations relating to shipping.

The discussions at the Conference were carried out in English and French and the delay incident on the translation of all the speeches caused the Conference to lag at times and prolonged the sittings.

### Draft Convention for Establishing Facilities for Finding Employment for Seamen

The General Conference of the International Labour Organization of the League of Nations,

Having been convened at Genoa by the Governing Body of the International Labour Office on the 15th day of June, 1920, and

Having decided upon the adoption of certain Proposals with regard to the "supervision of articles of agreement. Provision of facilities for finding employment for seamen. Application to seamen of the Convention and Recommendations adopted at Washington in November last, in regard to unemployment and unemployment insurance," which is the second item in the agenda for the Genoa Meeting of the Conference, and

Having determined that these proposals shall take the form of a draft international convention,

adopts the following Draft Convention for ratification by the Members of the International Labour Organization, in accordance with the Labour Part of the Treaty of Versailles of 28 June, 1919, of the Treaty of St. Germain of 10 September, 1919, of the Treaty of Neuilly of 27 November, 1919, and of the Treaty of Grand Trianon of 4 June, 1920.

#### ARTICLE 1.

For the purpose of this Convention, the term "seamen" includes all persons employed as members of the crew, except officers, employed on vessels engaged in maritime navigation.

#### ARTICLE 2.

The business of finding employment for seamen shall not be carried on by any person, company, or other agency, as a commercial enterprise for pecuniary gain; nor shall any fees be charged directly or indirectly by any person, company or other agency, for finding employment for seamen on any ship. The law of each country shall provide punishment for any violation of the provisions of this Article.

#### ARTICLE 3.

Notwithstanding the provisions of Article 2, any person, corporation or agency, which

has been carrying on the work of finding employment for seamen as a commercial enterprise for pecuniary gain, may be permitted to continue temporarily under Government license, provided that such work is carried on under Government inspection and supervision, so as to safeguard the rights of all concerned.

Each Member which ratifies this Convention agrees to take all practicable measures to abolish the practice of finding employment for seamen as a commercial enterprise for pecuniary gain as soon as possible.

#### ARTICLE 4.

Each Member which ratifies this Convention agrees that there shall be organized and maintained an efficient and adequate system of public employment offices for finding employment for seamen without charge. Such system may be organized and maintained, either: (1) by representative association of shipowners and seamen jointly under the control of a central authority, or (2) in the absence of such joint action, by the State itself.

The work of all such employment offices shall be administered by persons having practical maritime experience. Where such employment offices of different types exist, steps shall be taken to co-ordinate them on a national basis.

#### ARTICLE 5.

Committees consisting of an equal number of representatives of shipowners and seamen shall be constituted to advise on matters concerning the carrying on of these offices; the Government in each country may make provision for further defining the powers of these committees, particularly with reference to the committees' selection of their chairman from outside their own membership, to the degree of state supervision, and to the assistance which such committee shall have from persons interested in the welfare of seamen.

#### ARTICLE 6.

In connection with the employment of seamen, freedom of choice of ship shall be assured to seamen and freedom of choice of crew shall be assured to shipowners.

## ARTICLE 7.

The necessary guarantees for protecting all parties concerned shall be included in the contract of engagement of article of agreement, and proper facilities shall be assured to seamen for examining such contract or articles before and after signing.

## ARTICLE 8.

Each Member which ratifies this Convention will take steps to see that the facilities for employment of seamen provided for in this Convention shall, if necessary by means of public offices, be available for the seamen of all countries which ratify this Convention, and where the industrial conditions are generally the same.

## ARTICLE 9.

Each country shall decide for itself whether provisions similar to those in this Convention shall be put in force for deck-officers and engineer-officers.

## ARTICLE 10.

Each member which ratifies this Convention shall communicate to the International Labour Office all available information, statistical or otherwise, concerning unemployment among seamen and concerning the work of its seamen's employment agencies. The International Labour Office shall take steps to secure the co-ordination of the various national agencies for finding employment for seamen, in agreement with the governments or organizations concerned in each country.

## ARTICLE 11.

Each member of the International Labour Organization which ratifies this Convention engages to apply it to its colonies, protectorates and possessions which are not fully self-governing:

(a) Except where owing to the local conditions its provisions are inapplicable; or (b) Subject to such modifications as may be necessary to adapt its provisions to local conditions.

Each Member shall notify to the International Labour Office the action taken in respect of each of its colonies, protectorates and possessions which are not fully self-governing.

## ARTICLE 12.

The formal ratifications of this Convention, under the conditions set forth in Part XIII of the Treaty of Versailles of 28 June, 1919, of the Treaty of St. Germain of 10 September,

1919, of the Treaty of Neuilly of 27 November, 1919, and of the Treaty of the Grand Trianon of 4 June, 1920, shall be communicated to the Secretary General of the League of Nations for registration.

## ARTICLE 13.

As soon as the ratifications of two Members of the International Labour Organization have been registered with the Secretariat, the Secretary General of the League of Nations shall so notify all the Members of the International Labour Organization.

## ARTICLE 14.

This Convention shall come into force at the date on which such notification is issued by the Secretary General of the League of Nations, and it shall then be binding only upon those Members which have registered their ratifications with the Secretariat. Thereafter this Convention will come into force for any other Member at the date on which its ratification is registered with the Secretariat.

## ARTICLE 15.

Subject to the provisions of Article 14, each Member which ratifies this Convention agrees to bring its provisions into operation not later than 1 July, 1922, and to take such action as may be necessary to make these provisions effective.

## ARTICLE 16.

A Member which has ratified this Convention may denounce it after the expiration of five years from the date on which the Convention first comes into force by an act communicated to the Secretary General of the League of Nations for registration. Such denunciation shall not take effect until one year after the date on which it is registered with the Secretariat.

## ARTICLE 17.

At least once in ten years, the Governing Body of the International Labour Office shall present to the General Conference a report on the working of this Convention, and shall consider the desirability of placing on the Agenda of the Conference the question of its revision or modification.

## ARTICLE 18.

The French and English texts of this Convention shall both be authentic.

## Draft Convention Fixing the Minimum Age for Admission of Children to Employment at Sea

The General Conference of the International Labour Organization of the League of Nations,

Having been convened at Genoa by the Governing Body of the International Labour Office on the 15th day of June, 1920, and

Having decided upon the adoption of certain proposals with regard to the "application to seamen of the Convention adopted at Washington prohibiting the employment of children under 14 years of age," which is the third item in the agenda for the Genoa meeting of the Conference, and

Having determined that these proposals shall take the form of a draft international convention, adopts the following Draft Convention for ratification by the Members of the International Labour Organization, in accordance with the Labour Part of the Treaty of Versailles of 28th June, 1919, of the Treaty of St. Germain of 10th September, 1919, of the Treaty of Neuilly of 27th November, 1919, and of the Treaty of the Grand Trianon of 4th June, 1920.

### ARTICLE 1.

For the purpose of this Convention, the term "vessel" includes all ships and boats, of any nature whatsoever, engaged in maritime navigation, whether publicly or privately owned; it excludes ships of war.

### ARTICLE 2.

Children under the age of fourteen years shall not be employed on work on vessels other than vessels upon which only members of the same family are employed.

### ARTICLE 3.

The provisions of Article 2 shall not apply to work done by children on school-ships or training ships, provided that such work is approved and supervised by public authority.

### ARTICLE 4.

In order to facilitate the enforcement of the provisions of this Convention, every shipmaster shall be required to keep a register of all persons under the age of sixteen years employed on board his vessel, or a list of them in the articles of agreement, and of the dates of their births.

### ARTICLE 5.

Each Member of the International Labour Organization which ratifies this Convention

engages to apply it to its colonies, protectorates and possessions which are not fully self-governing:

(a) Except where owing to the local conditions its provisions are inapplicable; or

(b) Subject to such modifications as may be necessary to adapt its provisions to local conditions.

Each Member shall notify to the International Labour Office the action taken in respect to each of its colonies, protectorates and possessions which are not fully self-governing.

### ARTICLE 6.

The formal ratifications of this Convention, under the conditions set forth in Part XIII of the Treaty of Versailles of 28th June, 1919, of the Treaty of St. Germain of 10th September, 1919, of the Treaty of Neuilly of 27th November, 1919, and the Treaty of the Grand Trianon of 4th June, 1920, shall be communicated to the Secretary-General of the League of Nations for registration.

### ARTICLE 7.

As soon as the ratifications of two Members of the International Labour Organization have been registered with the Secretariat, the Secretary-General of the League of Nations shall so notify all the Members of the International Labour Organization.

### ARTICLE 8.

This Convention shall come into force at the date on which such notification is issued by the Secretary-General of the League of Nations, but it shall then be binding only upon those Members which have registered their ratifications with the Secretariat. Thereafter this Convention will come into force for any other Member at the date on which its ratification is registered with the Secretariat.

### ARTICLE 9.

Subject to the provisions of Article 8, each Member which ratifies this Convention agrees to bring its provisions into operation not later than 1st July, 1922, and to take such action as may be necessary to make these provisions effective.

### ARTICLE 10.

A Member which has ratified this Convention may denounce it after the expiration of ten years from the date on which the Convention

first comes into force, by an act communicated to the Secretary-General of the League of Nations for registration. Such denunciation shall not take effect until one year after the date on which it is registered with the Secretariat.

#### ARTICLE 11.

At least once in ten years, the Governing Body of the International Labour Office shall

present to the General Conference a report on the working of this Convention, and shall consider the desirability of placing on the agenda of the Conference the question of its revision or modification.

#### ARTICLE 12.

The French and English texts of this Convention shall both be authentic.

### Draft Convention concerning Unemployment Indemnity in Case of Loss or Foundering of the Ship

The General Conference of the International Labour Organization of the League of Nations,

Having been convened at Genoa by the Governing Body of the International Labour Office on the 15th day of June, 1920, and

Having decided upon the adoption of certain proposals with regard to the "Supervision of articles of agreement. Provision of facilities for finding employment for seamen. Application to seamen of the Convention and Recommendations adopted at Washington in November last in regard to unemployment and unemployment insurance," which is the second item in the agenda for the Genoa Meeting of the Conference, and

Having determined that these proposals shall take the form of a draft international convention,

adopts the following Draft Convention for ratification by the Members of the International Labour Organization, in accordance with the Labour Part of the Treaty of Versailles of 28 June, 1919, of the Treaty of St. Germain of 10 September, 1919, of the Treaty of Neuilly of 27 November, 1919, and of the Treaty of the Grand Trianon of 4 June, 1920.

#### ARTICLE 1.

For the purpose of this Convention, the term "seamen" includes all persons employed on any vessel engaged in maritime navigation.

For the purpose of this Convention, the term "vessel" includes all ships and boats, of any nature whatsoever, engaged in maritime navigation, whether publicly or privately owned; it excludes ships of war.

#### ARTICLE 2.

In every case of loss or foundering of any vessel, the owner or person with whom the seaman has contracted for service on board the vessel shall pay to each seaman employed thereon an indemnity against unemployment resulting from such loss or foundering.

This indemnity shall be paid for the days during which the seaman remains in fact unemployed at the same rate as the wages payable under the contract, but the total indemnity payable under this Convention to any one seaman shall not exceed two months' wages.

#### ARTICLE 3.

Seamen shall have the same remedies for recovering such indemnities as they have for recovering arrears of wages earned during the service.

#### ARTICLE 4.

Each Member of the International Labour Organization which ratifies this Convention engages to apply it to its colonies, protectorates and possessions which are not fully self-governing;

(a) Except where owing to the local conditions its provisions are inapplicable; or

(b) Subject to such modifications as may be necessary to adapt its provisions to local conditions.

Each Member shall notify to the International Labour Office the action taken in respect of each of its colonies, protectorates and possessions which are not fully self-governing.

#### ARTICLE 5.

The formal ratifications of this Convention, under the conditions set forth in Part XIII of the Treaty of Versailles of 28 June, 1919, of the Treaty of St. Germain of 10 September, 1919, of the Treaty of Neuilly of 27 November, 1919, and of the Treaty of the Grand Trianon of 4 June, 1920, shall be communicated to the Secretary General of the League of Nations for registration.

#### ARTICLE 6.

As soon as the ratifications of two Members of the International Labour Organization have

been registered with the Secretariat, the Secretary General of the League of Nations shall so notify all the Members of the International Labour Organization.

## ARTICLE 7.

This Convention shall come into force at the date on which such notification is issued by the Secretary General of the League of Nations, and it shall then be binding only upon those Members which have registered their ratifications with the Secretariat. Thereafter this Convention will come into force for any other Member at the date on which its ratification is registered with the Secretariat.

## ARTICLE 8.

Subject to the provisions of Article 7, each Member which ratifies this Convention agrees to bring its provisions into operation not later than 1 July, 1922, and to take such action as may be necessary to make these provisions effective.

## ARTICLE 9.

A Member which has ratified this Convention may denounce it after the expiration of five years from the date on which the Convention first comes into force, by an act communicated to the Secretary General of the League of Nations for registration. Such denunciation shall not take effect until one year after the date on which it is registered with the Secretariat.

## ARTICLE 10.

At least once in ten years, the Governing Body of the International Labour Office shall present to the General Conference a report on the working of this Convention, and shall consider the desirability of placing on the agenda of the Conference the question of its revision or modification.

## ARTICLE 11.

The French and English texts of this Convention shall both be authentic.

### Recommendation for Limiting Hours of Work in Inland Navigation

The General Conference of the International Labour Organization of the League of Nations,

Having been convened at Genoa by the Governing Body of the International Labour Office on the 15th day of June, 1920, and

Having decided upon the adoption of certain proposals with regard to the "Application to seamen of the Convention drafted at Washington, last November, limiting the hours of work in all industrial undertakings, including transport by sea and, under conditions to be determined, transport by inland waterways, to 8 hours in the day and 48 in the week. Consequential effects as regards manning and the regulations relating to accommodation and health on board ship," which is the first item in the agenda for the Genoa meeting of the Conference, and

Having determined that these proposals shall take the form of a recommendation,

adopts the following Recommendation, to be submitted to the Members of the International Labour Organization for consideration, with a view to effect being given to it by national legislation or otherwise, in accordance with the Labour Part of the Treaty of Versailles of 28 June, 1919, of the Treaty of St. Germain of 10 September, 1919, of the Treaty of Neuilly of 27 November, 1919, and of the Treaty of the Grand Trianon of 4 June, 1920:

In view of the declaration in the Treaties of Peace that all industrial communities should endeavour to adopt, so far as their special circumstances will permit, "an eight hours' day or a forty-eight hours' week as the

standard to be aimed at where it has not already been attained," the International Labour Conference recommends:

## I.

That each Member of the International Labour Organization should, if it has not already done so, enact legislation limiting in the direction of the above declaration in the Treaties of Peace the hours of work of workers employed in inland navigation, with such special provisions as may be necessary to meet the climatic and industrial conditions peculiar to inland navigation in each country, and after consultation with the organizations of employers and the organizations of workers concerned.

## II.

That those Members of the International Labour Organization whose territories are riparian to waterways, which are used in common by their boats should enter into agreements for limiting in the direction of the aforesaid declaration, the hours of work of persons employed in inland navigation on such waterways, after consultation with the organizations of employers and the organizations of workers concerned.

## III.

That such national legislation and such agreements between riparian countries should follow as far as possible the general lines of the

Draft Conventions concerning hours of work adopted by the International Labour Conference at Washington and at Genoa, with such exceptions as may be necessary for meeting the climatic or other special conditions of the countries concerned.

## IV.

That in the application of this Recommendation, each Member of the International Labour Organization should determine for itself, after consultation with the organizations of employers and the organizations of workers con-

cerned, what is inland navigation as distinguished from maritime navigation, and should communicate its determination to the International Labour Office.

## V.

That each Member of the International Labour Organization should report to the International Labour Office, within two years after the adjournment of the Genoa Conference, the progress which it has made in the direction of this Recommendation.

### Draft Recommendation for Limiting Hours of Work in Fishing Industry

The General Conference of the International Labour Organization of the League of Nations,

Having been convened at Genoa by the Governing Body of the International Labour Office on the 15th day of June, 1920, and

Having decided upon the adoption of certain proposals with regard to the "Application to seamen of the Convention drafted at Washington, last November, limiting the hours of work in all industrial undertakings, including transport by sea and, under conditions to be determined, transport by inland waterways, to 8 hours in the day and 48 in the week. Consequential effects as regards manning and the regulations relating to accommodation and health on board ship," which is the first item in the agenda for the Genoa meeting of the Conference, and

Having determined that these proposals shall take the form of a recommendation,

adopts the following Recommendation, to be submitted to the Members of the International Labour Organization for consideration, with

a view to effect being given to it by national legislation or otherwise, in accordance with the Labour Part of the Treaty of Versailles of 28 June, 1919, of the Treaty of St. Germain of 10 September, 1919, and of the Treaty of Neuilly-sur-Seine of 9 December, 1919, and of the Treaty of Trianon of 4 June, 1920:

"In view of the declaration in the Treaties of Peace that all industrial communities should endeavour to adopt so far as special circumstances will permit "An eight-hours day or a forty-eight hours week as the standard to be aimed at where it has not already been attained," the International Labour Conference recommends that each Member of the International Labour Organization enact legislation limiting in this direction the hours of work of all workers employed in the fishing industry, with such special provisions as may be necessary to meet the conditions peculiar to the fishing industry in each country; and that in framing such legislation each Government consult with the organizations of the employers and workers concerned."

### Recommendation concerning Unemployment Insurance for Seamen

The General Conference of the International Labour Organization of the League of Nations,

Having been convened at Genoa by the Governing Body of the International Labour Office on the 15th day of June, 1920, and

Having decided upon the adoption of certain proposals with regard to the "Supervision of articles of agreement. Provision of facilities for finding employment for seamen. Application to seamen of the Convention and Recommendations adopted at Washington in November last, in regard to unemployment and unemployment insurance", which is the second item in the agenda for the Genoa meeting of the Conference, and

Having determined that these proposals shall take the form of a recommendation,

adopts the following Recommendation, to be submitted to the Members of the International

Labour Organization for consideration, with a view to effect being given to it by national legislation or otherwise, in accordance with the Labour Part of the Treaty of Versailles of 28 June, 1919, of the Treaty of St. Germain of 10 September, 1919, of the Treaty of Neuilly of 27 November, 1919, and of the Treaty of the Grand Trianon of 4 June, 1920:

The General Conference, with a view to securing the application to seamen of Part III of the Recommendation concerning Unemployment adopted at Washington on 28 November, 1919, recommends that each Member of the International Labour Organization should establish for seamen an effective system of insurance against unemployment arising out of ship-wreck or any other cause, either by means of Government insurance or by means of Government subventions to industrial organizations whose rules provide for the payment of benefits to their unemployed members.

### Recommendation Concerning the Establishment of National Seamen's Codes

The General Conference of the International Labour Organization of the League of Nations,

Having been convened at Genoa by the Governing Body of the International Labour Office on the 15th day of June, 1920, and

Having decided upon the adoption of certain proposals with regard to a "consideration of the possibility of drawing up an International Seamen's Code," which is the fourth item in the agenda for the Genoa meeting of the Conference, and

Having determined that these proposals shall take the form of a recommendation,

adopts the following Recommendation, to be submitted to the Members of the International Labour Organization for consideration, with a view to effect being given to it by national legislation or otherwise, in accordance with the

Labour Part of the Treaty of Versailles of 28 June, 1919, of the Treaty of St. Germain of 10 September, 1919, of the Treaty of Neuilly of 27 November, 1919, and of the Treaty of the Grand Trianon of 4 June, 1920:

In order that, as a result of the clear and systematic codification of the national law in each country, the seamen of the world, whether engaged on ships of their own or foreign countries, may have a better comprehension of their rights and obligations, and in order that the task of establishing an International Seamen's Code may be advanced and facilitated, the International Labour Conference recommends that each Member of the International Labour Organization undertake the embodiment in a seamen's code of all its laws and regulations relating to seamen in their activities as such.

### Resolution Concerning Venereal Diseases

The International Seamen's Conference, recognizing the importance of taking active international measures for the prevention and treatment of venereal diseases in the mercantile marine, desires to urge upon the Health Section of the League of Nations the need for immediate attention to this subject,

And would recommend for special consideration:

(1) The provision of adequate facilities for the prevention and treatment of Venereal Diseases at all the principal ports:

(2) The inclusion of Venereal Diseases among the conditions for which free drugs

and treatment are provided for members of the mercantile marine;

(3) The dissemination of appropriate information on the subject to seafarers, and especially to those at training establishments;

(4) The provision of adequate facilities for recreation at all large ports under the administration of joint organizations representative of owners and seafarers.

They desire in addition, to call the special attention of the International Labour Organization to the importance of recommendation No. 4 about facilities for recreation.

### Resolution Concerning Unemployment Insurance

This Conference hereby resolves that the Joint Committee study the question of providing insurance against unemployment for seamen. For this purpose it should be assisted

by the Special Commission on Unemployment set up by the International Labour Office in accordance with the decisions at the Washington Conference.

### Resolution Regarding Articles of Agreement and International Seamen's Code

This Conference recognizes that the contracts of engagement of seamen in all countries contain two kinds of clauses:

- (1) clauses of a public character, inserted in the public interest;
- (2) clauses of a private character, inserted in the private interests of shipowners or seamen or both.

The Conference affirm the principles—

- (I) that so far as possible the clauses of a public character in seamen's contracts

should be the same in the different countries;

- (II) that the legal rights and obligations of seamen and shipowners, *inter se*, arising out of the clauses of a private character, should be placed upon a footing of strict equality;

- (III) that violations of provisions in contracts of engagement between seamen and employers should not be dealt with as criminal offences, unless they be violations of the clauses of a public

character maintaining public policy as distinguishing from private interests, and even then only at the instance of public authorities;

- (IV) that violations of provisions in contracts of engagements should be made the subject of procedure in civil courts only where such contracts have been freely entered into on both sides.

The Conference therefore invites the Inter-

national Labour Office, in its investigations preparing for the establishment of an International Seamen's Code dealing with contracts of engagement and discipline, to keep in view the application of the foregoing principles, and to embody them so far as possible in any drafts of an international code on either of these subjects which it may place before future meetings of the International Labour Conference.

### Resolutions to be Referred to Next Conference

The following Resolutions are to be placed on the Agenda for the 1921 Conference:

#### EMPLOYMENT OF CHILDREN.

- (1) "In conformity with Article 402, paragraph 3, of the Peace Treaty, the Conference decides to place on the Agenda of the next International Labour Conference the question of the prohibition of the employment of any person under the age of eighteen years as trimmer or stoker."

- (2) "In conformity with Article 402, paragraph 3, of the Peace Treaty, the Conference

decides to place on the Agenda of the next International Labour Conference the question of the compulsory medical examination to which all children employed on board ship should be submitted."

- (3) "In conformity with Article 402, paragraph 3, of the Peace Treaty, the Conference decides to place on the Agenda of the next International Labour Conference the following: 'Provision shall be made, in all harbours as far as possible, and in any case in those of the principal maritime towns, for the establishment of technical and complementary schools for seamen.'"

### ORGANIZATION OF THE INTERNATIONAL LABOUR OFFICE

**T**HE International Labour Office of the League of Nations, which is now established at Geneva, Switzerland, has begun the publication of a weekly bulletin which will contain the text of all formal official documents relating to the work of the office and to the International Labour Organization, miscellaneous information relating to the work of the office and the progress of its activities, and information as to the action taken by other countries with regard to the ratification of draft conventions and the legislative action taken to give effect to these conventions and to the recommendations of the International Labour Conference.

The first number of the Bulletin issued on September 8, contains an account of the organization of the International Labour Office. The office was established in January last with the appointment of Mr. Albert Thomas as Director by the Governing Body which had been appointed at the First Inter-

national Labour Conference at Washington. A staff was gradually collected until at present it comprises over one hundred persons of fourteen different nationalities. The office is organized under the following four divisions:

- (1) The Cabinet. This is under the control of Mr. Lemer cier of France, and comprises in addition to the personal secretariat of the Director, a special staff containing representatives of all the most important countries. Its duty is to keep the office constantly in touch with trade union movements in the different countries.

- (2) The Common Services. This division is under the immediate charge of the Deputy Director, Mr. H. B. Butler, and consists of five sections, the Establishment Section comprising the registry, the material branch and the central pool of typists and duplicators; the Section for Financial Relations and Commercial or quasi-commercial activities of the office, such as the sale of publica-

tions, etc., and three other sections dealing respectively with Examination and Control of Expenditure, Accountancy, and Staff questions.

(3) The Diplomatic Division. This is one of the two administrative divisions which deal with the administrative work laid upon the office by the various provisions of Part XIII of the Peace Treaty. It is responsible for the preparation, organization and secretarial arrangements for the meetings of the conference, the work in connection with the ratification of conventions and action taken on recommendations, the secretarial work of the Governing Body and official communications with the secretariat of the League of Nations.

(4) The Scientific Division. This is the second administrative division referred to above and deals especially with the work allocated to the office by Article 396 of the Treaty, namely, the collection and distribution of information on all subjects relating to the international adjustment of conditions of industrial life and labour.

In order to assist the Administrative

Divisions a number of Technical Services have been established in charge of recognized experts. These deal with (a) Emigration and Unemployment, under the charge of Mr. Varlez (Belgium) assisted by Mr. Motta (Spain) and Mr. Fuss (Belgium). (b) Agricultural Questions, under Dr. di Palma Castiglione (Italy) assisted by Dr. Riddell, late Deputy-Minister of Labour of Ontario. (c) Maritime Questions, under Mr. Randall (Great Britain). (d) Russian and Bolshevik Questions, under Dr. Pardo (Italy). (e) Social Insurance, under Mr. de Roode (Netherlands) with Mr. Tixier (France), the latter dealing specially with questions relating to men disabled in the war. (f) Co-operation, under Dr. Fauquet (France). (g) Industrial Hygiene, under Dr. Carozzi (Italy) assisted by Mr. Dhers (France). A special technical service has been constituted to deal with the enquiry into production decided upon by the Governing Body at its Genoa meeting. Four national correspondents have been appointed at Paris, London, Rome and Washington, respectively.

## TRADES AND LABOUR CONGRESS OF CANADA

### Summary of the Proceedings of the Thirty-sixth Annual Convention

THE thirty-sixth annual convention of the Trades and Labour Congress of Canada was held in the city of Windsor, Ont., from September 13 to 18. The sessions were held in the Armouries, the opening meeting being presided over by Mr. F. J. Claney, president of the local trades and labour council, who welcomed the delegates on behalf of organized labour. The civic welcome was extended by His Worship Mayor E. B. Winter. Col. Walter M. McGregor, president of the Chamber of Commerce, spoke on behalf of the commercial and industrial interests, and the Honorable Walter R. Rollo, minister of labour and

health of Ontario, who was a delegate to the convention, extended the provincial welcome. Mr. W. C. Kennedy, M. P., of Windsor, also contributed to the opening proceedings. Mr. Tom Moore, president of the congress replied to the addresses of welcome, after which the report of the credential committee was presented. The final report of this committee, which was adopted, showed 524 delegates entitled to seats, 38 representing international central organizations, one representing a labour federation, 56 representing 31 trades and labour councils, and 429 representing 269 local branch unions, and four fraternal dele-

gates. Three bodies which were represented for the first time were the American Federation of Teachers, the Dominion Postal Clerks' Association and the Associated Federal Employees (civil servants in the employ of the Dominion Government at Ottawa). At the opening session, the customary committees were appointed, and Mr. A. J. Haydon, of Ottawa, was named as associate secretary and Mr. Gus Franceq, of Montreal, as translator. At the afternoon session of the first day's proceedings the Right Hon. Arthur Meighen, Prime Minister of the Dominion, at the invitation of the local arrangements committee, addressed the convention. The speech of the Prime Minister was as follows:

I am here by the invitation of your committee to address this annual meeting of the Trades and Labour Congress, and my first problem is to determine what line of thought I can follow that will be in keeping with the courtesy of the invitation and at the same time of some little value. I am not a member of your organization—though I claim to be something of a labourer and that in more fields than one. There was a time, indeed, when I think you would have admitted me to membership, but I suppose my wanderings since have placed me outside the waiting list. Anyway, I want to talk, if you will permit me as one of your members this afternoon, whatever you may think about it, I do not think there is any big divide between you and me.

This congress represents organized labour—not all, but a large portion of organized labour in Canada. As I understand the position, it stands somewhat in the same relation to organized labour in Canada as the American Federation of Labour stands to organized labour in the United States. Labour organizations as a national institution have existed as going concerns for about seventy years on this continent. In all that time, their aims and their activities have altered some, but on the whole they have altered very little. Their principles were summarized in 1881 at the first convention of the Federation of Organized Trades and Labour of the United States and Canada which met in Pittsburg in that year. They were stated as follows:

“Legal incorporation, prohibition of child labour under fourteen years, uniform apprentice laws, a national eight-hour law, prison labour reform, abolition of the truck system, mechanics' lien, abolition of conspiracy laws as applied to labour organizations, a national bureau of labour statistics,

a protective tariff, an anti-contract immigration law, all trades and labour organizations to secure proper representation in all law-making bodies by means of the ballot.”

The consistency of purpose with which organized labour has adhered to almost all these objects is one of the secrets of its power. When Samuel Gompers was first elected President of the American Federation of Labour in 1885 that body had about 150,000 members. He is President still and its membership is over 3,000,000.

To put the central purpose of these great organizations in a word it is this: to raise the status of the worker. That the status of the worker has been in these years improved there is, I think, no doubt; his means of education, his chance of recreation, the safety of his craft, the regularity of his employment, the general standard of his living, all these things are better, though there is much yet to be done. In this work the labour organizations of the world have undoubtedly played their part. I think most of you will admit that at times labour organizations made mistakes—let that be granted, but the best and strongest of them have not made great mistakes, and they have managed to get a lot done and a lot that was worth while. It would have been better for the world, in my opinion, better for the labouring class and better for every class if attention had been given sooner to helping the lot of the low-waged toiler; there was more to be done for him by concerted action, more to be done by the state than people thought there was. That was true of every country in the world and it is true to-day.

What is the best way to make further progress? It is by steady determined movement along the lines that have brought results in the past—by exposing the facts and educating public opinion, by loyalty to your organizations, subordinated to that higher loyalty to country which alone gives your organizations respect and power; by studying the advances made in other countries in order to keep abreast or better than abreast at home, by regard for the rights of others, by fulfilment of contracts, by dependance on the ballot, by seeking success only through the power of public approval. These are the methods and the only methods that have in the past brought advance without reaction. I believe they are the principles upon which the Trades and Labour Congress has relied and intends to rely.

You tell me: “Yes, we have been working along these lines for years and we have accomplished much, but after all our progress has been slow.” You say there is a wide spread still between the wealth of the few and the wealth of the many. I admit you are correct. But, in coming to conclusions on this subject, there are some very vital facts to be kept in mind. I am going to recite some of these facts and ask you to ponder over them.

I am going to ask you to regard yourselves as in positions of responsibility, as indeed in the ultimate, all the people of this country are, and to realize that responsibility. I want you to give to undoubted facts the serious reflection they deserve.

In the first place, we could never, as a nation, hold up our end or hold any place at all in the world to-day, except by reliance upon individual energy, individual effort and individual reward. If there are any in this country who ever relied upon any communistic system as possible or practicable or even thinkable in competition with countries that hold fast to the energising principle of individual endeavour, they must surely have had their theories rudely shattered by recent experiments in Europe. Where the so-called theory of production for use has been put into practice in substitution for production for profit it has resulted practically in no production at all and has ended in chaos and starvation.

Secondly, there is a wide disparity between the industry and ability, and especially between the good judgment of individuals—a disparity which no legislation can remove. There are unfortunately, also varying currents of fortune which legislation at best can only partially control.

Thirdly, the intervening territory between rich and poor is covered in this young country with a multitude that comprises the great majority of our people. Nowhere in the world is there so large a proportion of those who are neither rich nor poor as there is in Canada; those who stand on the happiest ground of all, the middle ground of moderate means and comfort. To increase that proportion should be the aim of government.

Lastly, Canada is only one nation out of many; it is a young and relatively small nation struggling to make its place in a throng of competing countries. We must make our place and hold our place in the world's industrial progress, if we intend to maintain a good average prosperity among our people, to sustain our credit and pay our debts. I am in complete sympathy with you that no place in the world's industrial competition must be secured at the price of injustice to wage earners, and on the other hand, wage earners must also agree that any disability placed upon Canadian industries as compared with industries in other countries, and particularly in the United States, would react first and most severely upon the wage earners of Canada themselves.

If I were speaking in the presence of employers, I would emphasize the increasing need of regard for the condition of the workers and their fair remuneration. Speaking, as I am now, before representatives of labour, I want to appeal most strongly for consideration on your part of the indispensable requirement of Canadian employers not to be placed at a disadvantage with the employers of other countries with whom they are in competition. The

way to get better condition all around is for this country to work in co-operation with other countries of the world, and this course Canada has pursued; indeed, in this direction Canada has led the way. I will refer to that subject more fully later on.

You ask me now what has the Government done to show its good faith with labour. I will go over some things that we have accomplished and I will have to do so rapidly, as only a few moments of my time remain. It has taken from the ranks of organized labour a Vice-President of one of its largest organizations and has given him Cabinet rank. Never has a Labour Minister in Canada been accorded a more generous confidence from his colleagues and a freer hand in the administration of labour problems than has Senator Gideon Robertson. There is no Department that requires ability of a higher type. A practical labour man, for the first time in our history, has been in charge, and after two years' trial I believe the almost universal feeling of Canada is that he has discharged his task with admirable fairness and with extraordinary capacity. He has done honour to the ranks from which he came and has compelled the confidence of men and women of every class.

Senator Robertson's policy has been to work in co-operation with responsible labour organizations and with organizations of employers as well. The Government, on his advice, has had labour definitely represented on no less than sixteen boards or commissions performing public service. This was done at the request of organized labour, and on the whole it has produced good results. Growing out of a conference with employees and employers in 1918 a scheme of technical education was evolved and ten million dollars was appropriated to be spread over the succeeding ten years, for the better training, with the assistance of the state, of Canadian mechanics, and this big undertaking so long looked forward to by Canadian workmen is administered by the Department of Labour.

As a further result of this conference, the Government decided in 1918 that the time had come when the system of private employment agencies should give place to a Government system operating on a much wider interprovincial scale and without expense or imposition upon those seeking employment. Legislation was introduced and passed enabling the Labour Department to establish employment agencies throughout the Dominion in co-operation with the provinces. These offices were at once installed and the result that has attended the work has been pronounced and creditable. Between the First of March, 1919, and the First of August, 1920, 551,817 men and women were placed in employment through the Government offices, and all without charge to them. This is at the rate of almost 1200 per day, and surely this is an achievement whose practical value both to the workmen and to the country is at least worth recording. Because

the system is Canadian-wide it takes care of demands for labour in one province that can be supplied from another. Without the Government offices, this could not very well be done and much lack of employment as well as lack of labour resulted. Twenty-three thousand skilled workmen have been in this way transferred from one province to another, and consequent unemployment has been avoided. The policy thus established has been requested by labour itself and has been of undoubted value to labour, and I sincerely hope will continue to be of service to all.

I want to mention another fact: At the conference out of which the League of Nations was constituted the Canadian representation included a representative of labour. The Secretary of this Congress went as Adviser to the Prime Minister, and it is no information to this audience when I say that mainly through the efforts of the Canadian Prime Minister, assisted materially by Mr. Draper, the Labour Conventions were finally inserted in the proceedings of that Conference and a real and useful step was taken toward the recognition by the great nations of the world of what is now called the "Magna Charta" of labour. To the terms of that Labour Convention this Government and the other Governments joining in the convention are bound. You know what those terms are. You know they are cardinal principles of organized labour. The only way in which advance can be made toward their adoption is by the concurrent progress of great industrial nations along the lines set down. A first and a big step was taken when those Labour Conventions were agreed to, and the duty of Canada is the duty of all concurring countries, to seek to make practical progress toward putting into effect its terms by co-operation with the other countries concerned. In this way, real progress can be made and I know no other way in which it can be made.

One word more and I am done. No government can bring about equality or uniformity of wealth without bringing disaster to all, but the aim of government should be to bring about equality of opportunity. By the principle of equality of opportunity the present government will steadfastly abide. Every citizen who has the energy and ambition should have a chance to earn and receive adequate compensation for service rendered. Do not forget as well that after compensation exceeds the value of service rendered, stagnation of industry and unemployment are bound to follow.

Credit is the basis of industry and commerce, and the credit of a country and of its industries is maintained in proportion to the security of property which is the regard of industry. Capital we need in Canada, and the more capital we have invested here the more plentiful employment will be, and capital will come if we have comparative industrial peace and progress. The co-operation of workmen is therefore vitally important to themselves and to the nation.

Workmen who are anxious to advance their own interest cannot afford to ally themselves either industrially or politically with those forces which seek to introduce into Canada policies and ideas that have brought destruction, misery and death wherever they have prevailed. The Government of this country has steadfastly set its face and will steadfastly set its face against these influences abroad in this and other lands that aim to destroy respect for constituted lawful authority, civil and religious liberty, property rights and family relations. The Government of Canada does intend that labour organizations conducted sanely and reasonably will command and receive its friendly co-operation, and so conducted they will command and receive the respect of the public. The Government's duty is to protect the whole community against dictation from any section whether of employers or employees.

I hope and believe that the established policy of the Trade Unions affiliated with the Trades Congress of Canada is in keeping with these views, and I say to you: Guard and honour the integrity of your organizations, win by merit the respect and confidence of public opinion and you cannot fail of reward.

#### Report of the Executive Council

The executive council, composed of the president, three vice-presidents and the secretary-treasurer, submitted a report of the matters which had engaged their attention during the past year, and made a number of recommendations for the consideration of the convention. The following is a synopsis of the report, the various subjects being numbered as in the original: (1) Annual Interview with Dominion Government—This section mentioned the various items which had been brought before the Government on January 8, 1920, under instructions from the 1919 convention. (2) Legislation—Under this caption reference was made to the legislation enacted at the 1919 and 1920 sessions of the Dominion Parliament, the subject matter of which had been discussed at previous conventions. (3) Migration—Among other matters the executive reported the defeat of the proposed amendments to the Immigration Act, and in regard to Oriental Immigration recommended reiteration of the decision of Congress of last year favouring the abolition of the head tax and substitution of a system of admission of

not more than would always provide that the number of orientals in Canada would not exceed one for each thousand of population. (4) Industrial Disputes Investigation Act—The request for the extension of this law to cover employees not now included, and for the removal of the penalties clauses, was reported upon, as were also the amendments made to the Act at last session of Parliament. The executive asked for a decision on this subject that would enable them to act clearly in the interests of the majority of the wage-earners. (5) Political Action—On this subject the executive expressed gratification at the success of the labour political party in certain sections of the Dominion, but pointed out the desirability of the congress retaining to itself the proving of its platform. Recommendation was made that support be given to the labour party by members of affiliated unions and that all affiliates of the congress pledge themselves to assist in securing such legislation as is approved at the annual conventions. (6) Tariff—The recommendation on this matter was in favour of the creation of a tariff board, on which organized labour should be represented, with full powers to deal with tariff matters. (7) Provincial Executives and Federations of Labour—In this section suggestions were made for the guidance of the provincial bodies in dealing with legislative matters, and the executive reported on having last year placed legislative representatives in certain provinces as a means of having proper consideration given to the requests laid before the provincial legislatures. It was recommended that this practice be extended. Owing to the British Columbia Federation of Labour having returned its charter, the executive recommended that a provincial executive committee be elected. (8) Western Representative—Action on this matter was reported, as was also the granting of financial assistance to the trades councils in Vancouver and Winnipeg. (9) Permanent Headquarters—Under this caption report was made of the purchase in Ottawa of a building at

a cost of \$18,250, for congress offices. (10) Winnipeg Trial and Defence—Report was made of the efforts of the executive in conjunction with the Winnipeg Trades and Labour Council to secure the release of the eight men who were convicted on the charge of seditious conspiracy. The recommendation was made that the previous policy of the congress be followed until the fullest freedom be assured for all workers to continue their legitimate activities as members of trade unions, and that the men at present in prison in Winnipeg for offences under the law of sedition should be given their liberty. (11) Unauthorized Strikes and Trade Agreements—Reference was made to the invariable failure of unauthorized strikes and the executive suggested the strict observance of agreements, and where such is not intended it stated that no agreement should be made. (12) International Labour Organization—This section deals with the establishment of the International Labour office, its composition and functions, and the part that Canada has taken in its deliberations. (13) International Federation of Trade Unions—Affiliation with the International Federation of Trade Unions was reported and six months per capita had been paid. (14) International Affiliations and Special Conference of International Representatives—Under this heading report was made of the efforts of the executive to have each international organization make a place on their respective executive boards for a member of a Canadian local. A special conference of international representatives was held in Ottawa on May 10 at which matters of vital interest to the organized workers were discussed and recommendations made to combat opposition labour movements. Report was also made of the expenditures in Canada by certain international organizations, which were far in excess of the receipts from the Canadian membership, and it was reported that during the past year the most harmonious relations have existed between the Congress and the affiliated international organizations. (15) Industrial Councils—This section

contained a report of the formation of an industrial council for Canada to deal with labour questions in the building trades. (16) Reports from Representatives on Government Commissions, etc.—Under this caption were given reports from the various congress representatives on the Fire Prevention Association, Commission on Co-Ordination of Labour Laws, Council for Scientific and Industrial Research and Soldiers' Civil Re-Establishment. (17) Destructionist Propaganda—The attention of the delegates was directed by the executive to the propaganda being carried on in Canada by the One Big Union advocates and other groups with the view of destroying the trade union movement. Reference was made to various declarations which had been made by those who were opposed to the policy of the labour movement as represented by the congress and it was suggested that efforts be made to solidify the movement against the attacks which had been made against it. (18) Co-operation with Soldiers' Organizations—The executive had co-operated on many occasions with the executive of the Great War Veterans Association and the president had appeared before the special committee of parliament dealing with the re-establishment of returned soldiers and presented the decisions of the congress in regard thereto. (19) This portion of the report contained

(a) reference to the effort made to bring about an amalgamation of the Amalgamated Postal Workers and the Federated Association of Letter Carriers, (b) approval of the action of the president in attending public meetings of the Independent Labour Party, (c) a letter from Major-General W. L. Hughes, director of penitentiaries, asking for the co-operation of the congress in an endeavour to place prisoners in useful occupations manufacturing articles required for state use only, (d) memorial to the late Allan Studholme, (e) reports on the postponing of the conference *re* the issuance of a charter to a federation of policemen's unions, (f) report on the efforts made to effect amalgamation of

the International Brotherhood of Railway Clerks and the Canadian Brotherhood of Railroad Employees. (20) Organization and Publicity—During the year many public meetings had been addressed by officers of the congress for the purpose of presenting the aims and objects of the organization. Assistance in organizing work had been rendered in several localities, three central organizing bodies had affiliated with the congress and a number of trades councils had been chartered. (21) Amendments to the Constitution—Several amendments to the constitution were recommended for the purpose of facilitating the work of the congress. Property having been acquired, provisions were suggested for the management of the property. (22) Cost of Living—Reference was made to the advance in the price of commodities and the efforts made to secure reliable data on the subject. Co-operative methods were commended, and it was stated that the services of the Board of Commerce would be solicited to ascertain to what extent labour costs are responsible for the increased prices. (23) Government Departmental Matters—Under this caption reference was made to the representations which had been made to the government departments relating to legislation, etc. In addition a number of labour disputes had been brought to the attention of the government, and it was reported that the aid rendered had materially assisted in adjustments being made. In concluding the report the executive among other things pointed out that the work of the congress could only achieve the measure of success in proportion as it received the support of the majority of workers represented and as the demands made give due consideration to other sections of the Canadian people. It is therefore necessary, the executive stated, to exercise the greatest toleration of the expressions of opinions of others, and to guard zealously the established organizations and conditions.

### Reports from Provincial Executive Committees

Each of the four provincial executive committees submitted a statement of the activities for the year and reported on the legislation which had been enacted. The following is a summary of the reports:

**ONTARIO**—On February 23, the executive had waited on the Provincial Government and presented the various matters on which legislation was desired. Much important legislation had been passed, among which were (1) increased allowances in the Workmen's Compensation Act, (2) mothers' pensions, (3) minimum wage law, (4) local option in taxation, (5) abolition of property qualification for municipal office, and (6) one day off in seven for civic firemen. Accompanying the report of the executive was a statement from Mr. Wm. Stevenson, who was the representative of the congress during the 1920 session of the Ontario Legislature.

**QUEBEC**—The executive for this province referred to the labour troubles which had occurred during the past year and called attention to the constant increase in the cost of living. The international trade union movement had made much progress, notwithstanding the dual movements. In the month of January the executive had met the provincial cabinet and presented the resolution calling for desired legislation. Reference was made to the appointment of a commission with the view of drafting a new plan of administration for the city of Montreal. On this commission the Montreal trades council was represented by two delegates. This report was also supplemented by a statement from the congress representative who had acted during the latter part of the session of the Legislature.

**MANITOBA**—The executive in opening referred to the chaotic conditions existing at the close of 1919, the strike which occurred earlier in the year having had a disastrous effect on the organized workers. During the present year con-

ditions had improved, and an organizing campaign had resulted in the membership of the international unions being increased; also many local unions had re-affiliated with the trades and labour council. Reference was made to the legislation which had been secured, among which were increases in the scale of payments under the Workmen's Compensation Act, and to the success of labour candidates in the municipal and provincial elections.

**SASKATCHEWAN**—On October 8, 1919, the executive had appeared before the provincial cabinet and submitted certain matters for consideration. The government had not accepted the proposal for proportional representation in provincial elections, but had given the cities power to adopt the principle for municipal elections. Amendments had been made to the Factories Act bringing grain elevators under the law providing for inspection of elevators and prohibiting persons under 16 years of age from operating passenger elevators. Another amendment to the act limited the hours of labour for female workers and youths to 48 per week. A bureau of labour and industries had been created directed and administered by a member of the Cabinet through a commissioner. Hotels and restaurants had been brought under the Minimum Wage Act for Women. The question of having a provincial federation of labour had been considered, but it was apparent that such would not be a success until there was an increase in the number of local unions in the province.

**BRITISH COLUMBIA**—Included in the report was a statement on British Columbia legislation which gave a resumé of laws passed by the Legislature of direct interest to labour organizations. A law had been passed to facilitate the formation of co-operative societies, and the factory act had been amended to cover laundries, bringing Chinese establishments within the scope of the law. The semi-monthly payment of wages act had been amended providing that wages of employees in coal mines are to be

paid on Saturdays. Amendment was also made to the weekly half-holiday law, and increases in payments under the workmen's compensation act had been granted. The department of industries which was created in 1919 was designed to loan money to citizens desiring to start new industries. One of the conditions under which loans are made is that returned men are given the preference of employment and Asiatics are excluded. On July 1, 1920, the Mothers' Pension Act was put into force. Reference was made to the Government Employment Offices, which, it was stated, had already justified their existence.

#### **Reports from Provincial Federations of Labour**

There are three provincial federations of labour operating under charters from the congress, two of which submitted reports, the federation of Nova Scotia failing to send in a report. The following is a brief synopsis of the reports presented:

**ALBERTA**—Many requests for legislation were presented to the provincial cabinet council on January 26-27. The legislature had amended the Workmen's Compensation Act (1) to include industries not covered, upon application of either employers or employees, (2) empowering the board administering the law to make regulations as to safety devices, (3) increasing indemnities for fatal accidents by fifty per cent. The Coal Mines Act was amended providing for the payment of wages, and the Factories Act had been altered to permit of determining the minimum wages for persons under 18 years of age and for any female employed in places covered by the act, and also to regulate the hours of labour and to determine what number employed may be apprentices. Reference was made to the work of the international unions in consolidating their forces, and it was stated that the international trade union membership is larger than ever before.

**NEW BRUNSWICK**—The federation had, on March 12, waited on the provincial cabinet and presented the demands for legislation as approved by the annual convention. Amendments had been secured to the Workmen's Compensation Act providing for (1) full medical aid, hospital and nursing to injured persons, (2) increase in the amount allowed for funeral expenses, (3) increase in the allowances to widows and children, and also to injured persons. The Factories Act was amended making the employer responsible for damages for accidents to children under the age stipulated in the act. A law requiring the licensing of plumbers went into effect in August, 1920. A promise had been made by the Minister of Public Works that government contracts would contain a clause providing for the payment of union or prevailing wages.

Reports from Fraternal Delegates—Included in the report were statements from Mr. J. A. McClelland, fraternal delegate to the American Federation of Labour, held in Montreal in June, 1920, and from Mrs. Kathleen Derry, fraternal delegate to the first International Working Women's Congress, held in Washington, D.C., in October, 1919.

#### **Report of Committee on Officers' Reports**

The first item which the committee on officers' reports presented was that in reference to the tariff, the recommendation of the executive council being approved. The committee in reporting on item No. 1 (Annual Interview with Dominion Government) recommended that in future only the executive council should present the requests of the congress, except where expert advice is desired, then the council could call in affiliated labour representatives. This recommendation was adopted. Concerning the section dealing with political action, concurrence was recommended. Opposition was offered, some delegates desiring the congress to itself become a political organization. After considerable discussion the previous question

was called, and on a vote being taken the report as submitted was adopted. In reference to item No. 2 (Legislation) the committee disapproved of the prohibition in regard to contributions to election funds as contained in the Franchise Act and was also opposed to the provisions of the Naturalization Law. The committee also referred to the provisions of the Peace Treaty in regard to the eight-hour day, and stated that as the representatives of the Dominion Government had signed the treaty it was the duty of that government to see that legislation on this question was adopted; it was recommended that the executive council urge the government to enact the provisions of the Peace Treaty, and if necessary to do this that they ask for amendment to the British North America Act. The Committee also recommended that in presenting figures of trade union membership in Canada only those reporting international membership should be included in reports to congress. Approval was expressed of a recommendation made at a special conference of international representatives that suggested that in order to combat the O. B. U. and I. W. W. the different international organizations should take steps to immediately enforce the provisions of their constitutions, where such provide for expulsion or other penalties for those who endeavour to undermine the regularly constituted trade union movement. On the question of prison reform the committee recommended that an investigation of prison conditions be requested and that a representative of the congress be included on the commission. The president pointed out that the platform of the congress stood for prohibition of prison labour in competition with free labour. It was agreed that, notwithstanding this declaration, the representative of the congress on the proposed commission would not be bound by any previous policy on prison labour. Regarding a memorial to the late Allan Studholme, the committee recommended that a suitable tablet be placed in the Legislative building, as well as a bronze tablet in the Labour

Temple in Hamilton. In reference to police unions, it was recommended that a conference of representatives from such bodies be called by the executive council to form a police federation. It was also recommended that efforts be continued towards amalgamation of the Canadian Brotherhood of Railroad Employees with the Brotherhood of Railway and Steamship Clerks. The committee approved of co-operative methods in an endeavour to reduce the cost of living, and made the statement that it believed that price manipulation was responsible for considerable of the high prices. The remainder of the report of the executive council was concurred in, as were also the reports of the provincial executives, federations of labour and fraternal delegates.

#### Report of Secretary-Treasurer

Mr. P. M. Draper, secretary-treasurer, submitted his report showing the financial transactions for the year ended September 1, 1920. The total receipts, including the balance from the previous year, amounted to \$46,827.32; the expenditures, including the purchase price of the headquarters building in Ottawa, were \$44,969.50, leaving a balance, less \$10,000 in reserve fund and \$5,000 in victory bonds, of \$1,857.82. The total assets of the congress were reported to be \$35,107.82. The secretary also reported the membership at 173,463, an increase of 12,858 for the year. Six trades and labour councils and six federal labour unions had been chartered, and the new affiliations included the Dominion Postal Clerks' Association, American Federation of Teachers and the United Textile Workers. The report was referred to the audit committee, who reported as having found the accounts correct in every detail. This report was approved by the convention without discussion.

#### Committee on Constitution and Law

Several resolutions seeking to change the constitution of the congress were presented and referred to the committee on Constitution and Law. Of the resolu-

tions submitted, the committee was in favour of one which sought to decrease the representation at conventions. After a number of amendments had been moved, all of which, together with the report of the committee, were defeated, the former representation was confirmed. Among the resolutions defeated were (1) asking that the office of secretary-treasurer be made a permanent one with salary, the incumbent to devote his entire time to the position, (2) that any person holding a salaried position in the gift of the Crown be ineligible for any executive position in the congress, (3) That the railroad fares of delegates be pooled, (4) asking for wider autonomy for craft unions, (5) that all local unions chartered by the congress affiliate with chartered trades and labour councils, (6) seeking to increase the vice-presidents from three to five and asking that elections be conducted under the proportional representation plan, (7) setting a regular time for the nomination and election of officers, (8) asking that efforts be made to have the international organizations adopt a system whereby workers could transfer from one union to another, (9) asking that trades and labour councils be given the right to take strike votes, (10) that an agenda be prepared previous to conventions and submitted to affiliated bodies. The committee recommended that a resolution asking that the congress assume complete control over fire-fighters be referred for consideration to the executive council which should take up the question with the International Association of Fire-fighters, but in no case was the autonomy of this Association to be interfered with. This recommendation was adopted. A number of suggested amendments to the constitution contained in the report of the executive council were also referred to the committee on constitution and law. One of these amendments, which was approved, gives a majority of the executive council power to revoke the charter of any chartered body. The section as adopted reads as follows:

The Congress Executive Council shall have power by a majority vote of its members to suspend or revoke the charter of any Provincial Federation of Labour, Trades and Labour Council or Federal Union chartered by the Congress who have wilfully violated the Constitution, or where the officers have encouraged or advocated secession from international unions or assisted in forming independent or dual organizations, and the books, papers, funds and properties shall be surrendered, by the organization against which action is taken, to the Executive Council, to be held in trust pending the restoration of the charter suspended or revoked, when it shall be restored to the original or new organization.

A recommendation was approved that the committee on ways and means shall consider the financial standing of the congress and recommend any extraordinary expenditure not otherwise provided for. A new section was added to the constitution to provide for a board of trustees made necessary by the acquisition of real estate. The bylaws governing federal unions were amended by providing that such bodies shall consist of not less than ten members. (Seven was the former number).

#### Report of Ways and Means Committee

The report of the Ways and Means Committee recommended that the salary of the president be increased to \$4,500. An amendment was made that the salary be \$4,000. This was seconded by the president. Another amendment proposed that the amount be placed at \$5,000, and this was adopted. The remainder of the report, as amended, provided for the following appropriations: The secretary, \$2,000; assistant secretary for the convention \$100; sergeant-at-arms and caretakers, \$50 each; translator, \$80; messenger, \$50; fraternal delegate to the American Federation of Labour, \$600; fraternal delegate to the British Trades Union Congress, \$1,500; payment of the hotel expenses of the four fraternal delegates who were in attendance at the convention. The question of the salary of the stenographer was referred to the executive council to decide. It was decided to increase the per diem allowance to officers and

provincial vice-presidents and members of executive committees when engaged on congress work away from home from \$5 to not less than \$7 per day. The necessary changes were ordered to be made in the constitution.

### Report of Immigration Committee

The sections in the report of the executive council dealing with immigration matters, as well as a number of resolutions on the same subject, were referred to the committee on immigration. This committee regretted the retirement of Mr. W. R. Trotter as immigration authority, and recommended that a successor be appointed. Regarding the establishment of a central emigration empire authority, the committee concurred in the recommendation of the executive that such a board be established and that a labour man be nominated for a place on such board. The committee approved of the suggestion of the executive that any female household workers brought to this country should be brought through the Canadian Council of Immigration of Women and that Government grants to other organizations should be discontinued. Concurrence was also expressed in the recommendation that the work of the council should be extended to cover all work of this nature. Recommendation was made that legislation should be secured to prohibit private employers from recruiting workers from outside of Canada and advancing funds to such persons to reach and enter Canada; the committee further recommended in this matter the institution of a system of co-operation between the Dominion Employment Bureaus and the British or other government labour exchanges.

The Committee commended the activities of the Executive in their endeavour to secure what they considered the removal of objectionable clauses in the immigration laws, under which British born subjects, residents of Canada, may be deported, and recommended that they continue their activities along these lines to the end that these clauses be elimin-

ated from the immigration laws of the Dominion of Canada. On the question of Oriental immigration, the committee concurred in the recommendation of the executive that the congress reiterate the decision of last year, which was to abolish entirely the head tax and substitute a system of admission of not more than would always provide that the number of Orientals in Canada did not exceed one for each thousand of the population. A resolution pointing out that as there had been considerable immigration to Canada, and as the outlook for the winter was not reassuring, the government shall provide food and fuel, if the necessity arises, was sent to the executive council to be brought to the attention of the Government. The committee approved of a resolution that the Dominion Government compel shipping companies to have their immigration literature endorsed by a committee, and that organized labour be represented on such body, and expressed the opinion that the matter could be best handled through the Canadian Government employment bureaus and the British employment or labour exchanges. A resolution asking that all Mexicans now in Canada be deported, and that they be debarred from re-entering the country on the ground that they are undesirable citizens, was not concurred in, the committee being of the opinion that the matter might involve international complications. The report of the immigration committee was adopted without amendment.

### Report of Union Label Committee

The Union Label Committee had a number of resolutions referred to it for consideration. One of these resolutions called attention to the strike of the cigarmakers in Hamilton, Toronto, London and Montreal, and asked that the congress reaffirm support to the strikers and urged that every union member in Canada purchase only those cigars which are contained in the boxes bearing the cigarmakers' blue union label. The committee approved of the resolution

and it was adopted, as was also one seeking to have a law passed compelling cigar manufacturers to designate on the boxes how the cigars contained therein were made, by hand, mould or machine. The committee endorsed a resolution demanding all members of trade unions requiring work performed by building trades to have such done by union labour and contractors who are fair to organized labour, (2) that members of trade unions employed in factories, workshops, stores, etc., use their influence to have all buildings, alterations or repairs performed by union workers employed by firms recognized as friendly to organized labour, and (3) that all trades and labour councils in localities where union label departments do not exist be requested to establish such a department with the view of advancing the union label agitation and to popularize the sale of union made or fair goods, and that such bodies keep in touch with each other in order to carry on effective union label propaganda. Attention was called to the label of the United Brotherhood of Carpenters and Joiners, which appears on union made office fittings and furniture, and a request made that this label be given support. The committee recommended, and it was approved, that the executive council continue its efforts to secure legislation legalizing and assuring protection to registered trade union labels. The committee reported that of the delegates' credentials examined to ascertain whether they were carrying out the resolution of the congress which required each delegate to have three distinct union labels on his person, 215 met the full requirements. The committee, however, reported that they had no doubt that many more delegates met the decision of the congress on this point, but owing to the local secretaries failing to properly fill out the credentials the number of labels were not recorded. The committee, therefore, recommended that hereafter credentials should specify the name of the labels worn by the respective delegates. The report and recommendations were adopted.

Mr. John J. Manning, of Washington,

D.C., secretary of the Union Label Trades Department of the American Federation of Labour, during one of the sessions addressed the delegates on the power of the union label in bettering conditions and urged the great necessity of the money earned by union men being spent in the purchase of union labelled goods. A request was also made for support in the formation of union label leagues.

#### Fraternal Greetings

All of the fraternal delegates delivered fraternal messages to the congress. Mr. Wm. G. Shea, of Louisville, Ky., fraternal delegate from the American Federation of Labour, in extending greetings to the delegates, referred to the efforts now being made in the United States to introduce the American plan (open shop), and stated that the organized workers were endeavouring to prevent the system of the individual contract. Reference was made to the failure of the United States to enter the League of Nations, but the speaker believed the result of the pending elections would place men in power who would bring that country into line with the other great nations.

Mrs. Kathleen Derry, of Hamilton, Ont., fraternal delegate from the International Congress of Working Women, gave an account of the inception of the congress, which was formed in Washington, D. C., at the time of the organization of the International Labour Conference. The functions of the organization were outlined and a plea was made for support from the women of Canada.

Miss Mabel Gillespie, of Boston, Mass., fraternal delegate from the National Women's Trade Union League, gave an account of the League since its inception in 1903, and reported on the progress which had been made in organizing the women into trade unions and the efforts made to secure legislation in the interests of women. An invitation was extended to the congress to send a fraternal delegate to the next meeting of the league, and a desire was expressed for

a closer affiliation of the women of Canada with those of the United States in an endeavour to better their conditions.

Mr. John C. Davidson, of the Iron Founders of Great Britain, member of the British House of Commons for Sheffield, in extending greeting from the organized workers of Great Britain, referred to the loyalty of the workers to the nation during the war, and the efforts now being made by them to secure the full products of their toil. Speaking of the success of the labour party, which was composed of all classes who subscribed to the principles of that party, Mr. Davidson claimed that if called upon the party would be capable of governing. He recounted the progress which had been made in raising the early status of the workers, and referring to the threatened coal strike, stated that coal was one of the greatest natural resources of Great Britain. Enormous profits had been made from coal during the war. The workers claimed that no man had a right to make profits from this commodity, and were determined that it should cease. Mr. Davidson was opposed to direct action, and counselled his hearers against such a procedure, but urged them to organize politically in order to secure the demands that they could not secure through their economic power. In warning the Canadian workers against disruptive movements, the speaker suggested that every organized worker should be a missionary to add to the membership.

Mr. Eugene J. Brock, extended fraternal greetings from the Detroit Federation of Labour. He stated that the manufacturers of Detroit in order to secure the open shop and to reduce wages had laid off 60,000 men, and he asked that this be made known in order to prevent Canadian workmen from seeking work in that city.

Mr. Joseph Marks, of Toronto, secretary of the Ontario Independent Labour Party, addressed the convention urging increased support for independent political action.

Mr. Colis Lövely, of Boston, president of the Boot and Shoe Workers' Union, and Mr. Chas. B. Stillman, of Wilmette, Ill., president of the American Federation of Teachers, who were visitors at the convention, both delivered addresses, the latter making an appeal for the election to boards of education of friends of education from among the workers and asking for assistance from organized labour for the teachers in their efforts to organize.

During one of the sessions presentations were made as follows: To the fraternal delegates from the British Trades Union Congress and the American Federation of Labour, gold watches; to the delegates from the National Women's Trade Union League and the International Congress of Working Women, gold brooches. Presentations were also made to the officers of the local arrangements committee.

#### Refusal to Hear Ex-President

On the reassembling of the convention on Thursday afternoon ex-president J. C. Watters, who was a delegate, asked as a question of privilege to be allowed to bring before the delegates the action of President Moore in not allowing him to carry out the mandate of the congress as a delegate to the Peace Conference. The president submitted the question to the convention, and it was defeated by a vote of 66 to 179. A roll call vote was demanded, the request being again defeated by a vote of 101 yeas to 235 nays. After the vote was announced the president explained that the matter had been dealt with by the 1919 convention. He had not declared the request out of order, preferring to give the delegates an opportunity to express their wishes on the matter.

#### In Favour of Old Age Pensions

A resolution asking for the enactment of old age pension laws in the various provinces was endorsed as follows:

Whereas, there is no margin between the workers' wages and the cost of living, so that it is impossible to make any provision for old age; whereas, many of the aged toilers spend their declining years in charitable institutions because they have not the wherewithal to purchase the necessities of life; therefore, be it resolved, that this Trades and Labour Congress in Convention go on record as in favour of old age pensions and petition the various provincial Governments to enact such legislation.

### **Opposed to Congress becoming Labour Party**

The Resolution Committee reported adversely on the following resolution and recommended its deletion from the records:

Whereas, the Trades and Labour Congress of Canada claims to be the legislative mouth-piece of organized Labour; and, whereas, it has been the custom to interview the powers that be in the position of begging, cap in hand, to enact legislation; and, whereas, Congress has grown to manhood and self-respect; therefore, resolved that this Congress meeting at Windsor, go on record that the time has arrived to enter the political field and elect men of the working class to represent them in our legislative halls, Provincial and Federal, to enable the legislative demands of the Congress to be placed on the Statute books and eliminate the beggarly cap in hand function which has become an annual farce.

The resolution was strongly opposed by a number of delegates, the assertion being made that it was an effort to have the congress become a political organization. Opposition was also offered at the phraseology used. It was moved in amendment and approved that the following be added to the report of the committee: "That this congress reaffirm its decision on political action as adopted at the Ottawa convention." (This was a recommendation of the executive council for a labour party in Canada upon the lines of the British labour party to be formed provincially independent of the congress.)

### **Opposed to a Special Convention**

The Toronto District Labour Council in the following resolution presented a demand for special convention of organizations of workers in Canada:

Whereas the exigencies of the day prove that in all countries the workers are being forced more than ever to wield their economic power in a political crisis, and, whereas, it must be patent to all that the workers in Canada, in the absence of national autonomy, are hopelessly incapable of wielding their power; Be it therefore resolved, that a special convention be called by the incoming executive, before January 1st, 1921, of all the industrial organizations of the workers in Canada, to consider what steps should be taken to secure economic unity.

The committee on Resolutions recommended non-concurrence, and without any debate this was agreed to.

### **Not in Favour of an Irish Republic**

Two resolutions on the Irish question were submitted, asking that the congress endorse the demand for an Irish republic. The committee to whom they were referred recommended that on this question the decision of the 1919 convention be re-affirmed. (This decision was in favour of Dominion home rule for Ireland.) After a heated debate, in which a number of delegates took part, the report of the committee was adopted.

### **Against Industrial System of Production**

Toronto District Labour Council submitted a resolution asking that the Canadian workers align themselves with workers' political parties in other countries with the view of securing an industrial system of production. The resolution which was defeated without any one supporting it was as follows:

Whereas owing to the closing down of many factories, industrial chaos and economic insecurity has resulted, and at the same time the people of the world are in need of products, thus proving the inability of the powers that be to satisfactorily re-establish harmonious relations, and whereas, in the past the political activities of the workers in Canada have been purely reformist and opportunist, therefore be it resolved that this Congress considers the time has arrived for the Canadian workers to align themselves with the workers' political parties in other countries, and that they base their platform on advocacy of an industrial system of production for use instead of for profit, and be it further resolved, that this Congress grant \$5,000 to the Provincial Executives of the Labour Party to be spent for educational purposes to attain this object.

### Reaffirmed Attitude Towards Russia

Three resolutions on the Russian situation were presented (1) expressing determination against further interference in the internal affairs of Soviet Russia, (2) endorsing the attitude of British labour in Russian affairs, and (3) (a) pledging the Canadian workers to resist any attempt of the Dominion Government to support intervention in Russia and (b) to assist the Soviet Government against the designs of the Imperialist Governments of the world. The committee who dealt with these resolutions recommended re-affirmation of the action of congress of last year, but disapproved of the clause 3b. A lengthy discussion ensued on the resolutions, during which it was stated that their adoption pledged the Canadian workers to direct action. The debate was closed on the call for the previous question, and the report of the committee was adopted by an overwhelming vote.

(The action of the congress last year on the Russian situation was recorded in the adoption of the following resolution:

"That the Congress go on record as against military intervention in countries which after the termination of the world conflict changed the form of their social structure, and further expresses itself in favour of the self-determination of nations.")

### Do not Want Industrial Unionism

The following resolution seeking to change the present form of organization was presented by the Toronto District Labour Council:

Whereas our present form of organization has failed to organize the great mass of the workers, be it resolved, that this Congress goes on record as in favour, without further delay, of an industrial form of organization, and be it further resolved, that this resolution be sent to the American Federation of Labour and all central bodies in Canada and the United States.

The committee disapproved of the above proposal and the convention without any debate adopted the report.

Another resolution from the same source asked for the appointment of a

committee to investigate the actions of the executive council in regard to the Winnipeg strike and the trial of the workers involved. This resolution was also defeated by a large vote.

### Civil Service Demands

The Associated Federal Employees of Ottawa, an organization represented for the first time, submitted four resolutions for consideration: (1) Asking for the establishment of a national council for the Federal Government service, together with departmental councils for the various departments, in accordance with the provisions of the Whitley Councils as adopted in the British Government service, (2) that immediate steps be taken to properly grade the service and to raise the salary scales to an adequate standard with the view of abolishing the bonus system as at present in force, (3) that the Government's arrangement with Griffenhagen and associates to re-organize the civil service be terminated forthwith, and that the re-organization of the service be conducted by boards composed equally of representatives of the Government, the Civil Service Commission and the employees, assisted in an advisory capacity for each class of employment by representatives of similar classes in private employ. These three resolutions were adopted with the addition of the following resolve: "That the attention of the Prime Minister be directed to the serious situation which has developed in the postal service, which threatens to result in the disruption of this great public utility; and that in the opinion of this congress if this disruption is brought about the Government will have to assume the responsibility because of its failure to pay its employees a living wage and provide a Whitley council scheme for the adjustment of civil servants' grievances." The fourth resolution asked that a suitable superannuation measure for civil servants be at once devised and that the Government be urged to make it effective at the next session of Parliament. The committee reported that the movers had

withdrawn this request and accordingly no action was taken. Another resolution adopted had reference to the discharged employees from the printing bureau and requested that former employees not superannuated for life be permitted to make application for positions in the bureau as vacancies may occur.

#### **In favour of Light Beer**

A resolution was presented asking that the Nova Scotia Legislature be asked to enact legislation establishing saloons in the cities and towns of the province. The committee in reporting on this request, submitted the following as a substitute:

That the Congress reiterate its former decision as adopted in 1918, and that a protest be entered against the order-in-council giving to municipalities the power to restrict the sale of temperance beer in standard hotels, and that the Ontario Government be requested to repeal the present order-in-council.

(The decision of the congress in 1918 was in favour of legislation by the Dominion and Provincial Governments allowing the manufacture and sale anywhere in Canada of any beverage not exceeding two and a half per cent of alcohol by weight.)

#### **Industrial Disputes Investigation Act**

As previously mentioned in the report of the executive council, reference was made to the Industrial Disputes Investigation Act, and the demands which had been made from many sources for amendments to the law. A number of resolutions bearing on the same subject were also introduced. One of these requested that the act be extended to all industries upon the application of either an organization, an employer or a municipality, provided that the compulsory clauses restraining the right to strike pending decision be eliminated and the act so amended as to preserve full liberty of employees and employers during the investigation. Another was in favour of the act being extended to municipal employees, including police

and firemen, and asking that the provincial executive committees of the congress press for legislation which will permit of the law being applicable to such workers. A resolution was also submitted asking that a recommendation be made to the Minister of Labour that, in selecting chairmen for boards under the Industrial Disputes Investigation Act, he appoint men with the widest knowledge of economic problems. The committee recommended concurrence in the report of the executive council and also in the resolutions dealing with the Industrial Disputes Investigation Act, and recommended that the executive council draw up the necessary amendments in harmony with the resolutions submitted and present them to the proper authorities. After a brief discussion the report was adopted, only one delegate voting against it.

#### **Opposed to a National Organization of Municipal and Government Employees**

A resolution asking for the formation of a national organization of municipal and government employees was reported against by the committee on Resolutions, who presented a substitute that the congress and trades and labour councils and the international organizations be requested to take the necessary steps to organize all civic and government employees. It was moved in amendment that there be added to the report that the executive council convene a meeting of civic employees, not chartered by international organizations, to consider the formation of a national organization. By a standing vote the report of the committee was adopted by 93 to 69.

A resolution in favour of organizing office help and clerical staffs was adopted with instructions to the executive council and trades and labour councils to carry out the spirit of the resolution.

#### **Condemn the Ontario Government**

The following resolution was submitted by the Niagara District Trades Federation:

Whereas, during the year 1919, and until May 1st of this year, organized labour, as represented by the Niagara District Trades Federation, was working under an agreement with the Hydro-Electric Power Commission on the Chippawa Development, one of the conditions in said agreement was the basic 8-hour day and 44-hour week; and, whereas, the Niagara District Trades Federation submitted a proposed agreement to the Hydro Electric Power Commission early in this year, to go into effect May 1st, asking for the continuance of the 8-hour day and the 44-hour week, with certain increases in the rates of wages; and, whereas, the Hydro Electric Power Commission repudiated the 8-hour day and the 44-hour week, and substituted therefore a ten hour day and a sixty hour week; and, whereas, the Hydro-Electric Power Commission is a body appointed by, and subject to the Government of the Province of Ontario; therefore, be it resolved, that this Convention assembled go on record as vigorously opposing the action of the Hydro Electric Power Commission in repudiating the 8-hour day and the 44 hour week, and the substitution of the ten hour day and the sixty hour week; and, be it further resolved, that we condemn the Government of the Province of Ontario for not taking any action, or making any public statement, upon the report of the Special Committee appointed to investigate the dispute between the Hydro Electric Power Commission and the Niagara District Trades Federation, and for allowing the Hydro Electric Power Commission to put into effect on Provincial Government work conditions of labour other than which is prevalent in the district where the work is being carried on; and, be it further resolved, that we demand of the Government of the Province of Ontario and of the Hydro Electric Power Commission to put into effect at once, on the Chippawa Development work, such rates of wages as are established in that district, and working hours as are established in that district and as were in force on the Chippawa Development during the season of 1919.

The committee recommended concurrence in the demand, but it was not voted on until there had been a debate on the subject, during which the Ontario Government and the labour members thereof, as well as the Hydro-Electric Commission, were strongly criticized for their course in this matter. Mayor McBride, who was a delegate, defended his attitude, stating that he had done all he could to have the basic eight-hour day put into operation. Hon.

Walter Rollo, Minister of Labour in the Ontario Cabinet, also defended himself against the attacks made upon him. He stated that not all of the labour members were members of organized labour, and pointed out the limitations of the Government in dealing with the Hydro-Electric Commission. He asked if it was the desire to upset the labour connection with the Government and throw away all the benefits which had resulted. The president who took part in the discussion, dissented from the position of the Labour Minister in the matter of giving up established labour conditions for social betterment legislation. He read correspondence between himself and Sir Adam Beck, chairman of the Hydro-Electric Commission, regarding the existing conditions on the development work. The president stated that he was opposed to the repressive measures now in force, and if Sir Adam did not desire to give the workers what was desired in working conditions, then he should resign. The committee's report approving of the resolution was adopted.

#### Want Eight-Hour Day Legalized

A resolution seeking to have the eight-hour day legalized as adopted by the Peace Conference was approved by the convention. The resolution as adopted was as follows:

Whereas, all the allied countries interested in the Treaty of Peace of Versailles have adopted the principle of the eight-hour day, which principle was submitted by the Congress of organized labour then held at Paris; whereas, the construction trades benefit more or less from the eight-hour day, owing to their organization; whereas, several other trades, and even a great number of women and children, do not have the benefit of the eight-hour day; whereas, the Federal Government of our country claims that it is not within its jurisdiction to pass a law legalizing the eight-hour day, the federal authorities claiming that this power belongs to the Provincial Government; whereas, since the signature of the Treaty of Peace, certain European countries have passed a law legalizing the eight-hour day; Resolved, that the Executive of the Congress join the Provincial Executives in having the eight-hour day legalized.

### **Desire Government to Control Cold Storages**

Approval was given to a resolution seeking Government control of cold storages and the period for which food stuffs should be stored. The resolution was as follows:

Whereas, cold storage plants are necessary for the conservation of food products, so as to keep them in good condition for the people, but not, as is now being done by profiteers and speculators, to accumulate foodstuffs, which are allowed to remain in storage for months and years, thus becoming unfit for use; whereas, the above is done for the sole purpose of keeping the prices high and out of the reach of the workers; be it resolved that the Trades and Labour Congress of Canada instruct its executive to ask the Government for the enactment of a law placing such cold storage plants under the control, or making them the property, of the Government. At the said time, such a law should provide for the length of time during which foodstuffs are to be kept in storage.

A resolution was also adopted requesting that the Federal Government enact and enforce rigid legislation to eliminate profiteering and to prevent both corporations and individuals from realizing excessive profits.

### **Want Inquiry on Coal Embargo**

The Resolutions Committee recommended against a resolution asking that no embargo be placed on Canadian coal. The resolution read as follows:

Whereas, it has been intimated that the Federal Government will place an embargo on Canadian coal to foreign countries; and, whereas, in our opinion, the proposed embargo portends unemployment and hardship for those working in and about our coal mines, particularly; and, whereas, such a restriction is a distinct interference with the personal freedom of Canadian coal operators to sell their coal to whom and wheresoever they desire; and principally because the proposed embargo is calculated to prevent the investment of capital in our coal areas, and will consequently retard the development of our coal fields; be it resolved, that we place ourselves on record as strongly and unalterably opposed to the existence or continuance of any such embargo.

An amendment was introduced, and adopted, asking that the matter be referred to the executive council to secure further information to carry out the intent of the proposal.

Another resolution adopted asked that coal produced by miners be registered at 2,000 lbs., the same as the selling ton, and that a law to this effect be passed.

It was also decided that a demand should be made on the Nova Scotia Legislature to have the Coal Mine Regulation Act amended so as to permit underground miners to elect the inspectors.

### **Approve of Land Values Taxation**

The congress gave endorsement to a resolution asking for the adoption of a policy having for its object the abolition of land speculation through the medium of land values taxation, and instructing the executive council to petition the Dominion Government to adopt a tax sufficient to destroy permanently every element of speculation in land.

### **Want State Control of Mines and Railways**

A resolution was introduced demanding that the Dominion Government create a board of management for the democratic control of the government railway system, with equal representation of the Government, the community and the workers. The Committee on Resolutions submitted the following substitute, which was adopted without discussion:

Whereas the mines and railroads of Canada are of the utmost importance to the people of Canada, and the conditions under which these two utilities are operated have very far-reaching effects upon the people of the Dominion; And, whereas, profiteering in mines and railroads is indefensible and not in the interests of the people; And whereas it has come to be recognized that the investment of labour is at least as important as the investment of Capital; now therefore, be it resolved, that this Trades and Labour Congress call upon the Government to remove from private ownership and control all mines and railways within the Dominion of Canada and place them under the control of a board of management upon which the employees shall have equal representation.

### Seek Increased Compensation Benefits

Three resolutions were presented asking for amendments to workmen's compensation laws. From Quebec came a demand for the extension of the law to all workers in the province, for an increase in accident benefits from 50 to 75 per cent and for the raising of the indemnity from \$2,500 to \$3,000. This was approved and sent to the Quebec provincial executive committee. The second demand was from Nova Scotia, and requested increases in the benefits under the law as follows: (1) compensation to be raised from 55 per cent of earnings to 75 per cent; (2) a minimum of \$15 per week for partial disability, (3) in fatal accidents that each child under 16 years of age be given \$15 per month, irrespective of the number of children in the family. This proposal was adopted, as was also a request that the Ontario act have a provision inserted making it compulsory that all accidents be reported by the employer, whether the person injured leaves work as a result or not. A request was approved that policemen be included in the list of persons to whom compensation laws apply.

### Other Resolutions Adopted

Nearly one hundred resolutions received within the prescribed time limit were sent to the Resolutions Committee for consideration and report. Seven resolutions from the Toronto District Trades and Labour Council over which there was a question of their being forwarded according to the constitution, were on motion received and sent to the committee. Some twenty other resolutions over which there was no doubt of the time of their despatch were passed on to the Resolution Committee for their information only. The subject matter of these belated resolutions was, however, in most cases covered by resolutions regularly submitted. Of the resolutions not previously dealt with in this review of the congress proceedings, those on the following subjects were

adopted, no account being taken of those not approved:

Asking for provisions in the Canadian Copyright Act to give the Canadian printers equal protection to that afforded United States printers by their legislation.

In favour of supporting the appeal of the Canadian Daily Newspaper Association to the Dominion Government for legislation requiring each newsprint manufacturer to supply his proportion of the domestic requirements of newsprint at prices not higher than the current contract prices to foreign countries.

In favour of fair wage clauses in all provincial Government contracts.

Asking that the Department of Railways and Canals make an investigation as to wages and working conditions in the district where the new Welland ship canal is being constructed and that similar wages and conditions that may be found prevailing be put into operation on the canal work.

To make compulsory the removal of old wall-paper before new is applied.

In favour of the denaturing of wood alcohol used in painting and varnishing.

In favour of the discontinuance of the use of spraying machines in applying paint.

In favour of laws to govern the manning of vessels and changes in conditions governing pilotage.

In favour of 28 days constituting a month in the matter of pay for seamen and that seamen should be 12 months at sea before being qualified as able seamen.

In favour of the organized railroad employees being given representation on the board of management of government railways by the appointment of a *bona fide* trade unionist.

In favour of proper water and lavatory accommodations for railroad watchmen and signalmen.

In favour of express cars being kept in proper sanitary condition, etc.

In favour of a law prohibiting any drug clerk from filling prescriptions un-

less he holds a license as a qualified druggist.

Against the re-enactment of the wartime anti-loafing law.

In favour of the double platoon system for firemen, twelve hours per day and 72 in the week, no firemen being required to work more than 12 consecutive hours.

In favour of a question of trade jurisdiction concerning the pattern makers and railway carmen being referred to the American Federation of Labour.

In favour of assisting the Canadian National Railway employees in securing an increase in the minimum pension allowance from \$20 to \$50 per month.

In favour of a uniform barbers' license law in the various provinces.

In favour of all the provinces adopting exclusive state insurance to be administered by a board on which labour shall be represented.

In favour of legislation nullifying contracts between employer and employees which conflict with the right of collective bargaining.

Against the issuing of licenses to detective agencies which engage in strike-breaking activities.

In favour of an investigation into the working conditions in the rubber factories.

In favour of having furnace work properly performed.

In favour of the proper inspection of scaffolds by a qualified inspector.

In favour of the Government developing coal fields, owned and operated by the Government, with the view of making Canada independent of outside supplies.

In favour of the names being published of all persons who have food confiscated as unfit for food, and that a law be passed making it an offence for so holding food supplies, punishment to be imprisonment.

In favour of the enforcement of the provisions of the Ontario Building

Trades Protective Act, especially in the rural districts.

In favour of asking the Dominion Government to utilize the fleet of barges and dredges lying idle in the port of Sorel.

In favour of every worker being ensured at least one day's rest in seven.

In favour of the Dominion Government inserting provision for the payment of fair wages in all orders for supplies and equipment.

In favour of legislation similar to that in the British Trades Disputes Act re injunctions and seizures of trade union funds.

#### **Referred to Executive Council**

The following items were referred to the executive council at the request of the committee on Resolutions without any recommendations:

Opposing the increase in postage on all classes of publications and newspapers.

Asking that the medical and surgical profession be undertaken by the state.

Asking for a Royal Commission to investigate the conditions in the sugar refinery industries.

The question of excluding the Canadian Brotherhood of Railroad Employees from representation at Congress Conventions was referred to the executive council, as negotiations for an amalgamation with the Brotherhood of Railway Clerks were under way.

#### **List of Officers Elected**

The result of the elections was that the executive council of last year was returned to office, the president and secretary being elected by acclamation. The full list of officers for 1920-21 is as follows:

President—Tom Moore, Organizer, United Brotherhood of Carpenters and Joiners, Ottawa, Ont.

Vice-Presidents—Arthur Martel, member of Executive Board, United Brother-

hood of Carpenters and Joiners, Montreal, Que.; H. J. Halford, 4th Vice-President, Journeymen Barbers' International Union, Hamilton, Ont.; Alexander McAndrew, member of the United Brotherhood of Maintenance-of-Way Employees and Railway Shop Labourers, Moosejaw, Sask.

Secretary-Treasurer—P. M. Draper, member International Typographical Union, Ottawa, Ont.

Provincial Executives—Quebec: chairman, Gus Francq, Montreal; committee, J. A. Belland and A. Bouchard, Montreal; Omer Fleury, Quebec. Ontario: chairman, Jas. J. Ralph, Toronto; committee, Alf. Carrol, Windsor; W. J. Jeffrey, Sault Ste. Marie; Donald Deare, Ottawa. Manitoba: Chairman, H. J. W. Powers, Winnipeg; committee, Wm. McCormick, H. Pickett and E. Robinson, all of Winnipeg. Saskatchewan: chairman, James Somerville, Moosejaw; com-

mittee, R. J. Moore, Saskatoon; J. A. Regan, Regina; A. McKinnon, Moosejaw. British Columbia: Chairman, E. S. Woodward, Victoria. The selection of the remaining members of the committee was left to the Executive Council.

The provinces of Nova Scotia, New Brunswick and Alberta have organized Provincial Federations of Labour, which are chartered by the Congress to deal with legislative matters.

Fraternal delegate to the American Federation of Labour—W. F. Bush, member of Executive Board, United Garment Workers of America, Toronto, Ont.

Fraternal delegate to the British Trades Union Congress—John T. Foster, business agent, International Association of Machinists, Montreal, Que.

Winnipeg, Man., was selected as the convention city for 1921.

## ANNUAL CONVENTION OF THE NATIONAL AND CATHOLIC UNIONS

**T**HE third annual convention of the National and Catholic Unions was held at Chicoutimi, Quebec, on July 17-20. There were 225 delegates present representing 120 local groups with a membership of over 40,000. Forty-nine resolutions on a large variety of subjects were passed by the convention. A recommendation was made to the executive for the establishment of sick benefit funds. It was recommended that there be included in the agenda of the next convention consideration of the question of forming industrial councils composed of employers and employees, for the establishment of working conditions and the adjustment of grievances.

The confiscation by the government of profits unduly made during the war was advocated. It was resolved to urge the provincial government to pass legislation prohibiting the employment of women in abattoirs, tanning and currying shops and wholesale warehouses; to appoint two inspectors, one for the Dis-

trict of Quebec and one for the District of Montreal, for the enforcement of the Stationary Engineers' Act, with the power to prosecute employers and employees violating this Act; to pass a law similar to that of the Province of Ontario concerning the construction of steam boilers, but allowing any butter and cheese maker a certificate of competency to act as engineer in butter and cheese factories, and providing that the offices of the examiners of stationary engineers at Quebec and Montreal be equipped with accessories necessary for a practical examination of each candidate; to arrange for the recognition of Quebec stationary engineers' certificates in other provinces; to enforce the law relating to hygiene in barber shops, and to put a stop to Sunday work in those shops; to establish a compulsory court of arbitration for the settlement of disputes concerning firemen, policemen and waterworks employees, the arbitrators to be appointed by the parties to the dis-

pute. The foundation of technical schools in each industrial locality, and the provision of courses in practical and theoretical plumbing and heating in these schools was advocated. It was resolved to ask the provincial government to alter the regulations governing evening courses in localities other than Montreal and Quebec by reducing the registration for each teacher, the size of the classes and the number of courses per week, by increasing the teachers' salaries and putting the courses for female workers on the same footing as those for males.

It was resolved to ask the Dominion government to give more efficient help to the shipbuilding industry, and to request the provincial and federal governments to amend their housing legislation in various respects. The Executive was instructed to ask the provincial and federal governments for a law giving trade unions corporate rights similar to the French law of March 20, 1920, which allows trade unions to take legal action in the interests of the trade, to make contracts with other unions, societies or concerns, and to use union labels. It was claimed that trade unions should have the right to own and dispose of real estate and personal goods, and it was desired that certain of the property of the unions especially the benefit funds be declared not seizable. It was declared that several laws affecting labour were ineffective owing to defective means in their enforcement.

Among these were mentioned laws relating to the inspection of scaffolding, temperance and prohibition, the observance of the Lord's Day and the inspection of industrial establishments, as the officers having these matters in charge only acted upon the receipt of complaints from individuals often acting against their own interests. The convention held that the government officers should lay the charges themselves and conduct the prosecution and should have all the staff necessary for this purpose. It was decided to form a new organization to be known as the National Federation of the Catholic Workers of Canada, and the Executive was instructed to prepare a constitution and by-laws which will be submitted to the various groups of workers who are eligible for membership and will come into force after adoption by the next convention.

A resolution was passed approving the principle of proportional representation and urging the provincial and federal governments to appoint a commission composed of the various sections of the community to consider the matter and that delegate Alfred Charpentier, of Montreal, be the representative of the National and Catholic Unions upon said commission.

Mr. G. Hébert, Quebec, was re-elected president, and Mr. J. A. Pin, Quebec, was re-elected secretary.

Hull was selected as the place for the next annual convention.

### CONVENTION OF THE FEDERATED ASSOCIATION OF LETTER CARRIERS

**T**HE Federated Association of Letter Carriers held its nineteenth biennial convention at Peterborough, Ont., on September 2-4, there being present about 70 delegates from various parts of Canada. It was presided over by the president, Mr. Pierre Ménard, of Montreal.

It was decided that the convention should be held annually instead of every

two years; that there be one delegate from each of the three sections in Canada—east, centre, and west—to the Dominion Trades and Labour Congress; that the per capita tax be increased to \$6 a year; that an organizing secretary be appointed with power to adjust disputes between the branches and the Post Office Department; that a communication be address-

ed to the proper authority suggesting a reduction in the number of periodicals now being carried free; and that Panama hats be supplied every two years, for summer wear, and black Persian lamb every five years, for winter wear. It was also decided, instead of asking for an appeal board, to request the Government to grant a Whitley coun-

cil to adjust salaries, the decision of the council to be final rather than that of the Civil Service Commission; to ask the Government to furnish free transportation on the government-owned railways during vacation periods; to request the Post Office Department to supply street railway passes instead of tickets; to provide money in lieu of boots, and to set a limit of 35 pounds on any delivery.

### THE BRITISH TRADES UNION CONGRESS

**T**HE fifty-second annual Trades Union Congress of the United Kingdom was held at Portsmouth on September 6-11. There were more than 950 delegates representing about 6,500,000 workers. Mr. J. H. Thomas, M.P., presided at the Congress. In the opening address the chairman referred to the Council of Action which he said had been called into being for one object only, to secure the independence of Poland and peace with Russia. He described it as a challenge to the constitution, but added "Dangerous as was our remedy—and it was dangerous—it was justified by the result." Reference was made by him to the situation in Mesopotamia and to the Irish question, for the solution of which he advocated Dominion home rule.

The Congress adopted a scheme for setting up a General Council to supersede the Parliamentary Committee. The council will consist of 32 members, including two women, representing 18 groups of unions. The objects of the General Council will be to promote common action, to assist unions when attacked on vital principles of trade unionism, to endeavour to promote settlements of disputes, to assist unions in the work of organization, to carry on propaganda, and to enter into relations with kindred movements in other countries.

A resolution moved by Mr. Tom Mann and seconded by Mr. Ben Tillet was carried, demanding that each indus-

try should be made responsible for its unemployed workers assuring them an income while out of work amounting to 85 per cent of their regular wages.

Replying to a request for a statement as to the position of the Parliamentary Committee with regard to the demands of the coal miners, Mr. Thomas said: "We have considered both last week and this, very carefully the whole situation, and seeing that the matter is now raised, and both this Congress' action and the Parliamentary Committee's action are apparently deliberately misrepresented, I had better state the exact situation. . . . The miners submitted their case as they were bound to do, to the Triple Alliance. . . . The railwaymen and the transport workers deliberated separately on the issue and both unanimously came to the conclusion that in their opinion the miners' claim was not only fair and reasonable but that they displayed a particularly unselfish attitude." He announced that the miners had been invited by Sir Robert Horne, Minister of Labour, to meet him. Mr. Frank Hodges presented the miners' case to the Congress and declared that for the last six years they had been pursuing a dual policy, first, seeking to reduce the cost of living for the community generally, and secondly of trying to make wages keep pace with prices, and of the two they had emphasized the former. The Standing Orders Committee to whom the matter had been referred submitted the following resolu-

tion: "This Congress, having heard the statement of the miners' case for a reduction in the price of domestic coal of 14s. 2d. a ton, and an advance of wages of 2s, 1s, and of 9d. per shift for adults, youths and boys respectively, is of the opinion that the claims are both reasonable and just and should be conceded forthwith." This resolution was carried unanimously.

The Parliamentary Committee were instructed "to take the necessary steps to see that the British trade union move-

ment should be affiliated to the international trade union movement only through the Trades Union Congress and its Parliamentary Committee," and the Committee was directed "to refrain from co-operating with a sectional body which can only claim to represent a comparatively small minority, most of whom are, moreover, affiliated with the Congress." This was directed against the General Federation of Trade Unions.

The next annual congress will be held at Cardiff.

## NATIONAL ALLIANCE OF EMPLOYERS AND EMPLOYED IN GREAT BRITAIN

**T**HE National Alliance of Employers and Employed of Great Britain was founded in December, 1916, mainly to prepare a way in advance for the return to peace conditions in industry. But while designed as an organization for dealing with problems arising out of the war, the Alliance still continues to extend its work both in regard to area and scope of operation, and now appears likely to become a permanent body. Its functions do not conflict with, but are complementary to, those of the so-called Whitley Councils, the latter providing machinery for the internal organization of the several industries while the Alliance considers questions of a National character affecting industry generally. At the annual meeting held in Birmingham in June last, it was reported that the Alliance at that date covered 60 areas as compared with 13 areas at the date of the Armistice. In each of these areas the Alliance is represented by joint committees nominated by the Crown, and composed in equal proportions of representatives of chambers of commerce or other

employers' associations, officials of trade unions and Government delegates. Trade unions, however, are permitted to name their own representatives, if this course is consistent with the national interest. The function of the Alliance is to consider the general welfare of industry, including impartial consideration of such questions as increased production, unemployment, profiteering, nationalization, the use of machinery, payment by results, restitution of trade union rights, housing, transportation and safety arrangements. The proposals put forward by the Alliance, emanating from the responsible parties actually engaged in industry, but without Government control, are assured of consideration or co-operation on the part of the Government in carrying them into effect. The National Alliance thus represents an effort to reach a solution of industrial problems in so far as they can be solved by consent of the parties immediately concerned, and it is therefore described as a non-sectarian and non-political organization.

## CONFERENCE OF EMPLOYMENT SERVICE COUNCIL OF CANADA

THE second annual meeting of the Employment Service Council of Canada was held in Ottawa on Thursday and Friday, September 23 and 24. This Council was established under authority of Order-in-Council No. 3111 of December 17, 1918, as an advisory body to assist the Minister of Labour in the administration of the Employment Offices Co-ordination Act, and to recommend ways of preventing unemployment.

The following provincial governments and employees' and employers' associations are represented on the Council: Nova Scotia, Mr. W. B. MacCoy, K.C., Deputy Minister of Industries and Immigration; New Brunswick, Mr. Celine Melansin; Moncton, N.B.; Quebec, Mr. Jos. Ainey, General Superintendent, Offices, Employment Service of Canada, Quebec Government Offices, Employment Service of Canada, Montreal; Ontario, Mr. H. C. Hudson, General Superintendent Ontario Government Offices, Employment Service of Canada, Toronto; Manitoba, Mr. J. A. Bowman, General Superintendent, Manitoba Government Offices, Employment Service of Canada, Winnipeg; Saskatchewan, Mr. Thomas M. Molloy, commissioner, Bureau of Labour and Industries, Regina, Saskatchewan; Alberta, Mr. J. W. Mitchell, General Superintendent, Alberta Government Offices, Employment Service of Canada, Calgary; British Columbia, Mr. J. D. McNiven, Deputy Minister of Labour, Victoria; Canadian Manufacturers' Assn., Mr. G. E. Carpenter, Western secretary, Winnipeg, and Mr. E. Blake Robertson, Eastern secretary, Ottawa; Association of Canadian Building and Construction Industries, Mr. J. P. Anglin, president; Trades and Labour Congress of Canada, Mr. A. McAndrews, Ottawa, and Mr. H. J. Halford, Hamilton; The Railway Association of Canada, Mr. C. P. Riddell, secretary, Montreal; Cana-

dian Railway Brotherhoods, Mr. S. N. Berry, vice-president, Order of Railway Conductors, Toronto; Canadian Lumbermen's Association, Mr. Frank Hawkins, secretary, Ottawa; Canadian Council of Agriculture, Mr. W. C. Good, Paris, Ont., and Mr. R. McKenzie, Winnipeg; Mrs. J. S. Robson, Canadian Council of Immigration of Women for Household Service, Immigration Department, Ottawa, Miss Helen Y. Reid, Canadian Patriotic Fund, Montreal; Great War Veterans' Association, Mr. C. G. MacNeil, Dominion secretary-treasurer, Ottawa; Department of Soldiers' Civil Re-establishment, Mr. T. A. Stevenson, Director, Information and Service Branch, Ottawa, and Mr. Bryce M. Stewart, Director of Employment Service, Department of Labour, Ottawa.

Mr. Stewart, secretary of the Council, gave a resumé of the action taken on the recommendations passed at the last session, and reports were received from provincial representatives, indicating the progress that had been made in the employment work. The report of the Committee on Co-operation with the British Employment Exchanges, which was appointed last year, stated that the British government through its colonial office had entered into an agreement with the Canadian government with reference to the recruiting of workers in the United Kingdom for work in Canada. A form of application for the admission of workers had been agreed upon and was now in use in the Employment Service, and workers secured in the United Kingdom at the request of Canadian employers were being recruited through the British Employment offices. The Committee on Employment Management Courses reported that the special course which had been given in Toronto University last year had been well attended and had been regarded by employment people generally as very successful.

Following are the resolutions and recommendations of the various committees which were adopted by the Council:

**Resolutions submitted by the Committee on Unemployment and adopted by the Council**

WHEREAS the governments of Canada and of the United Kingdom have agreed that employers making application for labour from the United Kingdom shall be required to first make application to the Employment Service of Canada and shall import such labour if necessary only through the agency of the Employment Service and the Department of Immigration, and WHEREAS complaints continue to be received that workers recruited in the United Kingdom frequently find on arriving in Canada that employment conditions have been misrepresented; NOW THEREFORE BE IT RESOLVED that this council approves the agreement entered into by the said governments, and urges that such agreement be made more effective by providing that persons shall be permitted to recruit labour from the United Kingdom for employment in Canada only under the supervision of the British Ministry of Labour.

RESOLVED that the Employment Service of Canada should endeavour to extend among employers and workmen such methods as will result in stabilizing employment conditions; it is suggested that in the negotiations of trade agreements the principles of restriction of overtime and reduction of hours in slack periods rather than reductions of permanent working forces, as already agreed upon by many employers and labour organizations, be given full consideration; and that the members of this council representing various organizations of employers and workmen be requested to bring this resolution to the attention of their respective bodies and to report the views of such organizations to the Secretary of the Council.

WHEREAS in view of the report of the Royal Commission on Industrial Relations, and the recommendation of the National Industrial Conference and the fact that the principle of unemployment insurance has been endorsed by the Trades and Labour Congress of Canada, the Great War Veterans' Association and the International Labour Conference at Washington, this Council considers that some form of unemployment insurance would greatly reduce unrest and distress due to unemployment and fear of unemployment.

NOW THEREFORE BE IT RESOLVED that this Council request the Government to appoint a Board forthwith as recommended by the National Industrial Conference with instructions to submit a comprehensive report to the next National Industrial Conference.

WHEREAS unemployment consequent upon seasonal and cyclical fluctuations in the demand for labour can be greatly reduced by the policy of stimulating the demand for labour at bad times through the postponement of government contracts of a non-urgent character until it is necessary to promote a demand for labour owing to slackening of private employment, and WHEREAS this policy was endorsed by the Joint Industrial Conference of the United Kingdom and by the International Labour Conference at Washington, and WHEREAS this Council last year resolved "that in the approval and execution of public works and in the purchase of Government supplies regard shall be had so far as reasonably practicable to the general state and prospects of the labour market to the end that the total volume of employment of the country may be kept as constant as possible": NOW THEREFORE BE IT RESOLVED that the Employment Service of Canada through the Employment Service of the Department of Labour and through the provincial employment services shall with the least possible delay bring this policy to the attention of all government authorities controlling any considerable amount of public expenditure and shall in co-operation with such departments, arrange to have constantly at hand information as to available and projected government expenditure with the view to planning such expenditure in accordance with the state of labour market; that the Secretary shall send copies of this resolution to the departments concerned, and that the various Employment Services shall forward progress reports to the Secretary of this Council.

**Recommendations of the Committee on Administration and Technique  
Adopted by the Council**

**ADVISORY COUNCILS AND COMMITTEES.**

The members of the Committee declared themselves unanimously in favour of some form of Advisory Council or Committee for each employment office and for each provincial Employment Service and strongly recommends that each province take immediate action toward the formation of such Councils. Where special legislation is necessary it is recommended that the Federal Minister of Labour be asked to communicate direct with the provincial governments concerned.

**TRANSPORTATION.**

(a) The Committee realizes the importance of having the lowest possible transportation rates for persons securing employment through the Employment Service and recommends that the Director of the Employment Service exert his efforts to have the 2½c. rate maintained.

(b) In order to facilitate the transfer of workers to employment, the Committee recom-

mend that each province provide a fund out of which fares may be advanced to workers who are sent to more or less distant points on account of the impossibility of placing them locally. The regulations, covering such advances which should not be given any publicity whatsoever—should be modelled after the British system of Employment Offices—full particulars of which may be found on Pages 92 to 102 in the Government Code of General instructions to Divisional Office and Employment Exchange Staff (E. D. 399, Ministry of Labour Employment Department).

#### INFORMATION.

The Committee is pleased to learn that the efforts of the Department of Labour with regard to the issuing of an Employment Service Bulletin are meeting with success and we look forward with interest to the first number. We are convinced that such a bulletin will provide a valuable means of furthering the purposes of the Employment Service.

#### JOB ANALYSIS.

The difficulties under which the Department of Labour has been working are fully appreciated and the Committee is pleased to learn that in spite of these difficulties considerable progress has been made towards the publication of a memorandum on Job Analysis. The members of this Committee hope that the complete report on this subject will be issued as soon as possible, realizing that it will be of decided benefit to the Employment Service as a whole.

#### PUBLICITY.

With regard to the policy of the Employment Service towards the question of advertising and publicity the Committee recommends:

(a) The use of detailed classified newspaper advertising is essential to the successful operation of Employment Offices. The extent of this advertising may be determined by the Employment Service of each province.

Such advertising should be systematic and wherever possible should include the insertion in the same relative position of a daily advertisement showing the most attractive orders and applications which the office may have listed.

(b) Local Superintendents should confer frequently with such bodies as Boards of Trade, Chambers of Commerce, Business Women's Clubs, Rotary, Kiwanis and Commercial Clubs, Retail Merchants' and Builders' Associations, Local Trades and Labour Councils, and other organizations with the idea of laying before these bodies the advantages to be obtained

from the Employment Service as related to their business or private interests.

(c) It is recommended that a permanent poster be prepared which would direct seekers for employment or employers seeking workers to the various government offices. Such signs or posters should be displayed in railway stations, post offices and other public places.

(d) The Committee recommends that both general and local superintendents should seize every opportunity to have news items concerning the Service inserted in local newspapers.

(e) Standard Sign—after careful consideration of the various designs for a standard sign, the Committee recommended the adoption of the design used by the Province of Manitoba, consisting of an oval with the words, "Employment Service of Canada" around the outside, leaving the province directly concerned the decision as to the wording which shall be used in the bar running from end to end of the oval.

#### COMMERCIAL EMPLOYMENT AGENCIES.

The Committee has learned with satisfaction that several of the provinces have taken steps since the last meeting of the Employment Service Council to close all private employment agencies within their boundaries and it is strongly recommended that the provinces in which private agencies still exist should follow their example as soon as practicable.

#### Recommendations of Committee on Specialized Service, adopted by the Council

#### JUVENILE EMPLOYMENT WORK.

We recommend that the survey now being carried on by the Department under the direction of Mr. Wyatt at Winnipeg be continued and that all information gained be made available to the other provinces with the view that these provinces may proceed with the development of Juvenile Departments upon a sound and tested basis.

#### HANDICAPPED WORKERS.

This Committee reaffirms the recommendation made by the Employment Service Council, 1919, that where necessary special departments be created for handicapped workers. We further recommend the co-operation of the Employment Service of Canada with the special effort being made this winter by the Department of Soldiers' Civil Re-establishment in the placing of vocational trained men and that where necessary a special placement officer with overseas experience be attached to the offices of the Employment Service of Canada in the larger in-

dustrial centres for the express purpose of specializing in the needs of disabled and handicapped soldiers. The general principle that such workers require a special service seems to have been justified by the experience of the Public Employment Offices which are now handling handicapped workers in a special division. Special knowledge of occupational opportunities is necessary in connection with the placing of handicapped workers, and the needs of the employer as well as of the applicant must be carefully considered. A careful record of the progress of those applicants who are placed should be kept, preferably through a personal follow-up system.

#### WOMEN'S DIVISION.

This Committee would strongly urge the inauguration or establishment of distinctly female divisions in all employment offices throughout the Employment Service and that separate entrances to such divisions be provided where possible. We would recommend that all records of placements and replacements of female workers, especially girls from overseas, be made available to the superintendent of the local Hostel or such other authority as may seem entitled thereto.

#### PROFESSIONAL AND BUSINESS SECTION.

This Committee is of the opinion that adequate provisions should be made by the governments of the various provinces for the placing of teachers and other professional workers in employment so that they may not depend for this service on fee charging agencies. We would, therefore, recommend that the Minister of Labour take up with the various provincial Governments, the establishment of a uniform and co-ordinated system of business professional placement offices in the Employment Service at the earliest possible date.

#### FARM HELP.

The Committee recommend that the subject of farm and harvest labour be a special item on the agenda of the Council for general discussion Friday afternoon at 2.30 o'clock.

#### IMMIGRATION.

The Committee strongly recommends that the recruiting of workers from any country should be permitted only after consultation with employers and workers through the Employment Service.

### ANNUAL MEETING OF THE INTERNATIONAL ASSOCIATION OF PUBLIC EMPLOYMENT SERVICES

THE eighth annual meeting of Public Employment Services, formerly called the American Association of Public Employment Offices, was held at Ottawa, on September 20-22. A large number of men and women of recognized authority in their special lines were present, and the programme prepared for the meeting gave adequate expression to a broad view of public employment service work without neglecting definite practical problems. The meeting was characterized throughout by the large attendance at the various sessions and by the keen interest displayed in the papers and discussion.

In the present brief account of the meeting it will be impossible to do more than refer to the many papers presented, but these papers will be pub-

lished in full by the Department of Labour at an early date.

After the delegates had been welcomed to the City of Ottawa by the Mayor, the discussion on Unemployment and Organization of Employment was opened by a series of papers by representative Canadians. Professor Gilbert E. Jackson, Associate Professor of Economics, University of Toronto, by a critical examination of the merits of the five indications of the state of employment in Canada, published each month in the LABOUR GAZETTE, brought out the value of detailed studies of the labour market. The necessity for proportionate national development as a means of stabilizing employment was emphasized by Mr. Frank Beer of Toronto, who urged that there should be given to national production

some of the guidance and leadership now centered in industrial enterprises and that matters connected with production should be the subject of continuous study by the trade, employment and commercial experts of every country. Professor W. C. Clark, Associate Professor of Economics, Queen's University, advocated the policy of regularizing national demand for labour by Government employment. Professor Clark described what has been accomplished along these lines in other countries and dwelt on the need for such a policy in Canada. The morning session ended with two interesting papers on immigration problems. Dr. J. W. MacMillan outlined the functions which the public employment service, in co-operation with other agencies, can perform for the immigrant, and Mr. Rigg, acting as representative for Mr. Tom Moore, President of the Trades and Labour Congress of Canada, expressed the point of view of organized labour with regard to the importation of workers. The fundamental principle laid down by Mr. Rigg was that no authority to import labour should be granted unless it is first shown that the need for additional workers really exists and that such workers are not available in the country where they are required.

At the afternoon session Mr. S. M. Harrison of the Russell Sage Foundation gave a brief account of the scope and status of the study of public employment service which had been made by the Foundation. The trade union attitude towards the public employment service was described by Mr. A. J. Portenar; the managerial point of view was interpreted by Miss Odencrantz, while Mr. Buell made service the keynote of his discussion and analyzed the demand for organized employment service. Profes-

sor Lescoghier discussed the advisability and importance of studying not only the employment problem but all labour problems as market phenomena rather than as human welfare or production problems. The afternoon session closed with comments by Mr. Chas. B. Barnes on the remarks of previous speakers and further suggestions of his own on the proper functions of the public employment service.

In the evening a dinner was held in the Château Laurier at which Mr. Barnes was Chairman, and Mr. F. A. Acland, Deputy Minister of Labour, welcomed the delegates on behalf of the Department of Labour. Mr. Wade H. Skinner, Assistant Director General, United States Employment Service, traced the present trends in public employment service in the United States, expressing the opinion that these were noticeably towards centralization and standardization. Mr. Edward F. McGrady, representing the American Federation of Labour, commented on certain points which had already been raised at the Conference and expressed the views of organized workers regarding the public employment service. Scientific Management and the Reduction of Unemployment was the subject of an address by Mr. H. S. Person, Managing Director of the Taylor Society, and Dr. J. B. Andrews discussed different phases of the subject of unemployment insurance. The dinner session ended with an address by Miss Mary Van Kleeck, who suggested some of the unrealized possibilities of research as a factor in industrial relations. Mr. B. M. Squires, who was unable to be present, submitted a paper describing the actual situation with regard to long-shore employment and indicating the lines along which progress in regulariz-

ing and decasualizing such employment can be made.

The second day of the Conference was devoted to discussion of problems connected with juveniles, professional workers and handicapped persons by specialists in these particular fields. Miss Hirth, Director of the Bureau of Vocational Information, New York City, opened the session on Employment and Education with an address on the inter-relations of these two fields. In the discussion on employment service for junior workers, which included papers by Mr. Fred King of the Russell Sage Foundation; Mr. J. M. Wyatt, Juvenile Employment Specialist, Employment Service of Canada; Mr. Woelpper of the Junior Section, U. S. Employment Service; Mrs. Collier and Miss de Schweinitz the need for juvenile work in the public employment offices was stressed, the special problems connected with this work were stated, and methods of meeting such problems outlined.

Miss Florence Jackson of Boston told of her experience in employment work for professional women and insisted upon the necessity for educational and research work in the administration of employment service for professional women. In considering employment problems in the nursing profession, Miss Suzanne Haliburton placed her emphasis on the need for organization of employment in this profession and suggested a national clearance system for the employment of public health nurses. The special problems and possibilities of the University Employment Bureau were described by Mr. A. B. Crawford, Director of the Bureau of Appointments, Yale University.

Speakers who were qualified because

of first-hand knowledge of the questions discussed were unanimous in agreeing that the placement of the physically handicapped called for special attention and special organization. How the lessons learned in handling the war-disabled can be applied to the problems of those disabled in industry was shown by Mr. H. L. Brunson of the United States Federal Board for Vocational Education, while Mr. W. T. Cross gave an account of the work being carried on under the Illinois Department of Public Welfare with the aim of developing a plan for the physically handicapped which will afford the maximum opportunity for the Illinois Employment Service to do its part for the disabled. An address by Miss G. R. Stein, Employment Secretary of the Institute for Crippled and Disabled Men in New York, contained advice, based upon her own experience, as to the organization of an employment bureau for the handicapped. Employment opportunities for the hard of hearing was the theme of Miss Samuelson's address. The relation between workmen's compensation laws and the placement of the handicapped was handled in two papers submitted by Mr. Carl Hookstadt, U. S. Bureau of Labour Statistics, and Mr. T. Norman Dean, statistician, Ontario Workmen's Compensation Board, respectively.

Another phase of employment service work studied at the meeting was the harvest labour problem, which formed the subject of discussion at a round table evening conference. Professor Lescotier, who has recently conducted a survey of the harvest labour problem in the mid-western states for the Federal Department of Agriculture, introduced the topic and the discussion was

led by employment office officials of the various provinces of Canada.

The last day of the meeting was devoted to a consideration of employment office administration and technique. The majority of the speakers in this division of the programme were employment bureau officials and considerable light was shed upon the various matters taken up. Mr. Harry Lippart dwelt upon the fact that in order to justify the expenditure of public funds for employment offices the service given by these offices must be of real benefit to the public and made a strong plea for efficiency in employment office administration as a means of attaining this end. Mr. Hopf's presentation of the value of job analysis and job specifications to successful placement work was supplemented by charts, as was Mr. Boyd's description of the lay-out of the Chicago public employment offices. The possibilities in psychological tests to determine vocational aptitudes were explained by Mrs. Morgan, Employment Department of the Y. W. C. A., New York City, and Miss Esther Smith, Director of the Women's Employment Service at Pittsburg, gave a paper on the technique of placing professional women. Another phase of Employment Service for women was treated by Miss Rachael Gallagher who raised the problems which the establishment of separate departments for men and women involves, indicating the weaknesses in a demarkation along these lines. Miss La Dame discussed the structural organization of a national employment service and the division of work between national and state governments, favouring on the whole a co-operative plan between the two. Specialization in em-

ployment office administration was advocated by Mr. Richard Flinn, Superintendent of the State Employment Bureau in New York City. Mr. Flinn believes that specialization is particularly important in the case of interviewers in larger cities, because of the opportunities open to such interviewers to become acquainted with the principal trades and with employers and business agents of the locality.

Dr. Atwood called attention to the value of Advisory Committees in securing the confidence of both employers and employees and emphasized the opportunities such committees have for service. This same note was struck by Mr. Larkin in his paper describing the Ohio experience with Advisory Committees with particular reference to the valuable assistance given by these advisory bodies in war employment work. The factor of publicity as being most vital in all employment service work was brought out by Mr. Holbrook, Superintendent of the State Employment Bureau, Dayton, Ohio.

Three papers on the subject of clearance completed the programme. Mr. Leslie E. Woodecock traced the progress which has been made in the development of clearance and Mr. Mullane showed how important the clearance function is in employment work. The salient points in the Ontario zone system of clearance were explained by Mr. Hudson, General Superintendent of the Ontario Government Employment Offices.

At the annual business meeting which was held on the last afternoon the name of the organization was changed to the International Association of Public Employment Services. Certain other changes were also made in the constitu-

tion and the following were adopted as the objects of the Association:—

1. To promote a system or systems of employment exchanges in the United States and Canada.

2. To advance the study of employment problems.

3. To bring into closer association and to co-ordinate the efforts of Government officials and others engaged or interested in questions relating to employment, unemployment and the organization of the labour market.

The following officials were then elected for the coming year:—President, Mr. Bryce M. Stewart; First Vice-President, Mr. A. W. Holbrook; Second Vice-President, Mr. Harry Dunderdale; Third Vice-President, Mr. Sullivan; Secretary-Treasurer, Mr. R. A. Flinn; Executive members, Mr. John B. Densmore, last past President, *ex-officio*, Miss Findlay and Mr. Peters. Buffalo, N. Y., was chosen as the place of meeting for next year.

### REPORT OF THE EMPLOYMENT SERVICE OF CANADA FOR FOUR-WEEK PERIOD OF AUGUST 16 TO SEPTEMBER 11, 1920

**R**EPORTS from Employment Offices to the Dominion Headquarters of the Employment Service of Canada, Department of Labour, show that for the four weeks' period from August 16 to September 11 the number of placements was 46,310 as compared with 35,368 placements for the four weeks' period

ended August 14, an increase of 10,942. This is the best four weeks' period since the beginning of the record and when compared with the corresponding period of last year represents an increase in placements of 7,355.

During the period under review regular placements by weeks were reported

as follows:—week ended August 21—15,965; week ended August 28—12,223; week ended September 4—9,559; week ended September 11—8,523. In addition 6,931 casual jobs (employment of a duration of less than one week) were supplied and were reported by weeks as follows:—week ended August 21—1,751; week ended August 28—1,733; week ended September 4—1,795; week ending September 11—1,652.

The accompanying chart shows graphically the number of applications, vacancies, placements, week by week since the beginning of April, 1919. The chart indicates that during the period August 16 to September 11 (previous reports having been reviewed in other issues of the LABOUR GAZETTE) a new high record was established by the service in applications, vacancies and placements. The figures for the week ended August 21 marked the peak of the harvesting period in the West. During this year over 19,000 vacancies were listed, over 17,000 applications were registered and 15,965 placements were made. For the latter part of the period under review there was a steady falling off in applications registered, vacancies notified and placements reported, this being the inevitable reaction from the heavy demand of the previous weeks. On the whole, however, a higher level was maintained during the period than during the corresponding weeks of last year.

The accompanying table presents in some detail the work of the various offices for the four weeks' period ended Sep-

tember 11. At the beginning of the period (August 16) there were 3,997 applicants unplaced, of which 2,888 were men and 1,109 were women, as compared with 2,547 men and 934 women, or a total of 3,481 persons unplaced at the end of the four weeks' period. The number of vacancies remaining unfilled on August 14 totalled 14,694 of which 10,679 were for men and 4,015 for women. This compares with 16,671 vacancies for men and 3,500 for women, a total of 20,171 vacancies unfilled on September 11. It may be of interest to note that on September 13 of last year the the number of vacancies unfilled on September 13 of last year the number of applicants unplaced totalled 7,037 and the number of vacancies unfilled on the books of the various offices was 25,290.

During the period under review employers notified the service of 61,613 vacancies for men and 5,708 for women, a total of 67,321. while the number of applicants registered at the offices totalled 55,338 of which 50,526 were men and 4,812 were women. When compared with the report for the previous four weeks' period, this represents an increase of 19,948 vacancies and 11,302 applications. The report indicates also that placements in regular employment numbered 42,905 for men and 3,405 for women, as compared with 42,740 for men and 2,628 for women as reported during the preceding four weeks' period. Placements in casual jobs totalled 6,931 as compared with 6,836 during the previous period, an increase of 95.

## REPORT OF EMPLOYMENT SERVICE OF CANADA FOR FOUR-WEEK PERIOD ENDED SEPTEMBER, 11, 1920.

## UNEMPLOYMENT IN TRADE UNIONS AT THE CLOSE OF AUGUST, 1920, AS REPORTED BY UNIONS MAKING RETURNS

THE present article on unemployment among the members of local trade unions deals with unemployment as at the end of August, 1920, and is based on returns received from 1,464 labour organizations with a total membership of 187,432. For all occupations reporting, 3.16 per cent of the members were unemployed as compared with 2.64 per cent at the end of July, 1920, and with 2.33 per cent at the end of August, 1919. Unemployment as used here has reference to involuntary idleness due to economic causes. Persons occupied in work other than their own trades or who are idle because of sickness or as the direct result of strikes and lockouts are not consid-

ered as unemployed. As the number of unions making returns varies from month to month with consequent variations in membership upon which the percentage of unemployment is based, it should be understood that the percentage of unemployment figures have reference only to those unions reporting.

That the percentage out of work at the end of August was slightly larger than in the preceding month and also than in the corresponding month of last year was due to there having been somewhat less activity in the manufacturing and mechanical industries, particularly in the leather subgroup, and also in transportation. There were, on the

other hand, decreases in the percentages unemployed in the mining, quarrying and refining of ores, building and construction and miscellaneous groups.

Table I on this page summarizes the returns by provinces. Manitoba, Saskatchewan and Alberta registered declines in unemployment in comparison with the returns for both July, 1920, and August, 1919. In Nova Scotia and Prince Edward Island and New Brunswick, there were slight increases in the number unemployed as compared with the returns for the preceding month, but the percentages were considerably smaller than those reported for August of last year. In Quebec, Ontario and British Columbia there was more idleness than in both months.

TABLE 1.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Jan. 1920.....	2.72	3.97	4.38	2.66	4.50	4.92	4.01	12.17	4.23
Feb. 1920.....	5.08	2.31	1.93	3.04	4.62	5.24	5.12	14.58	4.38
Mar. 1920.....	1.88	3.06	3.18	2.53	3.18	4.03	2.06	9.50	3.44
Apr. 1920.....	.61	1.32	2.50	2.42	2.71	3.19	1.71	8.09	2.83
May 1920.....	.38	.53	3.62	1.80	2.63	1.32	1.49	10.63	2.88
June 1920.....	.56	.28	2.82	1.68	1.41	2.15	1.15	9.57	2.48
July 1920.....	.10	.20	2.59	1.50	1.33	.89	1.43	12.10	2.64
Aug. 1920.....	.26	1.02	4.15	1.73	.31	.53	.67	13.69	3.16

The percentages reported unemployed in the different groups of industries are indicated in Table II on page 1367.

Unemployment in the manufacturing and mechanical industries, as recorded by 378 unions having a combined membership of 53,730 persons, was more prevalent than at the end of July and also than at the end of August, 1919, 5.15

per cent of the members having been out of work as compared with unemployment percentages of 2.86 in the preceding month and 3.33 in the corresponding month of last year. This increase in unemployment may be attributed very largely to slackness for workers in leather, boots and shoes, and rubber products, where the number out of work was larger than has been reported previously in these articles. Workers in metals, machinery and conveyances, food, tobacco and liquors, printing, publishing and paper goods, and wood-working and furniture were more fully employed than in July and August of last year. In textiles, carpets and cordage, pulp, paper and fibre and glass blowing the percentages of unemployment were somewhat larger than in July, but improvement was shown in comparison with the figures for August, 1919. On the other hand, employment for jewellery workers as reported by 6 unions was brisker than in the preceding month, but the percentage out of work was larger than in the corresponding month of last year. As in the case of the leather and rubber sub-group mentioned above, employment for clothing workers was less active than in both months used in this article for comparative purposes. Some short time was recorded by unions of patternmakers, confectioners, meat cutters, butchers, tailors, garment workers, typographers, leather, boot and shoe workers, jewellery workers and glass bottle blowers.

Reports from 602 organizations of transportation workers having a total membership of 73,991 persons, indicated that 2.78 per cent of the members were unemployed as compared with percentages of 2.52 in July, 1920, and 2.02 in August, 1919. Employment among steam railway employees (whose returns constituted over 74 per cent of the entire group membership reporting) showed greater activity than in the preceding month, and also than in the corresponding month of last year. The same is true of street and electric railway employees and teamsters and chauffeurs. On the other hand navigation workers

recorded less employment than in both months. This increase in unemployment was partly the result of dullness in the shipyards in British Columbia. Some unions of firemen and carmen, engineers, trainmen and maintenance of way employees reported that not all their members were working full time.

In the mining, quarrying and refining of ores group, returns were tabulated from 37 unions having an aggregate membership of 10,497 persons, showing that .24 per cent of the members were out of work as compared with .94 per cent at the end of July and with .45 per cent at the close of August, 1919. Miners were more fully engaged than in both months, while employment for quarry workers and mill and smelter men was well maintained.

The percentage out of work in the building and construction group, as reported by 253 organizations having a combined membership of 28,724 persons, was 2.99, as compared with unemployed percentages of 3.99 in July, 1920, and

2.86 in August of last year. Plumbers and steamfitters and hodecarriers and building labourers were more fully engaged than in both months. The percentages out of work as reported by carpenters and joiners and steam shovel and dredgemen were somewhat smaller than in July, but they were slightly larger than in August, 1919. On the contrary, electrical workers, painters, decorators and paperhangers and bridge and structural iron workers were not as well employed as in the preceding month, but conditions were better than in the corresponding period of last year. The percentages out of work among bricklayers, masons and plasterers, granite and stone cutters and tile layers, lather and roofers were larger than in both months. Some short time was reported by unions of bricklayers, masons and plasterers, carpenters and joiners, painters, decorators and paperhangers and plumbers and steam fitters.

In the public employment group, as registered by 67 unions having a com-

bined membership of 4,203 persons, the percentage unemployed was .12 as compared with percentages of .03 and .17 in July 1920, and August 1919, respectively. Civic employees were slightly less fully employed than in the preceding month. The percentage out of work, however, showed a nominal decline as compared with the figures for August of last year.

Unemployment in the group of miscellaneous trades, as indicated by returns tabulated from 121 organizations with 14,271 members, was slightly less prevalent than in either month used in this article for comparative purposes, 1.49 per cent of the members having been reported as unemployed as compared with percentages of 1.84 in July and 1.58 in August, 1919. Retail clerks, as recorded by 5 unions, showed a smaller number out of work than in the corre-

sponding month, with practically the same percentage as in August of last year. Employment for hotel and restaurant workers and musicians and theatre employees was slightly more active than in the previous month, but the percentages out of work showed small increases over the figures for August, 1919. On the other hand, the percentages of idleness among barbers and stationary engineers and firemen and unclassified workers were somewhat larger than those reported for July. They were, however, considerably smaller than the percentages registered in August of last year. Some unions of musicians and theatre employees, stationary engineers and firemen, barbers and unclassified workers reported part of their members not working on full time.

The tabular statement on pages 1368-69 presents the returns in some detail.

## EMPLOYMENT CONDITIONS IN CANADA DURING THE PERIOD AUGUST 2 TO SEPTEMBER 11, AS REPORTED BY EMPLOYERS

**W**EEKLY reports from employers to the Dominion Headquarters of the Employment Service of Canada, Department of Labour, during the six weeks from August 2 to September 11 inclusive, show that there were declines of varying size in the volume of employment during five of the weeks, with an increase during the remaining week.

The change reported for each of the weeks under review as compared with the preceding week was as follows:—

Week ending August 7, a decrease of 7,689 persons or one per cent.

Week ending August 14, an increase of 1,048 persons or .1 per cent.

Week ending August 21, a decrease of 165 persons or .02 per cent.

Week ending August 28, a decrease of 172 persons or .02 per cent.

Week ending September 4, a decrease of 295 persons or .04 per cent.

Week ending September 11, a decrease of 433 persons or .1 per cent.

During the six weeks period under review, employment conditions were substantially the same in the different parts of Canada, declines in employment occurring during two or more of the six weeks in every district and also in every province. In the Maritime Provinces there were reductions in staffs during the first and second weeks of the period, with increases in the remaining four. Within this district, employment in Nova Scotia was better maintained than in the remaining provinces showing declines only during the first two weeks of the period, while in New Brunswick there was an increase for the week ending August 28 alone, and in Prince Edward Island there were additions during the week of August 21 and 28, with reductions in the first two and last two weeks. Firms in Quebec recorded increases in employment during the weeks of August 21, September 4 and 11, with large decreases during the remaining periods.

In Ontario there were additions to staffs during the weeks of August 14, 21 and 28, while decreases in employment occurred during the weeks of August 7, September 4 and 11, these losses being the most pronounced registered in any district. Employers in the Prairie Provinces reported increases in employment during the week of September 11 only, with substantial declines in the first five weeks. Within this district, Alberta showed decreases during the first four, Manitoba during the first five, and Saskatchewan during all six weeks of the period under review. In British Columbia there were additions to staffs during the weeks of August 7 and 28 only.

A summary of the returns by industrial groups shows that firms in Logging, Fur Products and Telegraph Operation reported increases in employment during each of the six weeks under review. Building Construction, Edible Plant Products, Non-Ferrous Metal Products, Pulp and Paper Products, Textiles, Coal Mining, Personal Services (chiefly laundries) and Local Transportation reported fluctuation from week to week, with net gains during the period as a whole. On the contrary, Railway Construction, Edible Animal Products, Lumber and Its Products, Iron and Steel Products, Clay, Glass and Stone Products, Rubber Products, Miscellaneous Manufacturing Industries, Metallic Ores, Non-Metallic Minerals other than coal (quarrying), Hotels and Restaurants, Telephone Operation, Retail and Wholesale Trade, Railway and Water Transportation registered declines, taking the period as a whole with increases during one or more of the weeks under review. In Mineral Products, n.e.s., Leather Goods and Wood Distillates, there were reductions during each week of the period.

The most pronounced increases in the volume of employment afforded during the period under review was reported by firms in the Logging group, where an aggregate of 3,136 persons were added to their staffs during the six weeks, largely on account of the commencement of bush operations. In Textiles, the re-

ductions as well as the increases were large, being caused in most cases by shut-downs for vacations and inventory purposes. Seasonal activity in the canning sub-group occasioned practically all the gains in Edible Plant Products.

In contrast with the preceding periods reviewed in the LABOUR GAZETTE, during which greatly increased employment of a seasonal nature had been reported in Railway Construction, the losses in this industry during the six weeks period being discussed were the most marked in any group, amounting to 3,459 employees. These declines to some extent were the result of the release of construction workers for harvest activities, particularly in the Prairie Provinces, but the fact that in some cases the season's operations were completed also contributed to the reductions. In Edible Animal Products, the decreases were attributable in large measure to the close of the fishing season in the Maritime Provinces and British Columbia, though inactivity in meat packing establishments in Ontario also caused some of the decline, particularly during the week of September 11. The completion of saw milling operations occasioned a large part of the reductions in Lumber and its Products, which occurred in Ontario and Quebec and also in the Maritime Provinces. In Iron and Steel most of the losses were reported in the vehicle sub-group. Seasonal inactivity, together with shutdowns for holidays and stock-taking purposes caused part of the declines in Leather Products. The decreases in Pulp and Paper Products, to some extent, may be attributed to low water, especially in Ontario and Quebec, while there was marked activity in this group in the Maritime Provinces. Most of the losses in Miscellaneous Manufacturing Industries were registered in the tobacco sub-group. Reductions in the staffs of summer hotels occasioned the declines in Hotels and Restaurants, which occurred largely during September. In Retail and Wholesale Trade the decreases were in part attributable to holidays and inventories, although trade dullness also contributed to the reductions. The

fluctuations in Railway Transportation were partly on account of temporary increases to staffs for harvest excursions, while the amalgamation of railways also caused some of the change. In Water Transportation fluctuations are usually sudden and marked, as employment in this group depends very largely upon the number of ships in harbour from week to week.

The accompanying chart shows the weekly percentage of change in the number of persons on payrolls in comparison with the figures for the base week (January 17), as reported by those employers making returns, the number of firms averaging over 5,100. The returns for the week of January 17 are being taken as base figures. It had been the intention to use the week of January 1, but this was found impracticable because of the abnormal situation at that time, due to

the annual inventory and holiday period and the consequent reductions in staffs. The week of January 17 coincides fairly closely with the termination of this season and accordingly reflects more normal conditions. The chart indicates percentage gains of varying size in the volume of employment during each of the weeks under review, as compared with the returns for the base week. The reports for September 11 show for those employers making returns on that date, additions to staffs of 55,808 persons or 8.1 per cent as compared with the staffs of the same firms for January 17. This increase was the largest registered during the six weeks under review, while that of 50,290 persons or 7.3 per cent recorded on August 7 was the lowest, the percentage showing fluctuations of less than 5 per cent during the intervening weeks.

### EMPLOYMENT IN THE BUILDING TRADES DURING AUGUST, 1920, AS INDICATED BY BUILDING PERMITS

**E**MPLOYMENT in the building trades as indicated by the value of building permits issued in 56 cities showed a decline during August as compared with the preceding month, the total value of

building permits falling from \$13,025,560 in July to \$9,439,807, in August, a decrease of \$3,585,753, or not quite 28 per cent. Prince Edward Island and Quebec were the only provinces to regis-

ter increases in this comparison, while of the reductions reported in the remaining provinces, that of \$1,226,768, in Alberta was the most pronounced.

As compared with the figures for the corresponding month in 1919, there was a decrease of \$2,476,238, or nearly 21 per cent in the building permits issued, the value for August, 1919, having been \$11,916,045. In this comparison, British Columbia alone reported an increase, declines being registered in the remaining provinces.

Of the larger cities, Montreal recorded an increase as compared with the figures for July, with a reduction in comparison with August, 1919. In Toronto and Vancouver, on the contrary, there were decreases as compared with July and increases over August of last year. Winnipeg and Edmonton registered declines in both comparisons.

Of the smaller centres, Sherbrooke, Brantford, Chatham, Fort William, Guelph, Owen Sound, St. Catharines, Sarnia, Brandon, and Regina reported increases in the value of building permits issued as compared with both July, 1920, and August, 1919.

The returns from 35 cities formerly used in this report (which are distinguished by asterisks, and which are also tabulated separately for statistical purposes), show that the total value of building permits issued by these cities amounted to \$8,525,337, a decrease of \$3,591,462, or almost 30 per cent, as compared with the returns for July. In comparison with the figures for August, 1919, moreover, a decrease of \$1,052,271, or 11 per cent, was registered.

# REPORTS ON CIVIC EMPLOYMENT IN FIFTEEN CITIES, AUGUST, 1920

**R** EPORTS from fifteen cities showing the number of workers temporarily engaged and the wages paid these employees during the month of August, showed a decrease of not quite three per cent in the number of workers and of less than four per cent in the wages paid as compared with the figures for the preceding month. In August, 1920, 11,401 persons were temporarily employed and the pay-rolls amounted to \$1,167,727 as compared with 11,711\* employees and of an aggregate payroll of \$1,213,752\* in July.

In comparison with the returns for the same period in 1919, increases of nearly eight per cent in the number of

employees and of more than thirty-eight per cent in the wages paid are indicated, there having been 10,563 employees with a total pay-roll of \$846,884 in August, 1919.

Toronto and London reported increases in the number of employees both as compared with the preceding month and also with August of last year. Montreal, Winnipeg, Regina, Moose Jaw and Calgary registered declines as compared with the figures for July, with increases over August, 1919. At St. John, Ottawa, Hamilton, Brandon, Saskatoon, Edmonton, Vancouver and Victoria there were decreases in both comparisons.

As to wages, Montreal, London, Winnipeg, Vancouver and Victoria showed

\*Revised figures.

increases both as compared with returns for July, 1920, and also for August, 1919. At St. John, Ottawa, Toronto, Regina, Moose Jaw, Saskatoon and Calgary decreases were registered as com-

pared with the returns for the preceding month with increases over August of last year. In Hamilton, Brandon, and Edmonton there were declines in both cases.

### FAIR WAGE CONTRACTS, SEPTEMBER, 1920

**D**URING September the Department of Labour received for insertion in the LABOUR GAZETTE the following information relative to sixteen fair wage contracts, of which thirteen were awarded by the Department of Public Works, and three by the Department of Railways and Canals. All the contracts, with two exceptions where fair wage schedules were included, contained the usual fair wage clause which provides for the prompt payment of such wages as are current in the district in which the work is to be performed, and for observance on the various works under contract of the prevailing hours of labour, and which otherwise prevents abuses and secures the legitimate rights of the labour employed.

A statement was also received as to supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, etc.

#### DEPARTMENT OF PUBLIC WORKS.

Dredging (in deep water berths), St. John, N.B. Name of contractor, J. A. Gregory, West St. John, N.B. Date of contract, September 20, 1920. Amount of contract, Class "B" \$0.32 per cu. yd. (scow).

Repairs to public wharf, Owl's Head, N.S. Name of contractors, Naugle & Hiltz, Laurencetown, N.S. Date of contract, September 14, 1920. Amount of contract, schedule of rates.

New steam boiler in the old Post Office, St. John, N.B. Name of contractor, James H. McPartland, St. John,

N.B. Date of contract, September 17, 1920. Amount of contract, \$2,980.

Repairs to the checkwater pier, Cobourg, Ont. Name of contractors, The York Construction Company, Ltd., Toronto, Ont. Date of contract, September 15, 1920. Amount of contract, schedule of rates.

Construction of new ceiling, Machinery Building, Lansdowne Park, Ottawa, Ont. Name of contractors, J. E. Cooper, E. McDonell & D. Beatty, Ottawa, Ont. Date of contract, September 18, 1920. Amount of contract, \$2,494.

Supply of underground cable between the Printing Bureau and the Royal Mint, Ottawa, Ont. Name of contractors, Ahearn & Soper, Ltd., Ottawa, Ont. Date of contract, September 2, 1920. Amount of contract, \$3,651.

Wharf, Anse Aux Gascons, Que. Name of contractor, Thos. P. Charleson, Ottawa, Ont. Date of contract, September 10, 1920. Amount of contract \$4,500.

Construction of office and garage building for Air Board of Canada, Jericho Beach, Vancouver, B.C. Name of contractors, W. J. Sloan and W. W. Harrison, New Westminster, B. C. Date of contract, August 23, 1920. Amount of contract, \$5,000.

Reconstruction of the superstructure of West Pier, Pelee Island, Ont. Name of contractors, Border Cities Construction Company, Windsor, Ont. Date of contract, September 22, 1920. Amount of contract, unit prices.

Dredging, Grand Anse, N.B. Name of contractor, Miramichi Dredging Co., Ltd., Newcastle, N.B. Date of contract,

August 28, 1920. Amount of contract, Class "B" \$0.63½ (scow measure).

Sub-structure, approach, spans, etc., of the bridge over Bow River, Banff, Alta. Name of contractors, Fegles Construction Co., Ltd., Fort William, Ont. Date of contract, September 23, 1920. Amount of contract, \$169,900.

Construction of wharf, Thetis Island, B.C. Name of contractor, The Vancouver Pile Driving & Contracting Company, Vancouver, B.C. Date of contract, September 15, 1920. Amount of contract, schedule of prices. Fair wages schedule as follows:

Trade or Class of Labour	Rates of Wages: Not less than the following:			
Foreman carpenter.....	\$9.00	per day,	8 hours	per day

Making metal dating stamps and type and other hand stamps and brass crown seals.....	\$ 401.25
Making and repairing rubber stamps, daters, etc.....	92.56
Supplying stamping material, pads and ink.....	62.25
Supplying mail bag fittings.....	3,713.42
Supplying mail bagging.....	2,578.38
Making up and supplying letter carriers' uniforms, etc.....	32,521.27
Scales new and repaired.....	1,066.60
Making and repairing miscellaneous articles.....	6.25

## WAGES IN DAIRY FACTORIES IN CANADA

THE results of a statistical survey of the dairy industry of Canada in the year of 1918 are given in Part II of the Census of Industry, 1918, recently issued by the Dominion Bureau of Statistics. In pursuance of the programme for securing consistency in the statistical returns of the various provinces uniform schedules were prepared by the Dominion Bureau (based on a schedule used by the province of Quebec), the distribution and collection of these schedules being for the most part carried out by the several Provincial departments concerned. The information given in the present report refers only to factories and takes no account of home production of butter and cheese. The factories in Canada total 3,373, this number including 990 creameries or butter factories, 1,885 cheese factories, 476 combined butter and cheese factories and 22 condensed milk factories, 15 of the latter being in Ontario. The production from

these factories in 1918 was 93,298,349 lbs. of butter and 174,878,313 lbs. of cheese. In the manufacture of butter, the province of Quebec stood first with 36,761,057 lbs., Ontario holding the second place with 29,452,422 lbs. In cheese production, however, Ontario was first with 107,886,724 lbs., Quebec being second with 62,070,162 lbs.

Statistics relating to the employment of labour are given in the subjoined table. The returns from 1,419 factories (exclusive of Quebec) show that 22 operated less than 60 days; 74 operated from 60 to 120 days; 596 from 120 to 180 days; 369 from 180 to 240 days; and 358 from 240 days and over. In Quebec province the 1,954 factories were in operation 372,738 days, or an average of 191 days for each factory. The total expenses including salaries and wages, amounts paid to farmers, fuel, etc., amounted to \$101,364,912, the value of the products totalling \$107,340,850.

\*In Quebec no distinction is made between salaried employees and wage-earners. The totals for Quebec in this table are given under the heading "Employees on Wages."

## RECENT INDUSTRIAL AGREEMENTS

THE following is a summary of the more important industrial agreements recently received by the Department. While the conclusion of every industrial agreement implies the acceptance, to a greater or less degree, of the principle of collective bargaining, it should not be overlooked that in a number of cases the agreement was reached only after the employees had been on strike. By verbal agreement is understood a schedule of rates and conditions agreed upon between the employees and the majority of employers, and in effect although not signed. The agreements are arranged by industrial groups.

### Metals and Machinery

AMHERST, N. S. — CANADIAN CAR AND FOUNDRY CO., LIMITED, AND THEIR EMPLOYEES, MEMBERS OF THE FEDERATED TRADES. Agreement in effect from June 30, 1920, until June 30, 1921, unless thirty days' notice be given.

Hours of labour: fifty per week, nine per day or night, and five on Saturday. Overtime, time and one-half; Sundays and holidays, double time. Work in excess of one shift in any twenty-four hours to be overtime. Pieceworkers working overtime to have overtime rates.

If staff is reduced, married men and men with dependents to be given preference.

Disputes to be referred to foreman, and failing adjustment, to a representative of the men and one of the Company. No strike or lock-out to take place pending settlement.

One apprentice for every five mechanics; apprentices to serve four years and to receive mechanics' rate at end of term, if retained. Apprentices to be between the ages of sixteen and twenty-one on entering the trade.

Minimum wages: Per hour—machinists, 70 cents; machinist specialists, 50 cents; 2nd year, 55 cents; 3rd year, 60

cents; blacksmiths, cabinet makers, upholsterers, template makers, bricklayers, pipe fitters, riveters, nut and bolt makers, electricians, welders, axle turner and fitter, 70 cents; carpenters, painters, saw fitters, wood machinists, sawyer and borer, morticer, sticker, planer, matcher, shaper, tool room repairer, car builders and repairers, armature winder 2nd class, motor attendants, wheel borer and wheel press, 60 cents; car oilers, bolt threaders, burners, tradesmen helpers, 50 cents; bucket, 65 cents; truck builders and repairers, punch operators, markers, press operator, reamer operator, shear operator, fitters, engineer, 55 cents; general checkers, 45 and 50 cents; tool room attendants, 45 cents; rivet heaters, 40 cents; fireman, water attendant, 47½ cents; crane operators, 52½ cents; millwright, 70 cents; apprentices, 25 cents per hour first year; each additional 6 months, plus 5 cents per hour; common labour, 40 and 42½ cents; watchman, 35 cents; tinsmiths, 70 cents; 2nd class, 60 cents.

AMHERST, N. S. — ROBB ENGINEERING WORKS, LIMITED, AND SHOP COMMITTEE REPRESENTING THE MOULDERS AND COREMAKERS IN THE FOUNDRY DEPARTMENT. Agreement in effect from July 14, 1920 until April 30, 1921.

Hours of labour, forty-eight per week; eight hours per day. Overtime, time and one-half; Sundays and holidays, double time.

Wages: Per hour up to October 1, side floormen, 75 cents; second men, 72 cents. From October 1 to April 30, men receiving 72 cents to receive 75 cents. Crane floor, first men, 78 cents; second men, 75 cents.

When a reduction of working force is necessary, married men to be retained.

Grievances to be referred to a committee, and no cessation of work to take place until committee shall have had

time to adjust a settlement with the highest officer of the company.

SAULT STE. MARIE, ONT. — ALGOMA STEEL CORPORATION, LIMITED, AND STEAM AND OPERATING ENGINEERS. Agreement in effect from September 7, 1920, with wage scale retroactive to June 15, 1920, with 60 days' notice of cancellation.

Wages per hour—Gas engineers, chief operators, 77½ cents; operators, 66½ cents; oilers, 59 cents; hoisting engineers, senior operators, 71¾ cents; junior operators, 68 cents; firemen, 55½ cents; locomotive engineers (narrow gauge), 70¾ cents; stationary engineers, 65¾, 67½, 68¾ and 70 cents.

Overtime, time and one-half.

Committee of engineers to have privilege of meeting company officials.

MONCTON, N. B. — LOCAL EMPLOYERS AND SHEET METAL WORKERS' UNION No. 643. Agreement in effect from May 1, 1920.

Wages: Per hour—journeymen 68 cents; foremen, 70 cents.

Hours of labour, forty-eight per week; overtime when necessary on stock work to be straight time; other overtime, time and one-half to 12 midnight; thereafter and Sundays, double time.

MOOSE JAW, SASK. — LOCAL EMPLOYING FIRMS AND AMALGAMATED SHEET METAL WORKERS' INTERNATIONAL ALLIANCE, No. 431. Agreement in effect from June 1, 1920 to May 1, 1921.

Minimum wage: Per hour—journeymen, 90 cents.

Hours of labour, eight hours per day, four hours on Saturdays.

Overtime to midnight, time and one-half; thereafter and legal holidays, double time; no work on Labour Day.

CALGARY, ALTA. — SHEET METAL WORKERS' EMPLOYERS AND SHEET METAL WORKERS' INTERNATIONAL ASSOCIATION, No. 254. Agreement in effect from May 1, 1920 to May 30, 1921 with 90 days' notice of change.

Hours of labour, eight per day, four on Saturdays.

Wages: Per hour—from May 1, 1920 to July 1, 1920, 90 cents; thereafter, 95 cents. Overtime, from 6 p.m. to 10 p.m., time and one-half; thereafter and Sundays and holidays, double time.

#### Foods, Liquors and Tobacco

OTTAWA, CANADA. — MASTER BAKERS' ASSOCIATION AND BAKERY DRIVERS' UNION, No. 488. Agreement in effect from June 1, 1920 to June 1, 1921.

Minimum wage per week to be \$25 for all experienced bread drivers; rate not to be changed where system of commission is in vogue. Less than three months' experience, per week \$18 to \$25.

Employers not to oppose men joining the Union.

Holidays to be observed with pay.

No route to require more than a nine-hour day.

Grievances not settled by committee of men meeting the employer to be referred to a joint committee.

VICTORIA, B. C. — MASTER BAKERS OF VICTORIA, AND INTERNATIONAL BROTHERHOOD OF TEAMSTERS, CHAUFFEURS, STABLEMEN, AND HELPERS, No. 365. Agreement in effect from July 1, 1920, until June 30, 1921.

All salesmen to be members of the Union.

Minimum wage: Per week—Bakery Salesmen, \$30.00; men without experience, for not more than thirty days, \$25.00; stablemen's wages to be settled between individual employers, union representatives and men affected.

Hours of labour, fifty per week; overtime, time and one-half. Sunday labour, time and one-half, to be worked only in emergency.

Disputes to be referred to a joint arbitration committee.

WINNIPEG, MAN. — LOCAL EMPLOYERS AND UNITED GARMENT WORKERS OF AMERICA, No. 35. Agreement

in effect from February 17, 1920, until February 17, 1921.

Employees to be not less than sixteen years of age, and to be good standing union members. During slack season, work to be so divided that each employee may receive an equal amount.

Hours of labour, forty-four per week, ending Saturday at noon.

Differences to be submitted to the General Union officers.

### {Printing and Publishing

CALGARY, ALTA. — EMPLOYING PRINTERS AND CALGARY PRINTING PRESSMEN ASSISTANTS' AND FEEDERS' UNION, No. 201. Agreement in effect from May 1, 1920, until October 31, 1920.

Wages: Per week—Journeymen, cylinder pressmen, day, \$45, night \$48; platen pressmen, four presses, \$40 three presses, \$37.50, two presses, \$35; assistant pressmen, \$35. Cylinder feeders, first six months, \$18; second six months, \$21; second year, \$23; third year, \$27. Platen feeders, first six months, \$9; second six months, \$12; second year, \$15; third year, \$18; feeder with three years' experience, \$21. Feeders working on both cylinders and platens to be classed cylinder feeders. A feeder with three or more years' experience to enter apprenticeship as assistant pressman when a vacancy occurs, and after two years to be entitled to sit for an examination; if qualified, to be given first opening for a pressman. Only one assistant unless three journeymen employed. Feeders and assistants to receive 50 cents per shift over scale, for night work.

Foreman pressman to have full charge of press room; to have right to hire or discharge help at will so long as men comply with rules of union and discharge is not on account of maintaining union principles.

Hours of labour, forty-five per week day work; forty-four per week night work. Overtime, first three hours, time and one-half; thereafter and Sundays and holidays double time.

Only union men to be employed.

VANCOUVER, B.C.—LOCAL EMPLOYING PRINTERS AND PRINTING PRESSMEN'S UNION, No. 69, INTERNATIONAL PRINTING PRESSMEN AND ASSISTANTS' UNION OF NORTH AMERICA. Agreement in effect from December 15, 1919 to December 31, 1920, and thereafter until a new contract or scale be made.

	From September 1, 1919 to December 31, 1919	From January 1, 1920 to August 31, 1920	From September 1, 1920 to December 31, 1920
Cylinder and offset:			
Journeymen pressmen...	\$36.50	\$39.50	\$40.50
Feeders.....	22.00	23.50	24.50
Platen:			
Journeymen pressmen.	33.50	36.00	37.50
Feeders.....	20.00	21.50	22.50

#### Night work:

Pressmen.....7 cents per hour over day rate.

Feeders and apprentices 5 cents per hour over day rate.

Apprentices: apprentice pressmen on cylinder or platen presses to receive \$1 per week over respective feeders' scales, with increase of \$1 per week each year thereafter until becoming a journeyman. In case of apprentice pressman employed on both cylinder and platen presses, cylinder scale to prevail.

Shops employing an apprentice pressman or one journeyman feeder or more to be entitled to employ an apprentice pressfeeder, registered with Union, apprentice to receive \$12 per week after one year, and \$14 per week after eighteen months, or after one year if competent. After two years' apprenticeship, if eighteen years of age, apprentice to receive a journeyman feeders' card.

Overtime: first six hours, time and one-half; thereafter and Sundays and holidays, double time.

One apprentice to every four journeymen. Scale to apply to all journeymen feeders, regardless of sex.

All employees to be union members if such are available.

BRANTFORD, ONT. — EMPLOYING PRINTERS, AND BRANTFORD TYPOGRAPHICAL UNION No. 378. Agreement in effect from October 1, 1919, until May 31, 1921. Minimum wages: Per week—Machine operators and floorman, day work, \$27.00; night work, \$29.00; machinist operators and foremen, \$29.00.

Hours of labour: eight per day: seven and one-half per night.

Overtime, day, until 11 p.m. time and one-half; night, until 10 a.m. time and one-half; thereafter day or night and Sundays and holidays double time.

Machine learners' scale, journeymen, two-thirds of hand compositors' scale while operating the linotype. After four months, full scale for operators. Apprentices in last six months may operate machines.

Only union members or apprentices employed in the job or advertisement departments to handle type in any department controlled by the Union.

Apprentice to be not less than fourteen years of age to begin, and possessed of a common school education.

Five years to be term of apprenticeship, but an apprentice may remain longer to qualify fully; apprentices to be registered by Union; one apprentice to three journeymen printers or fraction.

Apprentice wage scale: Per week—third year, \$9.00; fourth year, \$11.00; fifth year, \$13.00.

Disputes to be referred to a joint standing committee.

OTTAWA, ONT. — EMPLOYING PRINTERS OF OTTAWA, AND OTTAWA TYPOGRAPHICAL UNION, No. 102.

To the rates as in existing agreement, a bonus was added to be effective from July 1, 1920, to June 30, 1921, benefiting printers, linotype operators and monotype operators in commercial job offices. Amount of bonus, \$3 per week, except in Government Printing Bureau, where bonus is \$4 per week. Overtime is paid on the scale plus bonus rate. The agreement appeared in the LABOUR GAZETTE for February, 1920, on page 174.

OTTAWA, ONT. — NEWSPAPER PUBLISHERS, AND OTTAWA TYPOGRAPHICAL UNION, No. 102. Agreement in effect from January 1, 1918, to December 31, 1922.

Only union members to be employed. Scale of minimum wages: Per week—on evening newspapers, assistant foremen, compositors, make-ups, operators, copy cutters, bankmen, typesetters, machinists, and machine tenders, \$26.50 for first two years, and \$27.50 for remaining three years; eight hours per day; overtime, time and one-half. Morning newspapers, first two years, \$28.50; last three years, \$29.50; seven and one-half hours per night; overtime and time and one-half. Sundays and holidays, double time.

To this agreement was subsequently added a bonus making pay and bonus up to September 13, 1920, for evening papers \$36; and for morning papers, \$38.50; further amendment September 13, 1920 made evening paper scale \$38; morning paper scale, \$40.50. This is in force with the majority of local newspaper publishers; also annual vacation of one week with pay; overtime, based on scale and bonus. Hours per week actually worked, day, 45½; night 42½.

Learners must be union members. Learners' term, six months. Wages: Per week—first two weeks, \$12; next two weeks, \$14; next eight weeks, \$16; next six weeks, \$19; remaining eight weeks, \$21; night rate, 15 per cent in advance.

Apprentices:—News rooms: one apprentice to four journeymen or less; one for each additional four or less; not more than four on one shift. Apprentices to be not less than fifteen years of age, and to serve five years. At end of second year if competent, to be made apprentice members of Union. Apprentices scale: 1st six months of third year, \$9; 2nd six month, \$10; 1st six months of fourth year, \$12.50; 2nd six months, \$13.50; 1st six months of fifth year, \$14.50; 2nd six months, \$17.

Disputes to be referred to the local Joint Standing Committee.

TORONTO, ONT. — PUBLISHERS OF TORONTO DAILIES AND TORONTO TYPOGRAPHICAL UNION, No. 91. Agreement in effect from July 1, 1917 to June 30, 1922.

In this agreement the original scale was as follows: Per week—evening newspapers first two years of agreement, \$26.50; last three years, \$27.50. Morning newspapers, first two years, \$28.50; last three years, \$29.50. Subsequently the rates were raised by bonuses to: evening newspapers, \$36; morning newspapers, \$38.50. These earnings were increased by \$2 on September 9, 1920, making the rate plus bonus: evening newspapers, \$38; morning newspapers, \$40.50.

Hours of labour: morning papers, seven and one-half, evening papers, eight.

Working conditions of agreement are similar to other typographical agreements now in force.

KITCHENER, ONT. — LOCAL EMPLOYING PRINTERS, AND TYPOGRAPHICAL UNION, No. 366. Verbal agreement in effect from June 1, 1920 until April 30, 1921.

Newspaper, Book and Job scale:

Hours of labour: eight hours per day or night; six days or nights per week.

Minimum wage: Per week—hand-compositors, operators, make-up men, proof readers, and journeymen not otherwise specified, day work, \$30; night work, \$32; machinist operators, \$30. Overtime, time and one-half.

Apprentices: Per week—first year, \$6; second year, \$7; third year, \$9; fourth year, 1st 6 months, \$12; 2nd 6 months, \$14; fifth year, 1st 6 months, \$16; 2nd 6 months, \$18. One apprentice to every four journeymen; apprentices to be not less than sixteen years of age, and to have common school education.

ST. CATHARINES, ONT. — LOCAL EMPLOYING PRINTERS AND ST. CATHARINES TYPOGRAPHICAL UNION, No. 416. Agreement in effect from July 1, 1920, until July 1, 1921.

One week's holidays to seven-day workers having six months' service.

Construction and maintenance (city stations):

Hours of labour, eight per day, forty-eight per week. Wages: Per hour—maintenance men, 75 cents; helpers, 62 cents; labourers, 43 cents. Grievances to be settled by arbitration.

General shops: Hours of labour: forty-four per week. Wages: Per hour—electricians, armature winders, 80 cents; arc lamp assemblers, meter assemblers and repairers, testers, (meters transformers, motors) transformer winders, transformer assemblers, 70 cents.

Apprentice to serve three years. Wages: Per hour—first year, 31 cents; second year, 40 cents; third year, 50 cents; charge hands, 10 cents per hour above men over whom they have charge.

Grievances to be settled by arbitration. Piecework rates as in vogue May, 1920, to be increased 16 per cent.

### Transportation—Water

CANADA. — VESSELS TRADING FOREIGN OR BETWEEN PACIFIC AND ATLANTIC PORTS, AND NATIONAL ASSOCIATION OF MARINE ENGINEERS OF CANADA. Verbal agreement in effect for the year 1920.

Ocean and coastwise scale, Cargo steamships: Per month—1,001 to 2,000 power tonnage, chief engineer, \$200; second, \$150; third, \$125; fourth (overtime or introduction additional engineer), \$110; 2001 to 3000 P.T., chief \$205; second, \$155; third, \$125; fourth (as above) \$110. 3001 to 4000 P. T., Chief, \$210; second, \$155; third, \$130; fourth, \$120; fifth (overtime or introduction additional engineer), \$110. 4001 to 5000 P. T., Chief, \$215; second, \$160; third, \$135; fourth, \$120; fifth (as above), \$110. 5001 to 6000 P. T., chief, \$220; second, \$165; third, \$140; fourth, \$125; fifth (as above) \$110. 6001 to 8000 P. T., chief, \$225; second, \$170; third, \$145; fourth, \$125; fifth (as above), \$110. 8001 to 10,000 P. T., chief, \$230; second, \$175; third, \$150; fourth, \$130; fifth (as above), \$110. Power tonnage is indicated horse power plus gross tonnage of respective vessels. Subject to adjustment for oil tankers and refrigeration vessels.

Watch and watch to be maintained on sailing day; no engineer to take charge of a watch upon or immediately after leaving port, unless after six hours off duty. Working day, 8 a.m. to 5 p.m., one hour for dinner. Night service, eight hours per night. If required to stay aboard at night, after having worked all day, engineer to do only work necessary for safety of vessel and to have a full day off with pay and six hours overtime at 75 cents per hour. If required to do work, engineer to be paid in addition 75 cents per hour for all hours worked. If required to stay aboard Sundays or holidays, engineer to be paid overtime, 75 cents per hour. Work done off watch to be paid overtime. Assistant engineer working in excess of eight hours to be paid overtime. Chief engineers not to be paid overtime

except on vessels with less than four engineers. Full complement of engineers to be employed while vessel is working cargo or in commission. On vessel out of commission one engineer to receive pay and subsistence allowance of chief engineer. Others employed as machinists, to receive not less than minimum wage paid machinists.

Chief engineers to receive for subsistence allowance not less than \$2 per day. Assistant engineers, not less than \$1.50 per day.

If a member of the Association be discharged for observance of these rules, no member of the N. A. of M. E. to be permitted to sail or work with substitute.

ST. JOHN, N. B. — CERTAIN SHIP OWNERS, AND NATIONAL ASSOCIATION OF MARINE ENGINEERS OF CANADA, COUNCIL No. 2. Verbal agreement in effect from January 1, 1920.

Tug and freight steamers:

Minimum wage scale: Per month—first engineer, from 20 to 30 nominal horse power, \$120; over 30 to 50, \$135; over 50 to 75, \$150; over 75 to 100, \$165; over 100, increased according to scale. Second engineer, \$25 per month less than chief. All steamers (compound) under 20 N. H. P. minimum rate per month, certified engineers, \$100.

Class 1. Tugs and steamers, freight or passenger, single cylinder type: Per month—First engineer, from 10 to 20 nominal horse power, \$110; over 20 to 30, \$125; over 30 to 50, \$135; over 50 nominal horse power, increased according to scale. Second engineer, \$25 per month less than chief.

Class 2, Per month—First engineer, from 20 to 30 nominal horse power, \$120; over 30 to 50, \$135; over 50 to 75, \$150; over 75 to 100, \$160; over 100 to 150, \$170; over 150 to 200, \$180; over 200, increased in proportion to scale; all ferry steamers over 20 N. H. P., minimum scale per month, \$150. Second engineer, \$25 less than chief; third engineer, \$25 less than second engineer. All above rates include board, or \$20 per month extra to be given. Engineers

to receive first class transportation and hotel expenses when going to fit out or lay up steamers. When not hired by year, rates to be 25 per cent more than above scale.

CHARLOTTETOWN, P. E. I. — CERTAIN SHIP OWNERS, AND NATIONAL ASSOCIATION OF MARINE ENGINEERS OF CANADA, COUNCIL No. 15. Verbal Agreement in effect from June 1, 1919, to September 1, 1920.

Minimum wage scale for ocean and coastwise steamers; Per month and found, 200 nominal horse power and upward—Chief engineers, \$170; second, \$145; third, \$120; fourth, \$110; 100 to 200 horse power—Chief engineer, \$160; second, \$135; third, \$115; fourth, \$105; 50 to 100 horse power—Chief engineer, \$150; second, \$125; third, \$100; 25 to 50 horse power—Chief engineer, \$125; second, \$100. Steamers under 25 N. H. P., minimum rate for engineers in charge, \$110 per month and found.

On steamboats where engineers are not found, \$20 per month additional.

If not hired by year, men to have 20 per cent more.

MONTREAL, SOREL, CHAMPLAIN AND LEVIS, QUE. — SHIP OWNERS, AND PROVINCIAL COUNCIL OF THE NATIONAL ASSOCIATION OF MARINE ENGINEERS OF CANADA. Verbal agreement in effect during the season of 1920.

Expenses to be paid to and from residence to boat. All engineers to be found, except on ferry boats. Overtime after twelve hours, 75 cents per hour.

Passenger boats: 3000 tons and over—Chief engineers, season, \$2,400; second, per month, \$180. From 1,250 to 3,000 tons sailing six months or more, chief engineer, season, \$2,100; second, per month, \$150. From 1,250 to 3,000 tons, sailing less than six months—Chief engineer, season \$1,900; second engineer, per month, \$150. Boats less than 1,250 tons, requiring chief engineers with 2nd class certificate—Chief engineer, season, \$1,650; second, per month, \$125; other passenger boats—per month, chief engineer, \$125 and \$150; second, \$110.

Freight boats: 5,000 tons and over—chief engineer, season, \$2,400; second, per month, \$180; boats from 3,000 and less to 5,000 tons, chief engineer, season, \$2,200; second, per month, \$160. Other freight boats, chief engineer, season \$1,800 and \$2,000, and per month \$165; second per month, \$120, \$130; and \$140, according to class of boat.

Tugs: Per month—chief engineers, according to class of boat, \$185, \$170, \$165, and \$150, second engineers, \$145, \$140, \$130, and \$120 per month.

Ferry Boats: second class engineers, \$185; third class, \$150.

Dredges: according to type as specified by Department of Marine and Fisheries, first engineers, per season \$2,200, \$1,600; per month, \$175, \$200, \$180; second engineers, per month, \$160, \$150, \$140, \$130; third engineers, per month, \$140, \$120, \$100; fourth engineers, \$120.

PRINCE RUPERT, B. C. — PACIFIC STEVEDORING AND CONTRACTING CO., GRAND TRUNK PACIFIC RAILWAY, GRAND TRUNK PACIFIC COAST STEAMSHIP COMPANY, LIMITED, AND INTERNATIONAL LONGSHOREMEN'S ASSOCIATION, Nos. 38 and 41. Agreement in effect from July 16, 1920, subject to thirty days' notice of cancellation or revision.

Wages: general 'longshore work, per hour, day time, 90 cents; overtime, \$1.10. Eight hours per day. Coal and ore in bulk, and cement in lots of 25 tons, per hour, day time, \$1; overtime, \$1.20. Per hour straight time: fertilizer and plaster in lots of over 25 tons, \$1.15; powder any quantity, creosoted lumber and piles, \$1.10; sulphur in bulk any quantity, \$1.25. Double winch drivers, \$1.10 per hour, day time: \$1.50 overtime.

Hours of labour, eight per day.

'Longshoremen to line up at shed at 8 a.m. and 1 p.m. for one half hour. If not hired, to retire to hall and remain subject to call until 11 a.m. and 5 p.m.

Union to endeavour to supply sufficient men, otherwise employer may obtain men.

## PRICES RETAIL AND WHOLESALE IN CANADA, SEPTEMBER, 1920

THE movement of prices was again downward, lower levels appearing in both wholesale and retail prices. Many of the important changes were seasonal and due to large crops and better supplies on the market, but the tendency to lower levels for raw materials and for some manufactured goods was still evident. In some cases there was a slight recovery in the prices of raw materials, indicating that for such articles the usual fluctuations might now be expected rather than the steadily rising or falling markets which had characterized the movement since 1914. Raw silk, jute, brass, solder and aluminum illustrated this condition, while coal, gasoline, pulp and paper appeared to be still rising. Iron and steel were still firm but lumber fell in some lines. Dairy products were upward but the changes in butter and cheese were slight with fluctuations downward at times while eggs showed considerable increases. Cattle and beef were weak but hogs, ham and bacon were higher. Grain was lower but fodder was firm. Potatoes were again lower, and other fresh vegetables came on at lower levels than for some time. Sugar and molasses declined steeply as larger supplies became available. Cotton, hides, leather, and some metals continued to decline.

In retail prices the average cost of a list of staple foods in terms of the retail prices in sixty cities at the middle of September was \$15.95 as compared with \$16.42 for August, \$16.84 for July, \$16.92 for June, \$14.33 for September, 1919, \$13.31 for September, 1918, and \$7.83 for September, 1914. The chief decreases were in potatoes and sugar with slight decreases in beef, lard, flour and rolled oats, but increases in pork, bacon, eggs and butter. Coal, wood and coal oil were also higher and rent advanced in some of the cities.

In wholesale prices the index number was lower at 326.6 for September as compared with 330.2 for August, 346.8 for July, 349.3 for June, 356.6 for May, 301.5 for September, 1919, 385.3 for September, 1918, 141.3 for September, 1914, and 134.4 for September, 1913. The chief decreases by groups were in Grains, Foods, Textiles, Hides and Leather, and in Lumber, with the chief increases in Dairy Products and Fruits.

The accompanying tables and notes give details as to the prices movement during the month and as compared with the same month in previous years.

The table of retail prices gives statistics for some 60 localities in Canada, having a population of approximately 10,000 or over. Quotations are obtained by the correspondents of the LABOUR GAZETTE, resident in each locality, from representative dealers doing a considerable trade with workingmen. All prices are for delivered goods. The exact quality for which the quotation is given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The list of commodities includes over one hundred staple foods and groceries, coal, wood and coal oil, the number of articles having been increased twice since January, 1910, when the regular publication of these statistics was begun.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts, with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central,

without modern conveniences or with incomplete conveniences.

The weekly family budget calculated in terms of the average prices in the cities for which reports are received includes twenty-nine staple foods, laundry starch, coal, wood, coal oil, and rent, these being the items for which statistics have been obtained each month and published in the LABOUR GAZETTE since January, 1910. The quantities of each commodity included are modifications of those employed in similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance the only fruits are evaporated apples and prunes, and the only fresh vegetable is potatoes. As market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportion of expenditure on the various foods therefore tends to be maintained.\* In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the difference in quality. It was estimated, when the budget was first published in 1912, that these calculations represented from sixty to eighty per cent of the expenditure of an ordinary family, according to the total income. For the average family of five the expenditure on these items of food, fuel, light, and rent would be perhaps two-thirds or about sixty-five per cent of the total income. While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in

the Dominion or in any one province. The quantities of meats, dairy products, cereals, etc., included were designed to afford a liberal supply for the healthy family of a man at hard physical work. On the other hand an average family with an income sufficient to do so would buy less meat, etc., but more fruit, fresh and canned vegetables, etc.; so that the comparative expenditure would be little changed.

The index number of wholesale prices is based on the quotations for 271 commodities, and is the simple average of the percentages of current prices of the several commodities in relation to the average prices for the base period, 1890-1899, these being therefore made equal to 100. The quotations for most farm products are obtained weekly and averaged for the month, the quotations for other commodities are taken for the middle of the month. The table of index numbers shows the changes by groups and sub-groups for the previous month and for corresponding months back to 1913.

### Retail Prices

In meats, prices averaged slightly lower for beef, veal and mutton, but pork and bacon were higher. There were some decreases in lamb. Bacon and ham advanced in several of the cities, especially in the West. Lard was lower in a number of the cities. Eggs advanced, the increase averaging 5 cents per dozen. Milk advanced in twelve of the cities. Butter was slightly higher throughout the Dominion. Flour declined in several of the cities. Canned tomatoes, peas and corn were steady. Dry beans were lower in a few of the cities. There was a general decline in onions. Potatoes again dropped considerably, the decrease being general throughout the Dominion, the average price per bag at the middle of September being \$2.44 as compared with \$3.81 in August and \$6.51 in June. Fresh apples also declined considerably. Jam and canned fruit were steady. Sugar declined 2 cents per pound in nearly all the cities, averaging 22.1

\*At times when the price of an article heavily weighted for this purpose rises (or falls) abnormally the increase (or decrease) in food prices so indicated is exaggerated and this should be taken into account in using the budget as an indicator of changes in the cost of living.

cents per pound as compared with 25 cents in August. Tea, coffee and cocoa were steady.

Both anthracite and bituminous coal were higher, the increase in anthracite being \$1.00 to \$2.00 per ton in most of the cities, while in some cities the increases were greater. In bituminous coal the increases varied according to local conditions, there being no change in many of the cities. Wood advanced in some cases. Coal oil advanced again in some of the cities, continuing the general advance which began in the spring as a result of successive increases in wholesale prices.

Rent was higher at Amherst, Thetford Mines, Guelph, Kitchener and St. Thomas. In some localities further advances were reported, to take effect on the first of October.

#### Wholesale Prices

**GRAINS AND FODDER.**—Manitoba wheat No. 1 Northern reached \$2.77 per bushel in store at Port Arthur and Fort William at the end of August and rose to \$2.83½ in the second week in September, but fell to \$2.78¼ a week later and to \$2.55¾ in the last week. Ontario winter Wheat No. 2, at Toronto, was unchanged at \$2.30-\$2.40 per bushel. Barley at Winnipeg fell to \$1.25 at the beginning of September and was still lower at \$1.11 at the end. Ontario barley at Toronto was down from \$1.35-\$1.40 to \$1.15-\$1.20. Oats at Winnipeg had fallen to 84¾ cents at the beginning of September and were down to 73⅔ cents at the end. Ontario oats, No. 3, fell from 80-85 cents per bushel to 68-72 cents. Corn was down from \$2.00 per bushel to \$1.65. Flaxseed fluctuated, reaching \$3.55, but fell to \$3.30 at the end of the month.

**ANIMALS AND MEATS.**—Cattle at Winnipeg advanced from \$12.00 per hundred to \$12.50 for the best, but the next grade fell from \$11.00 to \$10.75. At Toronto, butcher cattle had fallen at the middle of August, recovering slightly at the end of the month when the price rose to \$13.50-\$14.75. At the end of September

the price was easier at \$13.00-\$14.75. Beef, dressed, hindquarters, fell from 31½ cents per pound to 28 cents. Hogs advanced from \$19.50 per hundred to \$20.25. Bacon advanced from 50 cents to 53 cents. Ham rose to 44 cents and fell to 42 cents. Mess pork fell from \$40.00 per barrel to \$37.00. Sheep were easier at \$7.00-\$7.50. Lamb had fallen to 25-27 cents per pound at the beginning of the month, but advanced once cent later. Turkeys were firmer at 55-58 cents per pound.

**DAIRY PRODUCTS.**—Finest creamery butter at Montreal had risen during August but fell from 59½ cents to 58¾ cents at the beginning of September and to 58½ cents later, the average price being slightly higher than in August. Creamery prints at Toronto rose from 62 cents to 63 cents. Cheese had risen at the end of August to 27½ cents per pound and fell to 26 cents by the end of September, but averaged higher in September than in August. Eggs rose at Montreal from 72-76 cents per dozen. Milk advanced in some of the cities.

**FISH.**—The export market for dry cod was very weak. Salt mackerel was in good demand and the price advanced from 7 cents to 8 cents per pound. Canned salmon advanced from \$5.25 to \$5.95 per dozen at Toronto for sockeye.

**FRUITS AND VEGETABLES.**—Peaches were higher, but fell from \$1.00 per basket to 85 cents toward the end of the month. Plums rose to 30-60 cents per basket, but later declined 10 cents. Pears were up to 60 cents-\$1.25 per basket. Early fall apples were up to \$4.00-\$6.00 per barrel. Bananas were higher at \$7.00-\$8.00 per bunch. Oranges were higher at \$8.00-\$10.00 per box. Potatoes were lower at \$1.65-\$1.85 per bag in small lots at Toronto. Fresh tomatoes fell to 20-30 cents per basket, but later advanced 10 cents. Dry beans were selling at \$4.40-\$5.00 per bushel. Onions came on the market at \$3.25-\$3.50 per hundred pounds. Turnips came on at \$1.00 per bag. Old crop government standard spring wheat flour fell from \$14.75 per barrel to \$14.15 early in September, but

\*Preliminary figures. †Four commodities off the market, fruits, vegetables, etc.; one line of spelter was dropped in 1915. \$Number varies from month to month.

recovered 10 cents in the next week. For the first time since January, 1918, the pre-war grades of flour were on the market. Manitoba patents came on at \$13.65 per barrel early in September, advanced 10 cents in the second week and reached \$14.00 in the third week. Toward the end of the month, owing to the lower price of wheat the market was weaker and the price fell to \$13.50. Santos coffee fell two cents, to 42 cents. Sugar had risen to \$24.88 per hundred pounds in barrels at Toronto in July, but toward the end of August began to fall and by the middle of September was \$3.00 per hundred pounds lower. Molasses fell from \$1.76 per gallon to \$1.53. Honey was rising, but supplies from New Zealand came on the market and the price remained at 23-25 cents per pound. Salt advanced about 10 per cent.

**TEXTILES.**—Cotton fell to 31 cents per pound. Raw silk recovered slightly after falling continuously since January. Silk thread declined again, machine twist being down from \$22.75 per pound to \$19.75. Jute and hessians had fallen continuously from February to July and the decline in hessians continued in August and September, but jute recovered slightly in August and again in September.

**HIDES, LEATHER, BOOTS, AND SHOES.**—Hides had fallen continuously since February, No. 1 beef hides being down to 12 cents per pound as compared with 30 cents in February. Calfskins were down to 12 cents as compared with 60 cents

in January. Horsehides were down to \$3.00-\$4.00 each as compared with \$10.00-\$12.00 in January. Leather was again lower in some grades. Harness leather fell 2 cents, to 92 cents per pound. Waxed split leather was down to 53 cents. The manufacturers announced a reduction in prices of boots varying according to varieties.

**METALS AND IMPLEMENTS.**—Iron markets continued firm. Other metals were lower for antimony, lead, quicksilver and tin, but aluminum, brass and solder were slightly higher. Coil chain and grindstones advanced.

**FUEL AND LIGHTING.**—Anthracite coal advanced \$1.25 per ton in Montreal. Connellsville coke fell from \$1.00-\$2.00 per ton. Gasoline advanced 2 cents per gallon. Calcium carbide rose from \$85 to \$95 per ton.

**BUILDING MATERIALS.**—Spruce deals at St. John fell from \$38.00 per thousand to \$36.00. The best grades of pine, oak and maple were easier at Toronto. Shingles recovered slightly at Victoria, B.C. Building paper advanced 20 cents per roll. Linseed oil fell to \$1.57 per gallon and turpentine was down to \$2.40 per gallon. Benzine advanced 2 cents per gallon.

**HOUSE FURNISHINGS.**—Glass tumblers, wooden pails and tubs were 10 per cent higher.

**MISCELLANEOUS.**—Malt fell to \$1.78 per bushel. Pulp and paper markets were firm. Raw rubber fell from 31 cents per pound to 26½ cents.

## PRICES IN THE UNITED KINGDOM AND IN OTHER COUNTRIES

**T**HE accompanying tables and the following notes give the latest information available as to the prices movement in the United Kingdom and other countries as compared with Canada.

The general prices movement is referred to as follows in the September number of the *Federal Reserve Bulletin* issued by the Federal Reserve Board of the United States:—

The current situation with respect to price developments is naturally closely allied to the exchange situation, not only because it reflects the results of inflation and the changes in the value of foreign currencies, but also changes in the volume of production. Exactly how far fluctuations in prices are due to changes in volume of production and how far to banking inflation is not capable of accurate determination. There can, however, be no difference of opinion as to the fact that changes in the levels of prices in the differ-

ent countries are influenced by all of these factors and that such changes when compared with changes in the price levels in other countries necessarily influence the flow of international trade profoundly. Without doubt the rapid and extensive fluctuations in the value of exchange which had been brought about by alterations in currency value, by Government fiscal operations, and by the "dumping" of large quantities of bills on the market because of the fear of their holders that loss might result from continuous holding of them, have profoundly disturbed prices from time to time and may be regarded as factors explanatory of the extremes to which price quotations have gone. Index numbers for some of the principal countries show that prices are much higher now than they were approximately a year ago. A review of such numbers for the past few months, however, shows that the tendency is distinctly downward both in England and in the United States. A similar movement is also to be noted in various continental countries, although obscured there to a greater extent through the existence of currency expansion.

*Commerce Monthly* published by the National Bank of Commerce in New York contains the following note on wholesale commodity prices:—

Prices continue to move downward in many important groups of raw products, and of semi-manufactured materials for use in further manufacture. Declines have been passed on to the finished product in some lines. Unless untoward social and political developments should take place in Europe, however, it now seems likely that in the case of most commodities the period of rapid price adjustment has passed, and that fluctuations from now on will be through a gradually narrowing margin. Present price movements, however, must be interpreted with the greatest care. Cases in point are those commodities the prices of which superficially appear stable, but in which, as a matter of fact, almost no business is being done. In such cases, actual values cannot be known until trading operations are resumed.

#### United Kingdom

The *Labour Gazette* published by the Ministry of Labour reported that the retail food prices in the United Kingdom on September 1, were 167 per cent higher than in July, 1914, as compared with 160 per cent on August 1, the chief increases for the month being in government butter, in eggs, British meat, bacon and milk, but there was a fall in pota-

toes. Increases in rent were restricted by legislation to increases due to higher local taxes. An amendment of July 2, 1920, however, permitted certain other increases chiefly those due to cost of repairs, and information secured for September 1, indicated that the average increase in rents by that date was 35 per cent., of which about one-half was due to higher taxes and water rates, while the remainder was due to cost of repairs, etc. As regards clothing, it was ascertained that prices had risen since July, 1914, by 330 per cent. In fuel and light, costs were up 135 per cent, and in sundries 130 per cent. In all items the average increase was calculated to be 161 per cent. In wholesale prices the various index numbers showed decreases since March and April, but increases appeared in some lines, while iron and steel were steady.

#### France

The General Statistical Department reported the index number of retail prices of food, fuel and lighting in Paris for July, 1920 to be 1 per cent higher than for June and 273 per cent higher than for July, 1914.

#### Belgium

The *Revue du Travail* reported that retail prices on June 17 averaged 1.9 per cent lower than on May 15, but 362 per cent higher than in April, 1914. Food prices were up 375 per cent, clothing fuel and light 356 per cent, and less necessary articles 377 per cent.

#### Italy

The Municipal Labour Office at Rome reported the level of retail food prices in July to be 2.2 per cent lower than in June, but 218 per cent higher than in 1914. Other necessities, however, were slightly higher for the month and the advance in the cost of all items since 1914 was calculated to be 213 per cent. The Municipal Labour Office at Milan reported the cost of maintaining a family in August, 1920 to 1.8 per cent

\*230 Commodities 1890-1909: 272, 1910-1914: 271, 1915-1920

†Food only. aQuater beginning in month specified

‡Continuing Sauebeck index number

higher than in July and 349 per cent higher than in 1914. For the month food increased 2 per cent and was 354 per cent higher than in 1914. Clothing had advanced 492 per cent since 1914, heat and light 549 per cent, and rent 8.3 per cent.

#### United States

The Bureau of Labour Statistics reported the index number of retail food prices for August to be 207 as compared

with 219 for July and June, 215 for May, 192 for August, 1919, 171 for August, 1918, and 92 for August, 1914. For the month, decreases appeared in all beef, in butter, cheese, flour, corn-meal, rice, potatoes, sugar, and coffee, with increases in porkhops, ham, hens, eggs, and milk. The index numbers of wholesale prices calculated by the various authorities showed decreases in August and again in September but there were increases in some foods.

### MINE AND QUARRY FATALITIES IN THE UNITED STATES

A reduction of 10.58 per cent in the actual number of coal mine fatalities in the United States during 1919, as compared with the previous year, is shown in the annual report of the United States Mines Bureau (Bulletin 196). The total number of mineworkers was estimated at about 765,000, or slightly more than in 1918, while the deaths in and around the coal mines numbered 2,307 in 1919 and 2,580 in 1918. On the other hand car-shortage, strikes, and unsettled demands for coal brought down the number of actual days worked to a level below that of 1918. Accordingly, if the proportion of accidents is based on the number of 300-day workers rather than on the pay roll lists, the accident rate for the year under review appears in a less favourable light. One death occurred in 1919 for every 235,900 tons of coal raised, compared with one death for every 262,873 tons in the previous year. To falls of rock or face 47.51 per cent of last year's fatalities were attributed, the other main contributing causes of deaths being mine cars and locomotives (16.38 per cent); explosives (8.93 per cent); gas and dust explosions (8.24 per cent). Fatalities occurring in or around shafts amounted to 2.25 per cent, and on the surface 8.02 per cent. Decreases are shown for the year in the fatalities due to some of these causes, notably in those caused by haulage operations and falls of material, but practically no change is apparent in the relative importance of each contribut-

ing cause over the period from 1914 to 1919. Mine disasters in which five or more men were killed occurred during the year, these involving 201 fatalities.

Similar statistics of fatalities in quarrying are given for the year 1918 in another bulletin of the Bureau of Mines (Technical Paper 245), the fatality rate in that year being given as 2.11 per thousand "300-day workers," as compared with 1.83 in 1917. The actual number of workers on the pay rolls was 68,332 in 1918, and 82,290 in 1917, the number of fatalities being 125 and 131 in the two years respectively. The equivalent in "300-day workers" of the actual number employed in 1918 is calculated at 59,285. The number of active operators was 1,620, or about 450 less than in the preceding year, the decrease being explained by the reduced demand for building material in the war. A large proportion of workers were engaged in the limestone quarries, which bore a corresponding share of fatalities and other accidents (54 of the 125 deaths in 1918 occurred in limestone quarries). The largest percentage of the fatalities (14.40 per cent) was due to falls of rock or overburden, explosives being second in order of importance. A comparison of the fatality rates in the quarries, metal mines and coal mines is made in a table showing the percentage of fatalities per thousand "300-day workers" in 1918 to be as follows:—quarries, 2.11; metal mines, 3.57; coal mines, 3.93. In 1911, the figures were 2.23, 4.45 and 4.97 respectively.

## MINE RESCUE AND FIRST-AID COMPETITIONS IN CANADA AND THE UNITED STATES

**T**WO Mine Rescue and First-Aid contests were recently held in Western Canada, which were very successful in regard to attendance and to the keenness of the competitions, and at which it is stated remarkable efficiency was shown in the carrying out of the work.

The first of these contests was held at Drumheller, Alberta, on July 1 and 2. Mining men from most of the mining districts of the province, and from British Columbia and the United States were in attendance. Ten mine rescue teams and five first-aid teams, representing Alberta coal mining companies, took part in the events. There was \$1,000 given in prizes to the winning contestants.

The International Mine Rescue and First-Aid competition held at Ladysmith, B.C., during September, was under the auspices of the Vancouver Island Mine Safety Association. Mr. Bagley, Chief Inspector of Mines for the State of Washington, Mr. Strachan, Inspector of Mines for the Fernie district, and a representative of the United States Bureau of Mines were judges of the contests. In the Mine Rescue competition, the Newcastle team of the Pacific Coast Coal Mining Company, Limited, State of Washington, and the Laird team of the Canadian Western Fuel Company, Nanaimo, B. C., were tied for the Pacific Northwest championship, and it was decided that the cup shall remain in Nanaimo for the first six months and go to Washington for the balance of the year. Each contestant was presented with a medal. The First-Aid results showed Nanaimo first and Cumberland, B. C. second in the Open Competition, and for the Department of Mines cup, and Cumberland with both first and second place for the Coulson cup. The Honourable William Sloan, Minister of Mines for British Columbia, in

presenting the prizes referred to the progress constantly being made toward improvements in the apparatus in use for mine rescue work and drew attention to the report of Mr. James McGregor, Chief Inspector of Mines, British Columbia, who was sent to investigate regarding the fatalities at the Black Diamond Colliery in the State of Washington on July 10, last, in which three members of mine rescue teams lost their lives while wearing rescue apparatus underground. He stated that the lesson taught by this occurrence was the need for the standardization of mine rescue equipment, and that he had taken the matter up with the Bureau of Mines, Washington, D.C., with a view to the securing of joint action toward the adoption of a uniform instrument for the use of mine rescue teams in connection with coal mines on this continent. He believed that, if a standard apparatus were adopted, in the event of an emergency, the members of mine rescue teams would find an apparatus ready for their use with which they were accustomed to work and in which they had confidence. He advocated the calling of a conference either at Washington or at Pittsburg (the latter being the point where the American Mine Rescue work is centralized) for the discussion of this question. He also stated that he had under consideration a policy which would have the effect of rendering further encouragement and stimulus to mine rescue work in connection with the working mines of British Columbia.

Another International Mine Rescue and First-Aid contest was held at Denver, Colorado, during September 9-11. This contest was conducted under the auspices of the Bureau of Mines, Department of the Interior. Miners from Canada, Mexico and the United States were invited to participate. One of the spectacular events of this competition

was a demonstration of the utility of the airplane in rescue work in quickly transporting engineers and oxygen rescue apparatus to the scene of mine disasters. While the mining teams were competing an alarm was telephoned to the nearest airplane of the United States Air Service, and an airplane was immediately dispatched to pick up Bureau of Mines men and bring them to the field as quickly as possible. A report of this contest states that during the ten years or more that life-saving work has been

in existence in the United States the lives of 5,000 men have been saved; that the mining industry of that country employs nearly a million men and that between two and three thousand are killed each year while at work; and that there are now more than 100,000 men in the United States being trained by the Bureau of Mines in mine rescue and first-aid work. Gold-medals were presented to United States miners who during the last three years had performed deeds of bravery in saving life.

### RECENT LEGAL DECISIONS AFFECTING LABOUR

**O**F the four recent legal decisions summarize below, one defines the liability of employers in Quebec when employing minors in contravention of the law

of 1919. The remaining three deal with various aspects of the Workmen's Compensation Law of Saskatchewan.

#### **Employer in Quebec is liable for any accident to child worker in factory if employed contrary to Law**

A boy of fourteen when leaving his place of employment fell into a hot air-conduit on the premises of the company where he worked, and was burnt to death. His father brought an action for compensation against the employer in the Superior Court of Quebec, but judgment was given against him and he appealed to the Court of Review. The company denied responsibility for the accident pleading that the boy met his death at a place where he had no right to be by reason of or in the course of his work, and while endeavouring to escape surreptitiously from his employment, and that they were unable to prevent the accident. On the ground that the accident was caused by the sole fault of the victim, the company claimed that it was discharged of all responsibility. The plaintiff based his claim on the Act which came into force on March 17, 1919, relating to the employment of infants in industrial establishments. This law prohibits the employment in any industrial establishment of any boy or girl under sixteen years of age who is unable

to read or write, and provides that if any one employs a boy or girl contrary to the provisions of the Act, he cannot in case of accident plead contributory negligence on the part of the victim.

It was declared by the Court that no proof was given that the victim could read or write, and he who employs an infant of the victim's age must prove that the victim has complied with the law. In default of such proof, if an infant is employed and is injured, the law will not allow the employer to obtain any advantage through the fault of the victim. "Therefore in order to succeed all that the plaintiff has to prove is that his son was the victim of an accident caused by something which belonged to the defendant. This has been proved. Plaintiff is not held to prove any fault whatever on the part of the defendant." By judgment of the Court, the judgment of the Superior Court dismissing the plaintiff's action was reversed, and the company defendant was condemned to pay \$500 and costs. (*Quebec—Despins vs. Dominion Glass Company.*)

**A workman hurt when disobeying a rule of his employer cannot recover damages for accident even if employer also proved negligent**

A railway conductor was injured when engaged in switching cars, and he brought an action for damages against the company employing him. It appeared from the evidence that there was a defect in the coupling of a car which was to be uncoupled. In order to see what was the matter, the plaintiff attempted to examine the coupling while the train was in motion. When standing on the ladder of the car he attempted to place his foot in the stirrup at the end of the car. In doing so he had to place his leg or part of his body between the two moving cars. His foot slipped and he fell and received the injury.

The company applied for a non-suit on the ground that the accident was due to the negligence of the plaintiff. The evidence showed that his act was in contravention of the rules of the railway which state: "The following and all similar acts of recklessness are specifically forbidden: (a) Entering between or being in front of engine, car or cars in motion, to couple or uncouple same, or for any other purpose whatsoever, except where engine or car is far enough away to clearly permit employee to get out of danger before engine or car

reaches him. (d) Riding or being between engine and cars, or between cars when same are moving, except where necessary in switching or train movements, or walking between moving cars."

In support of the company's application, a number of cases were cited, with reference to which the court declared — "The principle of the law which is laid down in these cases would seem to be that, where there is negligence on the part of the defendant which is proved, and there is a subsequent negligence on the part of the plaintiff which is also proved, and which consists of a breach of a regulation of the defendant company of which the plaintiff was fully aware, and by the observance of which the accident could have been avoided, then there is no case and the plaintiff cannot succeed. The rule would appear to be applicable in this case, and there is no dispute as to the facts. . . . This being, therefore, a case in which the evidence with regard to contributory negligence cannot in any way be questioned, and where there are no facts in dispute, the application for non-suit will be allowed with costs." (*Saskatchewan—Campbell vs. Canadian Pacific Company.*)

**Insurance company by conducting defence for insured assumes liability even if insured has violated a clause of policy**

An employer who conducted a laundry had taken out an insurance policy to indemnify him against accidents to his employees in his business. There was stipulation in the policy that the machinery should be guarded. While the policy was in force, an employee had her hand injured in a mangling machine that was not guarded. The insurance company entered into negotiations with the injured employee and paid her a sum of money in settlement of her claim, and later undertook the defence of an action brought by the employee against her employer. Judgment was given

against the employer, and after paying the amount of the judgment he brought an action against the insurance company to recover the amount so paid under the policy. The company denied their liability and entered a counterclaim for the amounts they had paid under the policy and to their solicitor for defending the action brought against the plaintiff. In the trial court judgment was given against the plaintiff, the action was dismissed, and the counterclaim of the defendant company was allowed. The employer appealed against this judgment and the case was heard by the

Court of Appeal of Saskatchewan. The plaintiff claimed that the stipulation in the policy that the machine should be guarded was waived by the company by entering into negotiations with the injured employee and paying her a sum on account of the accident, and further by taking charge of the defence in the subsequent action. It was held by the Court of Appeal that the defendants by continuing to defend the action after knowledge of the machinery being unguarded would lead the employer to believe that they were assuming liability under the policy, and the defendants

were estopped from denying that they had waived the conditions of the policy as to unguarded machinery.

The appeal was therefore allowed with costs, also the appeal as to the counterclaim. It was further pointed out in the judgment that the defendants could not recover from the plaintiff money paid to their solicitor, even if they were not liable under the policy, for money paid to a third person cannot be recovered as money paid under a mistake of facts. (*Saskatchewan — Parrot vs. Western Accident and Guarantee Insurance Company.*)

**A building sub-contractor is bound to furnish safe scaffolding for his men even if scaffold was not erected by him**

A plasterer employed by a sub-contractor on a building was directed to work on a certain scaffold. When he was on it, the scaffold fell and he received serious injuries. He brought action for damages against his employer on the ground of negligence.

On behalf of the defendant, it was claimed that under his contract, the main contractors were under obligation to erect the scaffolding necessary for the purposes of his sub-contract, and that the defendant was justified in assuming that the scaffold was strong enough, having been so informed by the foreman of the main contractors. The trial judge held that there was no evidence of negligence on the part of the defendant, and he withdrew the case from the jury. The plaintiff appealed to the Court of Appeal of Saskatchewan. The court held that the scaffold was sufficient for the work

of erection for which it was built but it was not strong enough to support the plasterers' material as well as the men. The evidence disclosed that the defendant had examined the scaffold and thought it was too light for his work. The defendant's duty was to provide a reasonably safe scaffold for his employees to work upon. There was positive testimony that the scaffold gave way because it had not been built sufficiently strong. This was *prima facie* evidence of the failure of the defendant to provide a reasonably safe scaffold. With the *prima facie* negligence established the case could not properly be withdrawn from the jury, and the court was of the opinion that the trial judge erred in withdrawing the case. The appeal was therefore allowed with costs, and a new trial was ordered. (*Saskatchewan—Michaud vs. Edwards.*)

# THE LABOUR GAZETTE

Prepared and edited in the Department of Labour, Ottawa

MINISTER—THE HONOURABLE GIDEON D. ROBERTSON.  
DEPUTY MINISTER—F. A. ACLAND.

Volume 20

NOVEMBER, 1920

Number 11

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

### **The month in brief**

This issue of the LABOUR GAZETTE contains a report of the proceedings of the Canadian Railway Board of Adjustment No. 1 from August 7, 1918, to August 31, 1920, also a summary of the various provincial laws in Canada in regard to the regulation of mines as affecting labour.

The cost of the weekly family budget of staple foods showed a slight decline averaging \$15.83 at the middle of October as compared with \$15.95 in September, \$14.21 in October, 1919, and \$7.93 in October, 1914.

At the beginning of October, the percentage of unemployment among trade unions was 3.25 as compared with 4 per cent (revised figure) at the beginning of September and 2.19 at the beginning of October, 1919. According to returns from over 5,100 firms, the volume of employment showed a decrease, which was more marked in the latter half of the month.

The time loss due to industrial disputes during October was greater than during September, but less than during October, 1919. There were in existence during the month 20 strikes involving about 5,147 workpeople, and resulting in a time loss of 65,556 working days. At the end of the month there were on record 11 strikes, involving about 1,418 workpeople.

### **Proceedings under the Industrial Disputes Investigation Act**

During October, the Department received reports from two Boards established to deal with disputes between (1) The Canadian Pacific Railway Company, the Grand Trunk Railway Company, and the Canadian National Railways, and certain of their employees, being clerks, timekeepers, railway checkers, freight handlers, truckers, coopers, etc., and (2) the Canadian Pacific Railway Company (Western Lines) and certain of its employees, being conductors, etc., members of the Order of Railway Conductors and the Brotherhood of Railroad Trainmen.

Four applications were received for the establishment of Boards, and a Board was established in connection with one of the applications.

### **International Commissions on unemployment and industrial hygiene**

A resolution was passed by the Washington Labour Conference inviting the Governing Body of the International Labour Office "to form an International Commission empowered to formulate recommendations upon the best methods to be adopted in each State for collecting and publishing all information relative to the problem of unemployment in such form and for such periods of time as may be internationally comparable." In

conformity with this resolution the Governing Body appointed a Technical Commission on Unemployment at its meeting on June 8, last. The Commission met on October 1, and considered a report, which had been prepared by the Technical Service of the International Labour Office, on Unemployment and Emigration. The report examined the method of compilation and publication of government statistics on unemployment as regards industrial censuses, workers' associations, employment exchanges, insurance funds and conditions of employment, and suggested the possibility of various improvements. The development of the occupational aspect of these statistics, and the elaboration of methods to secure statistics of a really international character were proposed. The report also suggested the compilation of certain categories of new statistics relative to the anticipation of crises, and the more active co-operation of employers' and workers' associations. The Commission decided to invite a number of experts to a meeting which will be held in Paris on November 30 next and to submit to them the scheme of work drawn up by the Technical Service of the International Labour Office.

A Service of Industrial Hygiene has been constituted by the International Labour Office in pursuance of suggestions of the Washington Conference and of decisions of the Governing Body. The work of the service will be: (1) The conduct of a general and permanent enquiry into unhealthy processes with a view to the preparation of draft conventions and recommendations for submission to the General Conference. (2) Generally to deal with everything relating to industrial hygiene, by the co-ordination of the provisions common to the various national legislations and the preparation of international regulations.

**Compensable industrial diseases in New Brunswick** The following Industrial diseases have been declared compensable from January 1, 1920, under the Workmen's Compensation Act of New Brunswick,

by a regulation adopted by the Workmen's Compensation Board and approved by the provincial Government:

**Anthrax.**—Handling of wool, hair, bristles, hides and skins.

**Lead poisoning or its sequelae.**—Any process involving the use of lead or its preparations or compounds.

**Mercury poisoning or its sequelae.**—Any process involving the use of mercury or its preparation or compounds.

**Phosphorus poisoning or its sequelae.**—Any process involving the use of phosphorus or its preparations or compounds.

**Arsenic poisoning or its sequelae.**—Any process involving the use of arsenic or its preparations or compounds.

**Sulphur poisoning or its sequelae.**—Any process involving the use of sulphur or its preparations or compounds.

**Ammonia poisoning or its sequelae.**—Any process involving the use of ammonia or its preparations or compounds.

**Carbon bisulphide or its sequelae.**—Any process involving the use of carbon bisulphide.

**Carbonic acid gas.**—Any process involving the use of carbonic acid gas.

**Ankylosistomiasis.**—Mining.

**Glanders.**—Care of any equine animal suffering from glanders, handling the carcass of any such animal.

**Compressed air illness.**—Any process carried on in compressed air.

**Infection by handling sugar.**—Any process involving the refining of sugar.

Of the diseases included in the above list, poisoning from sulphur, ammonia, carbonic acid gas, and infection from handling sugar are not compensable in any other province or in Great Britain, but the remaining diseases are all compensable under the British regulations. An account of the industrial diseases for which compensation is allowed in the United Kingdom, Canada and other countries appeared in the LABOUR GAZETTE for March, 1920, on pages 304 to 310.

**Profit-sharing plan of National Cash Register Co., Limited**

A profit-sharing plan recently adopted by the National Cash Register Company, Limited, of Dayton, Ohio, has been put into operation at the plant of its affiliated company at Toronto. The plan is as follows: An amount equal to 6 per cent of the Company's total investment, not including the value of patents and good-will, is first deducted from the total profits, which are determined by an outside firm of accountants. The remaining profits are then divided equally between the company and its employees, the share of the latter being paid in cash on the earliest possible date. The Company's share may be returned to the business for improvements or extensions of plant. For the purpose of the scheme the employees are divided into five groups: first the executives, who receive 12 per cent of the total profits; second, the foremen, who receive 5 per cent; third, the job foremen, who receive 8 per cent; fourth, all other employees of not less than six months' standing, who receive 25 per cent; fifth, new employees, who must serve one month's probation before being placed on the profit sharing roll. Besides these benefits the employees are guaranteed the highest current wages in their class of work.

**Proposed Pension Scheme for City of Winnipeg**

According to a draft by-law of the city of Winnipeg every permanent employee of the city on January 1, 1921, and every person entering its service thereafter shall contribute a percentage of his wages or salary according to the following schedule: Employees less than 27 years, throughout future service, must pay 3 per cent of their salaries; between the ages of 27 and 33 years,  $3\frac{1}{2}$  per cent; between 33 and 38 years, 4 per cent; between 38 and 42 years,  $4\frac{1}{2}$  per cent; between 42 and 45 years, 5 per cent; and present employees above the age of 45 years, 5 per cent. The by-law does not apply to persons entering the service of the city after having

passed their forty-fifth birthday. All monies received for pensions must be paid to the sinking fund trustees who will administer the fund. Pensions shall be payable monthly until death. The annual sum payable is to be one-fiftieth of the average maximum salary for five consecutive years of service multiplied by the number of years of service up to but not exceeding 40 years, but no pensioner is to receive less than \$600 or over \$3,000 a year. The city may at any time exercise the right to discharge or retire an employee if the city council so decides, and there shall be no liability upon the city for any claim for pension or other allowance except salary or wages due and the benefits provided by this by-law for employees leaving the service of the city. The city may also demand the retirement of an employee of 65 years of age, on three months' notice being given. Pensions will be granted to any person who has served at least 15 years and has through sickness or accident become unfit for further service; to any person who at any time during his employment is suffering from an infirmity of body or mind brought about by an injury received while performing his duties; to any person who has served for at least 40 years who is 60 years of age; to any person who has served for at least 40 years, who is years of age, and to the heirs of those who die in the service, such balance as was due the deceased pensioner from his contributions. If a pensioner who has been invalidated through sickness or accident recovers sufficiently to resume his former or other employment, the pension may be discontinued, and if such employee re-enters the service of the city, the period of absence on pension shall be considered as leave of absence and not as a break in the continuity of service. No employee who accepts compensation under section 37 of the Workmen's Compensation act, which provides for permanent total disability shall be entitled to a pension under this by-law. Employees who have been on active service (1914 to 1919) who re-enter the city's service within six months from discharge,

shall be given credit for the time of their absence on such service. In the event of an employee retiring before completing 15 years of service, because of an infirmity brought about in the discharge of his duties, the city must pay into the fund the amount of the employee's contribution, its own contribution of equal amount, and the amount of the pension granted. In the case of employees leaving the service of the city, amounts contributed by such employees will be returned with four per cent compound interest. In the event of death the heirs of the deceased will receive the amount contributed.

#### **International Congress of Commercial and Office Workers' Unions**

An International Congress of Commercial and Office Workers' Unions was held at Amsterdam on October 6-7, the delegates representing 971,500 members in Denmark, Germany, Great Britain, France, Holland, Hungary, Norway, Austria, Czecho-Slovakia and Sweden. Two similar international organizations had existed before the war, one with headquarters at Ghent, and the other at Amsterdam. The war put an end to both, and the object of the new Congress was to organize a new single international. All commercial and office workers' unions which are affiliated with national organizations or desire such affiliation, and are on a sound financial basis, are eligible for membership. A committee was named to draw up a constitution, consisting of representatives from Great Britain, France, Germany, Denmark, Czecho-Slovakia, and Holland. Amsterdam was selected provisionally as headquarters, with M. Smit (Holland) as international secretary, *pro tem*. The next congress will meet at Vienna in 1921.

#### **Changes in wages and hours in United States**

The National Industrial Conference Board of the United States has published a report on "Changes in Wages During and Since the War." The re-

port states that in the boot and shoe manufacturing industry the average hourly earnings amounted to 28.4 cents in 1914, with average hours of 54.3 per week and weekly earnings of \$15.43. In the 1920 period, the average of hourly earnings is 62.4 cents, the average weekly hours 48.1 and the full time weekly earnings, \$30.08. A table is given showing for male workers in the industries covered by the report the percentages of increases in hourly and full time weekly earnings and the percentages of decrease in weekly hours of work between September, 1914, and March, 1920. As in the boot and shoe industry, the percentage of increase in weekly earnings was less than the increase in average hourly earnings in the manufacturing of cotton, furniture, hosiery, knit goods, leather, metal, rubber, silk, and wool, due to the decline in the average weekly hours of work. In the printing and publishing trade alone, the percentage of increase in weekly earnings, which was 168, was higher than the percentage of increase in average hourly earnings, which amounted to 74. The report states in conclusion: "The movement for shorter hours of work, had its origin in socio-ethical ideas, and moved in its own lines, quite independently of the changes in rates of wages."

#### **A group bonus plan in United States**

After trying a number of plans to promote increased production, including bonuses for attendance, for securing new employees and for high individual production, and profit-sharing, all of which are reported as having proved unsuccessful, the Sweet-Orr Company, manufacturers of overalls and rough working clothes have adopted a group bonus plan at their plant at Wappinger's Falls, N.Y. The total piece-work earnings for each department were set at a fixed figure which was a little below the average earnings for the preceding six months. The company pays as a group bonus one-half of any excess of weekly piece earnings over the fixed figure, and the amount is distributed among the members of each

group in proportion to the earning of each member for that week. The day workers, chiefly alley girls, machine fixers and oilers, receive the same percentage of the bonus as the operators. A committee of the employees is allowed to audit the payroll in order to see that the bonus payments are correct. Weekly bulletins are posted up analyzing the bonus, with comments of the superintendent, and signed by the employees' committee. As a result of this plan it is stated that production has increased over 30 per cent above the old normal rate and the productive earning per employee has risen from 38.2 cents per hour to 48 cents.

# **Cost of "Labour Turn-over"**

According to a statement of the Industrial Bureau of the Merchants' Association of New York, in *Greater New York*, October 11, 1920, "It costs \$30,000,000 a year for American manufacturers to exchange employees with each other." An estimate, based on reports from individual firms, places the cost of labour replacement for a semi-skilled worker at \$50; \$42 was quoted by one manufacturer as the cost for replacing a hand tool maker, while a tobacco establishment stated that it cost from \$200 to \$250 to train a cigar maker. These estimates include such items as maintaining idle machinery, advertising, interviewing prospective employees and investigating references, medical examinations, and clerical work incident to discharging and hiring; also the cost of training and fitting the new worker for his job which covers a flat rate of pay until the worker becomes skilled enough to do piece work, wastage and breakages, and the tendency on the part of the new employee to increase the frequency and severity of industrial accidents. Comparisons appeared to show that labour turnover was twice as large in factories employing unskilled workers as in those employing skilled workers. In New York City, the report states, the average rate of labour turnover in plants employing skilled and semi-skilled workers is approximately

125 per cent. An analysis is given of the training cost of 235 new workers in a tobacco manufacturing plant which gives the cost for training an inexperienced operative as follows:

No. of weeks of training	Cost per week	Cumulative cost.
1st week	\$20	\$20
2nd week	12	32
3rd week	9	41
4th week	6	47
5th week	3	50

It is significant to note that while the greatest cost of training is incurred during the first two weeks, it is during that time that the turnover is also the greatest, 22 per cent of the total turnover of the plant in question having occurred among workers employed two weeks or less. This company, which employs about 1,000 workers, the majority of whom are semi-skilled, has succeeded in reducing its replacement cost from \$61,000 in 1918 to \$32,500 in 1920. Its annual rate of turnover during these two years was reduced from 122 per cent to 65 per cent. This improvement is attributed more to the methods adopted by the company in handling its personnel problems than to the amount of money expended. The company wrote: "We believe that the careful selection of workers by our employment department as well as the inauguration of a competent training school for new employees, is responsible for the improvement in our labour turnover." The report states that the company feel that any additional cost incurred in operating the employment and training departments on an efficient basis are more than offset by savings effected.

**United States employers and trade union principles** The Chamber of Commerce of the United States submitted last June to a referendum vote of its constituent organizations a statement of twelve principles which should govern industrial relations. Ballots were taken in 601

organizations in 47 states, consisting of local Chambers of Commerce and business associations representing employers and business interests of practically all classes. The propositions, twelve in number, were all affirmed by overwhelming votes, the chamber being thus committed to the principles involved, which were as follows:

(1) Liberty of contract either as employer or employee; (2) the right to operate an "open shop"; (3) the right of voluntary, but not of compulsory association, whether of employers or employees, for collective action; (4) the responsibility of such associations or combinations to the state; (5) restriction of productive effort, whether by employer or employee, is an injury to society; (6) wages and conditions should be such as to provide an incentive to industry; (7) hours of work should be subject to the "economic limit"; (8) provision by voluntary agreement of both parties for the settlement of industrial disputes; (9) neither party to an industrial dispute should accept direction or dictation by any group or combination outside the industry; (10) employers and employees alike should have a practical interest in the welfare of the plant; (11) Government, state, or municipal employees must not divide their allegiance in such a manner as to impair the efficiency of the public service; (12) in public utilities the interest of the public is paramount.

The Executive Council of the American Federation of Labour had under consideration the foregoing industrial platform, and President Gompers later issued a statement in which the twelve principles are characterized as a "direct challenge to the trade union movement coming from the heart of America's financial power."

#### Jottings

A conference of minimum wage officials of Manitoba, Saskatchewan, Alberta and British Columbia is to be held in Winnipeg at an early date for the purpose of establishing uniformity of hours,

wages and working conditions for girls in these four provinces.

A royal commission composed of Messrs. O. M. Biggar, K.C., W. F. Nickle, K.C., and P. M. Draper, has been appointed to draft new regulations for the penitentiaries of Canada. The commission will also consider the possibility of utilizing prison labour for the making of articles required by the government.

At a Dominion Child Welfare conference held at Ottawa on October 19 and 20, a Canadian Council of Child Welfare was formed which will co-operate with the child welfare division of the Federal Department of Health, prepare and disseminate information on child welfare work, and recommend a programme for the work throughout the Dominion. Any nationally organized body interested in child welfare work may be represented on the Council.

By an order-in-council of the Saskatchewan government, any permanent employee of the Civil Service throughout the province may apply for and receive an advance of salary, which must not exceed \$100, for the purpose of purchasing fuel. The administration of the scheme is in the hands of the Civil Service Purchasing Association.

A conference on first-aid work was recently held at Ottawa between officers of the St. John Ambulance Association and representatives of the Canadian Pacific Railway, the Grand Trunk Railway System and the Canadian National Railways. Matters of importance with reference to the development of the first-aid movement were discussed and changes were suggested in the regulations governing instruction and the administration of the work. This conference was the first of a series which it is proposed to hold in the future.

The Department of Education of the province of Alberta has adopted three new plans for the benefit of teachers, providing free dwelling for rural teachers with at least five acres of land at-

tached, loaning money to suitable candidates to enable them to take a course at the normal school, and establishing a minimum salary of \$840 a year for both "permit" and fully qualified teachers.

The total loans approved by the Soldiers' Settlement Board up to October 2 amounted to \$78,285,752, and the number of loans was 19,526. It is reported that 163 returned men have repaid their entire loan out of their first crop. In addition, nearly 8,000 grants of free Dominion lands were made representing a total area of over 1,900,000 acres.

It is stated that all the members of the building trades of Baltimore, Md., with the exception of plasterers, have declined to accept an increase in wages which was to have come into effect on

November 1, in accordance with an agreement made a year ago, the reason given for this step being that as prices were falling and there were indications of steady work at the present rate, the men were satisfied.

A total membership of 938,226 is reported for the various trade unions of Poland. Up to the time of the restoration of the Polish Republic, it is stated that the trade union movement was suppressed by the Prussian and Russian governments, but that it is now in the phase of a tremendous increase, and that the conclusion of peace with Russia will bring about the consolidation of the movement by merging all the different provincial organizations into one national trade union federation, for which plans are already laid out.

---

## INDUSTRIAL CONDITIONS DURING OCTOBER, 1920

---

### I.—General Review

From the beginning of October a decline was noted in the total average volume of industrial employment throughout Canada, the downward movement being most pronounced in the third week. All the provinces showed a decline over the month, though temporary recoveries occurred in Quebec, Nova Scotia and the Prairie Provinces. In metals, machinery and conveyances the month opened with a drop which, with the exception of the second week, continued to the close, the fluctuations being attributed mostly to variations in employment in shipyards and the vehicle sub-group. In the food group an increase of activity was noted in the meat-packing plants and abattoirs, while decreases resulted elsewhere from the completion of fruit canning operations

#### The Labour Market

for the season, especially in Ontario, and from a decline of activity in the sugar refineries in the Maritime Provinces, Quebec and New Brunswick. The textile industry made slight gains during the first week of the month, followed, however, by successive decreases, largely due to inactivity at the thread, yarn and cloth factories in Ontario and Quebec, and at the men's furnishing factories. The boot and shoe trades continued slack; the rubber industry continued to show a steady decline, mainly caused by inactivity in the tire factories in Ontario. The pulp and paper mills were still adversely affected by a shortage of water power, but conditions in this respect improved before the close of the month. Activity was fairly well maintained in the woodworking and clay, glass and stone groups, but paint, oil and chemical workers had slightly

less employment. In railway transportation increased activity resulted from the movement of grain in the Prairie Provinces. In the mining group, declines occurred in the nickel and in the non-ferrous metal industries, while the non-metallic and quarrying trades remained fairly steady; in coal mining increased activity in Alberta and Nova Scotia raised the general average of employment. The building trades showed a general downward movement, while in railway construction the period of seasonal inactivity began. In logging operations large increases in all provinces, especially Ontario and Quebec, resulted from the opening of winter camps; on the other hand employment in the saw-mills generally declined on the completion of the season's cut.

The loss of time on account of industrial disputes was greater during October than during September, 1920, but less than during October, 1919.

#### Strikes

There were in existence at some time or other during the month 20 strikes, involving about 5,147 workpeople, and resulting in a time loss of 65,556 working days, as compared with 28 strikes, 2,449 workpeople and 25,890 working days in September, 1920; and 35 strikes, 9,257 workpeople and 131,187 working days in October, 1919. On October 1, there were on record 12 strikes, affecting 467 workpeople. Eight strikes

were reported as having commenced during October, as compared with 11 in September. Five of the strikes commencing prior to October and four of those commencing during October were reported terminated, leaving 11 strikes, involving about 1,418 workpeople on record at the end of the month.

The prices movement continued downward, substantial decreases occurring in grain, cattle, hogs, sheep, butter, vegetables, cereals, sugar, cotton,

#### Prices

hides, some lines of metals and lumber, linseed oil, turpentine, chemicals, raw rubber, and laundry starch. The retail prices of foods averaged lower, there being slight decreases in beef, bread, flour and rolled oats and greater decreases in sugar and potatoes. There were some advances in hog products, eggs, milk, and in coal. The Departmental index number of wholesale prices was down to 317.6 for October as compared with 326.6 for September, 299.6 for October, 1919, and 138.7 for October, 1914. The group index numbers were lower than a year ago in Grains and Fodder, Fruits and Vegetables, Woollens, Cottons, Silks, Jute, Hides, Leathers, Boots, Paints and Oils, Raw Furs, but were higher for the other groups. The weekly food budget averaged \$15.83 at the middle of October as compared with \$15.95 at the middle of September, \$14.21 in October, 1919, and \$7.93 in October, 1914.

## II.—Industries and Trades

SYDNEY reported increased activity during October in the iron and steel industry, production being as follows: pig iron, 23,500 tons; ingots, 25,700 tons; blooms and billets, 4,500 tons; rods, 9,750 tons; bars, 525 tons; plates, 4,800 tons; wire, 1,250 tons; nails, etc., 1,495 tons; three blast furnace and metal roofing trades continued steadily active. The output of the mills at SYDNEY MINES was 6,950 tons of iron

#### Metals and machinery

and 11,450 tons of steel; four blast furnaces were in operation and five steel furnaces were undergoing repairs. The rolling mills at AMHERST worked steadily except one which was closed for repairs; foundry and machine shop workers were steadily employed. At CHARLOTTETOWN iron workers and moulders, machinists and helpers and electrical workers were busy, and blacksmiths and helpers were fairly active. At St. JOHN the rolling mills ran steadily; sheet metal workers

were busy fitting up furnaces for winter. At MONCTON one foundry and machine plant employed 40 per cent more workers than a year ago, all foundries being in active operation. MONTREAL reported fair conditions in the structural steel and sheet metal plants; the engine and boiler and electrical trades were also fairly active. At QUEBEC sheet metal workers were very busy, but structural iron and steel plants were quiet. SHERBROOKE reported fair conditions throughout the group, but with some reductions in staffs. Metal workers at ST. JOHN'S and IBERVILLE were well employed, with night shifts at some plants. At ST. HYACINTHE employment was fairly good, though some shortage of material was experienced. At SOREL activity was reported in the various metal trades. At THREE RIVERS the iron foundries were steadily active throughout the month. OTTAWA and HULL reported a continued shortage of moulders; foundries were normally active. TORONTO reported the metal and machinery industries generally quiet, with many men out of work; the principal exception was the agricultural implement trade, which was busy with heavy home and foreign demand, about 500 additional workers being taken on at one plant; furnace and steam heater plants were also busy, and electrical workers engaged in connection with the building trade were active, but other branches of the trade were slack; a new tin-plate mill opened early in the month. The moulding shops at OSHAWA were active, but sheet metal workers were slack. At HAMILTON steelworkers were busy on rails and tieplates; the structural steel industries were fairly active; engine and boiler workers were active, though their hours of work were shortened; farm implement plants were normally busy; some machinists were unemployed; temporary unemployment resulted in some cases from a fire which damaged several important factories at the middle of the month. Help was in demand at the can and chain factories at NIAGARA FALLS, but the cutlery and plating industry was less active; other metal in-

dustries were active. A steel working concern at WELLAND shut down early in the month owing to lack of business. Millwrights were in demand at PORT COLBORNE. At ST. CATHARINES most of the metal working factories laid off large numbers of workers, and prospects were reported very poor; but boiler makers and electrical workers had steady employment. At BROCKVILLE sheet metal workers were active and stove and furnace, tool and hardware plants were fairly busy. Night shifts were worked at BELLEVILLE in the rolling mills; engine, boiler and general foundry work was plentiful; farm implement factories were fairly busy. At PETERBOROUGH active conditions continued in the various metal trades, including foundries, moulding and core plants; machine shops were busy, but some shops were forced by power shortage to close; all plants except one which has its own power plant, closing one day in each week. GALT reported a demand for help in the stove and furnace foundries, and other steel and iron workers were well employed. At BRANTFORD machine and farm implement plants were busy, and stove and furnace workers were fairly active; electrical fixture and motor factory workers were well employed. At KITCHENER active conditions were reported in the sheet metal, electrical fixture, clock, and farm implement shops, but foundries and machine shops were rather less busy. Moulders and piano plate makers at GUELPH had a slack month; but stove, furnace, radiator and hardware workers were active. At STRATFORD tinsmiths were in demand, electrical workers were steadily employed, but machine shops and foundries were rather quiet. At WOODSTOCK the shortage of moulders continued, stove and furnace foundries being still busy. Stove and furnace foundries at LONDON were very busy, additional moulders being employed, but they were handicapped by shortage of material; wire and iron, engine and boiler workers were also well employed. At ST. THOMAS iron workers and moulders had

a good average month. The metal and machinery plants at CHATHAM were all very slack, several being closed. At WINDSOR the machine shops were affected by the general industrial depression; the injector factory was very busy especially on foreign orders; staffs were reduced at the scale and adding machine factories. The farm implement and stove factories at ORILLIA ran steadily; the electro foundries ran to capacity. Machine shops and stove and furnace factories at OWEN SOUND continued active. Trammers were in demand at SAULT STE. MARIE for the iron mill. The machine shops at BRANDON had a busy month. At REGINA structural steel work slackened off towards the end of the month; sheet metal and farm implement workers were active, and the electrical trades were normal. Sheet metal and iron workers at EDMONTON were well employed. VANCOUVER reported fair activity in the rolling mills, structural steel and engine and boiler factories; electrical apparatus and fixture workers were also fairly well employed; stove, furnace and sheet metal workers were busy, except at the shipyards where the sheet metal workers and copper-smiths were on strike; plumbers and steamfitters in the shipyards were also on strike, but otherwise these trades were well employed. Sheet metal and electrical work at PRANCE RUPERT were fairly active. Stove foundries at VICTORIA were active with increased staffs.

Boat and shipbuilding and repairing continued active at SYDNEY during

October. The car shops at AMHERST continued very busy in every department. Steady activity continued at MONCTON in the locomotive and car repair shops of the C.N. R., night shifts being worked. The shipbuilding yards at MONTREAL were quiet during the month. Dull conditions also prevailed at QUEBEC in the construction section of this industry, but repairing was very active; automobile and motor engine shops were quiet, but locomotive, car and parts shops were

busy. At THREE RIVERS one of the shipyards still remained closed, and the other was fairly busy, with likelihood, however, of a reduction of staff. At SOREL the shipbuilding yards continued busy. The car shops at OTTAWA and HULL were hampered by difficulty in securing supplies of steel. TORONTO reported the automobile industry slack, with a large number of men unemployed; a tractor plant was permanently closed down. HAMILTON reported normal activity in the tractor plants; night shifts were worked at the steel car foundry. Automobile shops at OSHAWA were slack. At BROCKVILLE the G.T.R. car repair shops were unusually slack; the motor boat industry was also quiet and the automobile plants showed a decline in activity. Locomotive workers at KINGSTON continued busy, with about 675 workers steadily employed, with good prospects of continuance; active conditions were maintained at the shipyards. Automobile part and carriage factories at BELLEVILLE had a fairly active month. CHATHAM reported slackness in the automobile industry, staffs being reduced. The malleable iron works at BRANTFORD were active on car castings; carriage workers were busy. Auto-truck and cycle workers at KITCHENER were fairly well employed; the tire factories laid off hundreds of men, most of whom secured work in the sugar factory. GUELPH reported motor tractor workers fairly active. The G.T.R. car shops at STRATFORD were busy in every department; automobile repair shops were active. The wagon factory at WOODSTOCK worked overtime, with good prospects of continued activity. The automobile plants at LONDON continued very busy, and preparations were under way for extensions in spring. At SR. THOMAS about 200 men were laid off at the car shops of the Michigan Central Railway, but other shop employees continued active. Automobile factories at CHATHAM were very slack, most of the skilled mechanics going to other employment in the city. All automobile factories at WINDSOR laid off a large number of workers, work being almost at a stand-

still at one plant; accessory plants were also very dull, with poor prospects; the Ford plant alone continued about normal. The carriage factory at ORILLIA laid off a number of its employees. The PORT ARTHUR shipyard required more bolters, reamers and helpers; about 700 men were employed at this plant. The railway shops at EDMONTON had an active month. The shipyard at NELSON was busy on repairs. VANCOUVER reported slack conditions in boat and shipbuilding; at one yard many men of all crafts were laid off owing, it was said, to the shortage of steel; automobile, carriage, cycle and motor engine works were also quiet. The shipyard and drydock at PRINCE RUPERT had a busy month. About 300 men were engaged in wooden shipbuilding at VICTORIA, but work at the iron shipyards was almost entirely suspended, only a few workers being retained.

A seasonal decline in activity was noted in some branches of the food group, including, soft drinks, ice-cream, etc. **Foods, liquors and tobacco** Active conditions continued at SYDNEY throughout the food group.

Creameries at AMHERST were very busy. The milk factory at TRURO worked full time, but a shut-down was anticipated owing to over-production. The sugar refinery at St. JOHN closed down on October 14 owing to unsettled conditions in the sugar market, 600 men being thrown out of work; flour and feed workers had a good month, but bakers and confectioners were less active; creameries and breweries were normally active. Good conditions were general at CHARLOTTETOWN, MONCTON, FREDERICTON and BATHURST. At MONTREAL the flour and feed plants were fairly active; abattoirs and packing houses and breweries were busy; soft drink factories were quiet and cigar makers were slack. QUEBEC reported the abattoirs active, but meat packing dull; bakers, confectioners and brewery workers were busy; normal conditions continued in creameries and dairies, the supply of milk

being still plentiful as the cattle were still on pasture. SHERBROOKE reported busy conditions in the baking and confectionery trades and breweries, and fair activity in the rest of the group. At St. HYACINTHE butter, cheese and tobacco factories were less active; flour mills worked full time; bakers and confectioners were well employed. Bakers and confectioners and brewery and soft drink workers at THREE RIVERS were busy. At OTTAWA and HULL the abattoirs worked at full capacity during the month; bakeries, confectionery establishments and dairies continued active. At TORONTO flour, feed and cereal plants had a fair amount of work; abattoirs and meat packing houses were quiet owing to a falling-off in export orders; bakers, confectioners, cannery workers and cigar makers were fairly well employed, but biscuit and candy factories were less busy than usual at this season, staffs being reduced. HAMILTON reported activity in the flour and feed, cigar, soft drink, baking and confectionery plants and breweries; abattoirs and packing houses were also active, but owing, it was said, to the high price of pork and beef the Armour Company decided to close its local branch, throwing out of employment about 50 men, some of whom were transferred to Chicago. Temporary help was in demand at NIAGARA FALLS in the fruit and vegetable canneries and wine factories, and other food industries were reported busy. Employment was fairly good throughout the food group at St. CATHARINES, BROCKVILLE and KINGSTON. At BELLEVILLE the flour and especially the feed mills were very busy, as were also the dairies, bakeries and confectionery plants. At PETERBOROUGH the flour mills were active with some demand for help, but the cereal product departments were rather quiet; the meat packing plant was busy enlarging its plant for next season; creameries and dairies were also busy, but weather conditions were said to hamper the production of cheese; very little condensed milk was made, the manufacturers stating, it was said, that the ad-

verse rate of money exchange eliminated their profits. Help was in demand at GALT for the flour, feed and cereal mills; bakers and confectioners, creameries and soft drink workers were all well employed. At BRANTFORD activity was noted throughout the group, except in soft drinks. At KITCHENER the flour and chopping mills ran full time; the sugar factory started operations during the month on the new beet crop which was unusually plentiful, 120 men being employed on two 12-hour shifts; activity was also noted in the abattoirs, meat and sausage factories, bakeries and confectionery plants and creameries; soft drink and cigar plants were slack; the distillery resumed operations. The brewery at WATERLOO continued very busy. Conditions are generally good at GUELPH and STRATFORD. At LONDON the flour mill's worked day and night, and the cereal factories were also very busy; some overtime was worked in the biscuit and candy factories, female help being in some demand; staffs were reduced in the soft drink and cigar factories. The packing plant at ST. THOMAS continued busy. At CHATHAM flour and feed mill's, abattoirs and meat packing houses ran full time; sugar factories ran day and night to cope with the heavy beet crop; cigarmakers were well employed. At WINDSOR female help was in demand for the creameries and dairies and for the canning factories; one canning plant completed its work for the season and closed; breweries ran to capacity; cereal workers were also very busy. Conditions continued normal at OWEN SOUND in the food group. The grain elevators at PORT ARTHUR and FORT WILLIAM worked steadily, but without any great demand for help. At WINNIPEG a fairly satisfactory month was reported in the vegetable canneries and confectionery plants, a few more chocolate dippers being employed in the latter. BRANDON reported activity in all branches except tobacco. At REGINA workers in the abattoirs, packing houses, and flour and feed plants were steadily employed. MOOSE JAW reported a short supply of cattle

at the local abattoir, much stock going to the Chicago market. The flour mills at MEDICINE HAT required help. At LETHBRIDGE brewery workers had a full month's employment, but no overtime; the flour mills also worked regularly, but night shifts had not yet begun. CALGARY reported fairly good employment in the flour and feed plants, bakeries and confectioneries and abattoirs and packing houses, but breweries and soft drink factories were quiet. Packing house workers at EDMONTON were fairly active. Brewery workers at FERNIE were steadily busy; bakers were fairly active except during the short period of a strike; breweries were very busy. The jam factories at BRILLIANT and NELSON completed work on the late season's crop. The United Growers' Fruit Products, Limited, started work at VERNON with five evaporating kilns and 40 employees. At VANCOUVER fair conditions were noted in the flour, feed and cereal mill's, creameries and dairies; abattoirs and packing houses were rather slack; fruit and vegetable canning was practically over for the season; breweries were busy but soft drink plants were quiet. The fish canneries at PRINCE RUPERT closed for the season. Feed and cereal mills and breweries at VICTORIA were busy; bakers, confectioners and cannery workers were fairly busy; soft drink and tobacco workers were slack. Meat packers at NEW WESTMINSTER were normally active.

TRURO reported the knitting mills working full time but staffs were reduced owing to lack of orders.

**Textiles,  
cordage and  
carpets**

The cotton mills at ST. JOHN both ran full time. The woollen and underwear factories at MONCTON continued steadily active. The cotton mill at MARYSVILLE continued running full time. At MONTREAL the woollen and knitting workers were fairly well employed, but tent and sail makers were quiet. The cotton mills at QUEBEC were busy, but sail making was very dull. At SHERBROOKE the woollen

industry was fairly active, but cotton and knitting factories, and bleaching and dyeing, finishing and printing textile plants were all quiet. Cotton operatives at THREE RIVERS were steadily employed. Silk and cotton workers at ST. JOHN'S and IBERVILLE worked full time. The woollen and knitting mills at ST. HYACINTHE were normally active, though some workers temporarily employed in a recent rush of business were discharged. TORONTO reported the woollen industry busy during the month; hosiery, underwear and knitted goods plants worked to capacity, with some demand for experienced female operatives; cloth factories were overstocked and reduced their staffs towards the middle of the month; tent and sail makers were quiet. The knitting mills and rope factories at HAMILTON were steadily active, and tent and sail makers were fairly well employed. Help was in demand at ST. CATHARINES for the woollen mills; knitting and silk operatives were also well employed. Tent and awning workers at BROCKVILLE were quiet. The textile factories at KINGSTON worked full time. PETERBOROUGH reported that the woollen mills worked to capacity in the yarn department, and in other departments were fairly busy; underwear, hosiery and knitted goods workers were well employed, and carpet weavers were busy. The cotton and woollen mills at GALT worked overtime; the silk, hosiery and underwear factories were also busy. The woollen and silk mills at BRANTFORD were busy; hosiery, underwear and cordage workers were very busy. At KITCHENER the knitting factory was fairly active and the felt and twine plants were busy. At GUELPH cotton, woollen and linen spinning and weaving mills, and carpet and rug factories had an active month. Female help was in demand at STRATFORD for the woollen and knitting factories. Textile factories at WOODSTOCK decreased operations during the month, unsettled price conditions, it was said, causing buyers to hold off. Female operatives were in demand at LONDON, at the underwear and hosiery factories,

which were all very busy. The knitting factory at ST. THOMAS was busy. Textile operatives at CHATHAM worked full time. The tent and awning plant at WINDSOR finished the season's work. The knitting mill at OWEN SOUND was active, though affected somewhat by a scarcity of material; more serious shortage was felt at the whitewear factory; tent and awning workers were slack. At WINNIPEG the bag and knitting factories were quiet but without change in staffs; tent and awning factories were normally active. At REGINA woollen and knitting factories were normally active, but the tent industry was quiet. At VANCOUVER the tent, awning and sail factories were rather slack, and knitting workers were less active than usual.

Steam laundries at SYDNEY continued active. Boot and shoe workers at AMHERST had a fairly active month. At TRURO the cap and shirt factories worked full time, but without a demand

for help. Boot and shoe workers at CHARLOTTETOWN were unusually busy; tailors and garment workers had steady employment, and steam laundries and cleaning plants were busy. At ST. JOHN ready-made clothing and laundry workers were active. At MONCTON the cap factory, men's and women's clothing and millinery establishments were all very busy. FREDERICTON reported steady activity among shoe and harri-gan workers, and in dyeing and cleaning plants. At MONTREAL the ready-made clothing factories were not very busy, but boot and shoe workers were increasingly active; hat, cap, whitewear and laundry workers were fairly active. QUEBEC reported dull conditions in the ready-made clothing, and boot and shoe industries; shirt and women's whitewear factories and laundries were also quiet, but glove and fur workers began their season of special activity. At SHERBROOKE ready-made clothing workers were quiet, but boot and shoe factories and laundries were fairly active. Shirt, collar and hat factories at St.

JOHN'S and IBERVILLE worked full time, and furriers worked overtime. Glove makers at THREE RIVERS were fairly active, but the boot and shoe industry was slack. Clothing workers at St. HYACINTHE were well employed, additional help being employed in the men's clothing and underwear departments; the corset factory reduced its activity; the boot and shoe industry employed about one-third of its normal staff, a drop in the price of leather being awaited. Shirt makers at SOREL had a very busy month. At OTTAWA and HULL clothing and laundry workers were well employed throughout the month. TORONTO reported that ready-made clothing and whitewear manufacturers were considerably curtailing their output, laying off many of their workers or reducing their staffs; shirt, neckwear, hat and glove factories were quiet, except those for working gloves; the boot and shoe industry continued quiet with a considerable percentage of operatives out of work, dyeing and cleaning plants were active. At HAMILTON the ready-made clothing trade started the month actively but slackened off later, the buyers, it was thought, waiting for lower prices; the boot and shoe industry also showed slackening, and a five-day week was anticipated; hat and cap makers were fairly active. Clothing factories and laundries at NIAGARA FALLS were busy. Laundries at St. CATHARINES continued very busy; rubber footwear workers were well employed but some felt boot makers were laid off. At BROCKVILLE fur-workers were active, and hat and glove makers fairly well employed; the hat company received an Australian order amounting to \$80,000. Shirt and hat workers at BELLEVILLE were well employed. PETERBOROUGH reported activity in women's whitewear and children's clothing factories; boot and shoe workers were quiet. The clothing and shirt industries at GALT were active, and laundries, dyeing and cleaning workers were busy. The overall and dress factories at BRANTFORD were busy; boot and shoe workers were rather quiet. At KITCHENER the robe and clothing fac-

tory ran full time; shirt and collar factories were less active than last month, but button factories were still busy; glove factories worked full time; boot and shoe factories were slack; rubber shoe workers were also quiet. Women's whitewear workers at GUELPH were active. At LONDON ready-to-wear clothing, and fur and cap workers had a busy month, but boot and shoe factories worked short time. The boot and shoe factory at St. THOMAS was undergoing reorganization. At WINDSOR the shirt and button factories were busy, but operations were temporarily suspended at the close of the month in the overall and glove factories. WINNIPEG reported a very quiet month in the ready-to-wear clothing and shirt factories, with shorter hours but the same staffs; cap workers had less employment; glove makers were steadily active; furriers and experienced laundry workers and cleaners were in demand. At VANCOUVER fair conditions were reported in both men's and women's ready-to-wear clothing factories, but some slackness was noted in the shirt and overall, and in women's whitewear plants; laundries and cleaning establishments were rather less active; boot and shoe workers were fairly active. Shirt and overall factories at VICTORIA were only moderately active, but laundry and cleaning plants were busy.

The pulp mills in the Maritime Provinces, including those at LIVERPOOL, MURRAY, CHATHAM, St. JOHN and BATHURST, continued to run steadily during October. In the Province of Quebec increases in staffs were noted in the mills at LA TUQUE, KENOGAMI, EAST ANGUS, CAP MAGDALEINE, DONNAcona and WINDSOR MILLS. Steady conditions were maintained in the mills at THREE RIVERS, and CHANDLER, while slight declines occurred at SHAWINIGAN FALLS, CHICOUTIMI, and BAGOTVILLE. At OTTAWA and HULL the pulp, paper, sulphite and cardboard mills were severely handicapped by the partial failure of water power, 75 per cent of the employees at one plant being thrown out

**Pulp, paper  
and fibre**

of work, but conditions improved before the close of the month. A decline in employment was also reported in the mills at CORNWALL, but steady activity was maintained at SMOOTH ROCK FALLS, HAWKESBURY, TORONTO, THOROLD, ESPANOLA, STURGEON FALLS, IROQUOIS FALLS, and SAULT STE. MARIE. VICTORIA reported the pulp and paper mills on the Pacific Coast very busy; rubber roofing and tarred paper mills were increasingly active.

Steady activity continued in the printing trade at SYDNEY, CHARLOTTETOWN and MONCTON. Printers were in demand at TRURO. At ST. JOHN printers and bookbinders were well employed, but paper

**Printing,  
publishing  
and paper  
goods**

box factories were unusually quiet for this season. The printing and binding trades at FREDERICTON had a good month. Printers, bookbinders and lithographers at MONTREAL were well employed, and at QUÉBEC also these trades were active, but paper box and bag makers were rather quiet. Printers were reported busy at SHERBROOKE, ST. HYACINTHE and THREE RIVERS, but quiet at SOREL. OTTAWA and HULL reported a slack month for printers, bookbinders and engravers. At TORONTO these trades were all well employed with experienced female binders in demand, and paper factories were fairly busy. Job printing shops at HAMILTON were said to be affected by the high price of paper, but publishing plants, lithographers and bookbinders were fairly active. Printers and binders were well employed at NIAGARA FALLS, ST. CATHARINES, BROCKVILLE, KINGSTON and BELLEVILLE. At PETERBOROUGH, GALT and BRANTFORD printers and paper box workers were busy. Job printers at KITCHENER were quiet, but newspaper staffs were busy, and paper box plants worked full time. Normal conditions were noted among printers at GUELPH and WOODSTOCK and at STRATFORD printers and box makers were well employed. At LONDON job

printers were fairly busy, but newspaper work was quiet, though staffs were not reduced; lithographers were busy, and box factories commenced their rush of work for the Christmas trade. The printing trades at ST. THOMAS were busy; especially in the job departments, and at CHATHAM printers, binders and lithographers were well employed. WINDSOR reported printing activity about normal, but the box factory had a quiet month. Printers, binders, and box makers at OWEN SOUND were well employed. At WINNIPEG the binderies were normally active; box factories were quiet but without reduction of staffs. The printing trades were steadily active at BRANDON, REGINA, CALGARY and EDMONTON. At VANCOUVER and VICTORIA newspaper printers were busy and job printers and binders fairly active; the paper box and novelty trades were busy in anticipation of Christmas. Overtime was worked in most of the printing offices at PRINCE RUPERT.

The sash and door factories and planing mills at SYDNEY continued active.

**Woodworking  
and furniture**

Woodworkers at AMHERST were steadily employed during the month. The mattress factory at TRURO ran full time. At CHARLOTTETOWN the planing mills and broom, carriage and wagon factories were busy, but the furniture trade was rather slack. MONCTON reported all planing mills very busy, and at ST. JOHN also conditions were good at the mills as well as in the box and brush factories. The sash and door factories and planing mills at FREDERICTON ran full time. At MONTREAL wooden box, furniture and piano workers had a fair month. QUÉBEC reported activity in the sash, door and planing mills, but the broom factories were quiet. At SHERBROOKE the planing mills were busy and the chair factory was fairly active. At THREE RIVERS the planing mills were busy, the chair factory worked to capacity, but the wooden toy factory was quiet. The planing mills at ST. JOHN'S and IBERVILLE were well employed. At ST. HYACINTHE the plan-

ing mills and organ factories were busy, but the phonograph factory was less active and the chair factory ceased operations. The woodworking trades at SOREL had a quiet month. The piano industry at OTTAWA and HULL was quiet, and the washing machine factory was also slack. At TORONTO the sash, door and planing mills were in steady operation; the furniture trade showed a falling-off in activity; the piano, organ, phonograph and toy industries unusually quiet for this season with a large number of workers unemployed. At HAMILTON furniture and box factories were rather quiet. Woodworkers at NIAGARA FALLS had a busy month. ST. CATHARINES reported continued activity in the woodworking trades. Staffs were reduced in the piano industry at KINGSTON, owing, it was said, to shortage of material. At BROCKVILLE the planing mills and office furniture factory workers were fairly active. BELLEVILLE also reported activity in the mills and in the chair factory. The sash, door and planing mills at PETERBOROUGH and GALT were very busy, but furniture workers at the latter were less active. At BRANTFORD mill workers and piano and furniture makers were well employed. At KITCHENER the planing mills, wooden ware and toy factories were busy, but wooden box, broom, cooperage, piano and organ workers were only fairly active, while the furniture industry was dull, upholsterers and finishers being laid off. Planing mill operatives at GUELPH were active but the piano trade was slack. The wooden box factories and planing mills at STRATFORD were very busy. At WOODSTOCK the furniture factory reduced its hours from ten to eight, and help was no longer in demand; the organ industry showed some improvement, but piano workers went on short time, owing, it was said, to the overstocking of the market. LONDON reported the planing mills and wooden box, barrel and piano factories all very busy. At ST. THOMAS skilled mechanics were in some demand. Woodworking factories at CHATHAM ran full time. All sash and door factories and planing mills at WINDSOR ran to capa-

city; the piano factory was also busy taking on extra help. Furniture plants at OWEN SOUND were quiet, but the planing mills and basket factory were active. At SAULT STE. MARIE the planing mills had a busy month. The sash and door factories at BRANDON were very busy, but at REGINA the mills were rather quiet. At LETHBRIDGE and CALGARY conditions were reported good throughout the month. The woodworking trades at EDMONTON were fairly active. The sash and door factories at FERNIE were very dull, with little hope, it was said, of a revival before spring. VANCOUVER reported some slackness at the mills, but at NEW WESTMINSTER wood and furniture workers were well employed. At VICTORIA the sash, door and planing mills were moderately active, but wooden box factories were quiet.

Trunk and bag makers at AMHERST were steadily employed. Tannery workers at ST. JOHN had a very busy month. At FREDERICTON leather and rubber (other than clothing) makers were steadily active. MONTREAL reported busy conditions in the tanneries and rubber factories; trunk, bag and harness makers were active. At QUEBEC the tanneries were active, but trunk, bag and harness workers were slack. Tannery workers at SOREL were well employed. At ST. HYACINTHE harness makers were active. The saddlery industry was unusually slack at OTTAWA and HULL, and a number of employees were laid off. Trunk, bag and harness makers at TORONTO were fairly well employed, but rubber factories worked much below capacity. At HAMILTON harness, trunk and leather goods workers were active. Harness and belting workers at BROCKVILLE were fairly well employed. The tannery at KINGSTON was rather busier, 115 workers being employed. Leather workers at PETERBOROUGH had a quiet month. Both tanneries at KITCHENER ran full time; trunk and bag workers were also busy. Harness and other leather workers at STRATFORD had steady employment. Tannery work-

ers at LONDON were reported slack, but at OWEN SOUND conditions were fairly good. At BRANDON tannery workers and trunk makers were busy. CALGARY reported fair activity in the trunk, bag, harness and horse goods trades. The tannery at NEW WESTMINSTER worked to capacity.

The cement plants at MONCTON were active throughout the month. At MONTREAL the glass factories were busy. The brick-yards at QUEBEC were busy, but stonecutters were very quiet. At SHERBROOKE also brickmakers were well employed; stone and granite cutters were fairly active. The artificial stone factories at THREE RIVERS had an active month. At TORONTO the brickyards were busy and glass factories were in steady operation. Glass workers and brick and tile makers at HAMILTON were active. Cut stone and brick workers at BROCKVILLE were quiet, the municipal brick-yards being closed. The pottery and brickyards at BELLEVILLE were busy. At KITCHENER employment was rather slack among stone, marble, brick and tile workers. The brick and tile yards at STRATFORD were normally active. LONDON reported stone cutters unusually busy and brick makers well employed. Glass workers at REGINA were quiet. VICTORIA reported the cement plants busy, chiefly on foreign orders; brick and tile plants were moderately active.

SYDNEY reported continued activity in the various local chemical industries. At MONTREAL the paint and varnishing industry was rather quiet, but chemical, drug, and medicine plants were fairly active. SHERBROOKE reported activity in the oil and grease industry; gunpowder, acid, drug and medicine factories were fairly busy. The paint mills near THREE RIVERS had an active month. At TORONTO paint and varnish factories were busy, but soap factories reduced their staffs. Chemical workers at HAM-

**Paints, oils,  
chemical,  
explosives**

ILTON were active. The electro-chemical plants at NIAGARA FALLS were very busy. The paint and varnish plants at BRANTFORD were busy. At KITCHENER the glue, oil and grease plants were fairly busy. The paint mills at WINDSOR were busy, though hampered by shortage of materials; the soap and perfume plants were very quiet, but the patent medicine factories were fairly busy. The paint and varnish industry at REGINA was quiet. VANCOUVER reported the petroleum refinery busy, but the paint and varnish plants were rather quiet. At VICTORIA the soap and paint factories were quiet powder and explosive plants were dull, the number of employees being considerably reduced.

The gross earnings of the Canadian Pacific Railway in September were \$20,009,287, as compared with \$17,513,690 in September, 1919. During October the number of persons employed by the Canadian Pacific, Grand Trunk and Canadian National Railways on railway operation including general offices, trainmen, and engine crews, station employees, sleeper, dining and parlour car employees, showed a decrease of about 1,300 persons, the total at the end of the month being 70,400 in comparison with 71,700 at the end of September. This reduction occurred during the first week of the month, and was accounted for by the decrease in the staff of the Canadian Pacific Railway. The increase in the combined totals given this month, in comparison with previous months is due to the inclusion of the Grand Trunk Pacific employees with the Canadian National Railways.

SYDNEY reported continued activity during October in railway transportation, both steam and electric; 'longshore work was steady and transfers were busy. TRURO reported slack employment among trainmen. All branches of transportation were exceptionally busy at CHARLOTTETOWN. At MONCTON freight and passenger traffic continued heavy, operating crews making good time; ex-

**Railways,  
shipping and  
'longshore work**

presses and transfers were active. ST. JOHN reported exceptionally heavy passenger traffic, trains from Montreal and Boston frequently arriving in two sections; street railway and transfer workers were steadily employed; but 'longshore work was dull. At MONTREAL railwaymen had an active month, and 'longshoremen were busy. Railways at QUEBEC began their reduced winter schedule, but the reduction was less than in recent years, owing to the extended tourist season; railway freight traffic continued steady; street railway still retained their full crews; 'longshoremen had a busy month, mainly owing to the low water in the channel to Montreal; transfers and garages were busy. SHERBROOKE reported activity among trainmen and transfer workers, and street railwaymen were fairly busy. At THREE RIVERS the Grand Trunk and Canadian Pacific railways as well as the steamship lines, had a very busy month; street railwaymen and transfer workers were well employed; transport workers had a busy month at ST. JOHN'S, IBERVILLE, and SOREL. At TORONTO trainmen were active, passenger traffic being unusually heavy for the season; street railwaymen were also busy; in water transportation freight was above the average, and 'longshoremen were busy, but passenger traffic was light; garages had a busy month. At HAMILTON passenger and freight traffic was very heavy; steamships were busy and 'longshoremen were well employed; street railwaymen had an active month. Railway freight traffic at NIAGARA FALLS was unusually heavy. At BRIDGEBURG train work was dull, but improvement was expected to follow the close of lake navigation. Railway activity was noted at ST. CATHARINES; navigation on the Port Dalhousie and Toronto route closed at the end of the month. BROCKVILLE reported signs of a falling off in railway activity; transfers also showed a decline. Passenger and freight traffic was brisk in the three lines of railway operating at BELLEVILLE; transfers and garages were also busy. At GALT and KITCHENER transportation was active on both steam and electric railways. BRANTFORD

reported railway freight traffic light, but passenger traffic normal; street railwaymen were steadily active. Railway workers were active at STRATFORD, especially in the freight department. At LONDON employees in the Grand Trunk and Canadian Pacific Railways had a full month's work. At ST. THOMAS, considerable reductions were made in the working forces of the Michigan Central Railway coinciding with a similar movement in United States railways; other railways also were quieter, though unskilled labour was in some demand. Transport workers at OWEN SOUND were busy. At SAULT STE. MARIE, 366,022 tons of freight passed through the canal during September, compared with 350,174 tons in September, 1919; the figures for October were not yet available. The freight sheds and coal docks at PORT ARTHUR and FORT WILLIAM were busy in view of the closing of navigation. Trainmen were busy in WINNIPEG, BRANDON, REGINA and other centres on the Prairies. CALGARY reported somewhat quieter conditions in the freight sheds, but railways were fairly active, and street railwaymen busy. At VANCOUVER trainmen and electric railway workers were active and 'longshoremen were fairly well employed; transfers and garages were busy. 'Longshoremen at VICTORIA had a quiet month.

QUEBEC reported continued activity in quarrying in the district. In SHERBROOKE district the Mining (other than coal) smelting and quarrying chrome iron mines were active, but the copper mines were quiet; the gravel pits were busy and the granite quarries fairly active. Asbestos miners at THETFORD MINES were active, except at two mines where a strike began early in the month; the asbestos mills were moderately busy. A demand continued at TIMMINS for underground workers. The Magpie iron mine at SAULT STE. MARIE had 160 men employed, with a demand for about 60 trammers; the output was about 650 tons in the rough, or 500 tons after being roasted; the steel

plant employed about 3,600, more labourers being required. Shipments from the mines at COBALT amounted to 46 cars containing approximately 3,578,468 pounds of ore, as compared with 38 cars containing 3,009,898 pounds of ore in the previous month; bullion shipments amounted to 372 bars containing approximately 425,098.35 fine ounces of silver; this compares with 519 bars containing 700,338.60 fine ounces in September; operations at the mines were curtailed owing to a shortage of power caused by the low level of the Montreal River; for the time being the supply of labour was reported equal to the demand. Additional men were placed in the quartz mines at THE PAS. Metalliferous mining at FERNIE was increasingly active, with a more plentiful supply of labour. Quartz miners were in demand at CRANBROOK. The mines at ROSSLAND were more active than in the previous month, shipping over one thousand tons of ore daily to the smelter at TRAIL; at this smelter one copper and two lead furnaces were in operation, an additional lead furnace starting during the month; the concentrator and lead, copper, zinc and silver refineries ran steadily, with increased lead productions expected. A shortage of miners was noted at GRAND FORKS. PRINCE RUPERT reported activity in mining with a demand for miners at STEWART and ALICE ARM.

SYDNEY reported the production of the Dominion Collieries during October as 274,000 tons, as

**Mining (Coal)** compared with 263,800 tons (revised figure)

in the previous month; 32,700 tons of coke were produced, 120 ovens being in operation. At the Nova Scotia collieries at SYDNEY MINES 50,800 tons of coal were raised, compared with 48,500 tons in September and 8,900 tons of coke, compared with 7,800 tons in the previous month, 190 ovens were working. The MINTO collieries were increasingly active. Miners continued to be in demand at the various employment centres in the Prairie Provinces. The coal

mines at LETHBRIDGE had a steady month's work but the miners employed by the city, as well as those at the COALHURST mines were inactive for a time owing to industrial disputes. Mining operations at FERNIE and MICHEL were suspended during the first half of the month owing to a strike resulting from the U. M. W. of A. "check-off," but work was resumed on October 19; about 1,230 men were affected. NANAIMO reported steady conditions in the Vancouver Island coal mines.

The value of the building permits in 56 cities during September amounted to \$8,921,374 as compared with \$9,439,807 in August. During

**Building and construction**

October building continued active at SYDNEY. At CHARLOTTETOWN the building trades continued well employed, fine weather favouring the completion of all outside work. ST. JOHN, FREDERICTON and BATHURST reported activity in building. The construction of a dam at NIPISIGUIT FALLS was nearing completion. The building trades at MONTREAL were fairly well employed. At QUEBEC, SHERBROOKE and THREE RIVERS building operations were still very active, but at SOREL a decline was noted. At OTTAWA and HULL building continued as active as it was during summer. The building trades at TORONTO showed continuous activity, especially in dwelling-house construction, all classes of labour being well employed; many, it was thought, would be engaged on inside work all winter. At HAMILTON some unemployment was noted among carpenters, bricklayers, and labourers, due to the high prices of building materials, but some large industrial extensions were begun, and the city had considerable improvements in hand. The building trades at NIAGARA FALLS were active; the city took over the paving work from the contractors, engaging additional workers; increased numbers were also employed on the Hydro-Electric Power canal. Fair conditions were reported at ST. CATHARINES; canal construction gangs were ac-

tive. The building trades at BROCKVILLE still showed signs of unusual activity; city work was also plentiful. General activity was also reported at KINGSTON; workers discharged from the city re-engaged for Provincial road construction. Building at BELLEVILLE was rather quiet. At PETERBOROUGH carpenters and other building trades except painters were busy. GALT and KITCHENER reported activity still continuing in all lines of building, with a demand for help in some trades. Practically no houses were going up at BRANTFORD, but at STRATFORD many were under construction. At WOODSTOCK employment continued good. LONDON reported a considerable amount of commercial, industrial and public building in progress; the City Housing Commission were completing a large number of dwellings. At WINDSOR over 200 dwellings were under construction; those built under the Housing Scheme were near completion; some industrial buildings were completed. OWEN SOUND reported building moderately quiet. All construction workers were well employed at FORT WILLIAM and FORT ARTHUR. The building trades were moderately active in BRANDON, REGINA, MOOSE JAW, CALGARY and EDMONTON and other centres in the Prairies provinces. At VANCOUVER building in all branches was reported rather slack. NANAIMO reported some activity in building under the Housing Scheme.

Railway construction showed a slight decline during the month of October. The number of persons employed by the Canadian Pacific, Grand Trunk and Canadian National railways on this work, including maintenance of way, was 45,400 at the end of the month in comparison with 46,200 at the end of September, a net decrease of about 800 persons. This reduction was equally divided between the Canadian Pacific and Canadian National railways. It should be noted that the combined staffs of these railways are somewhat larger this month than reported previously. This is due to the inclusion of the Grand Trunk Pacific employees with the returns of the Canadian National Railways.

Labour was generally reported scarce during October in the lumber camps in the Maritime Provinces, Quebec and Ontario.

#### Lumbering

CHARLOTTETOWN reported quiet conditions in the industry. The saw and shingle mills at ST. JOHN and FREDERICTON were still running. BATHURST reported the demand for men to be less than last year, and the camps were beginning to fill. In QUEBEC district the sawmills were actively engaged in finishing their season's cuts. The mills at SHERBROOKE were fairly active and the logging, tie and other surrounding camps were busy. At ST. JOHN'S and IBERVILLE sawmill workers were still employed. One sawmill at OTTAWA and HULL closed during the month; some improvement was reported before the month closed in the water power situation. PETERBOROUGH reported the lumber camps very active and taking on all available men; the saw and shingle mills continued busy. A strong demand for loggers was reported from TIMMINS, PEMBROKE, NORTH BAY and COBALT. The saw and shingle-mills at OWEN SOUND were still active. SAULT STE. MARIE, PORT ARTHUR and FORT WILLIAM reported a shortage of men for the woods. A demand for bushmen for the Prairie Provinces was reported from WINNIPEG, REGINA, EDMONTON and other employment centres, the fine weather tending to keep many men working on the farms. A considerable curtailment of production was reported in the lumber industry of British Columbia. At FERNIE the lumbering industry was reported rather quiet owing, it was said, to the unsettled condition of the prairie and American markets, the new freight-rate increase and unsettled labour conditions; the closing of some mills and the return of labourers from the prairies reduced the previous labour shortage; the pole and tie branch was also rather quiet. The lumbering industry was very slack at NELSON and TRAIL, many mills closing down; some, it was said, because of a shortage of cars, and some because of low prices or high railway rates. Some demand for

loggers was reported from KAMLOOPS and VERNON. VANCOUVER reported that a number of camps closed down towards the end of the month, and saw and shingle mills less active; tie makers and piece workers on poles and posts were in demand for interior points on the Grand Trunk Pacific Railway. At NEW WESTMINSTER several lumber mills were already curtailing operations owing to the unsatisfactory state of the market or shortage of cars, and one mill

closed down, throwing about 170 men out of work. PRINCE RUPERT reported most of the lumber camps as still busy, but a few of the smaller camps closed for the winter; the tie camps along the G.T.R. Railways were opening up. VICTORIA and NANAIMO reported some decline on Vancouver Island from the activity of the past months, several mills ceasing operations on account, it was said, of the dull market and high freight rates.

---

## INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907

---

### PROCEEDINGS FOR THE MONTH OF OCTOBER 1920, WITH TEXT OF BOARDS' REPORTS

**D**URING the month of October the Department received two reports from Boards established to deal with disputes between (1) the Canadian Pacific Railway Company, the Grand Trunk Railway Company, and the Canadian National Railways, and certain of their employees, being clerks, timekeepers, railway checkers, freight handlers, truckers, coopers, etc., and (2) the Canadian Pacific Railway Company (Western Lines) and certain of its employees, being conductors, etc., members of the Order of Railway Conductors and the Brotherhood of Railroad Trainmen. Four applications for the establishment of Boards were also received.

#### Applications Received

During the month of October applications for the establishment of Boards were received as follows:

(1) From the employees of the International Transit Company, Sault Ste. Marie, Ontario, members of Division No. 850, Amalgamated Association of Street and Electric Railway Employees of America. A special officer of the Department visited the locality and through his mediation negotiations between the parties were renewed and a

settlement was effected without reference to a Board.

(2) From the employees of various shipping companies doing business on the Great Lakes, being firemen, oilers, deck-hands, etc., members of the Sailors' Firemen's and Cooks' Union of Canada. The application in this case was later withdrawn, an adjustment of the dispute having been effected through the mediation of a special officer of the Department who visited the locality.

(3) From the employees of the Canadian National Transfer Company, being teamsters and chauffeurs, members of the Canadian Brotherhood of Railway Employees. A Board was established, composed as follows: Messrs. R. G. Persse and David Campbell, Winnipeg, nominees of the company and employees respectively. At the close of the month the chairman had not yet been named.

(4) From the employees of (1) the British Columbia Electric Railway Company, (2) Vancouver Power Company, Limited, and (3) Vancouver Island Power Company, Limited, being members of Local Unions Nos. 213 and 230, International Brotherhood of Electrical Workers. This application was under consideration at the close of the month.

**Report of Board in dispute between the Canadian Pacific Railway Company, the Grand Trunk Railway Company and the Canadian National Railways, and certain of their employees**

---

**A** REPORT was received from the Board established to deal with the dispute between the Canadian Pacific Railway, the Grand Trunk Railway and the Canadian National Railways, and certain of their employees, being clerks, timekeepers, railway checkers, freight handlers, truckers, coopers, etc. The Board was composed as follows: Mr. E. McG. Quirk, Montreal, chairman, appointed by the Minister in the absence of a joint recommendation from the other two members, Mr. U. E. Gillen, Toronto, appointed by the Minister in the absence of a recommendation from the company, and Mr. Adelard Laurendeau, M.P.P., Montreal, nominee of the employees. The report of the Board was unanimous and contained information to the effect that an agreement had been reached between the parties concerned adjusting the matters in dispute.

**Report of Board**

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between (1) the Canadian Pacific Railway Company, (2) the Grand Trunk Railway Company, and (3) the Canadian National Railways, Eastern Lines, respectively, employers, and certain of the employees of each of the said companies being clerks, timekeepers, railway checkers, etc., members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, employees.

Hon. Senator G. D. Robertson,  
Minister of Labour,  
Ottawa.

Sir,—

The Board of Conciliation and Investigation composed of Messrs. E. McG. Quirk, Chairman, U. E. Gillen and A. Laurendeau, M.P.P., members appointed by you to enquire into the dispute between the parties mentioned above, after being duly sworn held meetings in the City of Montreal, October 8-9-12-13-14-15 and 16. The meetings were open to the public and the employees who applied for the Board were given every opportunity to state their case and file documentary evidence, and at their request the Board on October 13th visited freight sheds 8-12-14 and 16, and observed the kind of work that was being done by the various classes of employees and talked with a number of the men then on duty; shortly after that the employees announced they had no more evidence to submit.

The Board's Chairman then urged that representatives of the employers and employees meet and discuss the matters in dispute with a view of reaching a mutually satisfactory agreement; the employers readily agreed to meet their employees with the result that eventually a meeting was arranged by the Board, Mr. George Hodge, Assistant to the Vice-President, Eastern Lines, Canadian Pacific, represented that company, and Mr. R. H. Fish, General Superintendent, Eastern Lines, Grand Trunk, represented that company and the Canadian National Railways.

Mr. A. F. Brunet, General Chairman of the Committee representing the Employees has addressed a communication to the Chairman of your Board reading as follows:

"I beg to advise you that the Committee representing the Montreal Wharf Freight Handling staffs of the Canadian Pacific, Grand Trunk and Canadian National Railways, have now concluded an agreement with the Railways covering all points in dispute."

All of which I have the honour to submit.

(Sgd.) E. McG. QUIRK,  
Chairman.

(Sgd. U. E. GILLEN,  
Member.

(Sgd.) A. LAURENDEAU, M.P.P.,  
Member.

Montreal, October 16th, 1920.

# **Report of Board in dispute between the Canadian Pacific Railway Company (Western Lines) and its conductors, etc.**

**A** REPORT was received from the Board established to deal with the dispute between the Canadian Pacific Railway Company (Western Lines) and certain of its employees, being conductors, etc., members of the Order of Railway Conductors and the Brotherhood of Railroad Trainmen. The Board was composed as follows: The Honourable Mr. Chief Justice T. G. Mathers, Winnipeg, appointed on the joint recommendation of the other two members, Messrs. Isaac Pitblado, K.C., and David Campbell, Winnipeg, nominees of the company and employees respectively. The report was signed by all three members of the Board and contained recommendations regarding settlement of the dispute, also schedules of proposed rates. Mr. Campbell, while signing the report, dissented on certain points and added a minority report as an appendix.

## **Report of Board**

In the matter of the Industrial Disputes Investigations Act, 1907, and of a dispute between The Canadian Pacific Railway Company, Western Lines, employer, and certain of its employees, being Conductors, Bag-gagemen, Trainmen and Yardmen, members of the Order of Railway Conductors and the Brotherhood of Railroad Trainmen, employees.

To the Honourable G. D. Robertson,  
Minister of Labour,  
Ottawa, Ontario.

Sir,—

The undersigned members of the Board of Conciliation and Investigation appointed by you on the 12th day of August last to enquire into and report upon the above dispute, beg leave to report as follows:

The Board held its first meeting on the 16th day of August, 1920, and on the 17th of August were attended on behalf of the company by Mr. C. Murphy, General Manager, Western Lines, Mr. A. Halkett, Superintendent, and by Mr. R. C. Morgan, Superintendent; and on behalf of the employees by Mr. W. G. Chester, Chairman of the General Committee of the O. R. C., Mr. C. E. Cross, Secretary of the General Committee of the O. R. C., Mr. E. H. Cooke, General Chairman of the Brotherhood of Railroad Trainmen, Mr. James McLaughlin, General Secretary of the Brotherhood of Railroad Trainmen, and their several committees.

Thereafter meetings were held on the 18th, 19th, 20th, 21st, 23rd, 24th, 25th, 26th and 27th of August, 14th, 27th, 28th, 29th and 30th of September, 5th, 6th, 7th, 8th, 11th, 12th, 13th, 14th, 18th and 19th of October.

Upon opening of the matter it was found that the dispute related entirely to rates of pay, grouped under four heads, viz.: First, the general rate of increase asked by the employees; Second, the differentials in mixed and way

freight service; Third, the basing rate in through freight service from Lake Louise west and Kootenay Landing west through the Kootenays; Fourth, the yardmen's schedule.

It will be convenient to first state the contention of the parties with respect to these several points in the order named before making our recommendations with respect to their settlement.

*Firstly as to the general increase.*

The employees ask for a general increase of 98.53 per cent over the rates paid in 1916, taking the Conductors' rate as a basis. Their contention is that the cost of living has been increased to that extent in the period named and that they are therefore entitled to a like increase in rates of pay.

The rates of pay existing in 1916 were by agreement between the company and the employees increased as of the first of January, 1918, by the application of the McAdoo Award and were by a like agreement further increased as of the first of January, 1919, by the application of Supplement 16 thereto.

The following examples illustrate the general method adopted in preparing the proposed new rate schedule:

In 1916 the passenger conductors' rate was \$165 per month for 5,600 miles or less, or at the rate of 2.94 cents per mile. Increase 2.94 by 98.53 per cent gives 5.85 cents as passenger conductors' mileage rate. The present rate is 4 cents per mile with a monthly minimum of \$187.

The baggagemen's existing rate is 69.25 per cent of the conductors' rate, consequently the baggagemen's rate is placed at 69.25 per cent of 5.85 cents per mile, or 4.05 cents per mile. The present rate is 2.77 cents with a monthly minimum of \$130.05.

The passenger brakemen's rate for the same reason is placed at  $66\frac{1}{2}$  per cent of 5.85, or 3.89 cents per mile. The present rate is 2.66 cents per mile with a monthly minimum of \$122.40.

In through freight service east of Lake Louise and Crow's Nest the con-

ductors' rate in 1916 was \$4.18 per hundred miles which rate being increased by 98.53 per cent made the proposed rate \$8.30 per hundred miles, and by the application of the same principle the rate asked for brakemen in this branch of the service is \$6.27 per hundred miles. The present rates are: conductors, \$5.40 per hundred miles and baggagemen and brakemen \$4.08 per hundred miles.

The basing rate asked for conductors from Lake Louise west and from Kootenay Landing west through the Kootenays, arrived at in the same way, is \$8.52 per hundred miles and for brakemen \$6.44 per hundred miles. The present rates are respectively \$5.40 and \$4.14 per hundred miles.

In the New Westminster Sub-division both conductors and brakemen were, in 1916, and still are, paid on a monthly basis, the former getting in that year \$175.00 and the latter \$131.25 for 224 hours or less. For the conductor is now asked a guarantee of \$263.25, and the brakemen \$197.44. The present rates are respectively \$187.00 and \$131.25 for 224 hours or less.

The company's representatives contend that the rates asked for are excessive. They admit that the employees are entitled to an increase, however, and offered to put into effect, as of the first of May last, the rates of increase awarded by the United States Railroad Labour Board to the same classes of employees in the United States by its award bearing date July 20th, 1920. This award gives conductors, baggagemen and brakemen in passenger service each a flat increase over existing rates of .67 cents per mile or if paid by the month a flat increase of \$30 per month, and conductors and brakemen on freight service an increase of 1.04 cents per mile.

*Secondly, differentials on mixed and way freight service.*

According to the existing schedules, conductors and brakemen in through freight service are entitled to be paid

differentials for certain territory. That is to say, west of Crow's Nest to Kootenay Landing, 11 cents per hundred miles in addition to the through freight rates of \$5.40 and \$4.08, and on the Mountain Sub-division, Lake Louise to Revelstoke, \$1.05 and \$1.04 per hundred miles respectively, and on the Nakusp and Slocan Sub-divisions, and on all sub-divisions west of the Columbia River on the Nelson Division, 90 cents and 76½ cents per hundred miles, in addition to the basing rates of \$5.40 and \$4.14 for these territories. There is also provided a differential for mixed and way freight service east of Lake Louise and Crow's Nest of 52 cents per hundred miles for conductors and 40 cents per hundred miles for baggage-men and brakemen. For the same service from Crow's Nest to Kootenay Landing the existing differential is 51½ cents and 41 cents respectively, and for way freight service west of Lake Louise and Kootenay Landing the existing differential is 52 cents and 41 cents.

The employees, by their presentation, ask that the differential for mixed and way freight service east of Lake Louise and Crow's Nest be for conductors 83 cents per hundred miles and baggage-men and brakemen 63 cents per hundred miles; for mixed and way freight service from Crow's Nest west to Kootenay Landing, that it be 84 cents per hundred miles and 64 cents per hundred miles, respectively; and for way freight service west of Lake Louise and Kootenay Landing that it be 85 cents and 64 cents.

The differentials claimed for mixed and way freight service east of Lake Louise and Crow's Nest, and west of Crow's Nest to Kootenay Landing were calculated on a basis of ten per cent of the proposed through freight rate for these territories, and the differential for way freight service west of Lake Louise and Kootenay Landing on a basis of ten per cent of the proposed basing through freight rate for that territory. Their contention is that prior to 1919 these differentials were calculated on a per-

centage basis and that that method of calculating them should be revived.

The representatives of the company raised no objection to any of the differentials with the exception of those claimed for mixed and way freight service. They point out that when the company adopted and applied in 1919 the Supplement 16 to General Order 27 of the United States Railroad Labour Board, commonly known as the McAdoo Award, pursuant to an agreement to accept that award, a dispute arose as to the latter differentials. Supplement 16 granted an increase in rates of pay, coupled with certain conditions, the application of which would mean a saving of money to the Company. The employees' representatives then contended that the rates of pay should be applied without the conditions. Under these circumstances a case was stated by the company and the men, known as case No. 42, for the opinion of the Canadian Railway Board of Adjustment No. 1, with respect to this and other disputes. This case was heard at Montreal on the 22nd September, 1919, and a decision rendered on the 24th September by the Board to the effect that all the provisions of Supplement 16, and as further outlined in Interpretation number one thereto, should be applied with the rates unless otherwise mutually agreed, and referred the matter back to the parties for further conference. This conference was entered upon with the result that the company agreed to forego the right to have the conditions specified in Supplement 16 incorporated in the schedule, and the employees on their part agreed to the company's contention with respect to these differentials, and the British Columbia basing rate hereinafter referred to. The result was that notwithstanding the increased rates given by Supplement 16 in through freight service, the differentials for mixed and way freight service were not increased but remained the same in amount as prior to the 1919 schedule, with the exception that the conductors' differential east of Lake Louise and Crow's Nest was made 52 cents per

hundred miles instead of 50 cents as in the schedule of 1918. These differentials having been in this way established at fixed sums by agreement for valuable consideration on the company's part, the employees are, they contend, bound by it. The men admit that such an agreement was arrived at but say that under the circumstances they were face to face with the alternative of either compromising in this way or going back to the Canadian Railway Board of Adjustment No. 1, and that as a compromise they agreed to the proposition of the company.

The employees did not in the negotiations with the company respecting the application of Supplement 16, nor do they now, ask for an increase in the differentials for through freight service notwithstanding increases asked for in the basing rates. These differentials have always been fixed sums and never have been calculated as a percentage of the basing rate. The only dispute, therefore, with respect to differentials relates to mixed and way freight service and only as to whether they should be calculated on a percentage basis or remain at the fixed sums established by the 1919 schedule.

*Thirdly, basing rate on through freight service on the British Columbia Division.*

The third point in dispute relates to the basing rate in through freight service from Lake Louise west and from Kootenay Landing west through the Kootenays, which basing rate applies also to mixed trains in that territory except on the Arrow Lake and Okanagan Sub-divisions where the way freight rate applies.

Prior to 1918 British Columbia had a separate schedule, which provided higher basing rates than those contained in the prairie schedule. In that year the schedules were amalgamated so as to cover all western lines and a separate basing rate higher than the basing rate

for the prairie was continued for the above mentioned territory.

On the territory east of Lake Louise and Crow's Nest the basing rates for conductors and baggagemen and brakemen were in 1918 respectively, \$4.18 and \$2.84½ per hundred miles, and west of Lake Louise and Kootenay Landing \$4.29 and \$2.97 per hundred miles. By the application of the McAdoo award these rates became respectively, \$5.04 and \$3.97, and \$5.17 and \$4.14. By the application of Supplement 16, effective January 1st, 1919, these rates became respectively, \$5.40 and \$4.08, and \$5.40 and \$4.14.

The employees by their presentation ask that the basing rate from Lake Louise west and Kootenay Landing west through the Kootenays, be \$8.52 per hundred miles for conductors and \$6.44 per hundred miles for baggagemen and brakemen. These figures as in other cases are arrived at by adding 98.53 per cent to the 1910 rate for conductors and taking 75.55 per cent of the amount so ascertained as the rate for baggagemen and brakemen.

When Supplement No. 16 to the McAdoo award was issued the company's representatives claimed that the rate of \$5.40 per hundred miles for conductors in through freight service and \$4.08 for brakemen in that service applied to all territory both east and west, except where differentials existed, and claimed that the difference in money between the basing rate in the Prairie Division and that on this district did not constitute a differential within the meaning of the Supplement. The representatives of the men on the other hand claimed that the money difference in the two basing rates above mentioned, constituted a differential and that the men in the district in question were still entitled in their basing rate to the same higher amount over the basing rate in the Prairie Division as theretofore existed.

The company's representatives allege that at the conference before referred

to, after Case No. 42 had been decided by the Canadian Railway Board of Adjustment No. 1, the employees in consideration of the company's abandoning its right to have the conditions specified in Supplement 16 incorporated in the schedule, conceded that the basing rates for the above mentioned territory should be made uniform with those for the prairie sections and as a result in the 1919 schedule the rate for conductors in both territories was made the same, viz., \$5.40 per hundred miles. In the case of baggagemen and brakemen the rate in that schedule for the prairie section was fixed at \$4.08 per hundred miles, while that of the British Columbia District was made \$4.14 per hundred miles. This difference arose in this way. By Supplement 16 the minimum rate for baggagemen and brakemen was placed at \$4.08 per hundred miles, all rates below that figure were to be brought up to \$4.08 but those already higher were not to be reduced. The rates on the prairie sections were below \$4.08 and consequently were raised to that figure. The rates then in force however on the British Columbia section were \$4.14 per hundred miles, a rate higher than that fixed by Supplement 16, but by the terms of that award were not to be reduced and consequently appear in the 1919 schedule at that figure.

#### *Fourthly, yardmen's schedule.*

The fourth subject of dispute relates to the yardmen's schedule. At present all yardmen excepting switch tenders are paid on an hourly basis. Those employed in Lethbridge, Calgary and Edmonton and west of these places are paid a differential of two cents per hour for day men over those employed elsewhere, and everywhere night men receive a differential over day men. This two cent differential was established in the United States in 1907 for the territory including Denver and west and was in the same year applied in Canada by arrangement from the points named. The present rates are as follows:

Cents.

Lethbridge, Calgary, Edmonton and West:—		
Yard foremen, day.....	68½	
Yard foremen, night.....	69½	
Yardmen, day.....	64½	
Yardmen, night.....	66	
Elsewhere—		
Yard foremen, day.....	66½	
Yard foremen, night.....	67	
Yardmen, day.....	62½	
Yardmen, night.....	63½	

The present rate for switch tenders in all yards is \$4.00 per day.

By their presentation the employees have asked that they be paid by the day instead of by the hour. The existing rates as expressed in days of eight hours and the rates asked for are as follows:

	Existing rate		Requested rate	
	Per hour	Per day	Per day	Per hour
Lethbridge, Calgary, Edmonton and West:—				
Foremen, day.....	.68½	\$5.50	\$7.68	.96
Foremen, night.....	.69½	5.54	8.08	1.01
Yardmen, day.....	.64½	5.13	7.09	.886
Yardmen, night.....	.66	5.28	7.49	.936
All other yards:—				
Foremen, day.....	.66½	5.34	7.53	.94
Foremen, night.....	.67	5.36	7.92	.99
Yardmen, day.....	.62½	5.00	6.93	.866
Yardmen, night.....	.63½	5.10	7.33	.916
Switch tenders, all yards.....		4.00	5.93	.742

The day, which consisted in 1916 of ten hours, was in 1918 reduced to eight hours with time and a half for overtime after eight hours. Calculated on an hourly basis the increases asked for for the yardmen varies from 137.5 per cent to 147.6 per cent over the 1916 rate and for switch tenders over 250 per cent. Calculated by the day not including increased earnings from overtime the schedule is on the average for day men 75.8 per cent and for night men 68.5 per cent higher than the 1916 schedule.

By the award of the United States Railroad Labour Board of July 20th last, referred to hereafter as the

Chicago award, all differentials are wiped out and rates are made for all territories without distinction between day and night service.

In the following table a comparison is made between the present rates and those fixed by the Chicago award:

	Present rates	Chicago award	Increase
Lethbridge, Calgary and Edmonton and West:			
Day foremen.....	\$5.50	\$6.96	\$1.46
Night foremen.....	5.54	6.96	1.42
All other yards:—			
Day foremen.....	5.34	6.96	1.62
Night foremen.....	5.36	6.96	1.60
Lethbridge, etc., and West—			
Day yardmen.....	5.14	6.48	1.34
Night yardmen.....	5.28	6.48	1.20
All other yards:—			
Day yardmen.....	5.00	6.48	1.48
Night yardmen.....	5.10	6.48	1.38
Switch tenders.....	4.00	5.04	1.04

Under the Chicago award the daily earnings, working eight hours per day and not counting overtime, would on the average be 74.5 per cent higher than the daily earnings in 1916 working ten hours per day.

#### RECOMMENDATIONS OF THE BOARD.

##### *Firstly—As to the question of general increase.*

As already pointed out, the company has offered to put into effect the increases granted by the Chicago award. While this award is not entirely satisfactory either in the United States or Canada, it has been accepted in the former under protest, and has also been accepted by the following classes of employees on the company's lines: Conductors, baggagemen and brakemen on eastern lines, The Federated Trades Employees, The Order of Railroad Telegraphers, The Brotherhood of Locomotive Engineers, The Brotherhood of Locomotive Firemen, and The Brotherhood of Maintenance of Way Employees. In short, practically all the employees with

the exception of those concerned in this inquiry have come under the award.

Upon full and careful consideration and after prolonged consultation, we recommend to the conductors and trainmen the acceptance of the company's offer to apply the rates of pay fixed by the Chicago award, effective May 1st, 1920.

##### *Secondly.—Differentials.*

With reference to the dispute as to differentials claimed in mixed and way freight service, we regret to say that the Board has not been able to arrive at a unanimous conclusion. The Chairman and the representative of the company, while not concurring in the company's contention that the employees' hands are tied by the agreement already referred to because of the provision in the schedule giving either party the right to terminate it, believe that no reason has been shown why the differentials in mixed and way freight service should be calculated on a percentage basis while those in through freight service are fixed sums, and upon a consideration of this and all other circumstances recommend that these differentials remain as at present constituted.

##### *Thirdly.—British Columbia basing rate.*

With respect to the dispute relating to the basing rate in through freight service from Lake Louise west and from Kootenay Landing west through the Kootenays, etc., including mixed trains, except on the Arrow Lake and Okanagan Sub-divisions, we regret that on this point also the Board are not unanimous. The Chairman and Mr. Pitblado consider that as the basing rate was fixed by agreement in the manner before mentioned and in view of all the circumstances, the basing rate for this territory should be the same as that for the territory east of Lake Louise and Crow's Nest, subject to the stipulations contained in Supplement 16.

##### *Fourthly.—Yardmen's schedule.*

On this point also there is a difference of opinion between the members of the

Board. The Chairman and Mr. Pitblado believe that substantial justice will be done both parties if the Chicago award is put into effect with respect to the yardmen. Whatever reason prompted the establishment of a differential of two cents per hour for men in Denver and west in the United States and in Lethbridge, Calgary, Edmonton and west in Canada, that reason appears to no longer exist, and so the Chicago award has wiped it out in the United States and made a uniform rate for all territory. This award has been accepted by yardmen on the company's eastern lines.

The recommendation, therefore, of the Chairman and Mr. Pitblado is that the rates of pay fixed by the Chicago award be put into effect for yardmen and switch tenders.

Mr. Campbell, the men's representative, dissents from the majority of the Board on the second, third and fourth points in dispute, and has stated his reasons and recommendations in the appendix hereto.

All of which is respectfully submitted the Nineteenth day of October, A.D., 1920.

(Sgd.) T. G. MATHERS,  
Chairman.  
(Sgd.) ISAAC PITBLADO,  
Member of Board.  
(Sgd.) D. CAMPBELL,  
Member of Board.

## APPENDIX.

### Reasons and Recommendations of Mr. Campbell

With regard to the second, third and fourth points of the dispute, it is to be regretted that I am unable to agree with the views and recommendations of the majority of the Board, and will, therefore, state my own as briefly as possible.

As to the second and third points, namely, the differentials in Way Freight and Mixed Train service and in the basing rate for British Columbia, I recommend that the differentials as they existed after the adoption of the McAdoo

Award as from January, 1918, be restored in every particular, and that the award of the United States Railway Labour Board of July 20th last be applied on these rates, all to be effective from and after May 1st, 1920.

The Mixed and Way Freight differentials were clearly established as late as the agreement on the McAdoo Award in 1918, and in each case these differentials were 10 per cent of the through freight rate, and were so expressed in the amount and the percentage basis of arriving at the amount. West of Lake Louise and Kootenay Landing, however, there was no differential for Mixed Train service. This service in those localities took the basing rate.

It is also to be noted that in January, 1918, prior to the adoption of the McAdoo Award, the parties to this dispute settled by mutual agreement a dispute which included these very differentials, while the matter was before a Board of Conciliation composed of the same members as the present Board. All these differentials were at that time similarly established.

It was shown by the employees that the Way Freight differential had heretofore always been 10 per cent of the through freight rate, and in fact in the past the company several times refused to depart from that method of establishing them. The company does not deny this, but now claims that by the agreement made in 1919 upon Supplement No. 16 to the McAdoo Award, and Interpretation No. 1 thereof, the employees agreed to forego this method of computation and accept the amount then existing in each case rather than have the objectionable rules embodied in their schedule which went with the rates; that is to say, they now rely upon this agreement as a substantial reason for declining to restore these differentials to the 10 per cent basis. I shall refer to this later. The company also contends that the Way Freight differential was expressed only by a money amount, although the schedule itself, in addition to naming the amount in each case, says:—"This differential is based on 10

per cent in excess of the through freight rate."

With reference to the basing rate from Lake Louise west to Vancouver and from Kootenay Landing west through the Kootenays, that too was the subject of agreement in both of the cases referred to above in 1918, with the exception that when the agreement on the McAdoo Award was made the difference between the Prairie rates, that is, east of Lake Louise and Crow's Nest of 11 and 12½ cents per 100 miles for Conductors and for Baggage-men and Brakemen respectively, was increased to 13 and 16 cents respectively.

It is worthy of note that these rates were at that time 2 cents and 9 cents respectively above the rates which in that agreement applied west of Crow's Nest to Kootenay Landing, and in 1919 the differential of 11 cents per 100 miles west of Crow's Nest to Kootenay Landing was maintained and is now 11 cents higher than the rates east of Lake Louise and Crow's Nest, and also 11 cents higher than all territory west of Revelstoke and west of Kootenay Landing through the Kootenays.

The company justifies this upon the ground that this 11 cents in this territory was a specified differential, while the basing rate west of Lake Louise and from Kootenay Landing through the Kootenays was a fixed rate and not based upon a differential. I confess I cannot conceive the distinction between the differential and the difference in a rate.

Undoubtedly there was an agreement to accept, at that time, the company's views with reference to these differentials, but that agreement is admittedly governed by Article 32 of their schedule, which reads as follows:—

"The articles embodied in this schedule shall constitute an agreement between the Canadian Pacific Railway Company and its Conductors, Baggage-men, Brakemen and Flagmen employed on its Western Lines thereof and will remain in force subject to thirty days' notice from either party."

Clearly the agreement as to these differentials and, in fact, all agreements, were made subject to the terms of this

Article, and by this Article the agreement in that regard is now at an end. The question then arises, is there now any merit in the contention of the employees to have these differentials restored? Way Freight service involves the handling of tons of package freight at way stations by the train crew, and to a great extent do the shunting of cars at local points, thus involving more onerous work than on through freights. Moreover, being paid on a mileage basis, it is perfectly clear they cannot make the same mileage in the same time, and a 10 per cent differential above the through freight service has been for many years the recognized differential.

With reference to the higher basing rate west of Lake Louise and from Kootenay Landing west through the Kootenays, what, if any, is the merit in the case demanding this differential? It was shown by the employees, and cannot be disputed, that the mountainous country necessitates a slower movement of trains, and there is greater danger from rock-slides and snow-slides, etc. Therefore it is reasonable to suppose there should be a higher rate than in Prairie territory.

The company contended that this higher basing rate had not heretofore been regarded as a differential, but regardless of what it may be called, whether a differential or a different fixed rate, to my mind does not alter its justification. In 1919 the company agreed to the higher rate west of Crow's Nest to Kootenay Landing. Moreover, this was due to the fact that it was a specified differential.

The territory west of Revelstoke for at least 250 miles is quite as mountainous on an average as it is from Crow's Nest to Kootenay Landing. Moreover, this higher basing rate has been recognized by both parties and mutually agreed to for twenty or thirty years. As to the existence of these differentials and the method of applying them, the guide to all concerned was Question and Answer No. 56 contained in Interpretation No. 1 to Supplement No. 16 of the McAdoo award, which reads as follows:

"Question 56. Schedules of certain railroads provide differentials for division or mountain or desert territory as compared with valley territory. Are such differentials preserved; if so, by what method, considering the provisions of Article XXI-(b)?"

DECISION. Such differentials are preserved. Former methods of establishing them are required to be continued. Where expressed in specific amounts of money, as compared with the valley rates, the same amount of money differential shall be continued."

I am at a loss to understand how any meaning can be logically taken from the words: "Such differentials are preserved. *Former methods of establishing them* are required to be continued" other than that the same differential should be preserved in the basing rate above referred to as well as the same proportionate differential for Way Freight and Mixed service, as existed at that time and on the same basis as they had previously been calculated.

It is also to be observed that the Canadian National Railways and its Conductors and Trainmen have since so interpreted and applied the above words. But there the higher rate applies from Edmonton through to the Coast, which included considerable Prairie territory, and a comparison of results shows that where the railways run parallel on each side of the Fraser River from Kamloops to Vancouver, the Canadian National Railway men are paid 16 cents per 100 miles more than those of the Canadian Pacific, and have less grades to contend with.

As for the binding effect of the agreement of 1919, if the view is to be adopted that either party having once agreed must be thereafter bound by that agreement regardless of Article 32 referred to above, it would mean that in the absence of mutual agreement to the contrary, wages and conditions were thereafter fixed for all time, unless some particular condition arose which must of itself compel a change. If such a principle is to be applied between employer and the employees, then neither party could ever for the sake of settling a dispute afford to compromise what it regarded as its rights; because if once

an agreement by compromise were reached they would be forever bound thereby. To my mind the spirit of the Industrial Disputes Act is conciliation, investigation and recommendation. But to impose anything which in effect is bound to destroy all efforts to conciliate, and in fact invite a disregard for agreements and to discourage compromise rather than encourage it, is to my mind erroneous in every respect.

Dealing next with the fourth point, namely, Yardmen's rates, one would have thought that if any agreement ought to be considered as having force at this time it would be an agreement which was mutual to both parties at the time of its adoption. The differentials in yard service in favour of the territory west of Lethbridge, Calgary and Edmonton, and also in favour of night work over day work, were arrived at in that way. The recent award in the United States fixes a flat rate for all territory, and for day and night service. These differentials, we are now told, should be set aside. But it was shown that the failure to observe them in the recent United States Wage Award in American territory is now the source of protest and dissatisfaction. Why then should we follow that course and disregard former mutual agreements?

To my mind there is another reason why there should be differentials in Yard service, namely, the severe climatic conditions in this country and in the territory west of Lethbridge, Calgary and Edmonton as compared with territory east thereof. The night work is also more onerous than day work.

I therefore recommend that the present Yard foremen's rates be increased by \$1.62 per day and the Yardmen's rates be increased by \$1.48 per day, and the rate for Switch Tenders be increased by \$1.04 per day as from May 1st, 1920.

All of which is respectfully submitted.

(Sgd.) D. CAMPBELL,  
Representative for the Employees.

**CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1****Report of Proceedings from August 7, 1918, to August 31, 1920**

**T**HE Department of Labour has received from Canadian Railway Board of Adjustment No. 1 a concise and valuable statement of the operations of the Board for the first two years of its existence, extending from August 7, 1918, to August 31, 1920, together with a summary of the disposition of all cases submitted for decision and the dates at which, in the different cases, the documents were received, the hearing secured, and the decision rendered. The report appears over the signatures of Mr. S. N. Berry, Vice-President of the Order of Railway Conductors, and Mr. George Hodge, Assistant to Vice-President, Eastern Lines, Canadian Pacific Railway Company, being Chairman and Vice-Chairman respectively of the Board.

The report is a record of successful accomplishment, with an expedition which, in the circumstances, seems quite remarkable. Many of the disputes are such as would, in the ordinary course of events, have fallen under the provisions of the Industrial Disputes Investigation Act, and their settlement would have entailed the establishment of numerous Boards of Conciliation and Investigation. In all eighty-seven cases were dealt with, covering twenty-four different employers and thirteen different trades union organizations. Under the terms of the agreement between the railways and the trades organizations, the decisions were binding, and all the disputes referred for adjustment were accordingly settled. The Board was established for the period of the war and thereafter until formally terminated under conditions prescribed. The armistice came three months after the agreement was made but, fortunately, the Board has, so far, continued to function and to perform its valuable work.

The report of the Board is reproduced in full below.

Montreal, Que., October 12, 1920.

Two years having elapsed since the creation of Canadian Railway Board of Adjustment No. 1, it is deemed advisable to issue in condensed form an outline of the circumstances leading up to the formation of the Board and of its work during the two-year period.

On July 26th, 1918, in response to a request made by the Dominion Government through the then Acting Minister of Labor, Hon. Senator G. D. Robertson, officials, representative of the various Railways in Canada, and Vice-Presidents and General Chairmen from practically all lines in Canada for:

The Brotherhood of Locomotive Engineers,

The Brotherhood of Locomotive Firemen and Enginemen,

The Order of Railway Conductors,

The Brotherhood of Railroad Trainmen,

The Order of Railroad Telegraphers,

The International Brotherhood of Maintenance of Way Employees

met at the Windsor Hotel, Montreal.

Senator G. D. Robertson, acting as Chairman, explained that the purpose for the call of the meeting was to arrive at an understanding as to the methods to be adopted for the application of the provisions of General Order No. 27 of the Director General of the United States Railroad Administration, to the Railways of Canada, and to also consider and, if possible, arrange for some agreement whereby all differences arising between the Railways and the Employees concerned could be disposed of in a mutually satisfactory manner.

General questions relative to the application of the provisions of General Order No. 27, and other matters of

mutual concern to the Railway Companies, their Employees and the Canadian people, were discussed at the meeting of July 26th, the general consensus of opinion, both from the viewpoint of those in charge of the Railways and those representing the Employees, being that some tribunal could and should be created to which all differences not otherwise disposed of between the Railways and their Employees could be referred for decision.

On July 27th, 1918, a Joint Committee, representing the Railways and the Employees' Organizations, met and prepared a tentative draft of a Memorandum of Agreement for the above purpose, such draft being in line with the terms of General Order No. 13 of the United States Railroad Administration, under which Railway Board of Adjustment No. 1 at Washington had been instituted some months previously, the only difference in the draft as proposed being that the language was made applicable as a mutual agreement between the Canadian Railway War Board and the Chief Executives of the six Organizations, parties to the proposed agreement.

After the preparation of the Memorandum of Agreement, and its submission to and adoption by the representatives of the employees in conference, a few days' adjournment was taken in order that the Railway War Board might submit the tentative draft of the proposed Memorandum of Agreement to its member Roads for consideration and endorsement, if approved, and so that the approval of the Chief Executives of the Organizations might also be secured.

On August 7th, 1918, a further meeting was held between the Administrative Committee of the Canadian Railway War Board and the Vice-Presidents, or other representatives, of the Organizations specified, and on the same date the following Memorandum of Agreement was adopted and signed by the Canadian Railway War Board and by the Chief Executives of the Organizations, parties to the Agreement.

The Memorandum of Agreement as signed on August 7th, 1918, reads as follows:

MEMORANDUM OF AGREEMENT made between the Canadian Railway War Board, acting for the Railways of Canada, members thereof, of the one Part; and the Brotherhood of Locomotive Engineers, the Brotherhood of Locomotive Firemen and Enginemen, the Order of Railway Conductors, the Brotherhood of Railroad Trainmen, the Order of Railroad Telegraphers, and the International Brotherhood of Maintenance of Way Employees, acting for the said classes of employees on the said railways; of the other Part.

WHEREAS the parties hereto in united desire to avoid disputes or misunderstandings which would tend to lessen the efficiency of transportation service in Canada during the War have resolved upon the appointment of a Board composed of members to be selected as hereinafter prescribed, which shall have full power and authority to determine all differences which may arise between any of the said railways and any of the classes of its employees above mentioned and which shall not be promptly adjusted between the officers and employees of the railway concerned; including the interpretation or application of wage schedules or agreements, and the application to the Railways of Canada of General Order No. 27 of the Director General of the United States Railroad Administration; with authority to make such amendments or additions in line with such amendments or additions as may be made thereto for the railroads in the United States as may be necessary, having due regard to the rights of the several classes of employees and of the railways respectively.

Now therefore it is agreed by and between the parties as follows:

1. There shall be at once created a Board to be known as Canadian Railway Board of Adjustment No. 1, to consist

of twelve members, six to be selected by the Canadian Railway War Board, and compensated by the Railways, and six by the Executive Officers of the Organizations of Employees hereinbefore named, and compensated by such Organizations.

2. The Canadian Railway Board of Adjustment No. 1 shall meet in the City of Montreal within fifteen days after the selection of its members and select a Chairman and a Vice-Chairman, who shall be members of the Board. The Chairman or Vice-Chairman will preside at meetings of the Board, and both will be required to vote upon the adoption of all decisions by the Board.

3. The Board shall meet regularly, at stated times each month, and continue in session until all matters before it are considered.

4. Unless otherwise mutually agreed, all meetings of the Board shall be held in the City of Montreal; provided, that the Board shall have authority to empower two or more of its members to conduct hearings and pass upon controversies when properly submitted at any place designated by the Board; provided, further, that such division of the Board will not be authorized to make final decision. All decisions shall be made, approved or ratified by the Board as herein provided.

5. Should a vacancy occur in the Board for any cause such vacancy shall be immediately filled by the same appointive authority which made the original selection.

6. The Canadian Railway Board of Adjustment No. 1 shall render decisions on all matters of controversy arising from interpretations of wage agreements and other matters in dispute as provided in the preamble hereof, and when properly submitted to the Board.

7. Wages and hours established by General Order No. 27 of the Director General of the United States Railroad Administration and amendments thereto shall be incorporated into existing agreements on the several railways, and should differences arise between the

management and the employees on any of the railways as to such incorporation, such questions of differences shall be decided by the Canadian Railway Board of Adjustment No. 1 when properly presented thereto.

8. Personal grievances or controversies arising under interpretation of wage agreements, and all other disputes arising or now properly pending between officials of a railway and its employees covered by this understanding will be handled in their usual manner by general committees of the employees up to and including the chief operating officer of the railway (or some one officially designated by him) when if an agreement is not reached, the Chairman of the General Committee of employees may refer the matter to the Executive Officer of the Organization concerned, and if the contention of the employees' committee is approved by such executive officer, then the chief operating officer of the Railway and the executive officer of the Organization concerned shall refer the matter, with all supporting papers, to Canadian Railway Board of Adjustment No. 1, which Board shall promptly hear and decide the case, giving due notice to the chief operating officer of the Railway interested and to the executive officer of the Organization concerned of the time set for hearing.

9. No matter will be considered by the Canadian Railway Board of Adjustment No. 1 unless officially referred to it in the manner herein prescribed, provided, however, that no case having origin in circumstances occurring prior to the date hereof shall be referred to the Board except those arising out of the application of the said General Order No. 27, or arising out of disputes properly pending at the date of this agreement as mentioned in Clause Eight.

10. In hearings before the Canadian Railway Board of Adjustment No. 1 in matters properly submitted for its consideration, the railway shall be represented by such person or persons as may be designated by the chief operating officer, and the employees shall be re-

presented by such person or persons as may be designated by the executive officers of the Organizations concerned.

11. All clerical and office expenses will be borne equally by the Canadian Railway War Board and the Organizations above mentioned. The Railway directly concerned and the Organization involved in a hearing will, respectively, assume any expense incurred in presenting a case.

12. In each case an effort should be made to present a joint concrete statement of the facts as to any controversies, but the Board is fully authorized to require information in addition to the concrete statement of facts, and may call upon the chief operating officer of the Railway or the executive officer of the Organization concerned for additional evidence, either oral or written.

13. All decisions of Canadian Railway Board of Adjustment No. 1 shall be approved by a majority vote of all members of the Board.

14. After a matter has been considered by the Board, and in the event a majority vote cannot be obtained, then any six members of the Board may elect to refer the matter upon which no decision has been reached to a referee to be unanimously agreed upon by the Board, and in failure to agree, application shall be made to the Governor-General-in-Council for appointment of a referee whose decision shall be final.

15. The Canadian Railway Board of Adjustment No. 1 shall keep a complete and accurate record of all matters submitted for its consideration and of all decisions made by the Board.

16. A report of all cases decided, including the decisions, will be filed with the Canadian Railway War Board, and with the chief operating officer of the Railway affected and with the executive officer of the Organization concerned.

17. The Canadian Railway War Board further agrees that the Canadian Railway Board of Adjustment No 1 shall have like authority to determine differences between any of the railways represented herein and any other classes

of employees of such railways who may request and consent to submitting differences to the Canadian Railway Board of Adjustment No. 1, and to agree that the decision of the said Board of Adjustment shall be final. .

18. This agreement shall remain in full force and effect during the period of the present war, and thereafter, unless the Canadian Railway War Board, on the one hand, as representing the Railways, or a majority of the executive officers of the Organizations, on the other hand, as representing the employees, shall desire to terminate the same, which can, in these circumstances, be done on thirty days' formal notice.

Signed on behalf of the above named parties this Seventh day of August, A.D. 1918.

THE CANADIAN RAILWAY WAR BOARD,

By U. E. GILLEN, Chairman,  
(by S. R. Payne.)

W. M. NEAL,  
Gen'l. Sec'y.

THE BROTHERHOOD OF LOCOMOTIVE ENGINEERS,

W. S. STONE, Grand Chief Engineer.  
By ASH KENNEDY, Assistant Grand  
Chief Engineer.

THE BROTHERHOOD OF LOCOMOTIVE FIREMEN AND ENGINEMEN,

TIMOTHY SHEA, Acting President.  
By GEO. K. WARK, Vice-President,

THE ORDER OF RAILWAY CONDUCTORS,

A. B. GARRETSON, President,  
By S. N. BERRY, Vice-President,

THE BROTHERHOOD OF RAILROAD TRAINMEN,

W. G. LEE, President,  
By JAMES MURDOCK, Vice-President,

THE ORDER OF RAILROAD TELEGRAPHERS,

J. M. MEIN, Deputy President,

**THE INTERNATIONAL BROTHERHOOD OF  
MAINTENANCE OF WAY EMPLOYEES.**

A. E. BARKER, President,  
By W. V. TURNBULL, Vice-President.

Pursuant to the terms of the Agreement the following named members were appointed to the Board:

Mr. S. N. Berry, Vice-President, Order of Railway Conductors.

Mr. F. P. Brady, General Manager Eastern Lines, Canadian National Railways,

Mr. Wm. Dorey, General Chairman, International Brotherhood Maintenance of Way Employees,

Mr. U. E. Gillen, Vice-President, Grand Trunk Railway System,

Mr. Geo. Hodge, Assistant to Vice President, Eastern Lines, Canadian Pacific Railway,

Mr. A. J. Hills, Assistant to President, Canadian National Railways,

Mr. S. J. Hungerford, Assistant Vice President, Canadian National Railways,

Mr. Ash Kennedy, Assistant Grand Chief Engineer, Brotherhood of Locomotive Engineers,

Mr. A. D. MacTier, Vice-President Eastern Lines, Canadian Pacific Railway,

Mr. J. M. Mein, Deputy President, Order of Railroad Telegraphers,

Mr. Jas. Murdock, Vice-President, Brotherhood of Railroad Trainmen.

Mr. G. K. Wark, Vice-President, Brotherhood of Locomotive Firemen and Enginemen

Messrs. Gillen and Hungerford have since resigned from the Board and have been replaced by Mr. G. C. Jones, Assistant to President, Grand Trunk Railway, and Mr. W. H. Sample, Superintendent Motive Power and Car Department, Grand Trunk Railway.

During the two years ending August 31st, 1920, the Board has been in session 86 days to deal with the cases submitted to it.

It is apparent that misunderstanding still exists in the minds of some regarding the position of this Board, as independent of the Railway Association of Canada (formerly the Canadian Railway War Board), although this matter was dealt with in a circular issued by the Board, dated October 17th, 1918, reading in part as follows:

"It seems desirable to point out at this time that the body known as Canadian Railway Board of Adjustment No. 1 should not in any way be confused with the Canadian Railway War Board.

"The Canadian Railway War Board is an association of the Canadian Railways through which joint action is taken in connection with important transportation matters affecting the operation of Canadian Railways. It is composed of Railway Officers who represent and act for practically all lines in Canada.

"Canadian Railway Board of Adjustment No. 1 is a body of twelve, composed of six Railway Officers and six Representatives of the following Railway Brotherhoods, viz.:

Brotherhood of Locomotive Engineers,  
Brotherhood of Locomotive Firemen and Enginemen,  
Order of Railway Conductors,  
Brotherhood of Railroad Trainmen,  
Order of Railroad Telegraphers,  
International Brotherhood of Maintenance of Way Employees.

"As the War Board takes joint action for all railways, the representatives of the Railways on Board of Adjustment No. 1 were selected by the War Board from the official staff of the Railways. The Board having been so constituted no actual connection

tion remained between the War Board and Canadian Railway Board of Adjustment No. 1. . . . The function of Board of Adjustment No. 1 is to settle all disputes that arise between the Railways and their employees who are members of the Brotherhoods named."

The accompanying condensed statement of the cases which have come before the Board for consideration, and of the decisions rendered in regard to them, as well as the financial statement covering the period the Board has been in existence, are issued as a matter of record and for the information of all interested or concerned.

Copies of decisions in individual cases, giving in detail the facts and conditions involved, may be had on application to the Secretary of the Board, Mr. R. Chaple, 263 St. James Street, Montreal.

(Sgd.) S. N. BERRY,  
Chairman.

(Sgd.) GEO. HODGE,  
Vice-Chairman.

## CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1

## SUMMARY OF CASES SUBMITTED FOR DECISION

FROM

AUGUST 7, 1918, TO AUGUST 31, 1920.

Case No.	DATE				Parties to dispute	Question	Synopsis of decision
	Application	Papers complete	Case heard	Decision rendered			
1	Aug. 27-18	Sept. 6-18	Sept. 10-18	Sept. 11-18	B.R.T. T.H. & B. Rly.	Dismissal of brakeman for accident involving rear end collision. Claim for reinstatement and pay for time lost.	The rules were followed as far as possible under circumstances. Brakeman reinstated and paid for time lost.
2	Sept. 4-18	Sept. 10-18	Sept. 11, 12 and 13-18	Sept. 13-18	Com. Tel. Un. of A. Can. Pac. Rly. Tel	Amendments to schedule. Working hours. Overtime rates. Inclusion of Telegraph Chiefs in Schedule. Interpretation and application of McAdoo Award.	Status of a telegrapher defined. Conditions under which Morse operators operate automatic devices stated. Rate for Morkrum employees revised. Article governing minimum performance amended. Working hours defined. Overtime rate basis established. With certain exceptions "Chiefs" included in schedule. Basis for readjustment of rates. Duration of agreement and application of overtime rates and rules specified.
Sup 1 to 2	Oct. 1-18	Oct. 7-18	Oct. 8-18	Oct. 8-18	Com. Tel. Un. of A. Can. Pac. Rly. Tel	Interpretation of Clause 4, Decision 2. Inclusion of Telegraph Chiefs in Schedule.	Chiefs, with the exception of those empowered to hire and discharge men, to be included in schedule.
3	Sept. 24-18	Oct. 4-18	Oct. 8 & 9-18	Oct. 10-18	O.R.C. B.R.T. T.H. & B. Rly.	1. What rates shall apply to passenger conductors and trainmen on Hamilton, Waterford and Dunville Branch Service?	The rates paid having since December, 1915, by mutual agreement been brought to a standard basis and applied to all passenger service: 1. The base rates to which the increases established by General Order No. 27 are to be applied for the service in question shall be the standard rates for all other assigned passenger service as existing in Dec., 1915, as it would be inadvisable to re-create inequalities in this service that had been removed by mutual agreement

SUMMARY OF CASES SUBMITTED FOR DECISION.—*Continued.*

Case No.	DATE				Parties to dispute	Question	Synopsis of decision
	Applica- tion	Papers complete	Case heard	Decision rendered			
						<p>2. What rates shall apply to men employed in yard service?</p> <p>3. What rate shall apply to brakemen in local passenger service between Hamilton &amp; Waterford?</p> <p>4. What date shall the new rates of pay become effective?</p>	<p>2. That inasmuch as the Company and the Committee of Employees jointly agreed to an increased yard rate as of July 1st, 1916, (that was in effect the generally recognized standard yard rate for first class yards) it would be inadvisable to re-create inequalities in yard rates that had been eliminated by mutual agreement, and that the yard rates claimed by the men should be applied.</p> <p>3. That as there is no generally recognized increased flagman's rate on the T. H. &amp; B. Rly. or other Canadian lines, the position of the Company should be sustained. <i>Note:</i> Company contended that the passenger brakeman's rate should apply.</p> <p>4. Having regard to all the arguments offered on behalf of the Company and the men, as well as the conditions existing on Canadian Railways in corresponding territories, it is decided that the new rates shall become effective May 1st, 1918.</p>
4	Sept. 13-18	Oct. 4-18	Oct. 9 & 10-18	Oct. 10-18	B.L.E. B.L.F. & E. Can. Pas. Rly. W.L.	Basic rates on which increases accruing from General Order No. 27 (McAdoo Award) should be applied.	New rates having been established effective as the result of an arbitration decision (affecting Western Territory) rendered late in 1915 and incorporated into the Engineers' and Firemen's Schedules Feb. 1st., 1916, the increases to be applied under General Order No. 27 shall be based on such rates. The increases under General Order No. 27 shall become effective as from July 1st, 1918.

## SUMMARY OF CASES SUBMITTED FOR DECISION.—Continued.

Case No.	DATE				Parties to dispute	Question	Synopsis of decision
	Applica- tion	Papers complete	Case heard	Decision rendered			
5	Oct. 4-18	Oct. 7-18	Oct. 11-18	Oct. 15-18	I.B.M. of W.E. Can. Pac. Rly., W.L.	Overtime for certain classes of Maintenan- ce of Way Employees.	Contention of em- ployees upheld and conditions named un- der which overtime is to be paid.
6	Oct. 7-18	Oct. 7-18	Oct. 15-18	Oct. 15-18	I.B.M. of W.E. Can. Pac. Rly., W.L.	Claim for lost time by Section Foreman be- tween dates of dis- charge and rein- statement.	Section Foreman re- imbursed for time lost
7	Oct. 5-18	Oct. 8-18	Oct. 14-18	Oct. 15-18	I.B.M. of W.E. Can. Pac. Rly., W.L.	Rates of pay and con- ditions governing Ori- ental Labor on British Columbia Division.	The Oriental Labour re- ferred to should be placed on the same basis under the pro- visions of the sche- dule as other Main- tenance of Way Em- ployees as of Sept. 1, 1918, the date upon which Supplement No. 8 to General Order No. 27 of the United States Railroad Ad- ministration became effective.
8	Oct. 7-18	Oct. 10-18	Oct. 15-18	Oct. 17-18	B. of L.F. & E. Can. Pac. Rly., W.L.	Claim for seniority rights with pay for time lost by Engineer who had been depriv- ed of main line rights on account of alleged defective hearing.	As evidence submitted to Board did not estab- lish that the En- gineer's hearing was below the standards established by the Board of Railroad Commissioners of Ca- nada, it was ruled that he be reinstated and paid for time lost.
9	Sept. 30-18	Oct. 12-18	Oct. 16-18	Oct. 16-18	B. of L.E. Can. Nor. Rly.	Claim that increases should apply to exist- ing schedule, effective Nov. 1st, 1917. Date and basis for cal- culating certain wage increases set forth in General Order No. 27.	New rates having been established effective as the result of an arbitration decision (affecting Western Territory) rendered late in 1915 and in- corporated in En- ginemen's schedule, Canadian Northern Rly., Western Lines, July 1st, 1916, the increases to be applied under General Order No. 27 shall be based upon such rates. Increase under Gen- eral Order No. 27 shall become effective as from August 1st, 1918, on account of a decision reached by Canadian Railway Board of Adjustment No. 1 at its meeting

SUMMARY OF CASES SUBMITTED FOR DECISION.—*Continued.*

Case No.	DATE				Parties to dispute	Question	Synopsis of decision.
	Application	Papers complete	Case heard	Decision rendered			
							in Montreal on Aug. 9th, 1918, that the effective date of the application of the McAdoo Award shall not be later than Aug. 1st, 1918.
10	Oct. 28-18	Nov. 8-18	Nov. 12-18	Nov. 14-18	B.L.E., O.R.C., B.R.T. Que. Rly. L. & P. Co.	Application of McAdoo Award and application of increased rates under General Order No. 27 to the steam and electric service.	With the assistance of a Sub-Committee of the Board an agreement was reached by the parties concerned which was confirmed by the Board.
11	Sept. 19-18	Oct. 26-18	Nov. 12-18	Nov. 15-18	O.R.T., Can. Nor. Rly. W. L.	Application of Article 7, Telegraphers' Schedule. Payment for time occupied in transfer from one station to another.	A Telegrapher who loses no time from works during the month is entitled to full pay for the month even though he be transferred from one station to another.
Sup. 1 to 11	Dec. 4-19	Dec. 22-19	Jan. 21-20	Jan. 21-20	O.R.T. Can. Ntl. Rlys, W.L.	Effective date of Decision No. 11 issued by Canadian Rly. Board of Adjustment No. 1 relative to the proper application of Schedule Article covering payment for time occupied in transfer.	The decision to apply from effective date of the schedule referred to, the Employees' contention being sustained.
12	Nov. 2-18	Nov. 9-18	Nov. 13, 14 15, 16, 19, & 20, 1918	Nov. 22-18	Com. Tel. Un. of A. G.N.W. Tel. Co.	1. Definition of Commercial Telegraphers. 2. Including certain offices in schedules. 3. Inclusion of Sub-Chiefs in Wage Schedule. 4. Inclusion of Gang Foremen in Linemen's Schedule. 5. Wages of District Linemen. 6. Date from which schedule shall be effective. 7. Employment of students.	1. Defined status of Commercial Telegraphers. 2. Specified those to be included in schedule and rates to be paid at various points. 3. Subject to status as per decision in question No. 1. 4. General Foremen not included in schedule. Gang and permanent foremen and cable spicers to be included in schedule and rates established. 5. Rate established in accordance with offer of the Company with a minimum of \$95 per month. 6. Effective date Sept. 1st, 1918. 7. Revision of rule as proposed by the Company denied.

Case No.	DATE				Parties to dispute	Question	Synopsis of decision
	Applica- tion	Papers complete	Case heard	Decision rendered			
Sup. 1 to 12	Dec. 2-18	Dec. 7-18	Dec. 10-18	Dec. 11-18	Com. Tel. Un. of A. G.N.W. Tel. Co.	Request for decision on certain additional questions other than those enumerated in Case No. 12, and an interpretation outlining the Board's intent on certain matters previously dealt with.	1. Positions at functional offices excluded from schedule. 2. Smaller offices. Salaried operators at all points devoting their time exclusively to the Company's work shall be included in the wage schedule. 3. Rates of operators at London and Hamilton established.
Sup. 2 to 12	Apr. 2-19	Apr. 9-19	Applica- tion with- drawn.	.....	Com. Tel. Un. of A. G.N.W. Tel. Co.	Linemen's Wages..	Mutual adjustment effected and application withdrawn.
13	Oct. 30-18	Nov. 19-18	Nov. 18, 19 & 20, 1918.	Nov. 22-18	Rly. Clks., F.H. & S.E. Can. Pac. Rly. W.L.	1. Claim that twenty-five employees held out of service at Calgary be reinstated.  2. Effective date increased rates of pay under the application of the so-called McAdoo Award.  3. Claim by the Organization that the Company's officers refuse to meet a Committee representing the Employees on Western Lines to discuss schedule.	1. In view of circumstances recited in the case the Board decided that the twenty-five employees be returned to the service of the Company at Calgary (without pay for time lost) not later than Dec. 15th, 1918, in positions not less remunerative than those positions previously held and to retain seniority rights. 2. Increases under McAdoo Award to Freight Shed Employees specifically named in agreement at points mentioned, effective from May 1st, 1918, pursuant to the order of the Canadian Railway War Board that the increases would be made effective from the date of expiry of agreements dating back not earlier than May 1st, 1918. 3. The Board ruled that conference should take place between the Company and representatives of employees.
Sup. 1 to 13	Dec. 23-18	Dec. 31-18	Jan. 15-19	Jan. 15-19	R'y. Clks., F.H. & S.E. Can. Pac. Rly. W. L.	Date of application of increased wage rates to men at Vancouver.	Retrospective application of the increased wage rates granted as of May 1st, 1918.

54	Nov. 26-19	Dec. 1-19	Dec. 9-19	Dec. 11-19	B.L.E. B.L.F. & E. T.H. & B. Rly.	Claim for run around by Engineer and Fireman.	Claim of the men sustained.
55	Nov. 5-19	Nov. 26-19	Dec. 9-19	Dec. 11-19	O.R.C. B.R.T. T.H. & B. Rly.	Application of Art. 4 (a), Supplement No. 16. Using regular passenger men in freight service to make up monthly passenger guarantee.	Contention of Employees sustained. Regularly assigned passenger men may not be used in freight service to make up monthly passenger guarantee.
56	Nov. 5-19	Dec. 5-19	Dec. 9 & 10, 1919.	Dec. 11-19	B.R.T. T.H. & B. Rly.	Consist of Yard Engine Crews.	The Board decided that it was not justified in ruling that all Yard Engine Crews must consist of not less than a Foreman and two helpers.

## SUMMARY OF CASES SUBMITTED FOR DECISION.—Continued.

Case No.	DATE				Parties to dispute	Question	Synopsis of decision
	Application	Papers complete	Case heard	Decision rendered			
Sup. 1 to 56	Jan. 26-20	Feb. 26-20	Apr. 16-20	Apr. 17-20	B.R.T. T.H. & B. Rly.	Consist of Yard Engine Crews.	The Board decided that it would make for greater safety in yard movements if certain yard engines had an additional helper placed thereon, and instructed the parties to further deal with the matter on that basis.
57	Nov. 5-19	Nov. 26-19	Dec. 10-19	Dec. 11-19	B.R.T. T.H. & B. Rly.	Train Baggage men handling mail on trains 70 and 71.	The Board cannot under existing conditions consistently go beyond the provisions of General Order No. 27 and Supplements thereto in the matter of compensation, nor is it within the jurisdiction of the Board to decide as to the appointment of Government mail clerks on trains.
58	Nov. 5-19	Nov. 26-19	Dec. 10-19	Dec. 11-19	B.R.T. T.H. & B. Rly.	Claim of Conductor for mileage on official motor car.	Conductor paid for service rendered.
59	Nov. 5-19	Nov. 26-19	Dec. 10-19	Dec. 12-19	O.R.C. B.R.T. T.H. & B. Rly.	Claim of Brakeman for run around in position of Station Switchman	In this case there was no run around within the intent of the Schedule. Claim denied.
60	Nov. 5-19	Nov. 26-19	Dec. 10-19	Dec. 12-19	B.R.T. T.H. & B. Rly.	Claim of Brakeman for run around in the position of Yard Foreman.	In this case there was a run-around within the intent of schedule. Claim sustained.
61	Nov. 5-19	Nov. 26-19	Dec. 11-19	Dec. 12-19	B.R.T. T.H. & B. Rly.	Claim of Brakeman for run around on road service.	In this case there was no run-around within the intent of schedule. Claim denied.
62	Dec. 4-19	Dec. 6-19	Dec. 11-19	Dec. 12-19	O.R.T. Can. Ntl. Rlys., E. L.	Seniority rights of Operator to certain position.	Operator having, pursuant to the terms of the Telegraphers' Schedule, applied for the position, and having been advised of his appointment thereto, the claim of the Employees is sustained.

## SUMMARY OF CASES SUBMITTED FOR DECISION.—Continued.

Case No.	DATE				Parties to dispute	Question	Synopsis of decision
	Applica- tion	Papers complete	Case heard	Decision rendered			
63	Jan. 6-20	Jan. 12-20	Jan. 20-20	Jan. 22-20	B.R.T. G.T.P. Rly.	Claim for reinstatement and payment for time lost by Brakeman who was dismissed.	Brakeman to be paid under schedule provisions for time lost between date of his discharge and date when he received discharge ticket. Also to be reinstated with original seniority standing. He to indicate within thirty days from receipt of decision if he desires to return to service.
64	Jan. 12-20	Jan. 21-20	Jan. 23-20	Jan. 23-20	O.R.C. B.R.T. Can. Ntl. Rlys., W. L.	Claim for difference between mileage actually made and minimum period guarantee.	Contention of Employees sustained.
65	Jan. 5-20	Jan. 13-20	Jan. 21, & 22-20.	Jan. 23-20	B.R.T. G.T. Rly.	Reinstatement of Conductor dismissed for improper protection of train.	The Board was unable to reconcile the material discrepancies between certain statements made at various times in connection with this case as reduced to writing. The written evidence presented to the Board in this case which was printed with the decision was so contradictory that the Board did not have any hesitation in deciding that the Conductor implicated in this case did not protect his train or see that it was protected, and the claim for reinstatement with pay for time lost was therefore denied.
66	Dec. 6 & 11-19.	Jan. 5-20	Jan. 22 & 23-20.	Jan. 23-20	Bro. Rly. Clks, F.H. & S.E. Can. Pac. Rly., W. L.	Schedule negotiations respecting certain classes of employees.	The right of employees to organize is unquestioned. On proper showing by the Organization of its right to represent the classes of Employees spoken for, arrangements should at once be completed between the Company and the Committee representing the Employees to negotiate a Schedule. Certain specified positions to be excepted from schedule.

## SUMMARY OF CASES SUBMITTED FOR DECISION.—Continued.

Case No.	DATE				Parties to dispute	Question	Synopsis of decision
	Applica- tion	Papers complete	Case heard	Decision rendered			
Sup. 1 to 66	Feb. 28-20	Apr. 5-20	Apr. 14-20	Apr. 16-20	Bro. Rly. Clks., F. H. & S.E. Can. Pac. Rly., W. L.	Interpretation of Deci- sion in Case No. 66 as to Foremen.	The Board affirmed their former decision that Foremen and other employees act- ing in a supervisory capacity with author- ity to administer dis- cipline, also the Chief Clerks, Accountants, Chiefs and Head Timekeepers and per- sonal secretaries of Superintendents, Mas- ter Mechanics and other officials of equal rank should not be included in schedule.
Sup. to 266	Mch. 5-20	Apr. 7-20	Apr. 14-20	Apr. 16-20	Bro. Rly. Clks. F. H. and S. E. Can. Pac. Rly., W. L.	Rates for overtime and increased rates for certain classes of em- ployees.	Overtime in excess of eight hours per day paid for at time and one half. Payment for Dominion and Statutory Holi- days established. Rates obtained by the Application of Sup- plement No. 7 to General Order No. 27 confirmed.
67	Jan. 20-20	Feb. 2-20	Mch. 9-20	Mch. 9-20	O.R.T. Can. Ntl. Rlys., E. L.	Seniority rights of Oper- ator to certain posi- tion.	Claim of Employees sustained.
68	Jan. 30-20	Mch. -20	Mch. 9-20	Mch. 12-20	M. of W. E. G.T.P. Rly.	Dismissal of Section Foreman on account of irregularities.	That further invest- igation be held so that charge of irre- gularities be more definitely set out if it was further desired to submit matter.
69	Jan. 24-20	Feb. 26-20	Mch. 10-20	Mch. 11-20	O.R.C. B.R.T. Can. Pac. Rly., W. L.	Application of Article 3, Clause F, Western Lines Trainmen's Schedule. Unassigned crews used in work service.	Claim of employees sustained.
70	Feb. 26-20	Mch. 3-20	Mch. 10 & 11-20.	Mch. 12-20	B.R.T. Can. Pac. Rly., W. L.	Dismissal of Conductor for improper handling of train after derail- ment.	Conductor concerned to be returned to service as Brakeman until such time as he demonstrates to sa- tisfaction of the Com- pany his qualifi- cations for promotion.

SUMMARY OF CASES SUBMITTED FOR DECISION.—Continued.

Case No.	DATE				Parties to dispute	Question	Synopsis of decision
	Applica- tion	Papers complete	Case heard	Decision rendered			
71	Feb. 16-20	Mch. 3-20	Mch. 10 & 11-20.	Mch. 12-20	O.R.C. Can. Pac. Rly., W. L.	Dismissal of Conductor for hauling car containing shipment of liquor as an empty, setting out car at a station, reporting and putting in ticket for brakeman not on train.	Inasmuch as the evidence does not show that Conductor participated directly in the stealing of the liquor, or that he had personal knowledge of it until after the occurrence, the Board decided to recommend to the Company favorable consideration of the Conductor's reinstatement, without pay for time lost, believing that he should be given the benefit of the doubt to this extent, and that his suspension from the service for somewhat over a year may be considered sufficient discipline for his failure to fulfil his duty as a Conductor on the occasion and in connection with the circumstances in question.
72	Feb. 27-20	Mch. 2-20	Mch. 11-20	Mch. 12-20	B.L.F. & E. Can. Ntl. Rlys.	Request that period of duty after which trains may be held up between terminals for trainmen to obtain rest be reduced from fifteen to twelve hours.	Claim of Employees sustained.
73	Feb. 28-20	Feb. 23-20	Mch. 11-20	Mch. 12-20	B.L.F. & E. Can. Ntl. Rlys.	Request of Employees that away-from home terminal pay exemption period be reduced from twenty to sixteen hours.	Referred back to parties for further conference in view of provisions of Supplement No. 24 to General Order No. 27 issued subsequent to reference to the Board.
74	Feb. 27-20	Mch. 6-20	Mch. 11 20	Mch. 12-20	B.R.T. Can. Ntl. Rlys., E. L.	Dismissal of Conductor for making false statements at investigation into cause of derailment.	Dismissal sustained.
75	Mch. 2-20	Apr. 5-20	Apr. 13-20	Apr. 17-20	O.R.C. B.R.T. Can. Ntl. Rlys., E. L.	Having regard to previous schedule conditions are Yardmasters entitled to punitive rates for overtime under Supplement No. 16 to General Order No. 27 ?	Yardmasters shall be paid on the same basis as to hours of service, overtime basis and relative rates with Yard Foremen.

77	Feb. 3-20	Apr. 15-20	May 11-20	May 11-20	O.R.C. B.R.T. T.H. & B. Rly.	Claim of Passenger Conductor and crew for yard rates for transfer of special pas- senger train from one point to another with- in a terminal.	Claim of men not jus- tified and denied.
78	Feb. 2-20	April 15-20	May 11-20	May 11-20	O.R.C. B.R.T. T.H. & B. Rly.	Claim of Conductor & Crew for run-around.	Claim of Employees sustained.
79	May 7-20	May 11-20	May 11-20	May 11-20	B.L.E. B.L.F. & E. Can. Pac. Rly., W.L.	Discipline placed on re- cord of Engineer for failure to detect pin working out of cross equalizer of engine.	Engineers may pro- perly be held respon- sible for inspection of such parts of engine as can be seen by inspection made by going around engines.
80	June 12-20	June 14-20	June 22-20	June 22-20	O.R.T. Can. Pac. Rly., W.L.	Overtime work per- formed by Assistant Agent on Sundays at certain points.	Agent to be allowed to perform service when required. Claim for back time not sus- tained.
81	June 16-20	June 21-20	June 22-20	June 23-20	O.R.C. B.R.T. Can. Ntl. Rlys., W.L.	Interpretation of Sched- ule rules. Claim for time consumed in switching operations at junction points.	Claim of Employees sustained.
82	June 16-20	June 21-20	June 22-20	June 23-20	O.R.C. B.R.T. Can. Ntl. Rlys., W.L.	Interpretation of Sched- ule. Claim of Pas- senger Conductor and Crew for Way Freight rates for passenger train on which stores, etc., carried in bag- gage car.	Claim of Employees not reasonably justi- fied therefore denied.
83	June 16-20	June 21-20	June 22-20	June 23-20	O.R.C. B.R.T. Can. Ntl. Rlys., W.L.	Claim of Conductor & Crew, under schedule conditions for junction switching time at Fort Frances.	Fort Frances to be re- garded as a junction point for Canadian National Railways, and claim sustained.
84	June 16-20	June 21-20	June 22-20	June 23-20	O.R.C. B.R.T. Can. Ntl. Rlys., W.L.	Claim of Conductors and Crews for contin- uous overtime while employed in wreck- ing service and Inter- pretation of sched- ule Rules.	Referred back to par- ties with suggestion that they get together and dispose of ques- tions on basis of equity, coupled with opinion that no in- justice was forced on Conductor and crew when required to take fourteen hours rest in a spread of sixty- seven hours.

SUMMARY OF CASES SUBMITTED FOR DECISION.—Concluded.

Case No.	DATE				Parties to dispute	Question	Synopsis of decision
	Application	Papers complete	Case heard	Decision rendered			
85	July 21-20	Aug. 2 20	Aug. 17-20	Aug. 17-20	O.R.C. B.R.T. T.H. & B. Rly.	Claim that regularly assigned pool passenger crew between Hamilton and Buffalo should not be used to dead - head Hamilton to Buffalo, to run passenger special Buffalo to Hamilton, and if so used should be paid through freight rates for the service in addition to the monthly guarantee in passenger service.	That the Company was within its rights in tying up a crew, but in discontinuing pay adequate compensation was not allowed.  The language of the schedule as revised gave the Company the right to use the crew in question in the service referred to and to compute the compensation therefor in the monthly guarantee.
86	July 31-20	Aug. 11-20	Aug. 17-20	Aug. 18-20	O.R.T. Can. Ntl. Rlys., E.L.	Claim of Agent and Clerk and Operator for overtime.	Working overtime without authority is not justified. Overtime should be paid from June 19th, 1919, until December 18th, 1919, on the basis of five hours per working day divided equally between the Agent and Operator.
87	June 14-20	Aug. 16-20	Aug. 17-20	Aug. 18-20	O.R.T. Can. Pac. Rly., W.L.	Claim of Operators with reference to working split trick at certain point.	Fifty per cent of calls claimed should be paid for. The working of split trick as previously in effect at point referred to is not properly permissible with in the intent of the schedule governing the service of Telegraphers.

## COST OF LIVING ADJUSTMENT OF WAGES OF VANCOUVER ISLAND COAL MINERS

THE Cost of Living Commission, appointed on January 21, 1919, to determine every three months the increase in the cost of living for coal miners on Vancouver Island, and to report the amount by which wage rates should therefore be increased or decreased, forwarded its report for the quarter ending September 30, 1920, to the Department on October 14, 1920. The Commission consisted of Mr. John McAllister, representing the miners; Mr. Tully Boyce, representing the operators; and Mr. D. T. Bulger, Fair Wages Officer of the Department of Labour, as chairman.

As in previous investigations, forms were sent out to the merchants and dealers with whom the majority of miners are accustomed to trade in the various towns. The forms contained the same list of groceries, provisions, meats, etc., that was used on previous occasions. The method of computation under review was the same as used on all previous adjustments, namely, to determine the percent-

age of increase or decrease, as the case may be, of prices on September 30 over June 30, for groceries, provisions, meats, etc., and to add a further two-fifths of this increase or decrease as an equivalent to cover similar increases or decreases in clothing. An increase of 1.88 per cent was ascertained, which amounted to an increase in wages of  $5\frac{3}{4}$  cents per day where the base rate was \$3 per day, and 6 cents per day where the base rate was \$3.15, the increase in wages to become effective from November 1, 1920, and to apply to all underground service, clerical and office employees.

Retail price lists returns were made by twelve general merchants and seven retail dealers in meat in the towns of Nanaimo, Ladysmith, Cumberland, Courtney, South Wellington, Union Bay, Bevan and Cassidy. Sugar and pork showed marked advances, while slight advances were found in all kinds of flour, lard, soaps, butter, milk, jams, syrups, and evaporated fruits. Beef, mutton, and veal showed a decline as did also all kinds of canned meats.

## STRIKES AND LOCKOUTS IN CANADA DURING OCTOBER, 1920

**E**IGHT strikes, involving 4,680 employees were reported as having commenced during October. There were in existence at some time or other during the month 20 strikes, involving about 5,147 workpeople. The total time loss on account of industrial disputes was estimated at 65,556 working days, as compared with 25,890 in September, and 131,187 in October, 1919. The time loss occasioned by the 8 strikes which began in October was 61,625 working days, while a loss of 3,931 is charged to the 12 strikes that commenced prior

to October. Termination was reported in the case of 5 disputes which commenced prior to October. Four of the disputes which commenced during October terminated during the month, leaving the following eleven strikes affecting 1,418 workpeople on record on October 30: asbestos miners, Thetford Mines; lathers, Hamilton; painters, Ottawa; plumbers, Montreal; engineers and moulders, Hamilton; machinists, St. John; moulders, Collingwood, Montreal and Toronto; and plumbers, steamfitters and sheet metal workers at Vancouver.

### Disputes by Industries

The following is a review of the disputes by industries in the order in which they appear in the statistical table. A brief summary is given of the more important strikes.

**MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.**—There was considerable strike activity in this group during the month, but with a termination of the strikes in District 18 of the United Mine Workers of America and the more favourable outlook in District 26, the strike situation in this industry, with the exception of the strike of asbestos miners, was much improved at the end of the month. Nearly 3,000 miners, chiefly of One Big Union affiliation, were on strike in District 18 for the abolition of the U.M.W. of A. check-off. According to information received, conditions were returning to normal, most of the mines resuming operations about the middle of the month. These strikes commenced on October 1. Six hundred asbestos miners at Thetford Mines struck on October 11, for increases, averaging 50 cents per day. The strike remained unterminated; only two mines were affected, the others being in regular operation. During the month, in this group, there were 3,856 employ-

ees involved with an estimated time loss of 44,517 working days.

**BUILDING AND CONSTRUCTION.**—Eighty-five roofers in Toronto were on a strike of one week's duration for increased wages, better working conditions and union recognition. The strike terminated on October 7, the employers agreeing to recognize the union and to meet a committee of employees to discuss wages and hours of work. The strike of carpenters in Saskatoon, which commenced on September 23, terminated within four days, the employers signing the contract for a nine-hour day. Twenty-five lathers in Hamilton were on strike for alleged non-payment of union rates. The largest strike in this group was that of 600 plumbers and steamfitters in Montreal. This strike, which commenced on October 4, was for a wage increase of 15 cents per hour over the prevailing mechanics' rate of 75 cents per hour. Practically all the large plumbing establishments in the city were involved and the strike was unterminated at the end of the month. Carpenters in Port Arthur were on a strike of two days' duration for increased wages and an eight-hour

STRIKES AND LOCKOUTS DURING OCTOBER, 1920

Industry or Occupation.	Particulars.	No. of employees affected.	Time loss in working days.
<b>Strikes commencing prior to October, 1920</b>			
<b>BUILDING AND CONSTRUCTION—</b>			
Carpenters, Saskatoon, Sask.....	Commenced September 23. For increased wages. Information received indicates this strike terminated September 28, when a compromise was effected.		
Lathers, Hamilton, Ont.....	Commenced September 11. Alleged non-payment of union rates. Terminated.	25	650
Tar and gravel roofers, Toronto, Ont.....	Commenced September 28. For increased wages, recognition of the union and improved working conditions. Settled by negotiations; compromise effected. Work resumed October 6.	85	425
<b>METALS, MACHINERY AND CONVEYANCES—</b>			
Engineers, Hamilton, Ont.....	Commenced May 1. For increased wages and better conditions. Terminated.	24	624
Machinists, St. John, N.B. ....	Commenced January 26. For increased wages and shorter hours. Terminated.	8	208
Machinists, Toronto, Ont.....	Commenced July 26. Against discharge of employees. Information received indicates strikers returned to work September 6, under conditions existing prior to strike.		
Moulders, Collingwood, Ont.....	Commenced June 2. For increased wages. Terminated.....	10	260
Moulders, Guelph, Ont.....	Commenced August 5. For increased wages. Settled by negotiations; compromise effected. Work resumed October 23.	4	80
Moulders, Hamilton, Ont.....	Commenced May 5, 1919. For increased wages and shorter hours. Terminated.	17	442
Moulders, Montreal, Que.....	Commenced May 5. For increased wages and shorter hours. Terminated.	8	208
Moulders, New Glasgow, N.S.....	Commenced August 2. For increased wages and shorter hours. Information received indicates work was resumed September 28, when a compromise was effected.		
Moulders, Preston, Ont.....	Commenced August 9. For increased wages. Information received indicates strikers have been replaced and factory working normal capacity about October 15.	2	24
Moulders, Toronto, Ont.....	Commenced May 1, 1919. For increased wages and shorter hours. Terminated.		

## STRIKES AND LOCKOUTS DURING OCTOBER, 1920—(Continued)

Industry or Occupation.	Particulars.	No. of employees affected.	Time loss in working days.
<b>METALS, MACHINERY AND CONVEYANCES—</b>			
<i>(Continued).</i>			
Rolling mill employees, Montreal, Que.....	Commenced July 15. For increased wages and better working conditions. Men returned to work under conditions existing prior to strike. Work resumed October 2.	250	500
<b>TEXTILES—</b>			
Textile workers, Stratford, Ont. ....	Commenced September 1. For increased wages and recognition of the union. Settled by mediation of Department of Labour; work resumed October 21.	34	510
<b>TRANSPORTATION—</b>			
Grain elevator employees, Montreal, Que. ...	Commenced July 23. For increased wages. Settled by negotiations; demands granted and information received in the Department indicates work was resumed the beginning of August.		
<b>MISCELLANEOUS—</b>			
Jewellery workers, Vancouver, B.C. ....	Commenced September 7. For increased wages. Information received in the Department indicates this strike was terminated September 7, when a compromise was effected.		
<b>Strikes commencing during October, 1920</b>			
<b>MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.—</b>			
Asbestos miners, Thetford Mines, Que.....	Commenced October 11. For increased wages. Unterminated.....	600	10,800
Coal miners, District 18, Alta., and Fernie & Michel, B.C.	Commenced October 1. For abolition of the U. M. W. of A. "check-off" and for a new agreement with the One Big Union. Men returned to work of their own accord; work resumed about October 19.	2,756	32,217
Coal miners, Sydney, N.S. ....	Commenced October 13. For increased wages and other improvements. Strikers decided to return to work under conditions existing prior to strike; work resumed October 16.	500	1,500
<b>BUILDING AND CONSTRUCTION—</b>			
Carpenters and hoisting engineer, Port Arthur, Ont.	Commenced October 12. For increased wages and 8-hour day. Settled by negotiations; compromise effected. Work resumed October 15.	21	42
Painters, Ottawa, Ont. ....	Commenced October 11. In sympathy with a strike of firm's employees in New York. Unterminated.	6	105
Plumbers, Montreal, Que. ....	Commenced October 4. For increased wages. Unterminated.....	600	13,200
<b>METALS, MACHINERY AND CONVEYANCES—</b>			
Plumbers, steamfitters and sheet metal workers, Vancouver, B.C..	Commenced October 4. For increased wages. Unterminated.....	120	2,760
Riveters, buckers and fitters, Hamilton, Ont.	Commenced October 13. For increased wages. Settled by replacement of strikers and work resumed October 28.	77	1,001

day. Six painters in Ottawa, employed in the parliament buildings were on strike in sympathy with the decorators working for the firm in New York.

**METALS, MACHINERY AND CONVEYANCES.**—Eleven strikes, involving 520 employees and an estimated time loss of 6,107 working days, was the summary for this group. One hundred and twenty plumbers, steamfitters and sheet metal workers in two shipbuilding yards in Vancouver struck on October 4, for an increased minimum wage. This strike was untermiated at the end of the month. Rivetters and fitters with one Hamilton firm struck for a large

increase in wages. Their demands were refused and the plant was partially closed for about two weeks. Untermiated strikes in this group were: moulders at Hamilton, Collingwood, Montreal and Toronto; machinists at St. John and engineers at Hamilton.

**TEXTILES.**—A dispute, which commenced on September 1, involving the textile employees of a Stratford firm, terminated on October 21. The trouble was chiefly over the principle of union recognition. The parties in dispute were brought together and a settlement effected through the mediation of a Fair Wage officer of the Department of Labour.

## STRIKES AND LOCKOUTS IN THE UNITED KINGDOM DURING SEPTEMBER, 1920

**T**HE following details with regard to strikes and lockouts in the United Kingdom during September, 1920, based on returns from employers and workpeople, are taken from the October issue of the British *Labour Gazette*.

### NUMBER, MAGNITUDE AND DURATION.

—The number of trade disputes, involving a stoppage of work, reported to the Department as beginning in September was 93, as compared with 139 in the previous month, and 90 in September, 1919. In these new disputes about 50,000 workpeople were directly involved, and 25,000 indirectly involved (i.e., thrown out of work at the establishments where the disputes occurred, though not themselves parties to the disputes). The figures include about 20,000 workpeople directly involved and 20,000 indirectly involved in a strike which arose out of arrangements entered into in connection with the restoration of pre-war conditions of staffing in the cotton industry at Oldham. In addition to the total of 75,000 work-

people directly and indirectly involved in those disputes which began in September, about 29,000 workpeople were involved, either directly or indirectly, in 119 disputes which began before September and were still in progress at the beginning of that month. The total number of disputes in progress in September was thus 212, involving about 104,000 workpeople, as compared with 86,000 workpeople involved in disputes in progress in August, 1920, and 655,000\* in September, 1919, when 500,000 railway workers and between 60,000 and 70,000 ironfounders, coremakers, dressers, etc., were on strike.

**CAUSES.**—Of the 93 new disputes, 56 directly involving over 11,000 workpeople, arose on demands for advances in wages; 10, directly involving nearly 22,000 workpeople on other wages questions; 2, directly involving about 1,000 workpeople, on questions respecting working hours; 18 directly involving

\*Revised figures.

nearly 7,000 workpeople, on questions respecting the employment of particular classes or persons; and 7, directly involving nearly 9,000 workpeople, on other questions, including a lockout of electrical workers at engineering establishments on the question of foremen being compelled to belong to a trade union.

**RESULTS.**—During the month settlements were effected in the case of 47 new disputes, directly involving over 35,000 workpeople, and 40 old disputes, directly involving nearly 7,000 workpeople. Of these new and old disputes, 25, directly involving over 5,000 workpeople, were settled in favour of the workpeople; 25, directly involving over 32,000 workpeople, were settled in favour of the employers, and 37, directly involving nearly 5,000 workpeople, were compromised. In the case of 25 other disputes, directly involving over 7,000 workpeople, work was resumed pending negotiations.

The following table classifies the disputes by groups of trades and indicates the number of workpeople involved (whether directly or indirectly) at the establishments concerned, and the approximate time lost by these workpeople during September:—

Groups of Trades	Number of Disputes			Number of workpeople involved in all disputes in September.	Aggregate loss of working days during September
	Started before September 1st.	Started in September.	Total		
Building.....	24	21	45	3,000	35,000
Mining and Quarrying.....	8	16	24	14,000	109,000
Metal, Engineering and Shipbuilding	25	16	41	17,000	233,000
Textile.....	8	5	13	46,000	530,000
Transport.....	3	5	8	2,000	24,000
Printing, Paper, etc.	4	.....	4	4,000	71,000
Woodworking and Furnishing.....	13	8	21	9,000	56,000
Other Trades.....	24	12	36	5,000	59,000
Employees of Public Authorities.....	10	10	20	4,000	18,000
Total Sept., 1920...	119	93	212	104,000	1,135,000
Total, August, 1920.	123	139	262	86,000	768,000
Total, Sept., 1919...	74	90	164	*655,000	*3,074,000

\*Revised figure.

Of the 1,135,000 working days lost in September by all disputes in progress, about 466,000 were lost by disputes which began before September and were still in progress at the beginning of that month, and about 669,000 by disputes which began in the month.

## THE BRITISH COAL STRIKE

**T**HE recent strike of coal miners in Great Britain arose out of the rejection by the Government of the recommendation of the Sankey Commission for nationalization of the coal mining industry. Since then, the miners have, apparently, concentrated their efforts on an attempt to secure from the Government an assurance that some scheme of nationalization would be effected.

The movement which terminated in the general strike, declared on October 18, commenced at Leamington on July 8, when a conference of the Miners' Federation formulated demands for an advance in wages of two shillings per day and a reduction of 14 shillings per ton in the price of domestic coal. These demands were made on the basis of the alleged estimated surplus profit realized

by the sale of export coal. On July 26, Sir Robert Horne, representing the Government, met the representatives of the Miners' Federation at the Board of Trade and informed them that the Government could not accede to their demands. The Government's refusal was based on its contention that the British consumer was getting coal cheaper than the consumer in other countries; that miners' wages had increased more than the cost of living since the war; and that the State had already taken 60 per cent in excess profits from the great industries. There was also their claim (dealt with elsewhere in this article) that coal production had fallen off with the reduction in working hours.

At a special conference of the Miners' Federation on August 12, it was decided to take a strike ballot on the demands refused by the Government. This ballot was to be taken on August 25 and 26, and definite returns on the same were to be made by August 30. The question appeared on the ballot as follows:

In view of the refusal of the Government to concede the claims of the Federation for a reduction in the price of domestic coal by 14s. 2d. a ton, and an advance of wages of 2s. per shift for members of 18 years of age and upwards 1s. per shift from 16 to 18 years, and 9d. per shift below 16, are you in favour of a strike action to secure these claims?

Meanwhile the Fuel Control Department warned the public to save coal. It was realized that an extended strike might result in industrial paralysis throughout Great Britain. The strike vote, announced on September 1, resulted in a strike majority of 367,917, or a percentage majority for strike of 71.75. Press statements indicated that the pit boys (of ages from 14 to 18) were an important factor in swinging the vote for a strike. In the Scottish coal districts, particularly, these young miners were reported to have cast a majority of the votes.

The other two branches of the Triple Alliance (the transport workers and the railway employees) expressed approval of the miners' claims as being "reasonable and just," but refrained from declaring sympathetic strikes. There was some expectation that an extension of the strike would impel the Government to dissolve Parliament.

Acting on the mandate given them by the strike ballot, the miners' delegates, at a conference in London, on September 3, decided to send out strike notices announcing the date of commencement as September 27. In the meantime, Government operators and miners placed their respective views before the public.

Several unsuccessful conferences occurred. The miners abandoned their demand for a reduction in the price of household coal. On September 23 the Prime Minister personally intervened in the situation and made what has become known as the "datum line" proposal—that any wage increase be contingent upon a corresponding increase in coal production, the proposal being calculated precisely in the terms of an equation as follows:

	If production is—
X tons,	wages are to
	be increased... 1s. per shift
X+Y	" " " 2s. "
X+Y+Z	" " " 3s. "

The difficulty in effecting a practical solution was the wide difference of opinion as to what amount of production should constitute "X" in the equation. The Government was willing to have the basic amount of production (X) determined by an independent tribunal such as the Industrial Court, but to this the miners' representatives refused, claiming that any such arbitration court was merely an instrument of the Government. Also, the Government maintained its position that wages and production are essentially related. Production per man, per year, after the reduction in the working day or shift from 8 to 7 hours, had fallen from 259 tons to 203 tons.

A truce of one week was declared by the miners' delegates, who immediately entered into negotiations with the owners as to the basic amount of production. These negotiations also ended in deadlock. The proposal of the owners was that an increase of one shilling per day be granted when production reached the rate of 240,000,000 tons per year; and two shillings per day increase when it reached 248,000,000 tons per year.

This proposal was submitted in the form of another strike ballot to all the local unions, the ballot to be taken on October 11 and 12. The result was another large majority (453,670) in favour of a strike.

The strike commenced on October 18 and over one million miners left the pits in response to the call for a nation-wide strike in the coal fields. A fresh crisis developed on October 21 when the railway workers served notice on the Government that they would also strike if negotiations were not resumed with the miners, an order which was, however,

rescinded one week later, owing to a division within the ranks of the railway workers, their leader, Mr. J. H. Thomas, M.P., heading the section opposed to a strike.

On October 28, after a series of conferences, the strike was provisionally settled by an agreement to increase the miners' wages by an immediate advance of two shillings per day, the permanency of the increase to be continued only if the volume of production be sustained. A national wage-board was to be established and its function would be to devise a schedule for varying wages with reference to profits.

This proposal, too, was submitted for sanction by a national ballot, requiring a two-thirds majority to continue the strike. The result of this last ballot was announced on November 3, as being 8,000 of a majority against acceptance. As this majority was far short of the necessary two-thirds, the strike was officially declared off and the miners were advised to resume operations by November 8.

## DISPUTE IN THE METALLURGICAL INDUSTRIES OF ITALY

**T**HE extensive dispute which recently took place in the metal industries of Italy had many unusual features and promises to bring material changes in the conduct of these industries. A document issued by the International Labour Office contains an interesting account of the dispute.

The first phase of the dispute began on June 18 when the Italian Confederation of Metallurgical Workers, the principal labour organization of the trade, presented a memorandum to the National Confederation of the Mechanical and Metallurgical Industry, containing certain demands for increased wages and better conditions of employment. Similar memorials were presented a little later by the three other metal workers' unions of Italy. Negotiations in connection with these demands began on July 15, after an arrangement had been made by which the representatives of the vari-

ous unions would discuss their memorials separately, but would unite to set forth conditions in the industry. When this was done the employers concluded by declaring that the industry could not bear the load of a new increase in wages, and that it was not in a position to make any concession. The Confederation of Metallurgical Workers replied that while the metal industries were not as flourishing as during the war, they were better than before the war. There was no lack of orders and some had an abundance of orders both for domestic and foreign trade. The foundries had never had so much work and the same conditions prevailed in many other branches. The employees had never required from the workers so many hours of overtime. Not a single enterprise had failed to declare dividends. If certain industries had some financial difficulties, they were due to artificial and transient reasons. The

reply concluded with a declaration that it would insist on the memorial already presented, but in order to render serious negotiations possible it was ready to prove the truth of its statements.

Meanwhile, the labour organizations ordered their members to refrain from working overtime and to reduce production to a minimum, by taking as long a time as possible in the repairing of machines, by each worker doing only the work expressly assigned to him, especially those engaged in oiling and cleaning, and seeing that machines are stopped when being oiled or cleaned as provided by regulations. If workers were dismissed, they were ordered to remain in the works and to return the following day with their comrades. Should a lock-out be declared the workers were ordered to return to the works all the same, even if the doors had to be broken, and to continue to work on their own account.

Toward the end of August the policy of obstruction became more acute and production diminished rapidly. The employers' organization declared that the tactics of obstruction were a violation of the rules and that the methods of the workers in applying them went even beyond the orders of the central committee of the Confederation of Workers in the Metal Trades. On August 28, the general secretary of the Workers' Confederation said they were still ready to discuss matters directly with the employers, provided they were inclined to make large concessions.

On August 30, the employers' society of Milan, anticipating the decision of the National Confederation of Mechanical and Metallurgical Industry, proclaimed a lockout in its establishments, as a protest against the acts of alleged sabotage. The workers refused to quit the shops, and shut themselves in with provisions, keeping the engineers and technical chiefs as hostages. On September 1, the National Confederation of Mechanical and Metallurgical Industry declared a lockout, stating that the policy of obstruction had degenerated into a state of complete anarchy, that production had almost entirely ceased, that acts of vio-

lence had taken place, and that under such serious conditions the employers had decided to close their establishments in order to avoid any proceeding that was not conciliatory.

On the declaration of the lockout the workers' organization replied by ordering the employees to enter the establishments and continue at work, recommending them to respect persons and things but to continue working. During the first five days of September the movement spread to Naples, Rome, Genoa, and many other places in Italy. The employers stipulated as a condition before resuming negotiations that the shops be evacuated and order restored. On September 9-13, the workers proceeded to occupy other mills than those of the metal industries, such as three rubber factories at Turin, a rubber factory, boot factories, chemical works and distilleries at Milan, and textile mills.

On September 10 and 11, a meeting of the National Council of the General Confederation of Labour was held at Milan, in which also participated the executive of the official Socialist Party, deputies representing the parliamentary socialist group, and representatives of various labour organizations, such as the Seamen's Federation, the Federation of Dockworkers, and the Federation of Postal Telegraph Service. The general secretary of the Confederation of Metallurgical Workers explained the different phases of the struggle and declared that the Confederation always wished to limit its action strictly to the field of trade unionism. Professor Gennari, secretary of the executive of the official Socialist Party, submitted a resolution in favour of the occupation of all industries by the workers in order to hasten the communistic revolution. Another resolution was submitted on behalf of the General Confederation of Labour demanding that the direction of the movement be entrusted to the Confederation itself, to the end that they might obtain the recognition by the employers of the principle of trade union control, which would lead later on to the socialization of industry. The resolution of the Confed-

eration was carried by a vote of 591,245 to 409,569 in favour of limiting the movement to the economic field, to the exclusion of political action.

During the period of obstruction and for the first two weeks of the occupation of the mills the government had remained neutral. Discussions had taken place at Rome between representatives of the employees and workers and the Minister of Labour, but without results. On September 15, Premier Giolotti summoned to a meeting at Turin representatives of the Strike Committee of the General Confederation of Labour and representatives of the General Confederation of Industry and others. As a result of this meeting the premier decided to appoint a commission by decree to draft a bill which the government would submit to the House. The commission would be composed of six members named by the General Confederation of Manufacturers and six named by the General Confederation of Labour. Under this proposed law industries would be organized on the basis of admitting the workers to a share in the technical, financial

and administrative control of the industries. The Commission would also be charged with the duty of making arrangements for the settlement of questions connected with the employment and discharge of workers. The Employers' Confederation announced that both parties were agreed upon the question of the control of the industry. Subsequent press despatches show that a final settlement was reached on September 20 through the intervention of Premier Giolotti who declared that the employers should abstain from punishing or dismissing their employees, that all workmen and members of the administrative staffs should retain their respective positions, any cases of incompatibility to be judged by a commission and two delegates from each side. These two parties had already agreed upon an increase in wages, retroactive to July 15, and a week's annual vacation with pay. By a vote of 127,904 to 44,531 the agreement was ratified by the metal workers and the factories were returned to their owners. It was reported that normal conditions were resumed during the first week of October.

## LEGISLATION RELATING TO THE REGULATION OF MINES IN CANADA

### A Comparison of the various Provincial Laws on the subject

#### Introduction

**T**HIS article is the fourth and last of the series examining and comparing the laws in force in the several provinces of Canada on the subjects covered by the Dominion-Provincial Commission on Uniformity of Labour Laws which met at Ottawa in April, 1920.

This Commission found that many minor provisions in the various Acts throughout Canada were made necessary by local conditions and that concerning these no real uniformity was possible. They therefore directed their

attention to those principles of a general character which are applicable to all provinces, and recommended that uniform standards be adopted as follows:—

(1) A minimum age of 14 years for boys working above ground, and 16 years for those below ground; (2) A minimum age of 18 years for those in charge of power machinery for moving material, and 21 years for those in charge of such machinery for moving persons; (3) The adoption of the 8-hour day; (4) The semi-monthly payment of wages and the prohibition of such payment in hotels and of the cashing of pay cheques on licensed premises; (5) Legislation pro-

viding for miners' liens; (6) No deduction to be made from wages except sums for powder, coal, oil, rent and such doctor's and hospital fees as may be approved by the Workmen's Compensation Board, and supplies necessary to the carrying on of work; the prohibition of deductions for payment of any debt due by the employee without his written consent given individually or by collective agreement; (7) Where certificates of competency are required, examinations to be conducted by a board composed of a government inspector, a mine manager and a working miner; (8) All candidates for certificates as mine managers, pit-bosses, etc., to have at least five years' mining experience, to produce evidence of ability, sobriety and good conduct, and to be at least 23 years of age; (9) Mine inspectors to be holders of mine managers' certificates, with at least seven years' mining experience in the class of mine concerned. (10) Without limiting the powers of inspectors, an inspector to have power to enter, inspect and examine any mine or any part thereof at all reasonable times by day or night, to examine into ventilation and safety, and to give notice in writing of any thing which he considers dangerous and defective and of its immediate remedy; if disagreement follows, the defect to be referred to a board of arbitration consisting of a judge and representatives of the interested parties, the decision of the tribunal to be final; (11) All mines to be adequately ventilated and examined before the entry of the workmen, a report of such examination to be entered in a book which shall be always available to any employee of the mine; (12) The health of employees in mining camps to be fully protected and laws on this subject unified as far as possible; (13) Present laws regarding special investigations to be continued and extended to the other provinces; (14) Provision for first aid and mine rescue work to be made by the Workmen's Compensation Board of each province, and special provisions to be made in

those provinces where no such board exists.

The present article deals only with those sections in the mining laws which refer to the subjects covered by the Commission's report.

#### Application

Inspection and regulation of mines is provided for by law in the Territory of the Yukon and in all Canadian provinces except New Brunswick and Prince Edward Island. Nova Scotia and British Columbia have each two Acts, the one referring to coal and the other to metalliferous mines. In the former province the Coal Mines Act applies also to mines of stratified ironstone, shale and fire clay. The Ontario law covers all mines, including those of coal and salt and all oil and gas wells. The Mining Act of Alberta applies to mines of coal, stratified ironstone, shale clay and other minerals, also to all places where coal is extracted by removing the overlying strata. If any question arises, otherwise than in the course of legal proceedings, as to whether any mine comes within the scope of the Act, the Minister of Public Works is empowered to decide. Manitoba excludes stone quarries and all mines where not more than six persons other than the owner are employed underground. Saskatchewan and the Yukon include all mines, and Quebec all mines and quarries.

#### Employment of Women and Children

Quebec, Ontario, Saskatchewan and Alberta forbid the employment of women and girls in mines except for office work. The Metalliferous Mines Act of British Columbia prohibits their employment below ground, and the Coal Mines Act of the same province allows them to perform clerical and domestic duties only. The laws of Nova Scotia, Manitoba and the Yukon have no provisions on this subject.

With regard to boys, Ontario fixes 16 years as the minimum age of employment above ground and 18 years below ground. The Coal Mines Act of British

Columbia and the Mines Act of Alberta prohibit work above ground by boys under 14 years of age, and below ground by those under 15 and 16 years respectively. The latter province, however, provides that no child under 16 years may be employed at all unless he holds a school certificate. This rule is in force also in Quebec where the minimum age for employment underground is 15 years and in Nova Scotia and the Yukon, where no boy under 12 years may do any work in a mine. Saskatchewan fixes 14 years as the minimum age for employment in any mining work and the Metalliferous Mines Act of British Columbia forbids work below ground by any boy under 12 years. The Mines Act of Manitoba has no provisions on this subject, but the Children's Act prohibits the employment of any child under the age of 16 years in any dangerous or unwholesome occupation.

#### Operation of Power Machinery

The Territory of the Yukon does not demand any particular qualifications or fix any age limit for persons in charge of hoisting machinery, but all the provinces have made rules in this regard. In Saskatchewan and Alberta and in the metalliferous mines of British Columbia the minimum age for this class of employees is 18 years, while in coal mines in the latter province no one but a man of 22 years of age or over may be in charge of machinery used to hoist persons, and he must have a medical certificate renewed every six months to the effect that he is physically and mentally fitted to perform his duties. Hoists for moving material may, however, be operated by a person 16 years of age. In the coal mines of Nova Scotia machinery used for conveying persons must be in control of a man 21 years of age or over, who holds at least a third-class certificate as a stationary engineer. The Metalliferous Mines Act of this province fixes 18 years as the minimum age for operators of any machinery used for moving persons. The Ontario law provides that no one under 20 years of age and no

person who has not had at least one month's experience may have charge of any machinery used for moving persons, but a lad of 18 years may operate an engine for hoisting material. All operators must, however, be physically and mentally fit for their work. Twenty years is also the minimum age fixed in Quebec for employees in charge of a hoist used to convey persons in a mine.

#### Hours of Labour

The Territory of the Yukon and all the Canadian provinces except Manitoba and Saskatchewan have limited hours of labour for some or all classes of mine employees. The Yukon has adopted the 8-hour day and the 48-hour week for workers under 16 years of age, while Quebec has fixed the same limit for those under 17 years. Nova Scotia allows employees under 16 years to work 10 hours a day and 54 per week in both coal and metalliferous mines. A week in all cases means the six days from midnight on Saturday until midnight on the following Saturday.

The 8-hour day and 48-hour week for certain adult workmen in mines is enforced by law in Alberta, British Columbia and Ontario. In Alberta it applies to all underground workers and in British Columbia to all workers, both above and below ground, except persons employed in the office, boarding house or bunk house of the mine. In Ontario it governs all underground workers, (except shift bosses, pumpmen, cage-tenders, hoistmen, persons engaged solely in surveying or measuring, and workers in a mine where the number of persons working in a shift does not exceed six), in districts that are without county organization, which includes nearly all those parts of Ontario where mining is carried on.

In Ontario the 8 hours must be reckoned from the time the workman arrives at his place of work in the mine to the time he leaves it. In coal and metalliferous mines in British Columbia and in Alberta the period between the time a workman leaves the surface and

the time he returns must not exceed 8 hours. In Alberta, it is provided that the time for the raising and lowering of each shift must be arranged by the owner, agent or manager of the mine in such a manner that every workman shall have an opportunity to return to the surface in the specified time. A conspicuous notice of the time so fixed must be posted at the pit head and all arrangements made for the observance of the schedule. The time allowed for the raising and lowering of each shift must not exceed what is reasonably required and must be approved by the Chief Inspector. The owner, agent or manager of a mine must appoint one or more persons to direct at the pit head the raising or lowering of workmen, and a book must be kept in which is entered the time of such raising and lowering, and any cases in which a workman is below ground for a longer time than is allowed by law, and the cause of his remaining under ground. The workmen may, at their own expense, station one or more persons at the pit head to observe the times of raising and lowering the workmen, and such persons are to be appointed in the same manner as the check weigher and bear the same relations to the owner, agent or manager of the mine.

In all the provinces, with the exception of Quebec, overtime may be worked in case of accident or emergency. Nova Scotia and the Yukon, where, as in Quebec, the legal limitation applies to boys only, recognize no other grounds on which longer hours are permissible. In Ontario a Saturday shift may work more than 8 hours for the purpose of avoiding work on Sunday, or for changing shift at the end of the week, or to give any of the men a part holiday or to make necessary repairs. In the event of any grave economic disturbance the Lieutenant-Governor in Council may suspend the 8-hour law for such time as he deems advisable. The Mines Act of Alberta contains a similar provision. This province allows a repairing shift for the purpose of avoiding Sunday labour to commence their work period on

Saturday before 24 hours have elapsed since the commencement of their last period, provided that at least 8 hours have passed since its termination. A workman may also remain below ground for more than 8 hours if any exceptional work requires to be done without interruption, in order to avoid serious interference with the ordinary work of the mine. The British Columbia Coal Mines Act provides that where more than two shifts are worked, the onsetter, bottomer or eager, pumpmen, stablemen and engineers in charge of constantly running machinery other than that directly used for the mining of coal at the face, and the fire boss or shift boss, in charge, may be relieved at the place of duty, but in no case may any person remain underground for more than 8½ hours except when extra hours are necessitated by the weekly change of shift where more than two shifts are worked. A pumpman or engineer in charge of constantly running machinery may also be below ground for more than 8 hours to deal with anything which requires immediate attention, and which, if neglected, might necessitate the closing of the mine. The overman or manager may enter the mine at any time and remain there in the discharge of his duties. The Metalliferous Mines Act of British Columbia allows overtime in case of accident or emergency only.

#### Wages

The mining laws of Ontario and Alberta direct the semi-monthly payment of wages, and in British Columbia the Semi-monthly Payment of Wages Act applies to all mines, while the Mineral Survey and Development Act of 1917 makes provision for this method of payment of workmen on mining properties under bond or option. In Nova Scotia all wages except those fixed at a regular monthly rate must be paid weekly in all mines to which the Coal Mines Regulation Act applies. The other provinces make no rulings on this subject.

The Truck Act of British Columbia and the Coal Mines Regulation Act of Nova

Scotia direct all wages to be paid in currency, but there are no rules to this effect in the other provinces.

The Coal Mines Regulation Act of Nova Scotia and British Columbia, and the Mines Act of Alberta provide that where the wages of miners depend on the amount of mineral produced by them, they shall be paid according to the weight of such mineral, which is to be weighed as near the entrance to the pit mouth as is practicable. These three Acts and the Mines Act of Saskatchewan contain sections permitting the employees thus paid to station at their own expense a representative called the check-weigher at the place appointed for the weighing of the mineral. In Nova Scotia the check-weigher is elected by ballot at a meeting of the employees interested, and cannot hold office for more than one year unless re-elected. The British Columbia law does not demand any special qualifications for this position, but the other provinces require that candidates should be working miners with, at least three years' experience. In Saskatchewan and Alberta appointees must be residents of the province, and in Nova Scotia they must have certificates and at the time of their appointment be employed in the colliery in which they are to serve. In all cases the check-weigher must be given every facility for the proper discharge of his duties, and Nova Scotia, Saskatchewan and Alberta direct the owner, agent or manager of the mine to provide him with a shelter from the weather and a desk at which to write. The laws of these provinces forbid the check-weigher to impede in any way the working of the mine, or to interfere with the weighing. There need be no delay on account of his absence. If he is guilty of misconduct, the owner, agent or manager of a mine may, on sufficient evidence, have him removed by order of a court of competent jurisdiction, and another check-weigher may be elected or appointed in his place. In Saskatchewan, Alberta and British Columbia the owner, agent or manager of the mine may, at

the request of the majority of the miners, make a *pro rata* deduction from the wages of each miner sufficient to meet the wages of the check-weigher, and may then pay him in the same manner as the other employees. Wherever in these four provinces the workmen are paid by order of the Minister or by mutual consent, otherwise than according to the amount of mineral produced by them, they may at their own expense employ one or more persons to check the correctness of the measurements or method according to which payment is made, and the provisions in the Acts applying to check-weighers shall apply to such persons.

The Mining Act of Alberta and the Coal Mines Regulation Acts of Nova Scotia and British Columbia permit the owner, agent or manager of any mine to agree with his employees that deductions be made in respect of stones and other material, such deductions to be determined by mutual agreement or by some person or persons appointed by the employers and employees for the purpose. In Nova Scotia and Alberta provision is made that where the representatives of the two parties fail to agree, they or the Minister or Commissioner, may choose a third person to act with them, and a decision of the majority of the three shall be final. In a mine where employers and employees have failed to appoint anyone to determine deductions, the Minister or Commissioner may appoint some person on their behalf.

With regard to other deductions the Alberta law allows any workman to authorize the employer in writing to apply the whole or part of the wages due him to the payment of any debt owing by such workman. The employer may also retain sums due by any employee for coal, oil, rent or other supplies. The Coal Mines Act of Nova Scotia adds to this list check-weighers' and doctors' fees, church, hospital and society dues, but forbids deductions for school or other rates, except with the written

consent of the workman. This prohibition appears also in the Metalliferous Mines Act of this province and is the only reference to deductions from wages found therein.

In 1919, British Columbia passed an amendment to the Coal Mines Regulation Act providing for the appointment of a Board to fix minimum wages for coal miners. The Board consists of one representative each of employers and employees, with the Chief Inspector of Mines as Chairman.

Ontario, the Yukon, both Mining Acts of British Columbia, and the Metalliferous Mines Act of Nova Scotia, forbid the payment of wages in any tavern or place where liquor is sold. The Quebec Act does not contain any reference to this subject, but prohibits the sale of liquor within a radius of seven miles of any mine, and gives the Inspector of Mines control of all licenses in his district. This province also forbids the cashing of pay cheques in any tavern. In many provinces the clauses relating to this subject have been repealed by the temperance laws passed during the last few years. This has been the case in both Alberta and Saskatchewan where the prohibition of payment of wages on licensed premises and cashing of pay cheques in hotels was contained in the Liquor License Acts repealed in 1918 and 1917 respectively. The Ontario Temperance Act of 1916 repealed the Liquor License Act of that province which prohibited the cashing of pay cheques in hotels and the sale of intoxicants within six miles of any mine. Nova Scotia omitted from the 1918 Coal Mines Act the clause which in the old law forbade the payment of miners in hotels, etc. This was presumably done owing to the passing of the Temperance Act of that year, which is a prohibition measure.

In Ontario and the Yukon every person who performs labour for wages in connection with any mine, mining claim or mining lands, has a lien thereon. The other provinces have no legislation on this subject.

## Certificates

The Coal Mines Regulation Acts of Nova Scotia and British Columbia, and the Mines Acts of Alberta and Saskatchewan contain sections relating to the examination and licensing of workmen.

In Saskatchewan examinations are held from time to time by an inspector of mines, while in the other three provinces they are conducted by a Board of examiners. The Nova Scotia Board consists of the Inspector of Mines with one mining and one mechanical engineer. In Alberta two managers and two working miners, and in British Columbia one representative each of the coal miners and the mine owners act with the Chief Inspector in conducting examinations for certificates.

There is considerable difference in the laws of these four provinces with regard to the classes of workmen for whom certificates are required and the qualifications demanded. Nova Scotia requires certificates of competency for a manager, underground manager, overman, mine examiner and stationary engineer; British Columbia for a manager, overman, shift boss, fire boss, shotlighter and mine surveyor, and Alberta for a manager, overman and mine examiner. In Nova Scotia a candidate for manager, underground manager, or overman must be a British subject at least 21 years of age, with four years' underground working experience, part of which must have been at the working face. A candidate for manager must have a certificate of competency as underground manager, or have had at least three years' practical experience and a degree as mining engineer from some approved college or university. A candidate for underground manager must have a certificate of competency as an overman. Those qualifying as first class stationary engineers must be at least 24 years of age and holders of second class certificates. In addition they must have served one year at mechanical work on machinery, or in charge of a hoisting or haulage engine or steam plant, or

two years in charge of some other type of engine, or three years at mechanical work in a machine shop. Candidates for second class certificates must be certificated third class engineers with one year's experience, and have reached the age of 21 years, while anyone entering for the third class examination must be 18 years of age and have served six months as a licensed fireman, twelve as engineer, assistant engineer, pumpman, oiler or locomotive engineer, or eighteen months at mechanical work in a machine shop. A British subject, 21 years of age who has had at least three years' practical experience in a coal mine, holds a certificate of competency as a coal miner and has a practical knowledge of gas, explosives, ventilation and timbering, may present himself for examination as mine examiner. All candidates must give satisfactory evidence of sobriety, experience and general good conduct.

British Columbia requires of a candidate for a mine manager's certificate that he be at least 25 years of age, and have either five years' working experience or a degree showing a course in scientific coal mining at an approved university or college, together with four years' practical mining. A person entering for examination for a certificate as overman must be at least 23 and have five years' experience, while candidates for shift boss, fire boss or shotlighter must have a similar age qualification and three years' practical mining; a certificate in first aid work is required of all applicants.

Both Nova Scotia and British Columbia provide for the holding of examinations for the granting of certificates as coal miners. In the former province the Commissioner of Public Works and Mines appoints for this purpose local boards of two persons having practical experience as coal miners in Nova Scotia, and one underground manager. In British Columbia the Inspector of mines for the district and one representative each of mine owners and miners from the Board of Examiners.

Examinations must be held on at least one day in every sixty at each colliery designated by the Minister. Both provinces require one year's working experience of all candidates, and British Columbia adds the provision that they must be familiar with the English language.

The Alberta law requires that a candidate for manager's certificate shall have at least five years' practical experience either wholly or partly in Canada, or he must hold a diploma showing a course of two years or more in scientific or mining subjects at an approved college or university, together with three years' experience in a coal mine as above. He must also be at least 25 years of age. An applicant for a certificate as overman or examiner must be 23 years of age and have three years' working experience. All candidates must produce evidence of good conduct and sobriety, and also a certificate from a medical practitioner or a recognized ambulance society showing him to be qualified to render first aid, and applicants for certificates of the second and third classes must satisfy the board that they are able to speak and write English. All three provinces direct that a register of all holders of certificates be kept. They also provide that in case complaint is made to the authorities that any holder of a certificate is guilty of incompetence, gross negligence or any offence against the mining law a public inquiry into his conduct may be held, and if the charge is sustained, the Minister may cancel or suspend the certificate of such employee. The British Columbia law permits the granting of a certificate without examination to the holder of a certificate granted in any British Dominion if the standard is equivalent to that required by the Act. Saskatchewan allows the same privilege to holders of satisfactory certificates from the United States, and Alberta extends it to persons from any country where the standard is equivalent to that demanded by the Act. Permission is also given for the granting of provisional certificates.

### Inspection

The mining laws of Nova Scotia, Ontario, Manitoba and the Yukon do not contain any reference to qualifications of inspectors. In Quebec these officers must be mining engineers who have practised their profession for at least five years and are possessed of sufficient knowledge of mineralogy and metallurgy for the satisfactory discharge of their duties. The Coal Mines Act of British Columbia and the Mines Acts of Alberta and Saskatchewan require all inspectors to be holders of mine manager's certificates, while the Metalliferous Mines Act in the first named province demands seven years' practical experience in mining. It also confers on the Provincial Mineralogist all the powers of an inspector. This law forbids an inspector to act as manager, agent or lessee of any mining or other corporation, or to make any report on a mine or mining property with the object of promoting its sale. The Alberta law stipulates that inspectors may not act as mining engineers or mine managers within the province, while the Coal Mines Act of British Columbia and the Mines Act of Quebec disqualify any person who has any interest directly or indirectly in any mine in his district.

In all the Canadian provinces and in the Yukon the inspector may enter the mines in his district at all reasonable hours in the performance of his duties but may not unnecessarily impede the working of the mine. In Nova Scotia and British Columbia he must visit each mine and every part of it at least once a month, but the other provinces and the Yukon do not contain any reference to frequency of inspection. The Yukon and all the provinces except Quebec have sections relating to the powers and duties of inspectors. They may examine into and make inquiry respecting the state and condition of any mine or any part thereof, the ventilation, the sufficiency of any special rules, and all things affecting the safety of the persons employed therein. In coal mines in Nova Scotia and all mines of British

Columbia and Alberta the inspector must, after each visit, cause a copy of his report to be posted in a conspicuous place at or near the mine. In the Yukon and all parts of the Dominion, except in Quebec and the coal mines of Nova Scotia, the inspector must give notice in writing to the owner or manager of the mine of anything which he finds to be dangerous or defective and direct that it be remedied within a specified time. The Ontario, Saskatchewan and Alberta Acts and the Coal Mines Act of British Columbia authorize any inspector to order immediate cessation of work and the departure of all persons from any mine or part of a mine which he considers unsafe, or to direct work to be carried on in such place with any precautions he may deem necessary. The British Columbia Coal Mines Act, the Metalliferous Mines Act of Nova Scotia and the Saskatchewan and Alberta laws provide that, in case of disagreement following such notice, the matter shall be arbitrated by one representative of each of the interested parties and an umpire. In British Columbia this third member of the Board is chosen by the other two, while in Alberta and Saskatchewan a judge acts in that capacity. The Nova Scotia Act names the Commissioner of Mines as umpire.

The Coal Mines Act of British Columbia empowers the inspector on his own initiative, or on written application of any three miners, to examine any employee of a mine in order to ascertain whether he is physically and mentally capable of performing his duties, and if he finds that the incapacity of any workman impairs the efficient working of the mine or endangers the safety of the other persons employed, he may order his removal.

Both Mining Acts of Nova Scotia, the Coal Mines Act of British Columbia and the mining laws of Alberta, Saskatchewan and the Yukon permit the workmen to appoint one or more competent inspectors to examine thoroughly the mine on their behalf and such inspectors

must be allowed every facility for the carrying out of their duties.

### Ventilation and Inspection

All the Mines Acts except that of Quebec require that every mine shall have adequate ventilation. Saskatchewan fixes a standard of 100 cubic feet and Alberta 200 cubic feet for each person and animal, while the Coal Mines Act of British Columbia demands 100 cubic feet for each man and 300 for each animal. All air must travel free of stagnant water, stables and old workings. The inspector may, if necessary, direct that more air be supplied, and in this event the British Columbia law requires him to post a notice at the mouth of the mine stating the quantity of air which is necessary for health and safety. The Ontario law provides that where the ventilating current is not sufficient, mechanical appliances must be installed and operated, while the Coal Mines Act of Nova Scotia provides for the use of brattice where the natural air current does not suffice to keep working places free of all inflammable or noxious gases. All cross cuts made for the purpose of ventilating must be kept of uniform width and height between the openings which they connect. The Coal Mines Act of British Columbia directs that where ventilation is provided by a mechanical contrivance the apparatus must be so placed that it will be uninjured by an explosion. This Act and the Saskatchewan and Alberta laws make provision for the division of each mine into districts or splits of not more than 70 men, each district being supplied with its separate current of fresh air, and in the two former provinces every place must be bratticed up to within four yards of the face. In British Columbia and Alberta these rules apply to all mines, but in Saskatchewan they need not be complied with where safety lamps are not necessarily used. In such mines, however, narrow working places must not be driven so far ahead of ventilation that the air becomes visibly foul, and in no case more than 40 yards.

Examination of all working places in a mine is provided for in the Yukon, Alberta, Saskatchewan and in both Mining Acts of Nova Scotia and British Columbia. The Yukon law and those governing metalliferous mines in Nova Scotia and British Columbia state that all working places must be thoroughly examined by a competent person at least once in every 24 hours, and the British Columbia Act requires the examiner to make a report which is recorded in a book kept for the purpose. The Coal Mines Acts of Nova Scotia and British Columbia and the Saskatchewan and Alberta laws make provision for the appointment of stations at the entrance to the mine or to any part of it, and all portions of the mine beyond such stations must be examined before the workmen are permitted to enter. This inspection is to take place at least once in every 24 hours and in British Columbia and Saskatchewan immediately before the commencement of work. The Nova Scotia and Alberta laws stipulate that it must be made within three and four hours respectively of the time the workmen enter the mine. In all cases the examiner must make a report which is recorded in a book. In Alberta and British Columbia a copy of such report must be posted immediately in a conspicuous place, while the other two provinces stipulate that the book bearing the record of examinations shall be open to employees at all reasonable times. The British Columbia law and those of Alberta and Saskatchewan make provision for a more frequent examination of any mine where inflammable gas has been found at any time during the preceding 12 months. If at the time of any examination dangerous gas is found to be present in any mine, Nova Scotia, British Columbia, Saskatchewan, Alberta and the Yukon authorize the withdrawal of all workmen until the danger is over.

### Health of Employees in Mining Camps

The question of health of employees in mining camps is in every case dealt with by the Public Health Acts, and all parts

of Canada except the Yukon have laws on the subject. In Nova Scotia no person may establish, conduct or maintain a camp without a permit from the Medical Health Officer to the effect that its sanitary conditions are satisfactory. The Superior Board of Health of Quebec may by by-law require the employment of duly qualified practising physicians by proprietors of mining camps employing 25 or more men. In Ontario and British Columbia employers in camps may by regulation be required to retain the services of a qualified medical practitioner, and in addition to provide permanent or temporary hospitals. Houses and premises for the accommodation of workmen are subject to inspection, and the British Columbia law further empowers the inspector to visit all camps in his district during the months of April and May in each year to examine the sanitary conditions and the water supply. The Public Health Act of Alberta provides for the sanitary control of all public places and all houses, temporary or permanent, and regulations covering mining camps have been issued thereunder. The Provincial Board of Health of Manitoba and the Commissioner of Saskatchewan are empowered to make regulations relating to mining camps. Although no mining act appears on the statute books of New Brunswick, the Public Health Act of 1918 protects the health of employees in mining camps, making provision for regulations regarding the inspection of all houses and places connected therewith, and for the erection of permanent or temporary hospitals and the services of duly qualified physicians. A 1919 amendment requires special precautions to be taken against smallpox.

#### Special Investigations

All the mining laws except those of Quebec and Saskatchewan contain clauses authorizing the holding of special investigations. In Alberta and in both classes of mines in Nova Scotia, the Minister or Commissioner may appoint one or more persons possessing legal or

special knowledge to act with the inspector in holding an investigation into any accident, or into any matter connected with the working of any mine. The Inspector may make the investigation in the way he considers most effectual, and he has right of entry to any place and power to require production of any document, and to take evidence under oath. He must make a full report of the inquiry which may be made public. The Mining Ordinance of the Yukon authorizes a similar investigation to be made by the inspector unaided. The British Columbia Coal Mines Act empowers the Minister to appoint any person with scientific or other qualifications to make a special investigation and report upon any mining operations so far as they relate to the safety of life and property in any mine, such person to have right of entry and access to records. The report of such inquiry may also be made public. Under the laws of Ontario and Manitoba and the Metalliferous Mines Act of British Columbia, the Minister may require the inspector to make a special report of any accident which has caused loss of life or serious personal injury to any person, the first named province giving him power to take evidence on oath and compel attendance of witnesses and production of documents. Under the British Columbia Act, the report of such investigation may be made public.

The Canada Explosives Act provides for an investigation into the cause of any accident from explosion of an explosive occurring in any mine or quarry in provinces whose laws make no provision for such inquiry.

#### First Aid and Mine Rescue Work

The Workmen's Compensation Acts of Nova Scotia, New Brunswick, Alberta and British Columbia provide that employers in any industries may be required to maintain such first aid appliances and service and transportation for injured workmen as the Board may direct. The Coal Mines Act of Nova Scotia also contains a clause to the effect

that properly constructed ambulances or stretchers with splints and bandages shall be kept at all mines ready for instant use. The same law empowers the Commissioner of Mines to make any necessary regulations for the purpose of ascertaining the fitness and qualifications of and the granting of certificates to persons skilled in the use of mine rescue apparatus. Alberta requires every applicant for a certificate as manager, overman or mine examiner to produce a certificate in ambulance work from a qualified medical practitioner or a recognized ambulance society.

The Ontario Mining Act directs that a properly constructed stretcher and the first aid service prescribed by the Workmen's Compensation Board, and, where poisonous or dangerous compounds, solutions or gases are used or produced, proper antidotes plainly labelled with explicit directions for use, must be kept in an accessible place. Life lines, and belts in good order are to be kept ready for immediate use. At all blast furnaces, breathing apparatus and portable resuscitating apparatus of approved type with an adequate supply of oxygen and absorbent material must always be maintained. In each working shift one or more workmen appointed by the Superintendent and trained in the use of this apparatus must be always on duty.

The Mining Act of Alberta authorizes the Lieutenant-Governor in Council to make arrangements for the installation and operation of mine rescue stations and cars, and to make regulations regarding the provision of emergency hospitals and any other matter that he may consider advisable in the interests of safety. This Act directs that properly constructed stretchers with splints and bandages be kept ready for immediate use.

The Ambulance Act of British Columbia requires that any employer of labour directly or indirectly operating any mine, (except those operating under the Coal Mines Act) or any camp, employing more than 30 persons situated more than

6 miles from the office of a physician, shall employ at least one person possessing a certificate of competency to render first aid, and also provide one or more good ambulance boxes. The employer must forward to the Provincial Secretary the name of the person in his camp who is qualified to render first aid and the number of such person's certificate.

The Coal Mines Regulation Act requires the owner, agent or manager of every colliery to establish such number of oxygen helmets or some form of mine rescue apparatus as may be approved by the Minister, and to keep them in workable condition and so placed as to be immediately available when wanted. This Act empowers the Lieutenant-Governor in Council to establish mine rescue stations for the purpose of supplementing, in case of need, the colliery installations of mine rescue apparatus, and also for the training of holders of certificates of competency in the use of such apparatus, and the owner, agent or manager of every mine must see that all physically fit certificated officials, and such number of workmen as the Chief Inspector may direct, receive such training. The rescue stations are, subject to the order of an inspector, available in case of emergency for the use of any trained corps of mine rescuers, qualified medical practitioners, or trained first aid corps.

### Conclusion

From the foregoing account it will be seen that none of the mining laws of the Dominion conforms on all points to the standard set by the report of the Commission on Uniformity of Labour Laws. Two provinces have fixed the minimum age for boys at the age named in the report and five have adopted the 8-hour day either wholly or in part. Two provinces have laid down all the rules regarding payment of wages that the Commission considered desirable, and in one province and the Yukon provision is made for miners' liens. In two provinces examination of candidates for certificates are conducted by a board of three members, but only one province

demands the qualifications which the Commission deemed necessary for such candidates. Two provinces give full power to inspectors and arrange for arbitration in case of disagreement. Four provinces provide for adequate ventilation and inspection, and all have some measure of protection for the health of employees in mining camps. Five provinces and the Yukon make

some provision for special investigations. The standards laid down by the Commission regarding deductions from wages, qualifications of mining inspectors and the minimum age for workmen in charge of power machinery are not attained by any province. The administration of first aid and mine rescue work is in no case entirely in the hands of the Workmen's Compensation Board.

### ORDER-IN-COUNCIL RESPECTING DRAFT CONVENTIONS AND RECOMMENDATIONS OF FIRST INTERNATIONAL LABOUR CONFERENCE

**R**EFERENCE was made in the December, 1919, issue of the LABOUR GAZETTE to the draft conventions and recommendations which were adopted by the International Labour Conference at its first meeting in Washington, D.C., during the month of November, 1919. The official text of these draft conventions and recommendations was later communicated officially through the League of Nations to the Government of Canada, in accordance with the provisions of article 405, paragraph 4, of the Treaty of Peace of Versailles.

Consideration was subsequently given by the Department of Justice as to what authority or authorities are, as respects the Dominion of Canada, to be regarded as the competent authority or authorities, under the provisions of the Treaty of Peace, for the purpose of considering the said draft conventions and recommendations, and also as to the action which the Dominion Government should take in order to carry out its engagements under the Treaty. A report on the subject was submitted to the Governor General in Council on November 2 by the Minister of Justice, which was duly concurred in by Council and approved by His Excellency the Governor General on November 6. The report of the Minister of Justice referred to expresses the opinion that the obligation of the Dominion Government in these matters will be fully carried out by

bringing the different conventions and recommendations before the competent authority, Dominion or provincial accordingly as it may appear, having regard to the scope and objects, the true intent and character of the legislation required. The report of the Minister of Justice further deals with the question of legislative jurisdiction as between the Dominion and the Provinces in regard to each of these conventions and recommendations referred to.

The full text of the Order-in-Council is as follows:

November 6, 1920.

The Committee of the Privy Council have had before them a report, dated 2nd November, 1920, from the Minister of Justice, in reference to the several draft conventions and recommendations which were adopted by the International Labour Conference at its first annual meeting, held at Washington, D.C., October 29th to November 29th, 1919, copies whereof have been lately received by Your Excellency's Government from the Secretary-General of the League of Nations under cover of communication dated 28th January, 1920, stating that the said meeting of the Conference was declared closed on 27th January, 1920, and calling attention to the fact that this is the date to be considered, in accordance with Article 405, paragraph 5, of the Labour Part of the Treaty of Versailles, and the like provisions of the other treaties of peace, in determining the time limits within which the members of the Labour Organization have undertaken to bring the said draft conventions and recommendations before the authority or authorities within whose competence the matter lies, for the enactment of legislation or other action.

The Minister states that he has had under consideration the question as to what authority or authorities are, as respects the Dominion, to be regarded as the competent authority or authorities for the purpose of considering the said draft conventions and recommendations, and also as to the action which Your Excellency's Government should take in order to carry out its engagement as respects the said draft conventions and recommendations under the provisions of the said Treaty.

The Minister further states that he is of opinion, that the provisions of the Labour Part of the Treaty of Versailles do not impose any obligation on the Dominion of Canada to enact into law the different draft conventions or recommendations which may from time to time be adopted by the Conference. The obligation as set forth is simply in the nature of an undertaking on the part of each member within the period of one year at most from the closing of the session of the Conference, or if it is impossible owing to exceptional circumstances to do so within a period of one year, then at the earliest practicable moment, and in any case not later than eighteen months from the closing of the Conference, "to bring the recommendations or draft conventions before the authority or authorities within whose competence the matter lies for the enactment of legislation or other action." The Treaty engagement being of this character it is not such as to justify legislation on the part of Parliament under the authority of Section 132 of the British North America Act, 1867, to give effect to any of the proposals of the said draft conventions and recommendations, which must be held, as between the Dominion and the provinces to be within the legislative competence of the latter. The Government's obligation will, in the opinion of the Minister, be fully carried out if the different conventions and recommendations are brought before the competent authority, Dominion or Provincial, accordingly as it may appear, having regard to the scope and objects, the true nature and character of the legislation required to give effect to the proposals of the conventions and recommendations respectively, that they fall within the legislative competence of the one or the other.

1. The Minister is of opinion, on consideration, that the proposals of the draft convention

(1) limiting the hours of work in industrial undertakings to eight in the day and forty-eight in the week;

(2) concerning employment of women before and after childbirth;

(3) concerning employment of women during the night;

(4) fixing the minimum age for admission of children to industrial employment;

(5) concerning the night work of young persons employed in industry;

and of the recommendation concerning,—  
the protection of women and children against poisoning,

involve legislation which is competent to Parliament in so far as Dominion works and undertakings are affected, but which the Provincial legislatures have otherwise the power to enact and apply generally and comprehensively.

## 2. *Draft Convention concerning unemployment.*

The Minister is further of opinion, seeing that the principal object of this convention is the establishment of a national system of employment agencies under the control of a central authority, that the Dominion is the proper authority to give effect to the proposals of the convention. The project does not appear to be attended by any question of legislative competence, because legislative sanction would not seem to be essential to the attainment of the objects in view. There are objects which, it is conceived, the Government may competently carry out as an executive measure, provided the necessary parliamentary appropriation be available. It is observed in this connection, that the provisions of the Employment Offices Co-Ordination Act, Chapter 21, Statutes of Canada, 1918, may be largely utilized for the purpose of carrying out the proposals of the convention except with respect to that referring to unemployment insurance, which at the present time has no application to Canada.

## 3. *Recommendation concerning unemployment.*

Four different recommendations are made:

As to No. 1. The Minister is disposed to think the suppression of private employment agencies carried on for profit and the licensing of such agencies pending the adoption of measures for their abolition, is properly competent to the provincial legislatures alone.

As to No. 2. The Minister thinks the proposal of this recommendation may be fully carried out, as between Canada and other members of the International Labour Organization, by reciprocal measures in relation to immigration, and that the Parliament of Canada, in view of its paramount authority to legislate upon this subject, is the competent authority to deal with the matter. The powers conferred upon the Governor in Council under Section 38 (c) of the Immigration Act, Chap. 27, 1918, as amended by section 13, Chap. 25, 1919 (1st session), coupled with the provisions of the Alien Labour Act, R.S.C.

Chap. 97, may probably be found sufficient to enable the Dominion to carry out any international agreement which may be arrived at.

As to No. 3. The Minister observes that the experience of other countries has demonstrated that a system of unemployment insurance, in order to be effective and successful, must be merely ancillary or complementary to a system of labour exchanges, the whole being adapted to the principal function of finding work for unemployed insured workmen. In this view, unemployment insurance has a pronounced federal aspect, and on the whole, the Minister thinks the establishment of a system of unemployment insurance is competent to the Dominion in the exercise of its residuary legislative power with relation to the peace, order and good government of Canada.

As to No. 4. The Minister thinks the proposal of this recommendation is one proper to be dealt with and carried out by the Dominion and provincial governments, each for itself, unless indeed by agreement some joint plan of co-ordination can be arrived at.

4. *Recommendation concerning reciprocity of treatment of foreign workers.*

The Minister is of opinion that the Dominion is the competent authority to stipulate reciprocal terms with the other members of the International Labour Organization with a view to giving effect to the proposals of this recommendation.

5. *Recommendation concerning the prevention of anthrax.*

The subject-matter of this recommendation is within the competence of Parliament. Under the provisions of section 3 (e), (f), and (g) of The Quarantine Act, R.S.C. Chap. 74, the Governor in Council may, by regulation, make provision for giving effect to the proposal of this recommendation.

6. *Recommendation concerning the establishment of Health Services.*

The Minister is of opinion that, provided health service and factory inspection be dealt with in the federal as contrasted with the provincial aspect, legislation to carry out the proposal of this recommendation is within the legislative competence of Parliament under the residuary power to legislate for the peace, order and good government of Canada. The provisions of chapter 24, Statutes of Canada, 1919 (1st session), entitled "An Act respecting the Department of Health" appear to be quite adequate to enable the Government to carry out this recommendation without further legislation.

7. *Recommendation concerning the application of the Berne Convention of 1906 on the prohibition of the use of white phosphorus in the manufacture of matches.*

The Parliament of Canada has, as the Minister observes, already legislated comprehensively upon the subject-matter of this recommendation under the provisions of chapter 12, Statutes of Canada, 1914, entitled "An Act to Prohibit the Manufacture, Importation and Sale of Matches made with White Phosphorus."

The Committee concur in the foregoing and, on the recommendation of the Minister of Justice, advise that a copy of this Minute, if approved, together with authenticated copies of the draft conventions and recommendations, be transmitted to the different Lieutenant-Governors for the consideration of their respective Governments, with a view to such legislative action in line with the proposals of such of the draft conventions and recommendations as are within the provincial sphere, as each Government may be advised to take.

All of which is respectfully submitted for Your Excellency's approval.

RODOLPHE BOUDREAU,  
Clerk of the Privy Council.

## REPORT FOR 1919 ON LABOR CONDITIONS IN ONTARIO

THE fourth annual report of the Superintendent of the Trades and Labour Branch of the Department of Public Works of Ontario covers the last period during which this branch was administered by that Department and prior to its reorganization in November 1919 as the Provincial Department of Labour. Summarizing labour conditions in the province during 1919, the report finds

the outstanding feature in connection with employment to be the re-establishment of returned soldiers in civilian life, which, it is claimed, was effected largely through the agency of the 36 offices of the Ontario Government Employment Bureau. So successfully was this work carried out that at the close of the year the labour surplus had been absorbed by the various industries.

Among the chief features of the labour situation during the year are noted the upward tendency of wages, and the unusual movement of labour from one centre to another. At several industrial centres the keen competition for skilled workers resulted in rates of wages considerably in excess of the union scales. Unskilled labour was also in great demand owing to the resumption of railway and building construction which had lain dormant for the four war years. The factories practically recovered from the loss of activity resulting from the closing of munition plants.

While demands for a 44-hour week were frequently made, it is claimed that "the 48-hour week probably more nearly approaches the standard desired by the majority of employers and workers." A large proportion of plants still work on 9-hour and 10-hour shifts. The report states that at present the only limitations of hours for adult men in Ontario are found in the Mining Act which forbids employment underground for longer than 8 hours per shift, and the Railway Act, which limits the working week of railway employees to six days of ten hours each and forbids work on two successive Sundays. Thirty-nine per cent of the strikes in Canada during the year and 26 per cent of the total working days lost were in Ontario (see LABOUR GAZETTE, March, 1920, p. 271). The industries most affected by industrial disputes were those of the Metals and Machinery group.

The report summarizes the new labour legislation passed in 1919 (see LABOUR GAZETTE, June, 1919, p. 748). Another section describes the work of the Provincial Employment Service. This service was greatly enlarged early in the year in order to meet the requirements of demobilization, and in consequence of the Employment Offices Co-ordination Act which linked up all employment bureaus in the Dominion. The Employment Service of Ontario more than justified its existence, it is claimed, when it found employment within a year for more than 75,000 work-

ers, many of whom would doubtless have had great difficulty in securing immediate employment had it not been for the service of the bureaus. The procedure in connection with Employment clearance work is as follows: An employment superintendent receiving an order for workers whom he cannot obtain locally communicates the order to a zone clearing office, of which there are five in the Province, situated at Port Arthur, Toronto, London, North Bay and Ottawa. If the zone Clearance officer is unable to fill the order from the offices in his district he forwards it to the Provincial Clearing House in Toronto, from which the order is circulated through all the bureaus in the Province. If still unfilled particulars are finally transferred to the Department of Labour at Ottawa by means of a Federal Clearance Bulletin, from which it is brought to the attention of Employment superintendents throughout the Dominion. Applications for positions are similarly circulated in ever-widening circles. Moreover by arrangement with the railway companies reduced transportation rates have been fixed to facilitate the movement of workers going to employment. Of 67,311 men placed during the 12 months ending October 31, 35 per cent were classified as general labourers; lumbering operations absorbed 13.32 per cent; manufacturing metals, 8.98 per cent; building and construction, 8.96 per cent; agriculture, 6.52 per cent; and commercial and clerical work, 5.03 per cent. Of 7,840 women placed in permanent positions 41.02 per cent entered the Domestic and Personal Service group; 19.09 per cent took up commercial and clerical work; 10.49 per cent took work in the metal group; 6.12 per cent in the textile group; and 3.37 per cent in the food, drink and tobacco group. After Toronto the most important centres of employment were Ottawa, Hamilton, Sudbury, Port Arthur, Fort William and Windsor. Hamilton and London were next to Toronto the chief centres for women's employment.

Included in the report is a summary of the administration of the Factory, Shop

and Office Building Act under which 10,844 inspections were carried out, the plants inspected employing 244,008 workers, of which number 159,554 were males over 16 years; 2,902 males of 14 to 16 years, 71, 477 females over 18 years, 6,994 females 14 to 18 years and 179 children under 14 years. The greater part of administration was carried out by negotiation, only eight prosecutions being instituted during the year for non-compliance with orders issued. Of these, seven resulted in conviction, four being for failure to provide room separate from laundry for sleeping and eating, and one conviction each for employment of child labour, Sunday work in bakeshop, failure to provide conveniences, and illegal overtime. Compliance with instructions was generally fair, though there was some evidence of neglect in some minor requisites; some bakeshops were found to be somewhat lacking in cleanliness. The law required the provision of rest and lunch rooms in factories employing more than 35 females, and the women inspectors secured such a provision even for smaller concerns. Fewer accidents occurred during the year, 4,029

being reported in 1919, with 57 fatalities, as compared with 4,907 accidents in 1918, with 78 fatalities. Of the total accidents 20.43 per cent were due to mechanical and 79.67 per cent to non-mechanical causes. As the result of six explosions 29 persons were injured, nine fatally. Belts, pulleys and shafting caused 19.3 of the fatalities, these being largely due to lack of caution in working round revolving belts or under shafting. The necessity for educating the employees in regard to safety is shown by the fact that more than three-fourths of the accidents were due to other causes than machinery. Elevators caused 6 fatalities in 1919, compared with 12 in 1918.

Other activities of the Branch during the year included investigation and research into Mothers' Allowances and vocational opportunities in the industries of Ontario;\* and the administration of the Stationary and Hoisting Engineers' Act, and the Steam Boiler Act.

## REPORT ON MINING IN BRITISH COLUMBIA DURING 1919

THE annual report of the Mines Department of British Columbia for 1919 shows that the gross value of the mineral production in the Province was \$33,296,313, a decrease from that of the preceding year of about 20 per cent. This decrease, however, indicates no decline of normal activity in the industry; from 1916 to 1918, the stimulus of war requirements caused an abnormal expansion, and last year's output shows a material gain over the production in pre-war years. The gross value of metallic minerals produced in 1919 was \$20,036,998, a decrease of about 28 per cent, due mainly to a heavy fall in the

output and in the value of copper, an essential war material. The production of gold, both placer and lode, showed a slight decline from 1918, resulting, it is claimed, from the fixed price of this mineral, combined with the increased cost of its production. The output of silver declined slightly in quantity, but its value increased. Lead also declined, owing to industrial disputes at some of the large producing mines, and to overstocking following the cessation of the war demand. On the other hand, the production of zinc, the third metal in British Columbia in point of value, showed marked gains over the previous

year, but a considerable quantity of the ore was exported to the United States for smelting.

In the 144 metalliferous mines which shipped ore in 1919 the average number of men employed throughout the year was 3,778, of whom 2,246 were underground workers; in the non-shipping mines 481 men were employed. In metalliferous mining there were six fatalities during the year, compared with 12 in 1918. Four of these deaths were caused by falls into chutes, raises, etc.; one by a cage in shaft and one on the surface by the breaking of a compressed air-pipe.

The collieries of the Province approximately maintained the level of 1918, producing 2,267,541 tons net, excluding that used for coke manufacture, valued at \$11,337,705. The coast mines showed gains, in spite of trade slackness in early summer, but the Crow's Nest collieries produced less coal and coke, due to a three months' strike resulting from a demand for recognition of the One Big Union. Fatalities in and around coal mines in 1919 numbered 12, as compared with 28 in 1918, when 16 men were killed in one disaster through the breaking of a hoist cable, the causes being equally divided between falls of rock, falls of coal, and haulage. The report notes that no fatal accidents occurred from falls of ground in 1919, "which speaks well for the care being exercised in making the roof and sides secure;" and none from the use of explosives, this being the second year of freedom from accidents of this class. For the first time in the history of mining in the West Kootenay and Boundary districts no fatal accidents were reported throughout the year.

During the year mining machines produced 4.75 of the total tonnage. Over 71 per cent of the safety lamps

now in use in the province are electric, this type of lamp being credited with saving lives in gas blow-outs. There is one mine-rescue apparatus for every 34 persons working underground in the coal mines and one oxygen resuscitating device for every 166 persons so employed. The report suggests the need for further legislation setting a limit for the permissive percentage of gas in the air in which to allow blasting operations and for compelling certain lines of treatment of coal dust in the mines.

The annual average production of coal per employee in 1919 is estimated by the Provincial Mineralogist at 581 tons per underground employee, or 404 tons per employee including those working on the surface. A table is given showing that the production *per capita* increased more or less regularly up to the year 1912, but that the following years, excepting 1916-18, show a decline, especially in the coast district. "This decreased effectiveness," says the report, "during the last few years, of the labour employed is largely due to the extension of the workings of the mines, causing a greater length of haulage and greater extent of old workings to be taken care of; but some of the increased labour is undoubtedly on account of the greater number of men employed in safeguarding the mine and workmen. In 1919 in the Coast district the production *per capita* of men employed underground has decreased from 645\* tons to 588 tons; and in the Crow's Nest district such production has decreased from 900 tons, the highest ever attained in British Columbia, to 559 tons, the lowest it has been in that district since 1914."

---

\*This figure for 1918 differs from that quoted in the last issue of the LABOUR GAZETTE, page 1311, from a bulletin of the United States Mines Bureau, which gave the year's output per underground worker as 790 tons.

## FEMALE AND CHILD LABOUR IN THE PROVINCE OF QUEBEC

**D**URING the "Social Week" held in Montreal in June last Mrs. M. J. Gérin-Lajoie, Vice-President of the Fédération National Saint-Jean Baptiste, delivered a lecture on "Female and child labour in the Province of Quebec" which was printed in the September issue of *La Bonne Parole*, the official monthly publication of the Federation.

"We may say," Mrs. Gérin-Lajoie stated, "that in our country the married woman who works outside is still an exception and that the army of women workers is principally recruited among girls and widows. Official statistics do not give the percentage of married women who work, but we know, through the inspectors and our trade organizations, that the married woman in need of earning her own living does not go to the factory or store. She is too often found, unfortunately, among charwomen. . . . . The working girl only temporarily accepts the occupation in which she is engaged outside her home, and one understands why the female workers have not, in their casual career, a man's ambition and do not subject themselves to a long period of apprenticeship. The prospect of an early marriage keeps them away, as a general rule, from positions which would demand a sacrifice of time; what they want is to make an immediate gain which may be sufficient to meet present needs, and that is all. Certain careers, however, which are useful to family life, are particularly sought by them; and for such occupations they subject themselves to a more elaborate preparation. These are the needle, clothing and millinery trades,

and among professions, teaching and nursing attract them in large numbers." Woman's work, it was claimed, is naturally subject to the economic conditions of our times, and as specialization is one of the characteristics of modern work, it is probable that women workers will specialize more and more.

It was pointed out that according to the 1911 Census there were then 364,821 women in various employments, divided as follows: Agriculture, 15,887; building trades, 211; domestic service, 138,879; public administration, 4,073; fishing and hunting, 265; Forestry, 13; manufacturing, 98,561; mining, 61; professions, 57,835; trade, 42,184; transportation, 6,852. The above figures have, however, changed in the last few years, and there is to-day further information as to the work in industry by women in Canada. The Bureau of Statistics, Ottawa, published in 1916 the results of an investigation into the condition of industry in Canada. There were 21,306 establishments investigated, of which 7,158 were in the Province of Quebec. "These establishments," Mrs. Gérin-Lajoie stated, employ 514,838 persons subdivided into two categories: superior employees receiving a salary, such as superintendents, managers, office clerks; and unskilled labour or wage-earners. At the top of the ladder are found, as superintendents, managers, 15,639 men and 730 women, of whom 191 are in the Province of Quebec. Office clerks throughout Canada number 26,883 men and 9,431 women, 2,277 of whom are in the Province of Quebec. Finally, among female wage-earners there are 462,200

persons in Canada. Women may be classified in the above total as follows: 74,458 women above 16 years of age; 3,900 girls under 16; 5,631 women working at home; or a total of 83,989 women. Add to it 10,161 superior employees and clerks, and you will find that a total of 94,150 women contribute to the industrial wealth of this country." As the value of manufactured goods is estimated at \$1,407,137,140, if you deduct therefrom the value of raw materials which is \$802,135,862, there remains a value of \$605,001,278 which is that furnished by labour." "And here," said Mrs. Gérin-Lajoie, "I particularly draw your attention to the fact that women constitute 18 per cent of industrial labour, or nearly one-fifth of the total. It is for you to judge the importance of their contribution to national prosperity. And we have said nothing of trade, of agriculture, where they are found in such large numbers; nor of the transformation of raw materials at home, by the wife, in the shape of food products, clothing, etc."

Having thus shown the part played by women in the industrial life of the province, Mrs. Gérin-Lajoie reviewed the legislation enacted by the Quebec Legislature in connection with female and child labour. This review may be briefly summarized under the following heads:

*Education.*—Any child over 16 years of age who wants to work must first secure a certificate showing that he can read and write, said certificate to be given by an inspector and to be produced upon request. At the present time, probably between 4 per cent and 5 per cent of the children are illiterate, and if a child does not possess a sufficient education the inspector may force him to attend an evening school. Unfortunately, evening schools in Montreal exist for boys only, private organizations only having a few schools for girls.

*Age.*—As to the age at which a child may begin to work, the provincial legislation is very incomplete and practically applies to industry only; the other car-

riers are hardly regulated. A child of either sex cannot start working until it is 14 years old; in establishments considered as dangerous a boy under 16 years of age cannot work, nor a girl under 18. Women of any age are prohibited from working in the mines. Inspectors are often deceived as to the age of children seeking work; widows and wives neglected by their husbands are often tempted to practice this kind of deception, and Mrs. Gérin-Lajoie thinks the adoption of a Mothers' Pension Act might perhaps bring a remedy to this evil. In other provinces of the Dominion the regulations may not be more complete than in Quebec, but compulsory education checks abuses.

*Hours of labour.*—As to hours of labour, the same difference is to be found between industry and other public establishments. In industry the general rule is 60 hours per week, and the time may not exceed 12 hours per day. Work may not commence before 6 a.m. nor be continued after 9 p.m. It is a practical prohibition of night work for women and children. The cotton industry is subjected to special regulations. No woman or child may work in that industry more than 55 hours per week or more than 10 hours in any day. Work must not begin before 7 a.m. or continue after 6.30 p.m. In case of emergency the inspector may authorize overtime, but in no case shall any work be done between the hours of 9 p.m. and 6 a.m.

As far as stores are concerned, the Legislature has authorized municipalities to make early closing by-laws. "Customs at certain times do more than laws. Thanks to an educational movement which is steadily increasing and which a Congress like the present one accelerates, social sense is increasing among employers, and usages tend to a reduction of the store female employee's working day."

*Meal time.*—In the cotton industry the law requires that a full hour be granted for the noon meal; in other industries nothing is specified, but accord-

ing to custom at least one hour is given the female worker for her dinner, and in all industrial establishments the female worker must be able to get some fire to warm up her food. If the importance of the establishments warrants it, the inspector may require that a separate dining-room be set aside for female employees. This requirement is of particular importance in the boot and shoe industry, on account of bad odours. In some cases a restaurant is connected with the establishment and there is a rest-room which female employees may use freely.

*Seats.*—In factories the employees are almost always seated while working, so that the law concerning seats hardly applies here; it affects more particularly store employees. The law requires the employers to put some seats at the disposal of employees so they may sit down when their work permits them to do so. This law is very much disregarded, on account of the lack of inspection of stores.

*Inspection.*—"We have just mentioned the lack of inspection of stores which is felt in spite of the remarkable devotion of our inspectors to duty; the same defect is to be found in small industrial establishments. Statistics mention 1,415 small shops employing a maximum of 5 hands in the Province of Quebec. How can they all be visited with 14 inspectors only, and yet the law can be efficient only on condition that its enforcement is closely watched. Six male and two female inspectors for the city of Montreal, is that enough?"

*Home work.*—There are in the Province of Quebec, 1,758 women working at home, in the following occupations: clothing, millinery, furs, toilet articles and boots and shoes. There is no law on the matter, but "our committee," Mrs. Gérin-Lajoie stated, "by suppressing the middleman and itself making the

contract, has secured a substantial raise of the home worker's wages."

*Minimum wage.*—A law was recently enacted by the Provincial Legislature fixing a minimum wage for women in industry, but it is alleged that this law is not being enforced, because no funds were voted for its enforcement, and also because public opinion does not appear ready to accept it and it is not believed that it will prove effective in raising women's wages. Mrs. Gérin-Lajoie tells us that "female workers themselves think a minimum wage is a premium to idleness and that in a system where the employer has decided to spend a certain sum only on his working staff, what he pays with one hand he will withdraw with the other; what he gives to unskilled workers will prevent an increase in the competent employee's wages."

Mrs. Gérin-Lajoie thinks the Province of Quebec is ahead of most other countries in the matter of legislation concerning female and child labour and that provincial legislation and the customs of the various trades have secured for them most of what was asked for in the resolutions adopted at the International Labour Conference held at Washington, D.C., in October, 1919. In her opinion, the more pressing reforms are of the moral order and to be realized they need the co-operation of women themselves. "what must be given the working woman is a well-tempered character in order to meet the duties of her condition; a consciousness of the part she plays in the working world and of the effect of her acts on the destinies of the proletariat. . . . Formation of the mind through a general culture, efficiency acquired through technical education; such are the lines on which the reforms should be made. Public authorities should have the right to interfere, but women workers must, after all, rely mostly upon themselves for the improvement of their conditions."

## NATIONAL CONFERENCES ON TECHNICAL EDUCATION

**T**WO conferences of unusual interest, destined to have a far-reaching effect upon the educational systems of Canada, were those on Technical Education and Educational Statistics held on October 25-28 in Ottawa. For the first time in the history of Canada the Ministers of Education of the various provinces, and their chief advisers, met to discuss the educational problems of the Dominion, and draft resolutions affecting the work in every province.

The conference on Technical Education originated from a suggestion of the Minister of Labour that representatives of the Departments of Education of the various provinces should meet to discuss the vital problems relating to Technical Education. The arrangements for the conference were completed by the Director of Technical Education for the Dominion. At the same time the Bureau of Statistics arranged for the Conference on Educational Statistics. In order that the same delegates might attend both conferences it was arranged to have them follow one another.

The combined conferences were held in the Parliament Buildings, and that on Technical Education commenced at 10 a.m. October 25 and concluded the following evening.

The following is a list of the delegates representing the various provinces:

### British Columbia—

Mr. J. Kyle, Organizer of Technical Education.

### Alberta—

Hon. G. P. Smith, Minister of Education.

Mr. D. A. Campbell, Director of Technical Education.

Mr. J. Ross, Deputy Minister of Education.

### Saskatchewan—

Mr. R. F. Blacklock, Registrar, Department of Education.

### Manitoba—

Hon. R. S. Thornton, Minister of Education.

Mr. R. B. Vaughan, Director of Technical Education.

Mr. R. Fletcher, Deputy Minister of Education.

### Ontario—

Hon. R. H. Grant, Minister of Education.

Dr. F. W. Merchant, Director of Technical Education.

### Quebec—

Mr. A. Macheras, Director of Technical Education.

Mr. Ian MacLeish, Assistant Principal, Montreal Technical School.

### New Brunswick—

Mr. F. Peacock, Director of Technical Education.

Rev. Father Tessier, Member, Vocational Education Board.

### Nova Scotia—

Dr. F. H. Sexton, Director of Technical Education.

Dr. A. H. MacKay, Superintendent of Education.

### Prince Edward Island—

Mr. R. H. Rogers, Superintendent of Education—

### Conference on Technical Education

The Honourable Senator G. D. Robertson, Minister of Labour, welcomed the delegates and outlined the purpose of the conference. In his address the Minister emphasized the importance of proper training for vocational teachers and the benefits of occupational guidance for children before leaving the elementary schools. The Minister also

outlined the policy of the Department of Labour in administering the provisions of the Technical Education Act; and stated that the Department aims to co-operate with the provincial authorities in developing and extending the work already established, to assist the provinces with special problems and to aid them by collecting and distributing information regarding courses, text-books and new developments in Technical Education. The Minister assured the conference of his interest in the work and promised to do all in his power to carry out its recommendations.

Immediately following the Minister's address the Honourable G. P. Smith, Minister of Education for Alberta was elected chairman of the Conference. Dr. A. H. MacKay, Superintendent of Education for Nova Scotia was elected vice-chairman, and Professor L. W. Gill, Director of Technical Education for the Dominion, was appointed secretary. The conference then proceeded to discuss the following questions relating to Technical Education:

1. Teacher Training.
2. Prevocational Classes and Vocational guidance.
3. Courses of study.
4. Text-books.
5. Condition for Entrance to Technical Classes.
6. Length of School Day.
7. Length of School Year.
8. Educational Reports, Method of Preparing.
9. General Supply of Teachers.

The following resolutions were adopted and the Secretary was instructed to forward them to the proper authorities:

RESOLUTION No. 1.—WHEREAS, the supreme need in the proper and efficient development of technical education throughout the Dominion of Canada is an adequate supply of specially trained and skilled teachers,

AND WHEREAS, only a very small number of thoroughly trained vocational instructors has been found in any and all of the provinces.

AND WHEREAS, no institution exists in Canada for the preparation and training of teachers of vocational subjects,

AND WHEREAS, the work of training such teachers can be done more economically and more efficiently by interprovincial co-operation than by independent efforts,

AND WHEREAS, such co-operative action will aid in the development of broader conceptions on the part of the individual teachers and a more intense national spirit,

BE IT RESOLVED that the representatives of the Departments of Education of the several provinces of the Dominion in conference assembled urge that immediate action be taken in the following direction:

1. That the Federal Government and the various provinces co-operate to establish and maintain one central institution for the adequate training of special teachers for vocational education.

2. That the basis of co-operation should be as stated hereunder:

(a) That the Federal Government provide the accommodation and equipment and one-half the cost of maintenance.

(b) That the Provincial Governments combine to bear the other half of the maintenance costs in proportion to the urban population of each Province, included in towns and cities having over 3,000 inhabitants.

(c) That the ownership and management of the institution be vested in a Board of Governors with condition that the ownership shall revert to the Federal Government in case the property should no longer be required for the designated purpose; the members of said Board to be appointed as follows:—Three by the Province of Quebec, three by the Province of Ontario, one by each of the other Provinces and two by the Federal Government; members to be appointed for three years, one-third to be retired each year; the Board to select its own chairman.

(d) That the institution have a dual staff—French and English.

(e) That transportation of teachers-in-training be paid for by the training institution.

RESOLUTION No. 2.—RESOLVED that the Secretary be instructed,

(1) To forward a copy of Resolution *re* teacher-training to each of the provincial governments, and, on behalf of the Conference, ask them to co-operate in giving effect to the resolution.

(2) To secure replies from the various provinces as soon as possible, and in case he finds that six or more provinces signify their willingness to pass the necessary legislation and

co-operate in giving effect to the proposal, to ask the Minister of Labour to endeavour to secure the co-operation of the Federal Government.

RESOLUTION No. 3.—WHEREAS, it is desirable that children should have more opportunities to obtain an educational development which is suitable to their native ability and aptitudes,

RESOLVED that junior industrial courses should be established for children who have completed grade VI, such courses to extend over a period of three years and to have a decided bias toward one or other of the main divisions of industrial activity, viz., commercial, manufacturing, trades, agriculture, household.

RESOLUTION No. 4.—RESOLVED that a committee, consisting of the federal director and the provincial directors, or other representatives, be appointed to formulate a system of vocational guidance.

RESOLUTION No. 5.—RESOLVED that the Conference ask the Federal Department of Labour to issue from time to time suggestive courses of study, texts, pamphlets, bulletins, monographs, and other material which would assist provincial officers in the problems of organization, development and administration of technical education.

RESOLUTION No. 6.—RESOLVED that, in the opinion of this conference, the school year for full-time technical classes should be of the same length as the ordinary school year; and, further, that the school year as at present observed is too short.

RESOLUTION No. 7.—RESOLVED that university authorities be urged to prescribe a special Matriculation Course and Examination for pupils attending technical schools who desire to enter the faculties of Engineering or Home Economics.

RESOLUTION No. 8.—WHEREAS the custom duties imposed on machines and equipment required in technical schools for educational purposes unduly discriminate against the technical school in comparison with other educational institutions for which scientific equipment is admitted free of duty,

RESOLVED that this Conference ask the Minister of Labour to interview the Minister of Customs with the view of securing either a more liberal interpretation of the present tariff clause relating to scientific apparatus, or an amendment of the same, so that technical school equipment may be admitted free of duty.

RESOLUTION No. 9.—WHEREAS the education of our new Canadians of foreign origin cannot be accomplished without the regular operation of the schools in non-English settlements,

AND WHEREAS this problem is one of national responsibility and national importance, quite beyond the ordinary financial possibilities of the Provinces,

RESOLVED that this Conference is strongly of the opinion that the Federal Government should, without delay, provide financial assistance to the Provinces, so that an adequate supply of specially selected teachers may be trained for this work, and provided in rural districts with permanent and attractive homes,

RESOLVED further that copies of this resolution be forwarded to the Premier of Canada, to the Minister of Labour and to the Minister of Colonization.

### Conference on Educational Statistics

The Conference on Educational Statistics commenced on the morning of the 27th and concluded the following evening. At this Conference Mr. G. W. Parmalee, Secretary of the Protestant Committee of the Department of Public Instruction, and Mr. M. J. Miller, Secretary of the Catholic Committee of the Department of Public Instruction, represented Quebec in place of Mr. Macheras and Mr. MacLeish, and Mr. R. B. Wallace, Statistician of the Department of Education, New Brunswick, was an additional representative of New Brunswick.

The Right Honourable Sir George Foster, Minister of Trade and Commerce, addressed the gathering and referred to the need of better educational statistics which would give an accurate conception of the work of the Dominion as a whole. He pointed out how the Bureau of Statistics can help the various provinces by compiling the vital statistics of each in a uniform manner and by avoiding duplication of work and expense. The Minister emphasized the need of a uniform system of questions from which to compile the figures, and the lessons to be learned from accurate and comprehensive statistics.

Mr. S. A. Cudmore, Chief of Education Statistics, was appointed secretary of the conference, and the Honourable G. P. Smith and Dr. A. H. MacKay continued to act as chairman and vice-chairman respectively.

The following is a list of the subjects discussed:—

1. Statistical Year.
2. Equation of Grading.
3. Population of School Age.
4. Age, Sex and Grade Table.
5. Schools Open Table.
6. Attendance Table.
7. Grading, Experience and, Salaries of Teachers.
8. Teachers in Training.
9. Secondary Schools Table.
10. Secondary Schools Attendance Table.
11. Secondary Teachers' Table.
12. Subjects of Secondary Education.
13. Financial Statistics.
14. Statistics of Special Schools.

The resolutions adopted by the conference are as follows:—

RESOLUTION No. 1.—Resolved, that this Conference considers it desirable that the educational statistics of the several Provinces, or at least those relating to personnel rather than finances, should be collected for school years ending June 30, and requests the Provinces not now collecting their educational statistics on this basis to give serious consideration to the desirability of making this change in their statistical year.

RESOLUTION No. 2.—Resolved, that this Conference approves of the principle now accepted in the majority of the Provinces of grading the pupils taking elementary and secondary work in twelve grades corresponding to the years of a normal school life, eight grades to be considered as elementary and four as secondary, the twelfth grade to include only work above pass matriculation standard, it being, however, understood that this grading for comparative purposes involves no changes in present terminology.

RESOLUTION No. 3.—Resolved, that this Conference recommends that the Provincial Departments of Education take cognizance of the statistics of school population collected by the Dominion Bureau of Statistics at the decennial census, at the quinquennial census of the Prairie Provinces, and also of such intercensal estimates of population as may from time to time be made.

RESOLUTION No. 4.—Resolved that the Department of Education of each Province be requested to supply to the Dominion Statistician and to each other province a concise statement showing (1) The classification of the teachers' certificates, and (2) The classification of the several types of schools to-

gether with the scope of the work done by each.

RESOLUTION No. 5.—Resolved, that in the collection and compilation of the statistics to be included in the annual report on Education Statistics, there should, as a necessary requisite to the success of the scheme, be close and cordial co-operation between the Provincial Departments of Education and the Dominion Bureau of Statistics, and it is expedient that the education statistics for primary and secondary schools under public control should continue to be collected by these Departments while the Dominion Bureau of Statistics, as possessing an expensive battery of tabulating machinery adequate to the work, should undertake the compilation of such statistics when collected, as well as the collection and compilation on a comparable basis of the statistics of primary and secondary private schools and of institutions of higher education, where this is not already done.

RESOLUTION No. 6.—Resolved that in securing education statistics on a Dominion-wide basis, chief attention should naturally be concentrated on the more general topics of educational statistics, such as statistics of the age, sex, and degree of advancement of pupils, school attendance, teachers' qualifications, experience and salaries, subjects taught, together with the revenue and expenditure, and the assets and liabilities of school systems.

RESOLUTION No. 7.—Resolved, that the schedule submitted by the Education Division of the Bureau of Statistics be recognized as in conformance with the purport of the last resolution, and that, as amended by this Conference and subject to the understanding here arrived at, they be accepted as furnishing the basis satisfactory for a Dominion-wide statistical survey of education, and that the adoption of these forms be recommended by this Conference to the Provincial Departments of Education.

RESOLUTION No. 8.—Resolved, that this conference express its appreciation of the action of the Department of Labour and of the Bureau of Statistics in arranging for representatives of the various provinces to discuss together the many matters of mutual interest which have been brought before us.

At the close of the conference the delegates visited the extensive plant of the Bureau of Statistics and examined the efficient tabulating machine and other devices for compiling statistics.

Those in attendance were very pleased with the success of the conferences, and many beneficial results are expected in both branches of the educational work.

## THE WORKERS' EDUCATIONAL ASSOCIATION

### Movement for higher education of workers in Canada, and in other countries

IN the LABOUR GAZETTE of February, 1919, there appeared an article by Professor R. M. MacIver on the Workers' Educational Association in Canada, in which an account was given of the formation of the Workers' Educational Association of Toronto and District, the outgrowth of a movement originating in the United Kingdom a few years before the war. The Association has recently commenced its third session with classes in Economics, Political Philosophy, Psychology and Logic, English and Rhetoric, and Public Finance. About 100 attended the organization meeting held on October 14. A leaflet issued by the Association contains a synopsis of the various studies taken up last session. The course in Economics conducted by Professor R. M. MacIver dealt with the various theories of value, and their application to wages, rent, interest, etc. This was succeeded by a discussion of the relation of the state to economic conditions. Finally, the meaning of national wealth, and the influence of wealth on welfare were studied. The study group of English Literature, conducted by Professor Pelham Edgar, dealt with the study of prose and poetry, with special attention to the writings of Shakespeare and Dickens. It also included rhetoric, and the students were taught the best use of words and how best to express their ideas. The essential features of grammar and composition were given to assist students in essay work. Mr. A. J. Glazebrook conducted the course on Public Finance. Included in this course was the early history of money; the slow process by which gold became an exact standard of value; experiments in paper expansion and the theory of money; the use of paper money; the Industrial Revolution and foreign trade; modern finance—national and international; and the coming of the great banks and the

machinery of exchange. In the group on Political Philosophy, conducted by Professor W. S. Milner, the study of Modern Political Thought was taken up, and Hearnshaw's "Democracy at the Crossways" was used as a foundation for reading and discussion. The study of Logic and Psychology, conducted by Mr. E. J. Pratt, took up the significance of perception, memory and imagination for the processes of belief and inference; factors that give rise to fallacious judgment; the personal equation; prejudices and prepossessions versus the scientific spirit; individual and mass psychology; relations of physical well-being to temperament and outlook, etc.; classification of people according to mental characteristics; psychological tests, their principles and application. Civic Administration was dealt with in a group conducted by Principal W. L. Grant. In the previous session Principal Grant had treated the political and economic development of Canada under the French and British regimes; last session he took up a study of the systems of municipal government in Great Britain, France, Germany, and the United States; using as textbook the works of W. B. Munro. The Ontario system was also discussed, with special reference to its working out in Toronto.

As may be seen by the above synopsis the education provided in these courses is not technical but cultural, the object of the Association being to provide for adult workers the opportunity to improve their education in the subjects of most enduring interest. The Association believes that methods can be devised for giving a real training in such subjects to men and women who, being engaged on their work during the day, can devote only some spare time at night to study and instruction. An elective commission establishes classes on subjects selected in accordance with the demands

of the workers. The class tutors are chosen for knowledge of the subject and for ability to teach. The work is carried on largely by discussion in which the class members are expected to take part.

The Association has the full endorsement and financial support of the University of Toronto, the District Trades and Labour Council, local trades unions, and the general public. Its executive control is vested in these bodies, together with representatives from the general membership.

An application is understood to have been received from Hamilton requesting the inauguration of the same sort of University extension work there, and labour organizations of Ottawa are taking steps in the hope of making arrangements for similar classes.

A plan was also laid before the Senate of the University of Alberta, in September, for the formation of night classes in economics, history, and other subjects in Calgary, Edmonton, Medicine Hat and Lethbridge, and in the Drumheller and Crow's Nest districts, during the present scholastic year.

#### Similar movements elsewhere

Colleges for the instruction of members of trade unions along similar lines

are being established by trade unions of Pennsylvania at Philadelphia, Pittsburgh, Reading, Eaton, Altoona and Harrisburg. They will be supported by nominal tuition fees and by the unions of the city where they are located. The Trade Union College of Philadelphia opened on October 4.

An educational department has been organized by the Amalgamated Clothing Workers of America under the direct supervision of the General Office of the Union. New York has been made the headquarters of the department, and it will take in every important clothing centre where the union is established. Courses will be offered in various languages in accordance with the desire expressed by the members. The services of many prominent educationalists of New York have been obtained for the coming winter.

A labour university has recently been created at Frankfurt, Germany, for the purpose of fitting workmen and small office holders to become political leaders, heads of unions or co-operative societies, or secretaries of labour organizations. Operating expenses have been guaranteed by the German government.

A workers' education movement in Belgium is dealt with in a separate article.

---

### WORKERS' EDUCATION IN BELGIUM

**T**HE Belgian Central Board for Workers' Education, "the most comprehensive undertaking for the education of the workers by the workers, and for the purposes of the labour movement itself, that has been made in any country of Europe," is described by Henry de Man in an article in *The Survey* of New York. The Central Board is the joint enterprise of the Belgian Labour Party, the labour unions, and the co-operative societies. Its inception was due to the labours of Emile Vandervelde,

the well-known socialist leader, whose schemes for workers' education about ten years ago engaged the interest of Ernest Solvay, the millionaire philanthropist and social reformer, and resulted in the formation of a board of representatives of the three bodies in 1911, supported by substantial subsidies from M. Solvay.

The directors of the new "Centrale d'Education Ouvrière" decided soon after its inception to reserve all its financial resources for administrative purposes on a national scale, rather than to

dissipate them on local efforts. They believed that under the stimulus of a central body the local labour organizations would themselves be induced to devote part of their funds to educational undertakings. Thus the rule was made that schools must be self-supporting or in charge of local organizations financially independent. This policy has been fully justified by results, and at the present time, it is said the budget of the Centrale represents only a small fraction of the total amount of money now spent by the labour organizations for educational work all over the country; moreover, the Centrale itself no longer depends on the original Solvay fund, but now derives more than two-thirds of its own income from voluntary subscriptions from the national labour organizations.

The purpose of the Centrale, according to its constitution, is "to develop and co-ordinate all institutions that aim at providing the workers with such knowledge and qualities as will facilitate their emancipation as a class in every field." Accordingly, although general education might tend towards such emancipation, the function of the schools is not to promote public education at large, but education with conscious aims in sympathy with the labour movement. In other words the Centrale is not a philanthropic but a "class institution of the labour movement for the labour movement." Its board is composed of three annually elected representatives of each of the three great labour organizations named above, together with one delegate of the Socialist Young People's Federation.

The work of the Centrale is divided into departments dealing respectively with school administration, lectures, libraries, information, moving pictures, and travelling scholarships. The most important part of the whole organization, however, is the local or district committee of workers' education, which administers the labour or "socialist" schools. These schools or classes are conducted on the following lines: The pupils are nominated in a given proportion by local labour organizations, which pay a share of the cost, and are kept in-

formed of the attendance of their pupils; pupils are limited in number to about 30. The curriculum consists of a series of discourses extending over several weeks on some subject connected with the labour movement. The teachers are appointed and paid by the Central Board. Since the war the school system has been reorganized into three degrees, namely, the elementary local schools, the district and the national schools. For the local schools a standard course is set for each year, the course for the present year consisting of a general introduction to the principles of the labour movement in nine lessons, entitled (1) Production in the past; (2) The birth of capitalism; (3) The concentration of industries; (4) The workers and the industrial system; (5) Trade unionism; (6) The organization of a trade union; (7) The co-operative movement; (8) Political action by labour; (9) The conquest of power. Specialized teaching is left to the district and national schools, to which the aptest pupils are sent from the elementary local schools. The national schools provide instruction in some special subject, such as unionism, co-operation, socialism, or municipal government, the pupils being assembled for a few weeks at Brussels or some other centre. A permanent national school, however, with facilities for a six months' course is now being organized for the coming winter. Records of every pupil are kept by the Centrale, and frequent conferences are held between teachers and other officials for the purpose of improving the educational system in the light of experience. The main aim is to awaken the pupil's intellectual curiosity and to enable him to generalize from his own experience. The pupils are trained in self-expression, the use of note-books being discouraged, while full encouragement is given for the use of original sources in the library. No examination test of knowledge is made at any stage beyond general discussions between teacher and pupils in the course of instruction. Some of the best teachers, Mr. de Man says, are self-taught workmen, who can adapt themselves to the

mentality of their fellow-workers. The present director, or general secretary, of the Centrale, for instance, was an iron-moulder before he became a teacher of economics in a village high school, where the Centrale found him. At the permanent national school, which opens in Brussels this year, the pupils are enabled to make an original contribution to the work of the school by "lending themselves" for a part of each day to a co-operative society, trade union, or labour newspaper, the money thus earned being used to defray the cost of their schooling.

Other activities of the Centrale in-

clude an extension service to provide lecturers on various educational subjects (exclusive, however, of propaganda, which is left to the political organizations); an art section conducted by local and district committees, which organizes tours of theatrical companies, musicians and other artists; the maintenance of a Central National Library, already containing about 60,000 works, mostly on socialism and the international labour movement. The Centrale further administers a privately subscribed fund providing travelling scholarships to selected pupils of the national schools.

### INDUSTRIAL COUNCILS IN BELGIUM

IN a recent issue of *The Survey*, Mr. Henry de Man of Belgium gives an interesting account of the system of Industrial Councils in Belgium which the writer declares has proved to be the most essential of all the means to bring about the economic rehabilitation of the country. This opinion is confirmed by Mr. H. H. Morgan, United States Consul General for Belgium, who reports as follows: "National committees, so called, [industrial councils] made up of employers and employees and including representatives of the Ministry of Labour, have been so successful in settling labour disputes in Belgium that they are being formed in increasing numbers in various industries. They were exceptional in Belgium before the war. Union labour, which first regarded them with distrust, now favours them. . . . These committees were created on the initiative of the Government to study the conditions of labour, and their decisions are applicable to particular industries throughout the entire Kingdom. Strikes in important manufacturing industries, such as the glass, iron and steel, and other industries, have been avoided by these committees, and their institution

is deemed by employer and employee to mark a considerable advance in settling the problems of both."

These industrial councils are an outgrowth of the conditions prevailing after the armistice and their functions were evolved out of industries themselves, receiving recognition from the State as their powers developed. All the government was asked to do was to nominate officers of the Department of Industry and Labour as impartial chairmen, and provide the necessary secretarial staff to record and publish the decisions. Before the war, collective agreements were confined to local arrangements in minor industries, but now collective bargaining with the unions is the rule everywhere. This is attributed to the alteration of the balance of power between capital and labour, trade unionists having recently increased enormously in numbers. It is stated that in one year their membership grew by about 400 per cent, and that in the chief industries close to 100 per cent of the labour is unionized. National industrial councils are now regulating labour conditions in the following industries of Belgium: mining, metallurgy, mechanical industries, building trades, structural wood and furniture, glass, gas and electricity, street railways and the port of Antwerp (dockworkers, etc.).

All these councils have been given a legal status. In most of the other industries there are permanent joint boards of the employers' and labour organizations for the fixation of labour conditions and the settlement of disputes, but their constitution has not yet been legalized.

A description is given in Mr. de Man's article of the organization of the National Council of Mines, the most important of all, as typical of the rest. This council was instituted by Royal Decree on April 18, 1919, to examine the demands of the miners with regard to the establishment of the eight-hour day. After it had enlarged itself into an organization for the settlement of all labour conditions in the mines, it was given a permanent status by Royal Decree on January 24, 1920, "to arrive through the co-operation of delegates of the coal operators' and miners' associations, at a peaceful settlement of all questions that concern the working of the mines." The national council consists of ten employers, nominated by the coal operators' association, ten delegates of the workers and two representatives of the Departments of Industry and Labour, who act as chairman and secretary respectively without a vote. The workers' representatives are appointed by the two industrial unions in proportion to their membership, the Socialist union having eight and the Christian (Roman Catholic) union having two. The National Council fixes the hours of labour (within the limits of the eight-hour law), the wage scale and general labour conditions, to make them apply uniformly to the six coal districts. The government pays the expenses of the council's meetings and officers. The National Council has instituted three groups of local bodies for the settlement of local disputes, six district councils, local councils for each concern working connected pits, and permanent workers' committees for each pit. The district council comprises twelve members, six being representatives of the operators of the district, and six being miners working in the district, or union officials living there, and also two chairmen and two secretaries, one worker and

one operator each. These councils deal with disputes of local importance referred to them by the pit councils and with demands of district organizations. By agreement no strike or lockout will be called unless the dispute has been laid before the district council for settlement by conciliation, but the council is given only seven days in which to effect a settlement. The local councils are formed of representatives of the operators working a mine or a group of pits in a single locality and of the workers' committees of the industrial pits. They are given three days in which to effect a settlement of the local disputes referred to them, after which the case, if not settled, must be submitted to the district council. The pit committee, of which there is one for each pit, consists of six members, three active and three alternatives elected by secret ballot, two being elected by the underground day shift, two by the underground night shift, and two by the surface workers. The right to vote is limited to workers over twenty-one years of age and employed for at least one month by the same company. Only voters of 30 years and over, employed for more than six months by the same company and actually working at the pit are eligible as candidates. No candidates can be elected unless their names are presented by a labour union or by a group of unorganized workers representing at least ten per cent of the voting strength of the pit. The delegates are elected for two years. These councils have supplanted various other schemes which had been attempted by the government or by private employers. Councils of industry and labour had been established by the government many years ago, but they failed because their members, both employers and workmen, were elected by general vote in special industrial elections, so that the employers' and workers' organizations as such were not represented. It was felt on both sides that there was no real guarantee for the execution of joint agreements unless they were arrived at by direct representatives of the employers' and workers' unions, which were

thus made morally responsible for their observance. Many attempts had also been made by employees since the middle of the nineteenth century to create an outlet for the workers' desire to participate in the fixation of labour conditions while keeping them out of the unions. But all the factory councils and shop committees failed both to create durable harmonious relations within the individual enterprises and to stem the general tide of unionism. It was only, Mr. de Man claims, after a great majority of the workers had organized into powerful unions, formed along industrial and not craft lines, that a real beginning was made with giving them a share in determining what their labour conditions should be; also it was only after the unions had been given such a minimum

share in the control of industrial conditions that they advocated not only willingness to work but also willingness to reach a high output. The principle that the interest of the community and of the workers who form its majority, requires an increasingly high level of productivity, and that every encouragement should be given to any method that will increase the economic result of a given human effort, is now the generally acknowledged doctrine of the Belgian labour movement. The recent Belgian experience shows that strong industrial unions, genuine collective bargaining, a guaranteed minimum wage, and organized representation of the workers in industrial councils, create conditions under which it is possible to interest the workers in the results of production.

---

### PROPOSAL FOR THE "DECASUALIZATION" OF BRITISH DOCK LABOUR

IN a recent issue of the LABOUR GAZETTE (April, 1920), reference was made to the "decasualization" of labour as a feature of the Manchester Building Trades Guild scheme. The Transport Workers' Federation of Great Britain have now placed before the waterside employers a scheme suggesting "industrial maintenance," or the provision by the industry as a unit for all the workers engaged in it, whether there is regular work available for them or not. The basis of the scheme, as described in the *New Statesman* is that every docker who presents himself regularly for work should be guaranteed a minimum weekly income of £4—that is, five days' pay at the national minimum rate of 16s. a day. This guarantee would be given, and the amount paid, not by any single employer, but by the industry as a whole, and the expense would be met by a levy spread over the whole industry. This levy, the Transport Workers propose, should take the form of a charge of 4d. per ton on all merchandise handled. The scheme is estimated as

likely to cost about £2,500,000 yearly, this calculation being based upon an average rate, for employment and under-employment, of 10 per cent. The proposal implies the pooling of labour resources and the registration of all recognized dock labour. To this end it is suggested that a system which was tried at the Liverpool docks a year or two before the war, be revived, and that clearing houses be established at each port, manned however, not by ordinary Employment Exchange officials, but by men with practical knowledge of dockwork. Each docker would report weekly at his clearing house and be allocated to his job as required; there also he would draw his pay, or have the deficiency made good, the clearing house having its account with each employer at the port. At the present time, as the result of the findings of Lord Shaw's committee, the dockers' national minimum wage is 16s. a day. This advance in wages, however, was largely neutralized, it is said, by the increased irregularity of employment which accompanied it.

## PROPOSED AMENDMENTS TO BRITISH WORKMEN'S COMPENSATION ACT

### Report of Departmental Committee on Act of 1906

#### INSURANCE.

**A** DEPARTMENTAL Committee of the British Home Department was appointed in May, 1919, "to inquire into the working of the present system of the payment of compensation for injuries sustained in the course of employment, and to consider and report whether it would be desirable to establish a system of accident assurance under the control or supervision of the State; and to report, further, what alterations of the law will be required to remedy defects which experience has disclosed or to give effect to their recommendations." (See LABOUR GAZETTE, August, 1919, page 868.). The committee's report, recently issued [Cmd.816] reviews the Workmen's Compensation Act of 1906 in the light of experience of its operation during twelve years, and recommends a number of changes suggested by the evidence of witnesses representing trades unions, employers' associations, chambers of commerce, county court judges, the British Medical Association, insurance and friendly societies and government departments. Information was also obtained by means of questionnaires addressed to the governments of the British Dominions and of many foreign states, as to the practice of workmen's compensation abroad, for, as the report points out, "the idea that a workman injured in his employment should be entitled to compensation irrespective of any question of negligence, revolutionary in 1897, and still novel in 1906, has by 1920 achieved world-wide acceptance;" forty-two of the forty-eight states of the American Union, all the British Dominions, and several other countries including Russia (in 1913), Portugal and Japan, have enacted legislation based on this principle. The provision of the Act of 1906, which came into force on July 1, 1907, were outlined in the LABOUR GAZETTE for August 1907 (page 189).

The first recommendation of the Committee relates to the system of insurance of employers against financial liability connected with industrial accidents or diseases. The existing system is one of voluntary organization based on private enterprise, employers availing themselves of the insurance offered by regular insurance companies, forming themselves into Mutual Associations, or carrying their own risks, the latter class being known as "self-insurers." The committee was required to ascertain whether the existing voluntary system could be improved by introducing a new system of accident assurance under the control or supervision of the State.

Three alternative methods were considered in this inquiry; (1) The establishment of a State fund, either having a monopoly of workmen's insurance or in competition with private companies; (2) The organization of a state system of mutual insurance; (3) State control of the rates, expenses and profits of insurance companies.

The monopolistic, sometimes called the "German" plan as following the German Accident Insurance Law of 1911, is favoured in the several American states. In Canada and Australia also, the first Workmen's Compensation acts followed the British plan, but most of the Canadian statutes have recently been remodelled on the lines of a state monopoly.\* The evidence satisfied the Committee that—

1. Insurance with an insurance company or a mutual association is a popular medium among employers for covering compensation risk.

\*See LABOUR GAZETTE. August, 1920, pages 1012-1020

2. Employers generally have a preference for private enterprise rather than state management.

3. Employers believe that administration by the State must necessarily become rigid and slow, and that owing to the lack of competitive interest it may easily become inefficient and expensive.

4. The administration of the Act necessarily involves many disputes of law and fact, and it is not desirable for the State to enter a sphere of administration involving disputes with workmen which frequently become the subject of litigation.

5. The workmen's representatives, while strongly in favour of a State scheme, were emphatic in their opposition to any proposal that they should be called up to contribute to a State fund, even for the purpose of providing additional benefits.

The defects of the existing system are declared to be (in the case of insurance companies) the absence of sufficient protection for the employer against excessive premiums; in the case of mutual associations the absence of any guarantee that sufficient monies are laid aside from year to year to meet liabilities; and in the case of "self-insurers," the possibility that the employer will be unable to meet a workman's claim for compensation. "We are of opinion," the Committee declare, "that these defects can be largely remedied without resort to a State system of insurance, though not without the introduction of a certain measure of State control." They therefore recommend that the present system of insurance continue, subject to the following modifications:—

State supervision of rates of insurance companies with a view to the reduction of their expenses and profits in workmen's compensation; not more than 30 per cent of the premium income to be expended in profits, management and commission; the maximum rates of premium to be approved or fixed by the proposed new Government Commissioner (whose duties are described below); mutual associations to be placed under

the same obligations as insurance companies as to setting aside funds, furnishing returns, etc.; every employer (other than the Crown, a public authority, a statutory company, or a householder in respect of domestic servants) to be required to insure against workmen's compensation risks (no point in the inquiry, the report states, was more strongly supported by evidence than the proposal to adopt compulsory insurance); employers with an annual wage roll averaging more than £20,000 over a period of three years to be entitled to claim exemption from compulsory insurance upon compliance with prescribed conditions.

#### INJURIES COMPENSATED.

The injuries coming within the scope of the Act should continue, in the opinion of the Committee, to be those "arising out of and in the course of the employment," while the "industrial diseases" provided for should continue to be those specific to the employment. The committee recommend, however, that to simplify procedure, employer and workman be enabled to enter into a binding agreement as to payment of compensation for a scheduled disease without a certificate from the certifying surgeon.

#### PERSONS ENTITLED TO RECEIVE COMPENSATION.

Under the existing act the classes of persons excluded are non-manual workers in receipt of over £250 a year; casual labour employed otherwise than for the purpose of the employer's business; London taxicab drivers (on the ground that they are bailees of their cabs); and fishermen working on shares. The committee recommends that the Act be amended to include the following clauses:—(a) Non-manual workers receiving not more than £350 a year. (b) Casual workers in connection with any game or recreation where they are engaged or paid through a club (otherwise casual employment should remain as at present). (c) Taxi-cab drivers,

(d) Share fishermen in the trawler industry. (e) Share fishermen in the herring or other fishery to be brought within the Act by order of the Commissioner. (f) All persons ordinarily resident in the country who are employed or are travelling in the course of their employment on a British ship.

#### BENEFITS.

(1) In fatal cases the present law, in awarding compensation to the dependents, makes no distinction between widows with children and widows without children, but fixes the amount of benefit with regard only to the average earnings of the deceased. Thus in the case of a worker accidentally killed who had been employed for three years, a sum equal to his aggregate earnings during the three preceding years, but not less than £150 or more than £300, is paid in compensation; and in the case of a worker employed for less than three years the amount of benefit equals his average weekly earnings multiplied by 156, with the same limitations.

The committee suggests the amendment of the Act by the adoption of an important new principle according to which the amount of benefit would be based not on the former earning capacity of the deceased, but on the necessities of his dependents. "We are unanimously of opinion," the report says, "that the pressing need at the present time is that adequate provision should be made to secure that the children of a fatally injured workman should have a reasonable chance of developing into healthy and intelligent members of the community and that within proper limits all interests should be subordinated to the attainment of this object. With this end in view it will be necessary to adopt the principle of fixed benefits for the different classes of dependents without reference to the earnings of the deceased workman." The benefits proposed to be granted in fatal cases to total dependents are as follows:

(a) Where a widow is left, £250; (b)

Where children under 15 are left, a weekly allowance of 10s. for the first, 7s. 6d. for the second, and 6s. for every other child; these allowances to be provided by the payment into a central fund of £500 in every case of a workman dying and leaving a child or children under 15 years of age. (c) Where other total dependents are left in addition to the above, a further sum not exceeding £50. (d) Where total dependents are left not including widow and children under 15, the sum of £250. Compensation to partial dependents should be calculated on the amount paid by the deceased for their support, with a maximum of £250. Where any total dependents are left, no partial dependent other than the widow should be entitled to compensation.

Burial and medical expenses should be increased from £10 to £15.

(2) For total incapacity the committee recommend that the amount of compensation should be raised from 50 per cent to 66⅔ per cent of the average weekly earnings, with a maximum of £3. They rejected a suggestion that larger benefit should be granted to a worker with dependents on the ground that "if wages do not vary with the number of the workman's dependents neither should compensation," and that "a workman's domestic responsibilities are no concern of his employer." Witnesses on the employers' side claimed that 50 per cent, the existing amount of the award, placed the loss resulting from an accident equally on the worker and employee, but the report points out that the workman gets the worst of the bargain, inasmuch as he has to bear the pain and incur expenses connected with his illness. Malingering would not be encouraged by the raising of the benefit, the committee believe. "We are satisfied," the Committee state, "that the average workman is anxious to return to his work as soon as he is able and is not disposed to malingering." The proportion of 66⅔ per cent of average earnings is the highest allowed in any state. In Canada, the report states, the

usual percentage is 55 per cent.\* In the United States, the percentage ranges from 50 per cent to 66 $\frac{2}{3}$ %, but in several American states the payments for total incapacity are limited to a specified number of weeks ranging from 260 to 780.

(3) Partial incapacity is provided for under the present Act on the percentage basis, namely the proportion of wage loss resulting from the worker's disability. The committee suggests the designing of a well-considered disability schedule, for major injuries at least, in order to remedy the present "chaotic arrangement" which results in widely different awards being made for similar injuries at the arbitrator's discretion. As to the amount of compensation, they recommend that for partial incapacity the weekly payment shall (subject to the maximum limit fixed for total incapacity) be equal to two-thirds of the difference between the amount of average weekly earnings of the workman before the accident and the average amount which he is earning or is able to earn in some suitable employment or business after the accident. Provision is also suggested for cases where the rate of wages had advanced 20 per cent since the date of the accident, namely that the worker should in such an event be at liberty to claim compensation on the basis of the amount which he would have been earning had he received the benefit of such an advance; the employer to make a corresponding application in respect of a wage decrease.

The committee cannot recommend any compensation under the act for disfigurement irrespective of loss of earning capacity.

#### WAITING PERIOD.

The committee recommend that the waiting period should be three days, with no dating back, considering that to

grant compensation from the day of the accident would result in a vast number of trivial claims.

#### MEDICAL AND SURGICAL AID.

It is recommended that any medical and surgical aid in addition to the medical treatment available under the National Health Insurance Act should be provided for the injured workman at the cost of the employer under a comprehensive scheme to be worked out by the proposed Commissioner in co-operation with the Ministry of Health.

#### NOTICE OF ACCIDENT.

Employers should be required to post notices reminding the workers of the necessity of notification in the event of an accident; employers should also keep an "accident book" to which workmen should have access; and the defence of want of notice should not be open to an employer.

#### REVIEW OF WEEKLY PAYMENTS

Special provision is suggested for dealing with cases where a difference arises as to a workman's fitness for work, the onus of proof to rest in each case upon the employer.

#### COMMUTATION AND REDEMPTION.

Under the existing law the employer and workman may agree at any time to settle a claim for compensation by payment of a lump sum, an arrangement said to be popular with workmen. The committee recommend that this practice be still permitted subject to the approval of the County Court Registrar, who should have power to refuse to record the agreement on any grounds he considers sufficient and refer the same to the judge, special powers to be assigned to the Registrar in respect to all lump sum agreements; the Registrar to act as mediator in case of dispute, but the decision of the medical referee to be final;

\*NOTE.—The percentages allowed at the present time in the various provinces are given in the LABOUR GAZETTE, August, 1920, page 1018.

the Registrar further to have full discretion as to the application of lump sums for the benefit of minors.

#### MEDICAL REFEREES.

Medical referees are appointed by the Home Secretary for County Court Circuits (sheriffdoms in Scotland and counties in Ireland), over 300 referees having been appointed for the whole country. The committee suggests that the Medical Referee be empowered (subject to appeal to the Judge) to decide applications from either party and to take part in an enquiry before the judge; also that the whole-time medical officers to be appointed under the National Health Insurance Act should undertake the duties of medical referees under the Workmen's Compensation Act.

#### CONTRACTING OUT.

The right of the workmen to "contract-out" of the Act should be continued, subject to the assurance of the Chief Registrar of Friendly Societies that the scales of alternative compensation are as good as those of the Act, and subject also to the opinion of the certifying authority that the alternative scheme is not less favourable to the workman and his dependents than the provisions of the Act.

#### BANKRUPTCY OF EMPLOYER.

The amount of compensation to which priority may be given in the distribution of the assets of a bankrupt employer should be fixed at the full amount of the claim.

#### ACCIDENT PREVENTION.

The idea of the early advocates of Employers' Liability was to encourage

employers to adopt safer methods by making accidents expensive. Hitherto, however, the British Workmen's Compensation Acts have included no provision designed to encourage accident prevention, employers meeting their accident risks by means of insurance. The Committee recommend that the principle of safety promotion be restored by an amendment to the Act giving to the proposed commissioner power "to institute inquiries into the practicability of a system of discounts from normal rates in consideration of approved safety devices or provisions, in other words, a system of 'schedule rating,' and by agreement with insurance companies and mutual associations to prescribe a practical scheme."

#### PROPOSED COMMISSIONER.

The Committee, as stated above, approve the continuance of workmen's insurance through existing private enterprises rather than through a monopolistic State fund. They recommend, however, that state supervision should be exercised over the private or mutual agencies concerned by a new government official to be appointed by one of the Departments of State. This commissioner would undertake the collection of comprehensive returns as to compensation, and should be enabled to call for returns from all employers, insurance companies and mutual associations. He should further be required to prepare an annual report to be presented to parliament giving a resumé of the development of workmen's compensation during the year in other countries, and also containing recommendations for the amendment of the Act or for improvements in its working.

## NINTH BIENNIAL CONVENTION OF THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS

THE ninth biennial convention of the International Brotherhood of Pulp, Sulphite and Paper Mill Workers met at Ottawa on October 5-9. There were present some 130 delegates representing over 30,000 workers from Canada, Newfoundland, and the United States. The president, Mr. John P. Burke, occupied the chair. In addressing the convention he urged the workers to hold together in one organization. The creation of other bodies in the form of labour unions, he maintained, was only a detriment to the cause of organized labour, and by the formation of such bodies organized labour was only playing into the hands of capital, the manufacturers, and the employers. "A one hundred per cent organization," he stated, "will open the doors of any manufacturing concern either in the United States or Canada, to the representatives of organized labour." The One Big Union was condemned by several of the speakers, and

outlines were given of the benefits that had been derived from the International Brotherhood. Figures were cited which showed that in the year 1919 Canadian labour unions affiliated with the International had paid out \$617,324 to the parent body, and in return had received from the International \$835,740 in the form of sick benefits, strike pay and salaries for organizers.

Reference was made to the very great reduction in industrial accidents among paper makers since they had become strongly organized.

The following officers were elected for the next two years: President, Mr. John P. Burke, Fort Edward, N.Y.; vice-presidents, Mr. H. W. Sullivan, Creno, Me.; Mr. John Connelly, Palmer, N.Y.; Mr. Maurice Labelle, Hull, Que.; Mr. Ed. Launer, Oregon City, Ore.; Mr. T. J. McMahon, Iroquois Falls, Ont.; Mr. J. W. Taylor, Pejepscot, Me.; secretary, Miss Emily M. Myers, Rumford, Me.

## CONGRESS OF INTERNATIONAL FEDERATION OF MINERS

THE International Federation of Miners held a Congress at Geneva, Switzerland, on August 2-6, for the first time since the war. There were 148 delegates representing 2,500,000 miners of thirteen nations. A report of the Congress was published by the International Labour Office in "Studies and Reports, Series A. No. 7." The following motion with reference to the prevention of war

was carried unanimously: "The delegates of the International Congress of Miners, assembled at Geneva after the reconstitution of the Miners' International upon more living and active bases than before the war, resolve that: Whereas the International Federation of Miners, judging from past experience, can assure the peace of the world: Whereas the highly important question of peace

and war has been several times raised at meetings of the International Congress: Whereas the question of the general strike to prevent war has not been favourably received by certain sections of the International, and Whereas the monstrous war of 1914-18 would have been avoided had this measure been put into force: For these reasons, and to avoid a recurrence of such a crime which is a disgrace to the whole human race, the International declares itself ready to call a universal general strike in the event of an aggressive military policy on the part of any monarch or any government whatsoever."

In a discussion on the nationalization of mines, the principle of nationalization was generally accepted, but there were differences in the views of the methods to be followed to attain it. The following resolution was finally adopted: "This Congress, considering that nationalization or socialization is the only organization and method by which the life of the people can be assured, decides that the International Executive Committee shall meet within two months of the rising of Congress to consider the position of the nationalization campaign in each country. It gives to the Executive Committee from this moment full power to act by all the methods at its disposal, including the general strike, if that become necessary, so as to secure the rapid realization of nationalization in all countries. The national sections will report to the Executive Committee, which shall thus be able to keep abreast of the general situation and to decide upon the lines of action to be followed. If the Executive Committee consider it indispensable to have recourse to extreme measures, it shall in the first place assure itself by definite undertakings of the support of the various federated na-

tional sections which will have the duty of carrying out its decisions. The national sections should immediately prepare themselves for any eventuality so that they may be ready at all times to fulfil the decisions of the Executive Committee."

The following resolution advocating an International Coal Board was carried unanimously: "The Congress, considering the ill-distribution of fuel, ores and other materials and the speculation and intermediate profits which are given full opportunity in this as in all other spheres, considering also the misery which results from such a state of things, expresses the desire that there be constituted within a brief period an international office for the distribution of fuel, ores and other raw materials indispensable for the revival of a normal economic life, and requests that the International Labour Office should take into careful consideration this urgent demand put forward by the delegates of the International Federation of Miners, and entrusts to it the task of finding a remedy as early as possible, in accord with the Executive Committee of the International Federation of Miners and with the assistance of the various branches of the League of Nations."

Mr. Albert Thomas, Director of the International Labour Office, who was present, was invited to inform the Congress how that office could further the end aimed at by the resolution. He undertook to communicate the request of the Congress to the next meeting of the Governing Body of the International Labour Office. The terms of the resolution were subsequently communicated by him to the Economic Section of the League of Nations, and together with the observations of the League were laid before the Governing Body on October 5.

## REPORT OF THE EMPLOYMENT SERVICE OF CANADA FOR THE FOUR WEEKS' PERIOD OF SEPTEMBER 13 TO OCTOBER 9, 1920

**R** EPORTS from Employment offices to the Dominion Headquarters of the Employment Service of Canada, Department of Labour, for the four weeks' period of September 13 to October 9, show a decrease in the number of placements for the period under review as compared with the preceding period. The offices reported that 33,483 placements were effected during the period as compared with 46,310 during the previous four weeks, a decrease of 12,827. This decline was due very largely to the inevitable reaction from the heavy demand of the previous weeks for harvesters in the west.

During the period under review, regular placements by weeks were reported as follows: week ended September 18, 9,213; week ended September 25, 8,070; week ended October 2, 8,229; week ended October 9, 7,971. In addition,

6,490 casual jobs (employments for a duration of less than one week) were supplied and were reported by weeks as follows: week ended September 18, 1,719; week ended September 25, 1,473; week ended October 2, 1,581; week ended October 9, 1,717. Placements in casual work during the preceding period totalled 6,931, representing a decrease for this period of 441.

The accompanying chart shows graphically the number of applications, vacancies and placements, week by week, since the beginning of April 1919. The chart indicates that for the first week of the period under present review increases were reported in applications and placements, while during the remaining three weeks a downward tendency was shown by both curves. Vacancies showed a steady falling-off during the entire period, decreasing to

a point where vacancies and applications, or the demand and supply, were about equal. On the whole, however, a higher level was maintained during the period than during the corresponding weeks of last year.

The preceding table presents in some detail the work of the offices for the four weeks' period ended October 9. It will be observed that at the beginning of the period (Sept. 13), there were 3,480 applicants unplaced, of whom 2,546 were men and 934 were women, as compared with 3,086 men and 1,202 women, a total of 4,288 applicants unplaced at the end of the four weeks' period. The number of vacancies remaining unfilled on Sept. 11, totalled 20,158, of which 16,664 were for men and 3,494 for women. This compares with 14,887 vacancies for men and 3,014 vacancies for women, a total of 17,901 vacancies unfilled on October 9. When compared with the corresponding period of last year it will be of interest to note that the total number of applicants unplaced on October 11, 1919, was 6,910, and the number of vacancies unfilled, was 23,637. During the period under review (September 13 to October 9) the number of applications registered at the offices totalled 43,457, of which 38,979 were men and 4,478 were women, while the number of vacancies notified by employers to the Service was 43,789 for men and 4,679 for women, a total of 48,468. This represents an excess of vacancies over applications of 5,011, as

compared with a similar margin during the preceding four weeks' period of 11,983, indicating a closer approximation of demand and supply than in the preceding period. The report indicates also, that placements in regular employment numbered 30,796 for men and 2,677 for women, as compared with 42,905 for men and 3,405 for women reported during the preceding four weeks' period.

#### CHRONOLOGICAL SUMMARY.

The following table gives in summary form, by provinces, a record of placements from March 1, 1919, to October 9, 1920. As has been indicated in previous issues of the LABOUR GAZETTE, regular placements refer only to those applicants for whom employment found was likely to be of more than one week's duration, while casual placements refer to those applicants for whom employment found was likely to be of less than one week's duration. The summary shows that the number of placements in regular employment from the beginning of the record until October 9, was 569,245, or a weekly average of 6,777. The number of casual placements for the same period totalled 101,214 or a weekly average of 1,205. The number of applications for regular employment made during the period totalled 764,581 or a weekly average of 9,102, while the number of vacancies for regular positions notified by employers to the Service totalled 780,430 a weekly average of 9,291.

## UNEMPLOYMENT IN TRADE UNIONS AT THE CLOSE OF SEPTEMBER, 1920, AS REPORTED BY UNIONS MAKING RETURNS

THE present article on unemployment among the members of local trade unions deals with unemployment as at the end of September, 1920, and is based on returns received from 1,468 labour organizations with a total membership of 189,253. For all occupations reporting, 3.25 per cent of the members were unemployed as compared with 4.0\* per cent at the end of August, 1920, and with percentages of 2.19 in September, 1919, 2.72 per cent in September, 1918, 1.71 in September, 1917 and 1.47 in September, 1916. Unemployment as used here has reference to involuntary idleness due to economic causes. Persons occupied in work other than their own trades or who are idle because of sickness or as the direct result of strikes and lockouts are not considered as unemployed. As the number of unions making returns varies from month to month with consequent variations in membership upon which the percentage of unemployment is based, it should be understood that the percentage of unemployment figures

have reference only to those unions reporting.

The chart following gives the curve of unemployment by quarters for 1916-17-18, by months for 1919 and to September of this year.

From time to time this has been analyzed in previous issues of the LABOUR GAZETTE, the last review, covering the period to June, appearing in the August issue on pages 1037-1038. A slight upward tendency in the curve manifested in July, as compared with June, was caused by slackening in the manufacturing group, particularly in the leather, boots, shoes and rubber industries, and also in navigation. Continued dullness in these lines, together with further slackness in the garment industry, made the curve mount to 4 per cent in August. While the situation in September improved somewhat in leather, this gain was more than offset by continued slackness in the garment industry. Improvement, however, was shown in transportation, especially in the navigation subgroup, longshoremen in British Columbia being especially affected. Some

\*Revised figures.

improvement was shown also in Building and Construction, due to the usual effort to complete contracts before winter.

That the percentage out of work at the end of September was slightly less than in the preceding month, as stated above, was due to there having been greater activity for workers in the transportation group, particularly for long-shoremen, and also in the building and construction group. Most of the increase in the percentage unemployed during September as compared with reports for the same months in previous years, occurred in the manufacturing and mechanical industries, largely in the clothing sub-group, but also in metals, machinery and conveyances.

Table 1 on this page summarizes the returns by provinces. Nova Scotia, Prince Edward Island, New Brunswick, Saskatchewan, Alberta and British Columbia reported declines in the percentage of unemployment in comparison with the figures for August and

also as compared with the returns for September of last year. In Quebec and Ontario, the percentages of idleness showed nominal increases as compared with the preceding month, but they exceeded those reported during September, 1919. In Manitoba, the number out of work was slightly larger than in August, but there was some improvement over September of last year.

The percentages reported unemployed in the different groups of industries are indicated in Table II on page 1524.

Unemployment in the manufacturing and mechanical industries, as reported by 362 unions having a combined membership of 51,525 persons, was more prevalent than at the end of August and also than in September of previous years, 8.80 per cent of the members having been out of work as compared with unemployment percentages of 7.74, 2.57, .96, 4.05 and .70 in August, 1920, September, 1919, September, 1918, September, 1917 and September, 1916, respectively. As mentioned above, most of this unemployment was registered by unions in the clothing subgroup, where the percentage reported out of work was larger than in any month for which returns have been received. Workers in metals, machinery and conveyances also were less fully employed than in August, and also than in September of previous years. Most of this slackness occurred in the vehicle industries and was reported largely in Ontario and British Columbia. In food, tobacco and liquors, the percentage out of work was slightly larger than in August, 1920, and September of 1919, 1918, and 1916, but there was some improvement over the returns for September, 1917. Workers in textiles, carpets and cordage, as reported by 9 organizations, continued to be busy, there being only a nominal percentage of idleness as compared with small percentages in the previous month, and in September, 1919 and 1916. The percentage of unemployment among pulp, paper and fibre workers showed a slight increase over those registered in August and in preced-

\* Revised figures.

ing Septembers, partly on account of low water. In printing, publishing and paper goods, the number out of work exceeded that reported in August and the percentage was also larger than in September, 1918 and 1916. There was however, some improvement over the corresponding months in 1919 and 1917. Workers in woodworking and furniture, jewellery and oil refining were scarcely as fully employed as in any of the months used in this article for comparative purposes. The percentages out of work among workers in leather, boots shoes and rubber and glass bottle blowers were somewhat smaller than those registered during the preceding month. In the former group, the number unemployed was larger than in September, 1919, 1918 and 1916, but there was considerable improvement over September, 1917. The same, in lesser degree, is true for glass bottle blowers. Some short time was reported by unions of boilermakers and iron shipbuilders,

machinists, moulders, compositors, pressmen, book-binders, papermakers, tailors and garment workers, woodcarvers, upholsterers and musical instrument makers, boot and shoe and jewellery workers, but with the exception of that reported in the garment and shoe industries, the number of tradesmen who were not working full time was smaller than in August.

Reports from 613 organizations of transportation workers having a total membership of 78,861 persons, indicated that .98 per cent of the members were unemployed as compared with 2.78 per cent in the preceding month and with 2.06 per cent in September, 1919, .38 per cent in September, 1918, .55 per cent in September, 1917 and .59 per cent in September, 1916. Employment for steam railway employees (whose returns constituted about 72 per cent of the entire group membership reporting) showed less activity than in August and also than in September, 1918, 1917, and

1916, but the percentage out of work was not quite as large as that in September of last year. Street and electric railway employees and teamsters and chauffeurs registered somewhat greater percentages of unemployment than in the previous month and also than in September of preceding years. The percentage out of work in the navigation sub-group was considerably smaller than in August, 1920 and September, 1919, but it slightly exceeded those reported in September, 1918, 1917, and 1916. There was some short time recorded by organizations of conductors, carmen, engineers and firemen, trainmen and street and electric railway employees.

In the mining, quarrying and refining of ores group, returns were tabulated from 34 unions with a combined membership of 9,628 persons, showing that .06 per cent of the members were out of work as compared with percentages of .24; 1.11; .35; .22; and .70 in August, 1920, and September, 1919, 1918, 1917, and 1916, respectively. Mine workers appeared to be more fully employed than in any month used in this article for comparative purposes. Mill and smeltermen continued to be active.

The percentage out of work in the building and construction group, as reported by 252 organizations having a combined membership of 29,277 persons was 2.04 as compared with 2.99 per cent in August, 2.91 per cent in September, 1919, 1.31 per cent in September, 1918, 2.26 per cent in September, 1917 and 6.34 in September, 1916. Bricklayers, masons and plasterers, and hodcarriers and building labourers were more fully engaged than in any month used in this article for comparison. The percentage out of work among carpenters and joiners was smaller than those registered in August, 1920, September, 1919, and September, 1916, but it showed a small increase over September 1918 and 1917. Electrical workers were less fully employed than in the preceding month and also than in September 1919, 1917 and 1916. Granite and stone-cutters registered more unemployment than in any month here used

for comparison with the exception of September, 1916. Painters, decorators and paper hangers, as reported by 23 unions, showed no members out of work as compared with slight percentages in August, 1920, and September, 1919 and 1916. The percentages out of work among plumbers and steamfitters, tile layers, lathers and roofers were smaller than in the preceding month and also than in September, 1919, 1917 and 1916. The same is true also of bridge and structural iron workers, with the exception of September, 1917 when the number out of work was somewhat less. Among bricklayers, masons and plasterers, carpenters and joiners, plumbers and steamfitters there was some short time, but the members who were not fully employed were not as numerous as in preceding months.

In the public employment group as indicated by 73 unions having a combined membership of 5,766 persons, the percentage out of work was .02 as compared with percentages of .02; .11; 1.54; .04; and .11 in August, 1920 and September, 1919, 1918, 1917, 1916, respectively.

Unemployment in the group of miscellaneous trades, as registered by 129 organizations with an aggregate membership of 12,200 persons was slightly more prevalent than in the preceding month and also than in September 1918 and 1917, but the percentage out of work was not as large as in September, 1919 and 1916. Retail clerks, as reported by 4 unions had no unemployment, as compared with nominal percentages in preceding months. The number out of work among hotel and restaurant employees was smaller than that reported in August and also than in September, 1916. It was, however, somewhat larger than in September, 1919, 1918, and 1917. Barbers, with a percentage of .84, were less fully employed than in the preceding months used in this article for comparative purposes. The percentage of idleness for musicians and theatre employees was considerably smaller than in August and also than in September, 1919, but it exceeded those for September 1918, 1917 and 1916. Stationary

engineers and firemen were scarcely as fully employed as in the preceding month and as in September, 1916. The percentage out of work, however, was considerably smaller than those recorded in September of the intervening years. The number of unemployed as regis-

tered by unclassified workers was larger than in any month here used for comparison. Some unions of musicians and theatre employees reported that their members were not working full time.

The tabular statement on pages 1526-1527 presents the returns in some detail.

### EMPLOYMENT CONDITIONS IN CANADA DURING THE PERIOD SEPTEMBER 18 TO OCTOBER 23 AS REPORTED BY EMPLOYERS

**W**EEKLY reports from employers to the Dominion Headquarters of the Employment Service of Canada, Department of Labour, during the six weeks from September 18 to October 23 inclusive, show a decline in the volume of employment afforded by these employers taking the period as a whole, increases being registered during three weeks of the period and decreases during the remaining three weeks.

The change reported for each of the weeks under review as compared with the preceding week was as follows:

Week ending September 18, an increase of 3,385 persons or .4 per cent.

Week ending September 25, an increase of 1,373 persons or .2 per cent.

Week ending October 2, a decrease of 2,936 persons or .4 per cent.

Week ending October 9, a decrease of 81 persons, or .01 per cent.

Week ending October 16, an increase of 175 persons or .02 per cent.

Week ending October 23, a decrease of 7,354 persons or 1 per cent.

During the six weeks period under review, employment conditions were substantially the same in the different parts of Canada, declines in employment occurring during three or more of the six weeks in every district, and also in every province, with the exception of Manitoba, where there were reductions during two of the weeks only. In the Maritime Provinces there were decreases during

the weeks of October 2, 9 and 23, with increases for the remaining weeks of the period. Within this district employment in Nova Scotia, as during the preceding period reviewed in the LABOUR GAZETTE, was better maintained than in the remaining provinces, showing declines in three of the weeks, with increases for September 18 and 25 and October 16. In New Brunswick firms reported additions to their payrolls during the first two of the weeks reviewed, with losses in the remaining four. In Quebec and Ontario conditions were very similar, increases being registered in both provinces during the weeks of September 18 and 25, with declines for the weeks of October 2, 16 and 23. During the week of October 9, however, there was an increase in employment in Quebec, with a decrease in Ontario. Employers in the Prairie Provinces recorded additions to their payrolls during the weeks of October 9 and 16 only, with considerably smaller reductions for the remaining periods. There were slight fluctuations in conditions within this district, Manitoba as noted above showing increases in employment during four of the weeks under review and Saskatchewan and Alberta having increased during two weeks only. In British Columbia there were increases during the weeks of September 18 and 25, with substantially larger declines for the four weeks in October.

A summary of the returns by industrial groups shows that concerns in Logging, Clay, Glass and Stone Products and Coal Mining reported increas-

es in employment during each of the six weeks under review. Building Construction, Edible Animal Products, Mineral Products, n.e.s., Metallic Ores, Telephone and Telegraph Operation, Railway and Water Transportation reported fluctuations from week to week, with net gains during the period as a whole. On the other hand, Railway Construction, Edible Plant Products, Lumber and Its Products, Leather Goods, Non-ferrous Metal Products, Pulp and Paper, Rubber Goods, Textiles, Wood Distillates, Miscellaneous Manufacturing Industries (chiefly chemicals and tobacco), Non-metallic Minerals, other than coal (quarrying), Personal Services (chiefly laundries), Retail and Wholesale Trade and Local Transportation registered declines, taking the period as a whole, with increases during one or more of the weeks under review. In Hotels and Restaurants only, were there reductions during each of the weeks.

The most pronounced increases in volume of employment afforded during this period, as during the last previous period considered, occurred in Logging, where the additions from week to week amounted to 4,373 persons, the increases being due to seasonal activity in lumber camps. These additions were reported in Ontario and Quebec, while those in Coal Mining, which were also of a seasonal nature, took place mostly in Alberta. General activity in the three subgroups included under the Clay, Glass and Stone group occasioned the gains in that industry. In Iron and Steel Products increases were registered in the car building and repairing branch of the Vehicle group, while substantial declines were reported in the automobile section of this industry. With the exception of the additions to staffs registered in Railway and Water Transportation, which were fairly large, the changes in the remaining groups showing plus tendencies were slight.

The most decided reductions reported during the six weeks under review occurred in Lumber and Its Products, where 5,975 persons were released from

employment, mostly on account of the completion of the season's operations in saw mills. In Edible Plant Products large increases were indicated during the last two weeks in September due to activity in canning plants, but the release of employees in such establishments, together with losses in cane sugar refineries occasioned the substantial declines which were recorded during October. In Rubber Goods the decreases were the result of slackness in tire factories which reflected the unsettled conditions in the automobile industry. Firms in Textiles reported additions to their staffs during the first three weeks of the period under review, with large declines during the last three weeks, most of the decreases being shown in the garment industry. Gradual reductions in the staffs of summer hotels accounted for the losses in Hotels and Restaurants. The general conditions in Retail Trade during the period were reflected in the declines which took place in this group.

The accompanying chart shows the weekly percentage of change in the number of persons on payrolls since the base week (January 17, 1920), as reported by those employers making returns, the number reporting being on an average over 5,200. While there had been considerable recovery from the declines incident to the annual inventory period by January 17, the chart shows that further increases took place in the remaining weeks of the month. From the beginning of February to the closing week of March the curve indicates little change in the volume of employment afforded. The marked rise at the end of March represents the resumption of spring time operations and the beginning of active railway, and, in a lesser degree other construction work. The upward tendency continued almost uninterruptedly until the week of July 17, when the peak of employment for the year was reached. On that date the employers reporting showed increases as compared with their returns for January 17, of 62,655 persons or 9.1 per cent. During the three succeeding weeks a

steady downward tendency was manifested, recovery taking place, however, in the first week of August, and the remaining weeks in this month showed a rather stable situation. At the beginning of September the curve showed an upward tendency which continued until the middle of the month. At this point the percentage increase over the base registered 8.1 per cent. During the re-

maining weeks of September and those of October covered by the present report, the curve indicated an almost steady downward tendency and the percentage increase over the base reported on October 23, showed for those employers making returns, a net increase of 6.1 per cent in the volume of employment afforded as compared with the number of persons on payrolls on January 17.

## REPORTS ON CIVIC EMPLOYMENT IN FIFTEEN CITIES, SEPTEMBER, 1920

**R** EPORTS from fifteen cities showing the number of workers temporarily engaged and the wages paid these employees during the month of September, showed decreases of slightly over 7 per cent in the number of workers and of 5.5 per cent in the amount of wages paid, as compared with the figures for the preceding month. In September, 1920, 10,578 persons were temporarily employed and the payrolls amounted to \$1,110,175.74 as compared with 11,386

persons and an aggregate payroll of \$1,174,620.02 in August.

In comparison with the returns for the same period in 1919, increases of slightly over 4 per cent in the number of employees and of almost 36 per cent in the amount of wages paid are indicated, there having been 10,128 employees with a total payroll of \$818,301.46 in September, 1919.

Montreal was the only city to report increases in the number of employees

as compared with the returns for both August 1920 and September, 1919. Reductions were registered by the remaining cities in the first comparison but were in most cases small. As compared with the reports for September of last year, Montreal, Toronto, London, Winnipeg and Regina recorded increases.

As to wages, Montreal, Toronto and Hamilton showed increases both as compared with the preceding month and

also September, 1919. At Edmonton there was an increase in comparison with the figures for August, with a reduction as compared with the reports for September, 1919. On the other hand, St. John, London, Winnipeg, Brandon, Regina, Moose Jaw, Vancouver and Victoria registered decreases as compared with the preceding month and increases over the statements for last year. In Ottawa, Saskatoon and Calgary there were decreases in both comparisons.

## EMPLOYMENT IN THE BUILDING TRADES DURING SEPTEMBER, 1920, AS INDICATED BY BUILDING PERMITS

EMPLOYMENT in the building trades as indicated by the value of building permits issued in 56 cities showed a decline during September as compared with the preceding month, the

total value of building permits falling from \$9,439,807 in August, to \$8,921,374 in September, a decrease of \$518,433 or 5.5 per cent. Prince Edward Island, Nova Scotia, Quebec, Alberta and Brit-

ish Columbia registered increases in this comparison, while in New Brunswick, Ontario, Manitoba and Saskatchewan, there were reductions, that of \$639,635 in the last named being the most pronounced.

As compared with the figures for the corresponding month in 1919, there was a decrease of \$4,382,458 or almost 33 per cent in the permits issued, the value for September, 1919, having been \$13,303,832. In this comparison, Prince Edward Island, Quebec, Alberta and British Columbia recorded increases. Of the decreases registered in the remaining provinces, that of \$3,953,679 in Ontario was the largest.

Of the largest cities, Montreal and Vancouver, reported increases both as compared with the return for August, 1920, and also for September of last year. At Winnipeg there was a gain in comparison with the preceding month, but a decrease as compared with September, 1919. On the contrary, Edmonton showed a decline in comparison with the figures for August, with an increase over September of last year. In Toronto there were small declines in both cases.

Of the smaller centres, Sydney, St. John, Sherbrooke, London, Woodstock and Lethbridge registered increases in the value of building permits issued as compared with both August, 1920, and September, 1919.

The returns from 35 cities formerly used in this report (which are distinguished by asterisks, and which are also tabulated separately for statistical purposes) show that the total value of building permits issued by these cities amounted to \$7,943,163, a decrease of \$582,174 or 6.8 per cent, as compared with the returns for August. In comparison with the figures for 1919, moreover, there was a decrease of \$4,052,520 or 33.8 per cent.

## RECENT INDUSTRIAL AGREEMENTS

THE following is a summary of the more important industrial agreements recently received by the Department. While the conclusion of every industrial agreement implies the acceptance, to a greater or less degree, of the principle of collective bargaining, it should not be overlooked that in a number of cases the agreement was reached only after the employees had been on strike. By verbal agreement is understood a schedule of rates and conditions agreed upon between the employees and the majority of employers, and in effect although not signed. The agreements are arranged by industrial groups.

### Metals and Machinery

AMHERST, N. S.—I. MATHESON AND COMPANY, LIMITED AND INTERNATIONAL MOULDERS' UNION, No. 253. Agreement in effect from September 25, 1920, to March 31, 1921.

Hours of labour, fifty-three and one-half per week. Overtime rate: time and one-half; Sundays and holidays, double time.

Wages: Per day—Those formerly receiving \$6 to receive \$6.25. Those formerly receiving \$6.25 to receive \$6.50; those formerly receiving \$6.50 to receive \$6.80.

MONTREAL, QUE.—CANADIAN CAR AND FOUNDRY COMPANY, LIMITED, AND THEIR EMPLOYEES OF THE FEDERATED TRADES. Agreement in effect from May 11, 1920, to April 30, 1921.

Hours of labour: forty-five hours per week, day or night. Overtime: time and one-half; Sundays and holidays, double time. A second or third shift in twenty-four hours to be paid overtime.

Pieceworkers to receive overtime rates for overtime work.

Married men to be given preference in the event of a reduction of staff.

In case of disagreement, no cessation of work to take place until highest local available representatives of both parties have failed to come to an understanding. No strikes to take place until it shall have been found impossible to adjust grievances satisfactorily. A period of thirty days to elapse before action is taken.

Union to endeavour to secure extra help when there is labour shortage.

Apprentices: one apprentice to five mechanics; to serve four years, and thereafter to receive mechanics' pay if retained; apprentices to be between ages of sixteen and twenty-one on entering apprenticeship.

Minimum rates of pay: Per hour—Axle turner, 80 cents; axle fitter, 80 cents. men assisting, classified as helpers, 60 cents; common labourers 45 cents; machinists, 80 cents; specialists, 60½ cents; template maker, 80 cents. Apprentices: Per hour..first year, 30 cents; each additional six months, 5 cents per hour increase.

FORT WILLIAM, ONT.—LOCAL FIRMS EMPLOYING SHEET METAL WORKERS AND AMALGAMATED SHEET METAL WORKERS' INTERNATIONAL ALLIANCE, No. 580. Agreement in effect from June 1, 1920 to May 31, 1921, with 30 days' notice of change.

Only union members to be employed.

Hours of labour: eight hours, and four hours on Saturday. Overtime only in emergency; rate until 10 p.m., time and one-half; thereafter and Sundays and holidays, double time. Work on Labour Day only to preserve life and property.

Grievances to be reported to the Superintendent; failing an adjustment in five days, to president of local.

Wages demands: Per hour: mechanics, 90 cents; improvers, 75 cents.

### Foods, Liquors and Tobacco

MONTREAL, QUE.—LOCAL FIRMS EMPLOYING MEAT CUTTERS, AND MEAT CUTTERS AND BUTCHER WORKMEN, No. 299. Agreement in effect from May 1, 1920, to March 1, 1921, and thereafter with 30 days' notice of termination.

Hours of labour: forty-eight per week, stopping at noon on Saturdays, except in case of shift work.

Overtime, time and one-half; Sundays and holidays, double time.

Forty hours' work per week guaranteed to employees, excepting weeks in which there is a holiday, when thirty-three and one-third shall be guaranteed.

Grievances to be taken to foreman, and then if necessary to the General Manager of the Company, by the employee and a committee of not more than two fellow employees. No employee covered by this agreement to be suspended, reduced or dismissed without just cause, reasons to be given on request in the presence of the committee, and if considered unjust, employee to be reinstated.

No discrimination against Union Members, or against employees because of creed, colour or nationality.

Employees not to be forced to join Company Sick Benefit Association.

Each honourably discharged soldier returning to work in any plant from which he enlisted to be given seniority as though after continuous employment.

A flat increase of 6 cents per hour on the regular wages paid on April 30, 1920, to be given to all persons engaged in the packing industry, not including office staff and travellers.

Where piece work is in practice in the butcher trade, gross increase to be included and operated in piece work rates.

Boys between 16 and 18 years to receive minimum of 31 cents per hour. A boy of 18 years, doing a man's work, to receive same pay as a man.

TORONTO, ONT.—EMPLOYING PACKERS, AND AMALGAMATED MEAT CUTTERS AND BUTCHER WORKMEN OF NORTH

AMERICA, No. 188. Agreement in effect from April 11, 1920, to March 1, 1921, and thereafter with thirty days' notice of change.

Agreement identical with that for Montreal given above.

LONDON, ONT.—LOCAL BREAD MANUFACTURERS AND BAKERS' UNION, No. 270. Agreement in effect from July 26, 1920, to May 1, 1921.

Only good standing Union members to be employed.

Hours of labour, fifty per week, night and day work. Overtime up to fifty-two hours, pro rata, thereafter time and one-half.

Minimum wages, in shops employing four men or over. Per week—Foreman, \$34; oven men and dough mixers, \$32. Bench hand, \$29; other help, \$27. In shops employing three men or less, foreman, \$31; other help, \$28. Head shipper, \$27; other help, \$25. Jobbers to receive Union scale. Employees after one year's service prior to June 1, in any year to be entitled to one week's holiday on full pay, between June 1 and November 1.

Disputes to be submitted to a committee of arbitration consisting of two employers, two members of Union and a fifth disinterested party.

KITCHENER, ONT.—EMPLOYERS, AND CIGAR MAKERS' UNION, No. 422. Verbal agreement in effect since May 3, 1920.

Piece rates given for various classes of work.

No team work by any Union member to be allowed.

All jobs not provided for by the bill of prices to be decided by the Executive Board.

All stock to be stripped properly, and booked and prepared in proper working condition.

Members placed on limit to be allowed to complete the limit in such time as they are able.

After lay-offs or holidays, members working up till time of lay-off or holiday not to be discharged for at least one week thereafter.

Apprentices: One apprentice for up to five men steadily employed; two for ten; three for fifteen; four for twenty-five; five for forty; five to be the limit. Packers' Apprentices; One apprentice to a journeyman packer, to be included in the general limit.

### Clothing

TORONTO, ONT.—LARGE LOCAL FIRMS AND TORONTO FUR WORKERS' UNION NOS. 35, 65 AND 40. Verbal agreement in effect from January 1, 1920, to December 31, 1920, and thereafter, with 30 days' notice of change.

Hours of labour: eight per day; four hours on Saturdays.

Overtime to be required during not more than twenty weeks, between September 1, and March 1, except in emergency.

Holidays to be paid if thirty-four hours are worked in week in which holiday occurs. Work on holidays, time and one-half, plus the day's pay, but work to be optional.

In emergency, workers to be permitted to take work home, but from their own factories only.

In case of friction, employees to send a representative to present matter to employer.

Disputes to be settled by arbitration.

Minimum wages: Per week—learners at operating or finishing, \$7, increased according to ability; after 6 months, \$10, increased according to ability.

No discrimination between union or non-union help whether on part of employees or firm.

HAMILTON, ONT.—ONE LOCAL FIRM, AND UNITED GARMENT WORKERS OF AMERICA, No. 278. Agreement in effect from August 12, 1920, to March 1, 1921.

Main clauses identical with general agreement under which Winnipeg Local works—(See LABOUR GAZETTE for October, 1920, page 1379.)

Supplementary clauses: employees to be good standing union members, not

affiliated with any dual or outlaw society. No discrimination against union members.

Overtime, time and one-half. Holidays, double time.

LONDON, ONT.—MERCHANT TAILORS, AND JOURNEYMEN TAILORS' UNION, No. 30. Agreement in effect from October 1, 1920.

Wages: Per week—tailors, \$30; bushelers, \$29; helpers, \$20.

One helper to every two skilled workmen. All employees, including foreman, to be good standing union members, or become members within ten days of employment.

Hours of labour, forty-eight per week. Overtime, time and one-half; Sundays and holidays, double time.

No person to be discharged through scarcity of work during slack season.

GALT, ONT.—GETTY AND SCOTT, LIMITED, AND BOOT AND SHOE WORKERS' UNION, No. 330. Agreement in effect from April 15, 1920, to September 30, 1920.

Hours of labour; forty-nine and one-half per week.

Overtime rates: Sundays and holidays, double time; other, time and one-half: Overtime not to apply in case of breakdown of machinery, or individual absence from work.

Minimum rates: Per day—beginners, first three months, \$1.40; second three months, \$1.60; third three months, \$1.80; thereafter according to efficiency.

Prices for any operation changed from day work to piece-work to be arranged in same manner as this agreement. Piece workers placed on time work to receive a wage equal to their average earning capacity under normal conditions.

This agreement contains a schedule of piece-work and weekly rates. Weekly rates range from \$20 for reinforcing insoles and lip turning, to \$30 for pulling over welts and heel trimming.

### Pulp and Paper

DRYDEN, ONT.—DRYDEN PULP AND PAPER COMPANY, LIMITED, AND INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS, AND INTERNATIONAL BROTHERHOOD OF PAPER MAKERS. Agreement in effect from May 1, 1920, to May 1, 1921.

Company when hiring men to give preference to Union members. Permanent operating employees to be Union members. New employees after thirty days to be instructed to join the Union within fifteen days—this not to apply to outside labour or to men on new construction work. Only those foremen who have received sanction of management of Company to become members of either Union.

Operation of paper mill, six days per week; pulp mill, six and one-half days, and longer if necessary.

Sunday work, paper mill, time and one-half; pulp mill, double time.

Hours of labour: day workers, eight per day. Overtime from 6 p.m. to 7 a.m., time and one-half; this not to apply to outside men and transient labour. Holidays, time and one-half.

No strikes or lockouts to occur during life of agreement.

Grievances to be reported in writing to management and if adjustment is unsatisfactory, to Vice-President and General Manager and to the Union President; and on failure to agree, arbitration shall be resorted to.

Apprentice system to be put into effect in the mechanical trade through the mill, under which youths and young men may learn their trade beginning at a minimum of 23 cents per hour.

Employees eligible for, or members of Paper Makers' Union may or may not join the Pulp, Sulphite and Papermill Workers' Union.

Wage schedule: Per hour—Recovering room, foreman, 58 cents; liquor runners, firemen, 55 cents; evaporators, causticiser, 58 cents; oiler, causticiser helper, 52 cents. Digester room: cook, 63 cents; cook helper, screen man, 55

cents; diffuser man, 58 cents; washer-out, 52 cents. Beater room, beater engineer, 60 cents; helpers, 52 cents; wet machine, 46 cents. Machine room, No. 1 machine: machine tenders, 75 cents; back tenders, 58 cents; rewinders, cleaner, 52 cents; pulp weighers, 55 cents. No. 2 machine: machine tenders, 90 cents; back tenders, 70 cents; 3rd hands, 52 cents (unless otherwise arranged); broke hustlers, 52 cents, oiler, 55 cents. A minimum of 6 hours' pay will be allowed for changing a wire to off-tour workers during the week and on Sunday. If longer than 6 hours is required, straight time after 6 hours to be paid. Finishing room: cutterman, 58 cents; helper, 46 and 52 cents; rewinderman, 58 cents; helper, 52 cents; roll packer, 52 cents; paper wrappers, 58 cents; baling press, 58 cents; general help: boys and young men, 23 to 46 cents, spare men, 46 to 52 cents; female help: beginners, 23 cents; experienced, 29 cents; foreman's helper, 63 cents. Boiler room: head fireman, 63 cents; firemen, 58 cents; boiler repair man, salary; helper, 55 cents. Wood room: foreman, 69 cents; chipperman, 55 cents; conveyors inside and out, 52 cents. 	Per week.		
	Feb. 14, 1919-20.	Feb. 14, 1920-21.	Feb. 14, 1921-22.
Daytime:—			
Hand composition.....	\$21.00	\$23.00	\$24.00
Machine composition.....	23.00	24.00	25.00
Casterman or machinists....	25.00	26.00	27.00
Night time:—			
Hand compositor.....	23.25	25.25	26.25
Machine compositor.....	25.00	26.00	27.00
Casterman or machinist.....	27.00	28.00	29.00

Overtime: time and one half.

Foremen in a shop to receive at least \$3.00 per week over hand compositors.

Apprentices to try examination, and if qualified, to serve one year at \$3 per week; to undergo second examination and if competent, to continue. Wages: per week, second year, \$5; third year, \$7; fourth year, \$9; fifth year, \$11.

Apprentices to be given opportunity to learn all branches of the trade.

One apprentice for every five journeymen, or fraction thereof, in each department. At least one Union member to be employed in composing room before office is entitled to an apprentice.

Only Union members to be employed in the composing room. No Union members to work in Non-union shops without permit from the president.

Double overtime price for work on Sundays, New Year's Day, Christmas and Labour Day—with exception for morning papers.

The foreman to have charge of employment.

STRATFORD, ONT.—LOCAL EMPLOYING PRINTERS, AND TYPOGRAPHICAL UNION, No. 139. Agreement in effect from August 1, 1920 to August 1, 1921.

Union members bind themselves not to support fellow members who prove dilatory or unfaithful in the discharge of their duties.

Wages: Per week—foremen, \$35; machinist operators, \$35; linotype operators, \$32; hand compositors, stone hands, etc., \$30.

Only Union men to be employed in composing room, if available.

No employee to be discharged (except for cause) without one full week's notice, nor to leave without giving same.

A joint conference committee to be established to settle disputes.

Forty-four hour week to be inaugurated May 1, 1921.

Hours of labour: forty-eight per week, day; forty-five per week, night. Overtime, first four hours, time and one-half; thereafter, double time.

Union not to discipline a foreman for carrying out the written or verbal orders of the proprietors.

Work on Sundays and holidays, double time.

Apprentices: one apprentice to three journeymen or fraction thereof. No office to be entitled to an apprentice unless at least one journeyman outside of the proprietor be regularly employed in the composing room.

Foreman to determine if applicants are mentally and physically fitted for the trade. Apprentices to be not less than fifteen years of age and to serve five years. During last six months to receive two-thirds of regular scale.

SASKATOON, SASK. — EMPLOYING PRINTERS AND INTERNATIONAL PRINTING PRESSMEN AND ASSISTANTS' UNION, No. 206. Agreement in effect from October 1, 1920, to September 30, 1921.

Job Press Rooms, first seven months, forty-eight hour week; next five months on forty-four hour basis. Webb Press Rooms, day forty-eight hours; night, forty-two hours.

Union to furnish capable men where possible.

Webb Press Rooms: Minimum wages: Per week—foreman of pressroom, \$60; pressman in charge, \$50; journeyman, \$46; assistant, first year, 33⅓ per cent of journeyman's scale; second year, 42 per cent; third year, 53 per cent; fourth year, 78 per cent; fifth year, 80 per cent.

Minimum crew on presses, single or double presses: pressman in charge, two journeymen, one assistant; and for each unit or portion thereof, one extra journeyman.

Hours of labour: eight per day; seven per night.

Minimum wages on Presses: Per week—Pressman in charge, no scale; journeyman (platen), \$42; journeyman (cylinder) \$45; assistant first year, 40 per cent of journeyman's scale; second year, 50 per cent; third year, 75 per cent; fourth year, 80 per cent; feeder, first year, no scale; second year, 33⅓ per cent of journeyman's scale.

Term for apprentice or assistant, four years; such apprentice to be a feeder of

at least two years, and to apply for full membership in Union on completion of fourth year of apprenticeship.

One apprentice to every four journeymen.

Night shift \$2 over day scale.

Work in excess of eight hours may be performed without payment of overtime if for making up for Saturday half-holiday, not more than nine hours to be worked in one day.

Overtime, time and one-half.

Foreman to have charge of pressroom, to employ and discharge help, and to act under instructions of employer in accordance with this agreement.

GUELPH, ONT.—EMPLOYING PRINTERS AND INTERNATIONAL TYPOGRAPHICAL UNION, No. 391. Agreement in effect from October 1, 1920 to April 30, 1921.

Disputed points in connection with agreement or wage scale to be referred to a joint committee, and if not settled, to a Board of Arbitration.

Foremen to have right to employ help and to discharge, with approval of the management, for incompetency, neglect, violation of office rules or in order to decrease staff.

Employees unable to work efficiently through disability or old age to be placed on a superannuation list.

Apprentices: one to four journeymen or fraction thereof; not more than three to a department. Foreman to determine whether applicants are suited for the trade. Apprentices to be at least fifteen years of age, to be registered in Union and to serve five years; to try examination at end of first year, and to continue apprenticeship if qualified.

Rates: Per hour—third year apprentices, one-third of journeyman's scale; fourth year, one-half; fifth year, two-thirds.

Hours of labour, forty-eight per week (day), forty-two per week (night).

Overtime, first three hours, time and one-half; thereafter, and Sundays and holidays, double time.

Minimum wages: Per hour—hand compositors and machine operators, \$32. Foremen, at least \$2 above scale.

NELSON, B.C.—LOCAL EMPLOYING PRINTERS, AND NELSON TYPOGRAPHICAL UNION, No. 340. Agreement in effect from May 1, 1919.

Newspaper offices: All employees in composing rooms except apprentices, to be Union members.

Hours of labour, seven and one-half per day.

Wages: Per day—floormen, machinists, operators, \$5.75; machinist operators, \$6.25; foremen, \$6.25. Per night—floormen, machinists and operators, \$6.32½; machinist operators, \$6.82½; foremen, \$6.82½. An operator asked to take care of his own machine to be paid 25 cents per shift above rates.

Overtime, time and one-half for first five hours; thereafter, double time.

Work on morning newspapers for holidays, six hours to constitute a full night's work, with full pay.

Only members and apprentice members to be allowed to practice on machines in the jurisdiction of the Union. Learners' period to be thirteen weeks.

Wages for beginners on machines: Per day—first three weeks, \$2; second three weeks, \$2.50; third three weeks, \$3; last four weeks, \$4.50.

Apprentices: one to every six journeymen, or major fraction thereof. Beginning with an apprentice's fifth year a second apprentice may be employed, provided that first apprentice has been continuously employed in the composing room. No apprentice to work overtime while journeymen are available, but one apprentice may be employed on overtime in his particular shift for up to six hours in a week. Term of apprenticeship to be five years.

Wages: Per week—1st six months, \$5; 2nd six months, \$6; second year, 1st six months, \$7; 2nd six months, \$8; third year, 1st six months, \$11; 2nd six months, \$14; fourth year, 1st six months, \$16; 2nd six months, \$19; fifth year, 1st six months, \$22; 2nd six months, \$25.

If given straight apprenticeship on machine last 13 weeks, beginners' wages; if during last six months half time on machine and half time on floor, two-third rate to apply.

Apprentices to be given opportunity to become proficient in the trade.

Book and Job offices:

Hours of labour, eight per day.

Wages; per day, foremen, \$6.25; job compositors, \$5.75.

Overtime and holidays, time and one-half.

Newspaper scale for machines to govern in book and job offices.

#### Transportation—Electric Railways

Hours of labour: forty-four per week, ceasing at noon Saturday. Saturday afternoons not to count as overtime.

Grievances: to be adjusted by foreman if possible; if this cannot be done, matter to be taken up by Company direct, with committee representing men having grievances; if understanding still cannot be reached, a committee of representatives from the different crafts employed by the company affected by this agreement to meet company and try to bring about an adjustment. No lock-out or strike to take place in the meantime.

No discrimination for being or not being Union members.

Holidays, time and one-half, except in case of shift work.

Minimum Wage: Per hour—Gas fitter, complaint man, meter setter, main and service foreman, caulker, 72 cents.

SAULT STE. MARIE, ONT.—THE INTERNATIONAL TRANSIT COMPANY, AND AMALGAMATED ASSOCIATION OF STREET AND ELECTRIC RAILWAY EMPLOYEES,

No. 850. Agreement in effect from October 1, 1920, and from year to year thereafter, with thirty days' notice of change.

Company agree to recognize Union; no employee's standing to be affected by reason of his membership.

Company to meet and treat through officers upon questions and differences arising during life of agreement.

Employees to have right of appeal to General Manager or Vice-President with a committee of the Union.

Hours of labour: nine per day.

Wages: Per hour—conductors, motor-men, barn employees, 1st six months, 45 cents; 2nd six months, 48 cents; 3rd six months, 50 cents. Interlocker signal men, per month, \$112.50. Employees 3 months and up to 6 months in service to receive \$10 per year bonus; 6 months and over, \$20 per year bonus.

#### Transportation—Water

HALIFAX, N.S.—CERTAIN STEAMSHIP COMPANIES, AND LONGSHOREMEN'S ASSOCIATION. Agreement in effect from January 1, 1920 to December 31, 1920.

Minimum wages: Per hour—day work, 65 cents; night work, 75 cents. Full cargoes of cement and handling bulk grain, day, 75 cents; night, 85 cents. Work on ships with cargo on fire (hatches affected by fire, steam, smoke or gas) day, \$1.30; night, \$1.50. Sundays and three holidays, double rates, except in case of ships with cargo on fire, minimum rate then to be: day, \$1.95; night, \$2.25. Work during meal hours, double time, double rate to continue until relief is brought. Winter period, October 1 to April 30, work to start at 8 a.m., except in case of mail or passenger boats.

Waiting time: 7 a.m., to midnight, full rate for first hour; half rate each succeeding hour; after midnight, full rate.

Work not carried on after midnight to be concluded at 11 p.m. all over water front. This not to apply when a ship is nearing completion or in case of a shunt or perishable cargo.

Non-union men employed on account of shortage of Union labour not to be replaced by Union men during remainder of day on which they are hired.

In case of minor disputes, business Manager of Longshoremen's Association to confer with employer, and decision to be binding.

Association to use efforts to prevent irregularity of attendance.

**AMHERSTBURG, ONT.—EMPLOYING ENGINEERING AND DREDGING COMPANIES, AND INTERNATIONAL SURFACE ROCK AND DRILL BOAT WORKERS' ASSOCIATION.** Agreement, with amended wage scale in force from March 1, 1920 to March 1, 1921.

Union men to be furnished if available. No discrimination against members of either party. Complaints and grievances to be submitted to arbitration—the Board of Arbitration to consist of one representative of the employer, one of the employees, and a third disinterested man; employees to continue to work pending a settlement.

No beer or intoxicant to be brought on the premises.

Foreman of drill-boat to hire his own crew, and not to employ a son, brother or brother-in-law.

No work to be done on Labour Day unless mutually agreed, nor on Sundays or holidays except by order from Superintendent, or man in charge of drill-boat.

Hours of labour: eight per day.

Wages: Per hour—foreman, \$1; blasters, 85 cents; runners, 75 cents; helpers, 65 cents; blacksmiths, 85 cents; blacksmiths' helpers, 65 cents; firemen, 75 cents.

Overtime, time and one-half; Sundays and holidays, double time.

#### Coal Mining

**BRULE MINES, ALBERTA.—THE BLUE DIAMOND COAL COMPANY, LIMITED AND DISTRICT NO. 18 OF THE UNITED MINE WORKERS OF AMERICA.** Agreement in effect from August 19, 1920.

This agreement is similar to that entered into by District 18 of the United Mine Workers of America and the Western Canada Coal Operators' Association, as in the LABOUR GAZETTE for August, 1920, both agreements having been approved by and put in effect by order of the Director of Coal Operations.

The rates of pay for men on day wages working for the Blue Diamond Coal Company were the same as those of the agreement in the August issue of the LABOUR GAZETTE. These were later revised (in October) by an amendment put into effect by order of the Director, increasing the rates by approximately \$1.15 per day. The new rates are given in the article on pages 1547-1548.

#### Building and Construction

**WINNIPEG, MAN.—GENERAL CONTRACTORS' SECTION, BUILDERS' EXCHANGE, AND UNITED BROTHERHOOD OF CARPENTERS AND JOINERS OF AMERICA,** Nos. 343 AND 2655. Agreement in effect from July 1, 1919 to May 1, 1921.

Hours of labour, eight per day, four hours on Saturdays.

Minimum wage: Per hour—until May 1, 1920, 75 cents; from May 1, 1920 to May 1, 1921, 80 cents.

"In the event of the cost of living increasing during the latter term of this agreement above the year 1919 as evidenced by the Dominion Government report and published in the LABOUR GAZETTE, the wages herein agreed to be paid shall be raised, the amount of such raise to be determined in the manner provided" i.e., by a committee consisting of three members of each of the parties to this agreement, who shall investigate into and try to settle same, any settlement to be binding on both parties.

The wage rate was finally fixed at \$1 per hour from May 1, 1920.

Union men to have preference of employment.

Overtime up to twelve hours, time and one-half. Thereafter, Saturday afternoon, Sundays and holidays, double time. No work on Labour Day.

SASKATOON, SASK.—BUILDERS' EXCHANGE, AND UNITED BROTHERHOOD OF CARPENTERS AND JOINERS, No. 1390. Agreement in effect from September 27, 1920 to May 1, 1921.

Wages: Per hour, 85 cents.

Overtime until 10 p.m., time and one-half; thereafter, and Sundays, double time.

Hours of labour: fifty per week.

No work on Labour Day except to save life.

HAMILTON, ONT.—HAMILTON SOCIETY OF DOMESTIC SANITARY AND HEATING ENGINEERS AND UNITED ASSOCIATION OF PLUMBERS AND STEAM FITTERS OF THE UNITED STATES AND CANADA, No. 67. Agreement in effect from May 1, 1920, to April 30, 1921.

Hours of labour, eight per day, four hours on Saturday.

Minimum wages: Per hour—from May 1, 1920 to Sept. 30, 1920, 85 cents; from October 1, 1920 to April 30, 1921, 90 cents. Apprentices who have passed examination, first year, 70 per cent of journeymen's wage; second year, 80 per cent.

Overtime, until midnight, time and one-half. Thereafter, and Sundays and holidays, double time.

Only Union men to be employed.

Employees to work only for established sanitary and heating engineers.

Grievances to be settled by a Joint Conference Board of three employers and three journeymen, to meet not less than once a month. If a dispute cannot be satisfactorily adjusted, matter to be referred to the General office of the Association. No strike or lockout to take place before a decision shall have been rendered.

ST. CATHARINES, ONT. — MASTER PLUMBERS, AND UNITED ASSOCIATION OF PLUMBERS AND STEAMFITTERS OF THE UNITED STATES AND CANADA, No. 244. Agreement in effect from September 1, 1920, with three months' notice of change.

Hours of labour: eight per day; four hours on Saturday.

Minimum wage: Per hour, journeymen, September 1, 1920 to September 1, 1921, 90 cents.

Overtime: until midnight, time and one-half; thereafter and Sundays and holidays, double time.

Only Union men or prospective members to be employed. One apprentice to every three journeymen, but present number to be retained. Each employer to be entitled to employ a man to do general helping; each steamfitter to be allowed one helper, who may be an apprentice or a labourer, any additional help to be labourers. Apprentices to serve five years, three as a helper and two as a junior.

Grievances to be referred to a committee or equal number of Masters and Journeymen.

MONTREAL, QUE.—EMPLOYERS IN THE MARBLE INDUSTRY AND MARBLE MASONS, CUTTERS, SETTERS AND CARBORUNDUM INTERNATIONAL UNION, No. 2. Verbal agreement in effect from July, 1920.

Minimum wage: Per hour—journeymen, 75 cents; foremen at least 10 cents per hour above.

Hours of labour: nine per day; five on Saturday.

Overtime to be worked persistently only in emergency, and not if there is any unemployment in the trade. Overtime rates, until midnight, time and one-half; thereafter, Saturday afternoons, Sundays and holidays, double time.

Members not to be discriminated against. No sub-contracting to be done.

WINNIPEG, MAN.—MASTER PAINTERS' ASSOCIATION, AND BROTHERHOOD OF PAINTERS, DECORATORS, PAPERHANGERS, GLAZIERS AND GLASSWORKERS OF AMERICA, No. 739. Amendment in effect from May 25, 1920 to May 1, 1921.

Agreement printed in LABOUR GAZETTE for November 1919, page 1333.

No member to work for anyone except recognized Master Painters who are paying business tax and workmen's com-

pensation and are parties to this agreement, so long as said Master Painters can give employment.

Minimum wage: Per hour, from May 17, 1920 to May 1, 1921, 87½ cents.

Men working on swing stage at height of three storeys and over to receive 5 cents per hour above minimum.

If regular payday falls on regular holiday, wages to be paid on last working day preceding such holiday, the employee to go for his pay in his own time.

OTTAWA, ONT.—OTTAWA BRANCH OF ASSOCIATION OF CANADIAN BUILDING AND CONSTRUCTION INDUSTRIES AND UNITED SLATE, TILE AND COMPOSITION ROOFERS, DAMP AND WATERPROOF WORKERS' ASSOCIATION No. 64. Agreement in effect from May 15, 1920, to April 30, 1921.

For Clauses 1-13 of this agreement see LABOUR GAZETTE for August 1920, page 1059.

Hours of labour, forty-four per week, the pot man to be allowed to start one hour earlier in the morning; straight time for the extra hour.

Wages: Per hour—roofers, 70 cents; roofers' labourers, 55 cents; employers to be the judge between labourers and roofers.

Driver not to be required to join Union; duties to consist in driving the horse and assisting the roofers except in laying felt or using the mop.

LACHINE, QUE.—DOMINION BRIDGE COMPANY, LIMITED, AND ITS EMPLOYEES IN THE FOLLOWING DEPARTMENTS: MACHINISTS, ELECTRICAL, STRUCTURAL, PLUMBING, PIPE AND STEAM FITTING, TINSMITHING AND SHEET METAL WORKING AND BLACKSMITHS. Agreement in effect from May 15, 1920 to April 1, 1921.

Hours of labour: for iron workers, blacksmiths and boiler department, fifty hours per week, being ten hours per day for first five days; for employees in electrical and steamfitting departments on maintenance work, fifty hours, nine

hours per day for five days, and five hours on Saturdays; for machinists, apprentices, specialists and machinists' helpers, forty-four hours per week, eight hours per day for five days and four hours on Saturdays. Night shift, fifty hours per week, ten hours per night excepting Saturday and Sunday nights. If Saturday night is worked, overtime will be paid.

Overtime, time and one-half. Sundays and holidays, double time. A second shift in twenty-four hours will count overtime.

Grievances: Company to meet a committee of employees and if possible adjust grievances. Work not to cease and company to take no action until chairman of the federated crafts and the highest local available representative have failed to adjust matters.

Employees engaged in work outside plant to receive 5 cents per hour extra.

Seniority and efficiency to govern in a reduction of working force.

Apprentices to be between the ages of 16 and 18 years; to serve four years; one for the shop, and one for every five journeymen; apprentices to be given opportunity to become proficient in all branches of the trade.

Minimum wages: Per hour—machinists, 80 cents; specialists, first year, 57 cents; second year, 65 cents; third year, 70 cents; helpers, 57 cents; apprentices, first year, 30 cents; second year, 35 cents; third year, 40 cents; fourth year, 45 cents.

TORONTO, ONT. — CERTAIN LOCAL MANUFACTURERS, AND GRANITE CUTTERS' INTERNATIONAL ASSOCIATION. Agreement in effect from April 1, 1919 to April 1, 1922.

In this agreement, as given in the LABOUR GAZETTE for January, 1920, the wage rate was changed on April 1, 1920 to \$1.00 per hour.

BROWNSBURG, QUE.—PROPRIETOR OF GRANITE QUARRIES IN CHATHAM TOWNSHIP, AND PAVING CUTTERS' UNION, BRANCH No. 39. Agreement in effect

from January 1, 1920 to January 1, 1921.

Section C—Pumping Station workers: Monthly workers not to work over eight hours a day except in event of a breakdown in the plant. Workers working Sunday to have one day off in seven. Hourly workers to work nine hours per day.

Minimum wages: Per month—chief engineer, \$204.10; assistant chief, \$175.-

35; shift engineers, \$158.10; spare engineers, first twelve months, \$147.50; thereafter \$158.10; firemen, \$137.50; oilers and cleaners, \$122.50.

Section D: Workers on monthly basis with exception of chief engineers, wiring inspector, meter readers and draughtsmen, after one year's service to be entitled to fourteen days' holidays with pay each year, the above named to be entitled to twenty-one days. Hourly workers in service for a period of one year to be entitled to one week's holidays with pay, and after two years, to two weeks, each year.

ALBERTA—GOVERNMENT TELEPHONES—REGULATIONS AND WAGE SCHEDULE, in force from February 1, 1920 to December 31, 1920 and thereafter from year to year unless terminated by notice in writing.

Hours of labour, eight per day. Overtime, Sundays and holidays, time and one-half, 10 p.m. to 8 a.m. double time.

Overtime to be authorized by foreman; not to be allowed employees on monthly basis, except in case of storms, fires or floods.

Wage schedule; Per month—foremen, wire chiefs, plant inspectors, \$160-\$190; Per hour, sub-foremen, chief installer, 90 cents; groundmen, 50 cents. Journeymen, 80-92 cents. Floating gang, per day \$3-\$5.50.

Apprentices: Per month, plant inspectors, combination men, \$75 to \$135. Per day—line men, \$2.00 to \$5.35; per hour—others, 40 to 75 cents.

**Domestic and Personal Services (including amusements)**

GUELPH, ONT.—MASTER BARBERS, AND JOURNEYMEN BARBERS. Agreement in effect from April 1, 1920 to April 1, 1921.

Wages: Per week—journeyman barbers, \$20, and one-half over \$28.

MONTREAL, QUE.—MASTER BARBERS, AND JOURNEYMEN BARBERS' INTERNATIONAL UNION, No. 659. Agreement in effect from July 2, 1920 to July 2, 1921.

Union shops to be open only between 8 a.m. and 8 p.m., with exception of Saturdays and days before holidays. Shops to be closed on certain holidays. Journeymen to have one-half day off each week.

Wages: Per week—\$25 guarantee and one-half over \$33. Wages for Saturday man, \$8 guarantee and one-half over \$10.

Employer to discharge any of his help at any time on request of the Union.

Any journeyman found incompetent may be discharged and cannot collect more than 35 cents per hour, or than 50 cents Saturday for the time he has worked.

WINNIPEG, MAN.—PROPRIETORS OF LOCAL UNION BARBER SHOPS AND BARBERS' LOCAL UNIT, ONE BIG UNION. Agreement in effect from May 1, 1920 to April 30, 1921.

All employees to be members of the Barbers' Unit.

Minimum wage: Per week—journeymen, \$25, with 50 per cent over \$35, and 60 per cent over \$40. Saturdayman, \$6 guarantee and 60 per cent over \$8. Any man employed for less than a week apart from Saturday, to receive \$4, and 60 per cent over \$6.

Shops to be open from 8.30 a.m. to 6.30 p.m., 9.30 p.m. on Saturdays and days before holidays.

CALGARY, ALTA.—UNION BARBER SHOPS AND JOURNEYMEN BARBERS' INTERNATIONAL UNION, No. 230. Verbal agreement in effect from August 30, 1920.

No barbers to be employed except Union members, or men with permit cards from Secretary-Treasurer.

Minimum wage: Per week—\$25, and 60 per cent over \$40. Saturday, 60 per cent of total receipts, with \$7.50 guarantee; any other day, 60 per cent of total receipts, with \$5 guarantee.

Shops to remain open until 9 p.m. before holidays, and close on holidays.

PRINCE ALBERT, SASK. — LOCAL THEATRE PROPRIETORS AND MUSICIANS' PROTECTIVE UNION, No. 221, AMERICAN FEDERATION OF MUSICIANS. Agreement in effect from September 1, 1920, to August 31, 1921.

Only Union men to be employed.

Grievances to be arbitrated by three local disinterested parties, this clause to be in effect if terms of agreement are carried out by employer, and not in event of a call by the Union officials.

Rates: Empress theatre, casual rate, leader (afternoon or evening) \$5; sidemen (afternoon or evening), \$3; 15 minutes intermission each session. Strand and Orpheum theatres, per week of six days, leader, all day, \$40; sidemen, all day, \$30; sidemen, evenings only, \$18. Casual rate: afternoon or evening, leader, \$4, sidemen, \$3; afternoon and evening, leader, \$7; sidemen, \$5. When required to play on stage in uniform or in sight of audience, \$1 per man per performance.

One week's notice of dark week or lay-off. If theatre orchestra is displaced by travelling orchestra, local members to receive full salary.

OTTAWA, ONT. — LOCAL THEATRE MANAGERS AND INTERNATIONAL ALLIANCE OF THEATRICAL STAGE EMPLOYEES, No. 55. Agreement in effect from September 1, 1920 to August 31, 1921.

Only Union men to be employed.

Wages: Per week—\$36 to \$40. Per performance, \$2.60. Midnight show, not less than \$10 per man. Rehearsals, \$1 per hour—and not less than four hours. Taking in or putting out show, 75 cents per hour or less. Sunday work, \$1.50 per hour or less. Holidays, double time.

Disputes to be adjusted by an arbitration board of three members.

KINGSTON, ONT. — TRANS-CANADA THEATRES, LIMITED, AND INTERNATIONAL ALLIANCE OF THEATRICAL STAGE EMPLOYEES AND MOVING PICTURE MACHINE OPERATORS, No. 528. Agreement in

effect from April 1, 1920 to May 31, 1921.

Only Union members to be employed.

Minimum scale: Per week—carpenter, \$30; moving picture machine operator, \$27.50; property man, electrician, assistant moving picture machine operator, \$25; head flyman, \$23. Per performance, flyman, \$2; grips, \$1.50; others, \$1.50.

Union agrees to furnish competent men.

KINGSTON, ONT. — THREE LOCAL THEATRES AND AMERICAN FEDERATION OF MUSICIANS, No. 93. Agreement in effect from September 1, 1920 to August 1, 1921.

Orchestra prices: Dance halls—per evening, man, \$4 to \$7, leader, \$5 to \$8. Concerts, dinners, etc., man, \$3; leader, \$4. Picture Houses, per performance, man, \$2 to \$2.50; leader \$3. Per week, man, \$30; leader, \$35; formal dress, \$5 extra; organist, \$40.

Band prices: Concerts, exhibitions, etc., per man, \$2 to \$3; leader, \$4 to \$5.

Leader only to engage or discharge musicians.

VANCOUVER, B.C.—AMERICAN FEDERATION OF MUSICIANS, No. 145. Prices and working conditions, effective September 6, 1920.

Matters not dealt with in this scale to be reported to President or Secretary and adjusted by same pending a meeting by Board of Directors.

Rates for out of town engagements—varying according to time of leaving and returning. Two members not to alternate on a weekly engagement. Members blacking up, \$5 extra; playing on stage in view of audience, \$1 extra per performance; playing behind scenes, \$5 extra per week; talking or whistling to assist comedian, \$5 extra per week (paid by act). Overtime, \$1 per half hour.

No member to play more than one instrument on any engagement without permission from Board of Directors.

Grand Opera, Ballet and Classic dancing, single performances, \$9; six evening performances, \$50.

Combination houses: one evening performance, \$7; one matinee, \$6; week of 10 performances, \$60. Dramatic stock houses: one evening performance, \$6; one matinee, \$5; six evenings and one matinee, \$39. Burlesque and Musical comedy stock, one evening, \$7; one matinee, \$6; six evenings with one matinee, \$41. Vaudeville (2 a day): twelve performances, \$51; leader extra, per week, \$12. Unclassified vaudeville (3 a day or more): six days, \$51; leader extra, per week, \$12.

Picture theatres, varying according to price of admission and length of show, \$35 to \$52 per week; leader 25 per cent above scale; overtime per half-hour, \$1; relief players, \$12 to \$38.

Rates are also given in detail for

dancing engagements, dancing schools, excursions and picnics, cafes, restaurants, cabarets, hotels, parades, funerals, fairs, park concerts, race meets, skating rinks, and symphony orchestra concerts.

#### Civic Agreements

MOOSE JAW, SASK.—CITY OF MOOSE JAW AND CITY FIRE FIGHTERS' UNION, No. 151. Agreement in effect from February 1, 1920 to February 28, 1921.

Wages: Per month—firemen, 1st three months, \$110; next six months, \$115; next twelve months, \$120; thereafter, \$125; Lieutenants, \$135; Captains, first year, \$135; further period, \$140; Captain in charge, \$150; electricians, same as Captain; motor mechanic, first year, \$160; second year, \$165; thereafter, \$170.

No employee representing his fellow workmen to be discriminated against.

### SUPPLEMENT TO AGREEMENT BETWEEN COAL MINERS AND OPERATORS IN DISTRICT 18 OF THE UNITED MINE WORKERS OF AMERICA

ON July 20, 1920, an agreement was entered into between the Western Canada Coal Operators' Association and the United Mine Workers of America of District 18, which covers the Eastern British Columbia-Alberta coal field, to cover the period between April 1, 1920 and March 21, 1922. Working conditions, rates of pay for men on day wages in the whole field, and rates for men working on contract, that is, by the ton, yard, etc., were specified for each mine and part of a mine. In the LABOUR GAZETTE for August, 1920, beginning at page 1047, the details as to the agreement were given. The rates of pay agreed upon on July 20 were based upon increases given to coal miners in the United States as had been agreed to in December, 1919. Further increases in wages to miners in the United States having been recently awarded to men on day wages, the rates of pay in Dis-

trict 18 for men on day wages were accordingly further advanced, the increases averaging \$1.15 per day. The agreement entered into on July 20th and approved by the Director of Coal Operations was accordingly amended on October 25 and a supplement issued giving the new scale of pay for men and boys on day wages, effective from October 25, as follows:—

#### OUTSIDE WAGES.

Occupation.	Per day.	Hours
Bottom man.....	\$ 7.08	8

## FAIR WAGE CONTRACTS, OCTOBER, 1920

**D**URING October the Department of Labour received for insertion in the **LABOUR GAZETTE** the following information relative to twenty-five fair wage contracts, of which twenty were awarded by the Department of Public Works, and five by the Department of Railways and Canals. All the contracts contained the usual fair wage clause which provides for the prompt payment of such wages as are current in the district in which the work is to be performed, and for observance on the various works under contract of the prevailing hours of labour, and which otherwise prevents abuses and secures the legitimate rights of the labour employed.

A statement was also received as to supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, etc.

## DEPARTMENT OF PUBLIC WORKS.

Restoration of a portion of Fairmont Barracks, Vancouver, B.C. Name of contractor, J. W. Bye, Vancouver, B.C. Date of contract, September 9, 1920. Amount of contract, \$18,000.

Repairs to wharf, Campbell River, B.C. Name of contractor, William Greenlees, Vancouver, B.C. Date of contract, September 23, 1920. Amount of contract, schedule of prices.

Construction of wharf, Lyall Harbour, B.C. Name of contractors, Vancouver Pile Driving and Contracting Company, Vancouver, B.C. Date of contract, September 23, 1920. Amount of contract, schedule of prices.

Renewal of wharf, Moresby Island, B.C. Name of contractors, Vancouver Pile Driving and Contracting Company, Vancouver B.C. Date of contract, September 23, 1920. Amount of contract, schedule of prices.

Alterations and additions to heating system in Customs Building, Winnipeg, Man. Name of contractors, Green &

Lister, Ltd., Winnipeg, Man. Date of contract, September 25, 1920. Amount of contract, \$5,289.

Reconstruction of wharf, Owen Sound, Ont. Name of contractor, Ed. Conroy, Peterborough, Ont. Date of contract, September 27, 1920. Amount of contract, schedule of prices.

Alterations and additions to Court House for conversion into Post Office, Red Deer, Alta. Name of contractor, W. H. Cawston, Calgary, Alta. Date of contract, September 20, 1920. Amount of contract, \$11,750.

Reconstruction of Public Building, Annapolis, N.S. Name of contractors, Denton & Condon, Digby, N.S. Date of contract, September 16, 1920. Amount of contract, \$26,300.

Water system for Air Station, Jericho Beach, Vancouver, B.C. Name of contractors, Weeks & Co., Vancouver, B.C. Date of contract, September 7, 1920. Amount of contract, \$2,669.52.

Alterations and additions to Public Building, Yarmouth, N.S. Name of contractors, H. A. Russell and D. K. McAulay, Halifax, N.S. Date of contract, September 30, 1920. Amount of contract, \$25,947.

Construction of Ice-Breaker, St. Joseph de Sorel, Que. Name of contractors, A. Lacroix & H. Gravel, Montreal, Que. Date of contract, October 1, 1920. Amount of contract, \$2,800.

Construction of floating wharf, Princess Creek, B.C. Name of contractors, F. Cogle and H. Perry Leake, Proctor, B.C. Date of contract, September 27, 1920. Amount of contract, \$7,980.

Restoration of Ore Dressing Plant, Ottawa, Ont. Name of contractors, Taylor & Lackey, Ottawa, Ont. Date of contract, October 12, 1920. Amount of contract, \$6,233, and unit prices for additions or deductions which may be made in connection with this contract.

Alterations to heating plant in Public Building, Dauphin, Man. Name of con-

tractor, H. H. Moore, Dauphin, Man. Date of contract, October 6, 1920. Amount of contract, \$3,478.

Construction of Assistant Medical Officers' Quarters and Tile Conduit from Ward "H" to Nurses' Home and for the execution of additional work above mentioned at the Westminster Psychopathic Hospital, London, Ont. Name of contractor, W. H. Harvey, Kingston, Ont. Date of contract, October, 14, 1920. Amount of contract, \$158,780.

Reconstruction of 466 feet of the superstructure of East Pier, Eastern Channel to Toronto Harbour, Toronto, Ont. Name of contractors, The C. S. Boone Dredging & Construction Co., Ltd., Toronto, Ont. Date of contract, October 12, 1920. Amount of contract, schedule of prices.

Reconstruction of portion of superstructure of wharf, Thessalon, Ont. Name of contractor, Geo. P. Sandie, Thessalon, Ont. Date of contract, October 16, 1920. Amount of contract, schedule of prices.

Alterations and additions to Heating Apparatus in Immigration Building, St. John, N.B. Name of contractor, R. E. Fitzgerald, St. John, N.B. Date of contract, October 15, 1920. Amount of contract, \$8,500.

Construction of wharf, Lord's Cove, Deer Island, N.B. Name of contractors, F. L. Boone & G. S. Macdonald, South Devon, N.B. Date of contract, October 20, 1920. Amount of contract, schedule of prices.

Construction of Floating Wharf, Proctor, B.C. Name of contractors, F. Cogle and H. P. Leake, Proctor, B.C. Date of contract, October 22, 1920. Amount of contract, \$7,940.

#### DEPARTMENT OF RAILWAYS AND CANALS.

Grading for Locomotive Terminal Yard at Fairview, N.S., Canadian National Railways. Name of contractors, Dominion Construction Co., Ltd., and Wheaton, Moncton, N.B. Date of contract, October 4, 1920. Amount of contract, schedule of prices.

Grading for Railway Yard in the parish of Moncton, N.B., Canadian National Railways. Name of contractors, Dominion Construction Co., Ltd., and Wheaton, Moncton, N.B. Date of contract, October 4, 1920. Amount of contract, schedule of prices.

Construction of Mechanical Coaling Plants at Truro, Point Tupper, Pirate Harbour, N.S., and Newcastle, N.B., Canadian National Railways. Name of contractors, Williams & Wilson, Ltd. Date of contract, October 4, 1920. Amount of contract, schedule of prices.

Sandblasting and painting certain steel bridges on the Lachine Canal. Name of contractors, Canadian Sand Blast Co., Ltd., Montreal, Que. Date of contract, October 4, 1920. Amount of contract, schedule of prices.

Placing of stone protection along certain portions of the summit level of the Welland Canal between Thorold and Port Colborne, principally between Thorold and Welland. Name of contractor, Joseph Battle, Thorold, Ont. Date of contract, October 11, 1920. Amount of contract, cost plus basis.

#### POST OFFICE DEPARTMENT.

The following is a statement of payments made in October for supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, and the performance of work under sanitary conditions:

Nature of orders.	Amount of orders
Making metal dating stamps and type and other hand stamps and brass crown seals.....	\$ 739.90
Making and repairing rubber stamps, daters, etc.....	171.56
Supplying stamping material, pads and ink.....	465.26
Supplying mail bag fittings.....	6,249.00
Supplying mail bagging.....	70,977.75
Making up and supplying letter carriers' uniforms, etc.....	23,026.40
Scales, new and repaired.....	325.70
Repairing letter boxes.....	45.85
Making and repairing miscellaneous articles.....	2.20

## PRICES RETAIL AND WHOLESALE IN CANADA, OCTOBER, 1920

THE movement of prices was again downward, the chief decreases appearing in grain, cattle, hogs, sheep, fish for export, butter, cheese, fresh and canned vegetables, bran, shorts, flour, rolled oats, sugar, molasses, cotton, hides, leather, boots, some metals and lumber, linseed oil, turpentine, several lines of chemicals, raw rubber, and starch. There were slight increases in hay, eggs, iron, pulp and paper.

In retail prices the average cost of a weekly budget of twenty-nine staple foods in sixty cities was \$15.83 at the middle of October as compared with \$15.95 at the middle of September, \$14.21 in October, 1919, and \$7.93 in October, 1914. The chief decreases were in sugar and potatoes but there were also slight decreases in beef, bread, flour, and rolled oats with advances in pork, bacon, lard, eggs and milk. Anthracite and bituminous coal were higher in many of the cities. Rent advanced in several localities.

In wholesale prices the index number was again lower at 317.6 for October, as compared with 326.6 for September, 299.6 for October, 1919, and 138.7 for October, 1914. The chief decreases appeared in the groups Grains and Fodder, Animals and Meats, Miscellaneous Foods, Building Materials, and Chemicals. The group index numbers were lower than a year ago in Grains and Fodder, Fruits and Vegetables, Woollens, Cottons, Silks, Jutes, Hides, Leather, Boots, Paints and Oils, and Raw Furs, but were higher for the other groups.

The accompanying tables and notes give details as to the prices movement during the month and as compared with the same month in previous years.

The table of retail prices gives statistics for some 60 localities in Canada, having a population of approximately 10,000 or over. Quotations are obtained

by the correspondents of the LABOUR GAZETTE, resident in each locality, from representative dealers doing a considerable trade with workingmen. All prices are for delivered goods. The exact quality for which the quotation is given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The list of commodities includes over one hundred staple foods and groceries, coal, wood and coal oil, the number of articles having been increased twice since January, 1910, when the regular publication of these statistics was begun.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts, with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central, without modern conveniences or with incomplete conveniences.

The weekly family budget calculated in terms of the average prices in the cities for which reports are received includes twenty-nine staple foods, laundry starch, coal, wood coal oil, and rent, these being the items for which statistics have been obtained each month and published in the LABOUR GAZETTE since January, 1910. The quantities of each commodity included are modifications of those employed in similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance the only fruits are evaporated apples and prunes, and the only fresh

vegetable is potatoes. As market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportion of expenditure on the various foods therefore tends to be maintained\*. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the difference in quality. It was estimated, when the budget was first published in 1912, that these calculations represented from sixty to eighty per cent of the expenditure of an ordinary family, according to the total income. For the average family of five the expenditure on these items of food, fuel, light, and rent would be perhaps two-thirds or about sixty-five per cent of the total income. While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province. The quantities of meats, dairy products, cereals, etc., included were designed to afford a liberal supply for the healthy family of a man at hard physical work. On the other hand an average family with an income sufficient to do so would buy less meat, etc., but more fruit, fresh and canned vegetables, etc.; so that the comparative expenditure would be little changed.

The index number of wholesale prices is based on the quotations for 271 commodities, and is the simple average of the percentages of current prices of the several commodities in relation to the average prices for the base period, 1890-1899, these being therefore made equal to 100. The quotations for most farm products are obtained weekly and aver-

aged for the month, the quotations for other commodities are taken for the middle of the month. The table of index numbers shows the changes by groups and sub-groups for the previous month and for corresponding months back to 1913.

### Retail Prices

In meats, beef prices again averaged slightly lower owing to slight decreases in a number of the cities. Lamb and mutton were lower in some of the cities. Pork and bacon averaged higher, there being increases in several cities. Prices of fish showed little change. Whitefish advanced in the cities between Brockville and Sorel. Canned salmon advanced in a number of the cities in the East. Lard advanced in several cities. There was a general advance in eggs, the prices being 10 cents per dozen higher in several localities and 5 cents in some of the others. Milk was higher in Montreal, Hull, Ottawa, Orillia, Guelph, Woodstock, Stratford, Owen Sound, Regina, Prince Albert, Saskatoon and Vancouver, but was lower at Brockville. Butter was slightly higher in several of the cities, but there were decreases in some. Oleomargarine was lower in some localities. Cheese was steady. Bread declined slightly in nine cities, but advanced in three. Flour and rolled oats were lower in most of the cities. Canned tomatoes were easier in some localities. Onions were substantially lower in nearly all of the cities. Potatoes declined in forty-one of the cities and advanced in five, the decreases being general throughout the country. Fresh apples were lower in most of the cities. Prunes and evaporated apples showed little change. Raisins, currants, jam and canned fruit were steady. Marmalade and corn syrup were steady. Honey was higher in some of the cities, but lower in others. In sugar there was a general decline, the price being three cents lower at the middle of October than at the middle of September.

Anthracite coal advanced in twenty-

\*At times when the price of an article heavily weighted for this purpose rises (or falls) abnormally the increase (or decrease) in food prices so indicated is exaggerated and this should be taken into account in using the budget as an indicator of changes in the cost of living.

## COST PER WEEK OF A FAMILY BUDGET OF STAPLE FOODS, FUEL AND LIGHTING, AND RENT IN TERMS OF THE AVERAGE PRICES IN SIXTY CITIES IN CANADA.

two out of the forty cities where it was quoted. Bituminous coal advanced in twenty-four cities. Wood and coal oil were comparatively steady.

Rent was higher in several of the cities.

### Wholesale Prices

**GRAINS AND FODDER.**—Wheat No. 1 Manitoba Northern, was down to \$2.24 per bushel at the beginning of the month, recovered to \$2.39, but fell in the last week to \$2.27. Ontario winter wheat fell from \$2.30-\$2.40 to \$2.20-\$2.30 at the beginning of the month, to \$2.05-\$2.15 the next week, and to \$2.05-\$2.10 the last week. Barley No. 3 Western had fallen to \$1.06 at the beginning of the month but was up to \$1.22 later. Ontario barley fell to \$1.10-\$1.15 but advanced 2c. later. Oats, No. 2 Western, fell to 70c. the next week. Ontario oats fell to 68c, but rose to 71c. American corn was down to \$1.55 at the beginning of the month and still lower at \$1.17 in the last week. Flaxseed fell to \$3.10 at the beginning of the month and to \$2.76 in the last week. Ontario rye was down to \$1.65. Hay advanced \$2.00 per ton, reaching \$33.00 at Montreal and Toronto. Bran fell from \$52.00 per ton to \$40.00 and shorts from \$61.00 to \$45.

**ANIMALS AND MEATS.**—Western cattle were down from \$12.50 per hundred pounds to \$10.50 at the beginning of the month, and after a recovery to \$11.00, fell to \$10.00 in the last week. Butcher cattle at Toronto fell from \$14.75 per hundred pounds to \$13.00. Beef, dressed hindquarters, fell from 27c. per pound to 25c. and forequarters from 16c. to 15c. Hogs had risen to \$20.25 per hundred pounds at the end of September but fell to \$19.25 in the second week in October and to \$18.25 in the last week. Bacon eased off toward the end of September but advanced 2c., reaching 54-55c. toward the end of October. Ham fell from 42c. per pound to 40c. at the beginning of October and eased off to 39-40c. toward the end. Lard advanced from 28½c. per pound to 30c. Sheep were lower at \$6.00-\$7.00 per hundred

pounds. Dressed lamb eased off from 26-28c. per pound to 24-26c.

**DAIRY PRODUCTS.**—Creamery butter rose to 60c. per pound at Montreal the second week in the month but fell 10c. owing to lack of export demand. At Toronto, creamery butter fell off from 63c. per pound to 61c. Cheese was slightly lower at 25c. per pound. Eggs reached 75-76c. per dozen at Montreal in the last week of September, advanced 1c. at the middle of October, but fell off to 75-77c. in the last week. At Toronto fresh eggs reached 67-69c. at the beginning of the month and advanced 1c. in the last week. Milk advanced from 31c. per gallon to 37c. at Montreal. At Toronto the price had reached \$3.25 for an eight gallon can in September but was reduced at the end of October owing to the fall in the prices of mill feed and the smaller demand for milk products.

**FISH.**—The export market for dried cod was reported very poor owing to unfavourable commercial conditions in the West Indies and to large stocks of fish on hand in those islands, in Nova Scotia, and in Newfoundland. Catches of cod for the year were large. Prices were reported to be down about 25 per cent. The catch of mackerel, alewives, and herrings was reported to have been less than expected, but the demand was good. The export market for canned lobster was reported to be quiet owing to a falling off in the demand in Europe and to unfavourable exchange conditions. Sales in the United States were reported to be curtailed owing to the general expectation of lower prices for all food-stuffs.

**FRUITS AND VEGETABLES.**—Peaches advanced to 50c.-\$1.25 per basket but fell to 40-70c. Plums were up to 35-50c. for a six quart basket. Pears rose to 50c.-\$1.25 per basket, but fell to 40c.-\$1.00. Grapes rose from 40-50c. per basket to 50-65c. Bananas were easier at 11c. per pound. Lemons and oranges were lower at \$4.50 and \$8.00-\$9.50 per box respectively. Evaporated apples were lower at 15-16c. per pound. Potatoes were 10c. per bag lower at Toronto at \$1.65-\$1.75 in small lots. At Mont-

\*Preliminary figures. †Four commodities off the market, fruits, vegetables, etc. One line o. spelter was dropped in 1915.

real potatoes were down to \$1.40 per bag in car lots. Tomatoes were down to 20-30c. per basket at the beginning of the month but reached 50c.-\$1.00 later. Onions were lower at \$2.00 per bag. Turnips were down to 65-75c. per bag. Canned corn declined to \$1.65 per dozen. Canned peas were lower at \$1.80-\$1.90 per dozen. Canned tomatoes were down to \$1.80-\$1.90 per dozen. Oatmeal was lower at \$5.00 per bag. Flour was down from \$14.00 per barrel to \$13.00. Rice, Rangoon, was lower at 12½c. per pound. Sugar fell from \$21.26 per hundred pounds at the middle of September to \$19.76 at the middle of October but toward the end of the month was falling rapidly owing to large stocks on hand and demoralization of commercial and financial conditions in Cuba. Glucose was \$1.50 per hundred lower. Molasses fell from \$1.53 per gallon to \$1.43. Honey was firmer at 26c. per pound.

**TEXTILES.**—Raw cotton fell from 31c. per pound to 22c. Coloured cottons averaged lower. The market for raw silk was firmer after the substantial decline since February. Jute had fallen from 17c. per pound in February to 13c. in July, rising slightly each month to 13.48c. in October. Hessians similarly were firmer after a decline.

**HIDES, LEATHERS, BOOTS, AND SHOES.**—Beefhides and calf-skins were down to 10c. per pound. Harness leather was again lower at 86-88c. per lb. Several lines of boots declined, the decreases varying from \$1.00 for the lighter

grades to 15c. for the medium heavy grades.

**METALS AND IMPLEMENTS.**—Pig iron advanced to \$61.80 per ton owing to the increase in freight rates. Wrought iron scrap also advanced, reaching \$25.00 per ton. Antimony was down to 8c. per pound. Copper fell to 22c. Lead was down to 9c. Spelter was down to 9¾c. Solder was lower at 31½c. Tin fell to 48-50c. Coil chain fell to \$13.50 per hundred.

**FUEL AND LIGHTING.**—Coal and coke remained at the high prices reached in September but bituminous coal was reported to be easier in the United States, the weather being favourable for transportation and for the accumulation of supplies. Calcium carbide eased off.

**BUILDING MATERIALS.**—In lumber, oak and British Columbia fir continued to decline. British Columbia shingles were also easier. Coal tar, sash cord, and copper wire were lower. Linseed oil fell 10c. per gallon. Turpentine fell from \$2.40 to \$2.05 per gallon. Resin and shellac were lower.

**HOUSE FURNISHINGS.**—Wooden pails and tubs averaged higher.

**DRUGS AND CHEMICALS.**—Alcohol, alum, bleaching powder, caustic soda, copperas were lower.

**MISCELLANEOUS.**—Malt, raw rubber, and laundry starch were lower. Newsprint paper was higher. Pulp continued scarce and difficult to obtain but the situation was reported easier in some instances.

## PRICES IN THE UNITED KINGDOM AND IN OTHER COUNTRIES

**T**HE accompanying tables and the following notes give the latest statistics as to the prices in the United Kingdom and in other countries.

### United Kingdom

The Ministry of Labour reported the average cost of the principal articles of

food at the first of October to be 170 per cent higher than in July, 1914, as compared with an increase of 167 per cent by the first of September. The chief increases for the month were seasonal advances in milk and eggs, but there were also increases in bacon, mutton, and margarine. Potatoes and tea were lower. Rent was reported to be 39

per cent higher, clothing 330 per cent, fuel and light 145-150 per cent, other items 140 per cent. The average increase in all items was, therefore, estimated at 164 per cent.

The *Economists'* index number of wholesale prices in Britain declined 470 points or 6.2 per cent during the month of October. But for a sharp rise in the cereal and meat group, the decline in this period would have been still more pronounced. The drop was greater than in any preceding month since the downward movement began in April. In spite of the decreases in other lines, the strength of foodstuffs, especially cereals and meats, has been persistent. Wholesale grain and meat quotations are 21 per cent higher than in November, 1918.

#### United States

In the United States *Bradstreet's* index number of wholesale prices showed a sharp decline in October. "In fact, no single month in the country's history shows a larger volume or proportion of decline, nor was the retreating tendency ever more general and at the same time varied, as regards the commodities involved". A decrease of 7.3 per cent during the month is largely accounted for by declines in hides, leather and textiles with smaller decreases in metals, foods and oils.

The National Bank of Commerce of New York comments on the price situation as follows: "Wholesale commodity prices continued to decline during the month from September 16th to October 15th. A striking feature of the last thirty days has been the further drop in the price of commodities which were among the first to show a downward tendency. Hides are practically at their pre-war level, and the prices of most grades of wool have further decreased. Spectacular declines have occurred in corn and cotton. The iron and steel market is reflecting the general tendency. The few increases in prices during the

month serve only to accentuate the uncertainties of the market and the continued waiting attitude of buyers."

#### France

The General Statistical Department of France reported that its index number of retail prices of food in the cities, except Paris, for the third quarter of 1920 showed an increase of 2.5 per cent compared with the second quarter and an increase of 288 per cent over the third quarter of 1914.

#### Italy

The Municipal Labour Office at Rome reported the general level of food prices in August, 1920, to be 1.3 per cent higher than in July, and 227 per cent higher than in 1914. The general level of prices for necessities was found to be 216 per cent higher than in 1914. The Municipal Labour Office at Milan reported the cost of maintaining a family in September, 1920, to be 370 per cent higher than in 1914, food having increased 368 per cent, clothing 578 per cent, heat and light 587 per cent, rent 8.3 per cent. The cost of food in September was 3.1 per cent higher than in August.

#### Sweden

The general level of retail prices in Sweden showed a slight decline in September as compared with August, though prices increased in Stockholm at the same rate as they declined elsewhere in Sweden. It is estimated that the cost for food, fuel and lighting is 207 per cent above a similar expenditure in July, 1914.

#### New Zealand

In New Zealand, increases are still being reported in the retail prices of food, the cost in September being estimated at .8 per cent higher than in the preceding month and 72.8 per cent above the level of July, 1914.

## FATAL INDUSTRIAL ACCIDENTS REPORTED DURING THE THIRD QUARTER OF 1920

**A**CCORDING to information received by the Department, there were 296 fatal industrial accidents in the industries and trades of Canada during the third quarter of 1920, 103 of which occurred in July, 100 in August, and 93 in September. The revised records for the preceding quarter indicate 259 fatal accidents, while in the corresponding quarter of 1919, 284 fatal accidents were reported. (Since the publication of the last quarterly statement there have been reported 24 fatal accidents pertaining to the first quarter and 36 to the second quarter of this year. Of these 23 occurred on a trawler blown up at sea on March 11, and on a trawler which sank off Halifax on April 5 last.)

An amendment to the Workmen's Compensation Act of Nova Scotia, which became effective on January 1, of this

year, brings within the protection of the Act any officer or member of the crew of a ship registered in Nova Scotia or operated by a resident of the province "for the period that the operations of the ship are confined to the making of voyages or trips between places in Nova Scotia and places in New Brunswick, or Prince Edward Island, or Newfoundland, or to the making of fishing trips or voyages from ports or places in Nova Scotia."

The steam railway service group was responsible for the greatest number of fatalities during the quarter, there being 47 reported in this group. The record for the lumbering industry showed 42 fatalities, and building and construction 34 fatalities.

The following table, while not necessarily containing all the fatal accidents that may have occurred, has been prepared from all sources available.

FATAL INDUSTRIAL ACCIDENTS REPORTED DURING THE THIRD QUARTER OF 1920.

Trade or Industry.	Locality.	Date.	Age.	Cause of fatality.
<b>METALS, MACHINERY AND CONVEYANCES.—</b>				
Chainman at steel foundry .....	Hamilton, Ont.....	July 1	27	Struck by casting from load.
Machinist .....	Hamilton, Ont.....	" 2	53	Caught in planing machine.
Operator at pipe cutting .....	Fergus, Ont.....	" 2	17	Caught in shafting.
Workman at galvanizing shop.....	Welland, Ont.....	" 13	36	Vat containing acid exploded.
Employee at shipyard.....	Victoria, B.C.....	" 6	30	Collapse of derrick.
Carpenter at machine plant.....	Toronto, Ont.....	" 24	.....	Fall from window.
Bricklayer at steel plant.....	Sault Ste. Marie, Ont.....	" 26	43	Crushed between slag pot and cart.
Labourer at implements works.....	Toronto, Ont.....	" 30	25	Heart strain when loading machinery.
Locomotive fireman .....	Algoma, Ont.....	Aug. 6	33	Drowned; fell from engine.
Labourer at steel plant.....	Welland, Ont.....	" 7	62	Crushed when wall caved in.
Employee at steel plant.....	Sydney, N.S.....	" 5	50	Collapse of staging.
Employee at steel plant.....	Quebec, Que.....	" 6	.....	Leg crushed by falling steel.
Ladleman.....	Sydney, N.S.....	" 8	42	Struck by mould falling from car.
Bolter at shipyards .....	Collingwood, Ont.....	" 11	.....	Scratched hand; infection.
Bolter at shipyards .....	Vancouver, B.C.....	" 12	.....	Fall from staging.
Employee at pulley works.....	Toronto, Ont.....	" 12	.....	Fall of elevator.
Employee of motor factory .....	Windsor, Ont.....	" 18	.....	Electrocuted.
Employee at implement works.....	Hamilton, Ont.....	" 26	.....	Bruised foot; infection.
Tinsmith.....	Dartmouth, N.S.....	" 18	65	Explosion at oil stills.
Crane operator at steel plant.....	Toronto, Ont.....	" 24	.....	Fall from ladder.
Clerk at machine plant.....	Guelph, Ont.....	" 16	19	Fall from tractor.
Employee at machine plant.....	Fredericton, N.B.....	Sept. 11	35	Struck by chain block.
Machinist at lithographing plant.....	Montreal, Que.....	" 8	.....	Fall from ladder.
Machinist's helper .....	Montreal, Que.....	" 13	46	Struck by falling tackle.
Mixer at open hearth.....	Sydney, N.S.....	" 14	27	Crushed when hoist block fell.
Employee at steel foundry.....	Pointe St. Charles, Que..	" 25	28	Struck on head by steel girder.

FATAL INDUSTRIAL ACCIDENTS REPORTED DURING THE THIRD QUARTER OF 1920.

Trade or Industry.	Locality.	Date.	Age.	Cause of fatality.
<b>FOODS, LIQUORS AND TOBACCO.—</b>				
Employee of fish company.....	Sydney, N.S.....	July 10		Explosion of ammonia tank at abattoir
Employee at sugar refinery.....	Montreal, Que.....	" 19	42	Struck by belt when tongs gave way.
Fireman at sugar refinery.....	Montreal, Que.....	" 27	47	Buried under coal from chute,
Employee at packing plant.....	Toronto, Ont.....	Sept. 8		Electrocuted.
Employee at packing plant.....	Montreal, Que.....	" 2		Crushed by truck in elevator shaft.
<b>CLOTHING AND LAUNDERING—</b>				
Employer at laundry.....	Sault Ste. Marie, Ont....	Aug. 16	19	Caught in extractor.
Employee at wearing apparel plant.	Toronto, Ont.....	Sept. 27	14	Struck by descending elevator.
<b>PULP, PAPER AND FIBRE.—</b>				
Foreman at pulp mill.....	Fort William, Ont.....	July 3		Breaking of pike pole.
Labourer at pulp mill.....	St. George, N.B.....	" 6	17	Drowned.
Employee at pulp mill.....	Rimouski, Que.....	Sept. 16	55	Caught in chain used for drawing logs.
Labourer at paper plant.....	Smooth Rock Fall, Ont..	" 28	19	Struck on head by block.
<b>WOODWORKING AND FURNITURE.—</b>				
Employee at sawmill.....	Deer Park, B.C.....	July 5	40	Crushed by lumber from wagon.
Employee at sawmill.....	Fernie, B. C.....	" 6	26	Caught in saw.
Labourer at sawmill.....	Cutler, Ont.....	" 27	44	Fell off lumber pile.
Labourer.....	Castlegar, B.C.....	Aug. 3	18	While adjusting brake, horses bolted and cart tipped.
Workman at sawmill.....	Colpoys Bay, Ont.....	" 12		Struck by board from an edger.
Employee at sawmill.....	Rimouski, Que.....	Sept. 16	54	Struck by falling log.
<b>LEATHER, BOOTS, SHOES AND RUBBER.—</b>				
Employee of rubber plant.....	Montreal, Que.....	Aug. 25	49	Fell down fuel economizer.
<b>CLAY, GLASS AND STONE.—</b>				
Employee at cement works.....	Montreal, Que.....	Sept. 6	24	Caught in stone crusher.
Employee at cement works.....	Tuxedo, Man.....	" 7	26	Crushed between cars.
<b>PAINTS, OILS, CHEMICALS AND EXPLOSIVES.—</b>				
Stationery engineer.....	Sydney, N.S.....	July 10	46	Explosion at ammonia tank.
Employee at powder plant.....	Deseronto, Ont.....	" 22		Explosion.
Section foreman at alkali plant.....	Amherstburg, Ont.....	" 23		Crushed under car.
Fireman at gas producer.....	Sydney, N.S.....	Aug. 5		Collapse of staging.
<b>STEAM RAILWAYS.—</b>				
Sectionman.....	Montreal Tunnel, Que...	July 1	31	Run over by motor
Sectionman.....	Headquarters, B.C.....	" 3	49	Crushed when burning snag fell.
Section foreman.....	Sharbot Lake, Ont.....	" 5	65	Fell under cars.
Fuel man.....	St. Thomas, Ont.....	" 3	41	Crushed between cars.
Fireman.....	Victoria, B.C.....	" 5	23	Struck by falling debris.
Fireman.....	Edmonton, Alta.....	" 27		Derailment.
Employee.....	Aldershot, Ont.....	" 12		Struck by train.
Employee.....	Searchmont, Ont.....	" 23		Run over by train.
Trainman.....	Toketic, B.C.....	" 27	24	Fell from train.
Brakeman.....	St. John N. B.....	" 12		Run over by cars.
Engineer and baggageman (2).....	St. John, N. B.....	" 30	55 & 58	Collision.
Yard helper.....	London East, Ont.....	" 21	27	Crushed between cars.
Switchman.....	Toronto, Ont.....	" 27	52	Stepped from shanty in front of train.
Labourer.....	Chesterville, Ont.....	Aug. 2		Struck by train.
Labourer.....	Grandview, Man.....	" 24		Struck by train.
Labourer.....	Jaffray, B.C.....	" 25	55	Fell striking head.
Car repairer.....	Turcot Yard, Que.....	" 1		Struck by train.
Trainmen (3).....	Fort William, Ont.....	" 4	39, 22,	
			37	Engine overturned.
Brakeman.....	Smith Falls, Ont.....	" 12	28	Struck by train.
Engineer and fireman (2).....	Headquarters, B.C.....	" 18		Boiler exploded.
Bridgeman.....	Lindsay, Ont.....	" 24		Struck by train.
Section foreman.....	Vineland, Ont.....	" 5	50	Struck by train.
Section foreman.....	Saskatoon, Sask.....	" 28	30	Track motor collision.
Sectionman.....	Sydney, N.S.....	" 9	47	Struck by engine.
Sectionman.....	Haney, B.C.....	" 18	48	Struck by train.
Sectionman.....	Lac du Bonnett Sub., Man.....	" 22		Struck by train.

## FATAL INDUSTRIAL ACCIDENTS REPORTED DURING THE THIRD QUARTER OF 1920.

Trade or Industry.	Locality.	Date.	Age.	Cause of fatality.
<b>STEAM RAILWAYS—Continued.</b>				
Sectionman.....	Cranbrook, B.C.....	Aug. 26	55	Fell from car.
Yardman.....	Montreal, Que.....	" 20	21	Fell between cars.
Yardman.....	Toronto, Ont.....	Sept. 1	29	Struck by train.
Yardman.....	London, Ont.....	" 5	29	Caught between cars.
Yardman.....	Toronto Ont.....	" 15	26	Caught between cars
Section foreman.....	Popkum, B.C.....	" 3	3	Struck by train.
Sectionman.....	Brooking, Sask.....	" 25	"	Fell from speeder.
Labourer.....	Kingsville, Ont.....	" 4	"	Electrocuted.
Foreman.....	Stanley Jct., Ont.....	" 25	"	Struck by engine.
Employee.....	Oakville, Ont.....	" 11	45	Struck by engine.
Employee.....	Toronto, Ont.....	" 15	"	Crushed between cars.
Employee.....	St. Thomas, Ont.....	" 27	19	Fell between cars.
Trainman.....	Castleford, Ont.....	" 26	45	Derailment.
Brakeman.....	Saskatoon, Sask.....	" 14	24	Crushed while coupling cars.
Brakeman.....	Redwater, Ont.....	" 15	37	Collision.
Fireman.....	Ingersoll, Ont.....	" 23	26	Struck by engine.
Conductor.....	Lavaltrie, Que.....	" 25	34	Struck by train.
<b>ELECTRIC RAILWAY—</b>				
Conductor.....	Montreal, Que.....	Sept. 2	34	Struck by car.
<b>MISCELLANEOUS TRANSPORT.—</b>				
Expressman.....	St. John, N.B.....	July 10	60	Fell down elevator shaft.
Driver for express company.....	Toronto, Ont.....	" 14	"	Fell off wagon.
Teamster.....	Edmonton, Alta.....	" 22	28	Crushed between wall and wagon.
Driver.....	Strathmore, Alta.....	" 17	24	Car overturned.
Motor driver.....	River Hebert, N.S.....	" 26	18	Clothing caught in machinery.
Livery employee.....	Kingston, Ont.....	Aug. 4	15	Electrocuted while carrying an extension lamp.
Driver with contractor.....	Dundas, Ont.....	" 12	39	Thrown off motor truck.
Teamster for brick company.....	Kitchener, Ont.....	" 16	73	Crushed under load.
Airplane, guide.....	Near Lake Onawayay, Que.....	" 18	"	Fall of airplane.
Teamster.....	Toronto, Ont.....	Sept. 1	55	Kicked by horse.
Teamster.....	Grainger, Alta.....	" 9	20	Crushed under load.
Teamster.....	Toronto, Ont.....	" 16	19	Horses ran away.
Driver.....	Princeton, B.C.....	" 21	"	Train struck truck.
Teamster.....	Jordan Falls N.S.....	" 28	55	Fell off horse.
<b>NAVIGATION.—</b>				
Cableshep employee.....	East of Newfoundland.....	July 10	48	Drowned while repairing cables.
Deckhand.....	Jeddore, N.S.....	" 10	"	Drowned.
Ship carpenter.....	Montreal, Que.....	" 16	44	Fell into hold of vessel..
			Over	
Boat captain.....	Bonshaw, P.E.I.....	Aug. 16	21	Drowned.
Fireman.....	Fort George, B.C.....	" 19	28	Drowned.
Labourer on steamship.....	Port Edward, Ont.....	Sept. 8	32	Struck by coal winch.
<b>MINING AND QUARTYING—</b>				
Brakeman.....	Coppercliff, Ont.....	July 2	212	Skull fractured.
Pumpman.....	Rossland, B.C.....	" 6	35	Fell into shaft.
Miner.....	Hillcrest, Alta.....	" 6	30	Asphyxiation.
Miner.....	Gadsby, Alta.....	" 6	38	Asphyxiation.
Miner.....	South Wellington, B.C.....	" 6	26	Struck by falling rock.
Quarry employee.....	Hillsboro, N.B.....	" 9	26	Fall of plaster rock.
Quarry employee.....	St. Romuald, Que.....	" 30	28	Premature blast.
Steam shovel runner.....	Asbestos, Que.....	" 24	24	Fell under shaft of engine.
Runner.....	Cobalt, Ont.....	" 31	28	Struck on head by block.
Blaster at mine.....	Sellwood, Ont.....	" 7	30	Ecplosion.
Labourer.....	Commerce, Alta.....	" 28	"	Fell into hopper; suffocated.
Miner.....	Springhill, N.S.....	Aug. 5	35	Burned by liquid from electric battery.
Miner.....	New Aberdeen, N.S.....	" 11	43	Fall of coal.
Miner.....	New Ross, N.S.....	" 13	"	Cave-in.
Miner.....	Surf Inlet, B.C.....	" 15	49	Fall of rock.
Miner.....	Stellarton, N.S.....	" 25	50	Fall of coal.
Miner.....	Evansburg, Alta.....	" 25	33	Pushed down shaft by truck.
Chuteloader.....	Coleman, Alta.....	" 7	32	Crushed between locomotive and chute.
Smelterman.....	Galetta, Ont.....	Aug. 9	18	Asphyxiated.
Roperider.....	Cassidy, B.C.....	" 21	27	Thrown against timber when car jumped.

## FATAL INDUSTRIAL ACCIDENTS REPORTED DURING THE THIRD QUARTER OF 1920.

Trade or Industry.	Locality.	Date.	Age.	Cause of fatality.
<b>MINING &amp; QUARRYING—Continued.</b>				
Roperider.....	Cassidy, B.C.....	Aug. 30	21	Struck by timber tram.
Trainman.....	Creighton Mines, Ont.....	" 20	19	Crushed between car and timber.
Labourer.....	Robertsonville, Que.....	" 10	36	Fall of rock.
Labourers at quarry (2).....	Terra Cotta, Ont.....	Sept. 1	50 & 26	Crushed under derrick.
Labourer at municipal quarry.....	Grimsby, Ont.....	" 17	40	Struck by box; fell into pit.
Miner.....	Pocohontas, Alta.....	" 17	21	Car jumped track.
Miner.....	Stellarton, N.S.....	" 22	"	Fall of coal.
Miner.....	South Minto, N.B.....	" 23	23	Crushed between shaft and cage.
Chain runner.....	Inverness, N.S.....	" 25	50	Fall of coal.
<b>BUILDING AND CONSTRUCTION.—</b>				
Bridge builders, (4).....	Metabetchouan Bridge, Que.....	July 2	2	Boat capsized; drowned.
Carpenter.....	Charlottetown, P. E. I.....	" 2	Over	Fall from building.
Carpenter.....	Toronto, Ont.....	" 6	52	Drowned.
Carpenter.....	London, Ont.....	" 16	68	Fell, striking head.
Workman.....	Montreal, Que.....	" 30	"	Breaking of cable on boom.
Workman.....	Toronto, Ont.....	" 30	"	Fall from scaffold.
Workman.....	Drummondville, Que.....	" 31	60	Fall from scaffold.
Employee at excavation work.....	Edmonton, Alta.....	" 21	29	Dump wagon upset; crushed.
Foreman.....	Beaumont, Alta.....	" 22	48	Fall from scaffold.
Canal employees (3).....	Niagara Falls, Ont.....	" 31	28	About Lightning struck steam shovel where they had taken shelter.
Employee at drydock.....	St. John, N.B.....	" 9	48	Struck by stone from derrick.
Foreman with contractor.....	Twin Falls, Ont.....	Aug. 6	52	Struck by car.
Workman.....	Buckingham, Que.....	" 8	18	Fell of Pier.
Workman.....	Twin Falls, Ont.....	" 13	"	Crushed by cable.
Workman.....	Montreal, Que.....	" 19	"	Struck by falling beam.
Workman.....	St. John, N.B.....	" 21	"	Struck by rock from blast.
Rigger at cement plant.....	Point Anne, Ont.....	" 24	25	Fell off cooler on cement.
Bridgeman.....	Lindsay, Ont.....	" 24	39	Struck by train.
Roofer.....	Valleyfield, Que.....	" 28	19	Electrocuted.
Pileman at canal work.....	Queenston, Ont.....	Sept. 7	37	Fall of rock.
Driller at canal work.....	Niagara Falls, Ont.....	" 18	20	Fell under train.
Painter.....	Montreal, Que.....	Sept. 10	22	Fall from ladder.
Workman.....	Toronto, Ont.....	" 9	"	Fall from scaffold.
Carpenter.....	Port Arthur, Ont.....	" 10	50	Fall from wall.
Carpenter.....	Halifax, N.S.....	" 22	55	Crushed by falling building.
Carpenter at elevator.....	Delia, Alta.....	" 22	21	Over Fell into bin.
Workman.....	Pembroke, Ont.....	" 11	"	Struck by train.
Workman.....	Fort William, Ont.....	" 18	"	Fall from scaffold.
Labourer.....	Montreal, Que.....	" 23	30	Fall from scaffold.
<b>LUMBERING—</b>				
Foreman.....	Windigo, Ont.....	July 1	32	Drowned.
Pondman.....	Jaffray, B.C.....	" 7	21	Drowned while breaking log jamb.
Feller.....	Jacquet River, N.B.....	" 20	17	Struck by falling tree.
Logger.....	Courtenay Bay, B.C.....	" 28	23	Struck by falling snag.
Logger.....	Haslam Lake, B.C.....	" 31	"	Crushed by rolling log.
Employee.....	Hart's Lake, N.B.....	" 12	"	Struck by falling tree.

## FATAL INDUSTRIAL ACCIDENTS REPORTED DURING THE THIRD QUARTER OF 1920.

Trade or industry.	Locality.	Date.	Age.	Cause of fatality.
<b>LUMBERING—Continued.</b>				
Millwright.....	Fort Frances, Ont.....	Aug. 25	34	Crushed by lumber.—
Bucker.....	Sedgewick, Bay, B.C....	" 27	50	Struck by falling limb.—
Lumberman.....	Cochrane, Ont.....	"	38	Caught in shaft.—
Teamster.....	Kynoch, Ont.....	Sept. 1	27	Kicked by horse.—
Bushman.....	Lake Kasaswaychin, Ont	" 4	.....	Drowned.—
Chokerman.....	Union Bay, B.C.....	" 7	31	Struck by falling tree.—
Feller.....	Reid Bay, B.C.....	" 6	32	Struck by falling tree.—
Feller.....	Duncan, B.C.....	" 10	.....	Struck by falling tree.—
Workman.....	Pickeral, Ont.....	" 7	.....	Caught between cars.—
Labourer.....	Ioco, B.C.....	" 2	.....	Struck by falling tree.—
Labourer.....	Gogama, Ont.....	" 8	36	Caught in saw.—
Labourer.....	Madawaska, Ont.....	" 16	32	Drowned.—
Labourer.....	Kenneway, Ont.....	" 17	40	Struck by tree.—
Labourer.....	Blind River, Ont.....	" 23	22	Drowned.—
Axeman.....	North Bay, Ont.....	" 15	58	Struck by falling tree.—
Watchman.....	Waubaushe, Ont.....	" 16	73	Fell from elevation.—
Employee.....	Vancouver, B.C.....	" 23	.....	Crushed by load.—
Employee.....	Fort Frances, Ont.....	" 30	.....	Fly-bæk from split saw.—
<b>PUBLIC AND MUNICIPAL EMPLOYMENT</b>				
Labourer.....	Toronto, Ont.....	July 13	29	Overcome by sewer gas.
Engineer and foreman (2).....	Medicine Hat, Alta.....	" 19	38	Burned; lit match in manhole.
Lockman.....	Welland Canal, Ont.....	" 23	62	Drowned.
Electrician.....	Toronto, Ont.....	Aug. 30	44	Electrocuted; cleaning wire with emery paper.
Workman.....	Port Arthur, Ont.....	Sept. 8	.....	Electrocuted.
Fireman.....	Sudbury, Ont.....	" 26	.....	Missed hold in attempt to catch a passing fire wagon.
<b>PUBLIC UTILITIES—</b>				
Employee electric light plant.....	Dunnville, Ont.....	July 12	15	Caught in wheel.
Lineman.....	Paris, Ont.....	Aug. 7	42	Electrocuted.
Lineman.....	Chatham, Ont.....	" 9	36	Electrocuted; slipped at top of pole.
Lineman.....	Oshawa, Ont.....	" 14	21	Electrocuted.
Lineman.....	Orillia, Ont.....	" 16	26	Electrocuted.
Lineman.....	Halifax, N. S.....	" 19	42	Electrocuted.
Lineman.....	Regina, Sask.....	" 30	22	Struck by motor car.
Employee at telephone company.....	Morinville, Alta.....	" 11	29	Automobile overturned.
Employee at power plant.....	Montreal, Que.....	" 25	31	Fell from pole onto wires.
Repairman at power plant.....	Kingsville, Ont.....	Sept. 4	35	Electrocuted.
Patrolman, with power commission.....	Vinemont, Ontario.....	" 19	55	Fell off pole; electrocuted.
Helper with power commission.....	Niagara Falls, Ont.....	" 20	28	Fell under truck.
Lineman.....	Saskatoon, Sask.....	" 21	.....	Electrocuted.
Floorman with power commission.....	Orillia, Ont.....	" 26	21	Electrocuted.
<b>AGRICULTURE—</b>				
Farm hand.....	Wetaskinwin, Alta.....	July 9	25	Struck by a breaking plough.
Farmer.....	Cornwall, P. E. I.....	" 17	21	Thrown from wagon when horses bolted.
Farmer.....	Wellington, Ont.....	Aug. 3	.....	Gored by a heifer.
Farmer's son.....	Brockville, Ont.....	" 15	.....	Kicked by horse.
Rancher.....	McMurphy Siding, B.C.....	" 19	.....	Forest fires.
Farmer.....	Stevensville, Ont.....	" 25	27	Caught in threshing machine belt.
Separator expert.....	Vulcan, Alta.....	Sept. 8	.....	Fell from separator.
Brakeman.....	Rimbey, Alta.....	" 16	35	Crushed between engines.
Stockmen (4).....	Canora, Sask.....	" 28	.....	Collision on railway.
<b>FISHING AND HUNTING—</b>				
Fisherman.....	Rivers Inlet, B.C.....	July 9	50	Drowned.
Fisherman.....	Port Renfrew, B.C.....	" 11	.....	Drowned.
Fisherman.....	Bella Coola, B.C.....	" 13	50	Struck by swinging boom; drowned.
Fisherman.....	Bella Coola, B.C.....	" 19	42	Carried overboard by tow line.
Fisherman.....	On Banks at Sea (N.S.).....	" 21	.....	Drowned while attending trawl.
<b>MISCELLANEOUS—</b>				
Mill worker.....	Edmundstón, N.B.....	July 3	18	Crushed by bevel gear.
Caretaker.....	Buffalo Park, Alta.....	" 5	55	Fell from horse.
Foreman.....	Toba River, B.C.....	" 8	.....	Drowned.
Foreman.....	North Vancouver, B.C.....	" 25	56	Burned while shutting valves of boiler; septic poisoning.

## FATAL INDUSTRIAL ACCIDENTS REPORTED DURING THE THIRD QUARTER OF 1920.

Trade or Industry.	Locality.	Date.	Age.	Cause of fatality.
<b>MISCELLANEOUS—Continued.</b>				
Truckman.....	Montreal, Que.....	July 9	60	Fell down elevator shaft.
Labourer.....	Vancouver, B.C.....	" 27	45	Drowned.
Clerk at electric plant.....	Toronto, Ont.....	" 23	16	Caught in elevator.
Watchman at box factory.....	Montreal, Que.....	" 14	59	Fall of wall.
Stable boss.....	Nelson, B.C.....	" 30	.....	Struck head against tree while coasting.
Watchman.....	Montreal, Que.....	Aug. 2	57	Crushed by locomotive.
Craneman.....	Sorel, Que.....	" 9	22	Electrocuted.
Labourer.....	Lacombe, Alta.....	" 9	29	Motor truck struck by train.
Labourer.....	Ocean Falls, B.C.....	" 22	33	Crushed by car.
Geologists (2).....	Great Slave Lake, N.W.T.....	" 12	.....	Drowned
Mechanic.....	Windsor, Ont.....	" 18	24	Electrocuted.
Mechanic.....	Lethbridge, Alta.....	" 19	30	Gas explosion.
Collector.....	Peterboro, Ont.....	" 28	31	Thrown from auto.
Constable.....	Passburg, Alta.....	" 9	32	Shot.
Constable.....	Bellevue, Alta.....	" 7	30	Shot.
Workman.....	Sydney, N.S.....	" 31	.....	Collapse of air-plane hangar.
Labourer.....	Vancouver, B.C.....	Sept. 7	.....	Drowned.
Labourer.....	Vancouver, B.C.....	" 14	51	Crushed between carriage and roll case
Labourer.....	Ocean Falls, B.C.....	" 20	.....	Caught in rolls of machinery.
Messenger.....	Toronto, Ont.....	Sept. 27	14	Caught in elevator shaft.
Prospector.....	Nelson, B.C.....	" 9	65	Believed to have slipped down rock-slide.
Stableman.....	Toronto, Ont.....	" 1	.....	Kicked by horse.
Well repairers (2).....	Brandon, Man.....	" 11	.....	Asphyxiated.
Well cleaner.....	Manilla, Ont.....	" 15	.....	Struck by falling bucket.
Fireman.....	Boston Bar, B.C.....	" 17	37	Engine derailed by earthslide.
Edgerman.....	New Westminster, B.C.....	" 21	35	Jammed between cant and edger.
Watchman.....	St. Hyacinthe, Que.....	" 26	.....	Fell from window.
Labourer.....	Nelson, B.C.....	" 16	70	Struck by car.

## SUPPLEMENTARY STATEMENT OF FATAL ACCIDENTS IN 1920 NOT PREVIOUSLY REPORTED.

Trade or Industry.	Locality.	Date.	Age.	Cause of fatality.
Labourer at lumber company.....	Manitowaning, Ont.....	Feb. 28	28	Struck by limb.
Employees on trawler (23).....	Atlantic Ocean.....	Mar. 11	.....	Trawler blown up.
Caretaker at lumber company.....	Dalhousie, N.B.....	Apr. 1	40	Stomach punctured when coasting.
Employees on trawler (8).....	Off Halifax.....	" 5	.....	Sinking of trawler.
Employee at underwear mill.....	Windsor, Ont.....	" 8	18	(No particulars).
Builder.....	Winnipeg, Man.....	" 11	.....	Struck by falling timber; died 26-9-20.
Labourer at dairy.....	St. Thomas, Ont.....	" 20	.....	Collapse of building.
Workman with carriage company.....	Toronto, Ont.....	" 22	61	Cut thumb; infection.
Diver.....	Sambro, N.S.....	" 27	49	Colic, while making underwater examination of steamer.
Stream driver.....	Acadiaville, N.B.....	May 8	22	Crushed by timber.
Stream driver.....	Coughlan, N.B.....	" 20	27	Boat foundered.
Workman at quarry.....	St. Mary's Ont.....	" 28	51	Crushed by timber.
Employee on railway.....	College Bridge, N.B.....	" 24	54	Struck by train.
Constable.....	Grand Forks, B.C.....	June 10	42	Shot.
Constable.....	Montreal, Que.....	" 13	.....	Murdered while on duty.
Labourer.....	Castlegar, B.C.....	" 15	18	Drowned.
Sorter.....	White Rock, B.C.....	" 22	32	Fell on saw.
Workman at lumber company.....	Norman, Ont.....	" 20	.....	Drowned.
River driver.....	Bolger Bridge, Ont.....	" 18	.....	Drowned.
River driver.....	Lake Pleasant, N.S.....	" 23	64	Drowned.
Sawyer.....	Beachburg, Ont.....	" 23	69	Caught in saw.
Workman at lumber company.....	Smith Falls, Ont.....	" 23	65	Broke leg by fall; complications.
Labourer.....	Revelstoke, B.C.....	" 18	35	Struck by train.
Labourer.....	Otter, B.C.....	" 26	40	Struck by slab.
Breakwater labourer.....	St. John, N.B.....	" 28	32	Fell between cars.
Carpenter.....	Duncan, B.C.....	" 24	.....	Struck by carriage.
Foreman.....	Vancouver, B.C.....	" 26	48	Car ran over bridge.
Foreman on railway.....	Long Lake, Ont.....	" 28	41	Fell from car.
Plate hanger.....	Vancouver, B.C.....	" 29	37	Fell from scaffold.
Stream driver.....	Woodstock, N.B.....	" 28	32	Fell between cars.
Stream driver.....	St. John, N.B.....	" 30	37	Fell from train.

## MIGRATION AND SETTLEMENT DURING THE THIRD QUARTER OF 1920

IMMIGRATION.—The following statements compiled from information furnished by the Department of Immigration and Colonization give details as to the total immigration into Canada during the third quarter of 1920. For purposes of comparison the figures for the previous quarter and for the corresponding quarter in 1919 are also given:

STATEMENT OF IMMIGRATION TO CANADA DURING THE THIRD QUARTER OF 1920.

	British	From U.S.A.	Other countries	Totals
1920				
July.....	10,472	4,301	1,888	16,661
August.....	7,404	5,838	2,510	15,752
September.....	6,405	4,227	2,718	13,350
	<b>24,281</b>	<b>14,366</b>	<b>7,116</b>	<b>45,763</b>
Second quarter, 1920.....	28,487	16,397	4,358	49,242
Third quarter, 1919.....	23,218	14,451	1,987	39,656

The table on page 1575 gives the nationality, sex and destination of all immigrants entering Canada during the third quarter of 1920.

HOMESTEAD ENTRIES.—During the third quarter of 1920 there were 1,698 homestead entries recorded in the Provinces of Manitoba, Saskatchewan, Alberta and British Columbia, as compared with 1,612 for the second quarter of 1920, and 2,336 for the corresponding quarter of 1919. The statement opposite shows the number and nationality of those who took up homesteads in the various provinces during the third quarter of 1920.

HOMESTEAD ENTRIES BY PROVINCES AND NATIONALITY OF HOMESTEADERS DURING THIRD QUARTER OF 1920.

Nationality.	Manitoba.	Saskatchewan.	Alberta.	British Columbia.	Total 3 months.

## RECENT LEGAL DECISIONS AFFECTING LABOUR

**O**F the five legal decisions which are summarized below two have reference to the Workmen's Compensation Act of Quebec, one has reference to an appeal in connection with a case arising from an alleged violation of the Indus-

trial Disputes Investigation Act, and the remaining two have reference to the issuing of injunctions against members of labour organizations in Alberta and New York respectively, for matters arising in each case out of trade disputes.

**An employer or his foreman must supervise dangerous work and provide all appliances needed to prevent accident**

Six employees were ordered by a foreman to raise from their supports a number of copper tanks weighing nearly a ton, and to place longer ones underneath. The first tank was raised under the orders and direction of the foreman, but he then left, and the men continued to work without supervision. There were no ropes, chains, or other appliances to support the tanks in case of a fall. One of the tanks slipped from its support and crushed the right foot of one of the men, permanently injuring him. The injured employee brought action against the employer in the Superior Court of Quebec. In delivering

judgment, the Court declared that the work the plaintiff and his companions performed was difficult and dangerous, and it was the duty of the defendant company and its foremen to adopt all means and appliances necessary to prevent a fall or an accident, and to direct and oversee the workmen employed on the job. Failure to do so constituted negligence. The plaintiff was accordingly awarded \$3,812.50 with costs, the sum including \$2,000 capital for his permanent partial disability, \$1,562.50 for the period of complete disability, and \$250 as compensation for his sufferings. (*Quebec—Marchand vs., Canadian Electro Products Company.*)

**Suit taken under Quebec Workmen's Compensation Act may proceed instead under Common Law if nature of action is not changed**

An action was brought against a railway company for \$4,500 damages by a father and mother for the death of their son who had been in the employ of the company. The action was entered under the Workmen's Compensation Act of Quebec and \$2,000 of the amount was claimed on the ground of inexcusable fault on the part of the Company. A motion was then made in the Practice Division of the Superior Court, on behalf of the plaintiffs, for permission to change their declaration by adding several allegations, modifying the conclusions and seeking to rest the claim on damages resulting under the common

law. The amount of damages asked, however, was not changed. This motion was rejected by the Practice Court on the ground that the amendment would change the nature of the action. The ruling, however, was reversed by the Court of Appeal. In the opinion of the Court it was stated: "The amendment proposed does not change the nature of the action, but only the basis of the plaintiff's claim. The Workmen's Compensation Act bars any claimants who proceed under that act from exercising at the same time any recourse under the common law. But in changing the procedure the two means of re-

course will not be exercised at the same time. The law will not be violated. Article 522 of the Code of Procedure allows the court to modify or enlarge the conclusions provided that the facts

alleged give rise to the new relief demanded. The amendment proposed in this instance does not exceed the limits of the text." (*Quebec—Barone et uxore vs. Grand Trunk Railway Co.*)

#### **Injunction issued restraining union officials from interfering with workers**

Arising out of a strike of coal miners in Alberta, the coal mine operators at Wayne and Drumheller, members of the Red Deer Valley Coal Operators' Association, applied for an injunction to restrain certain officials and members of the One Big Union from interfering with their miners. The statement of claim set out by the plaintiffs declared that on September 21 a demand was made by the miners through the secretary of the Drumheller Central Council of the One Big Union, one of the defendants, for the removal of the United Mine Workers of America check-off and for the opening up of negotiations for a new agreement; that on October 1 the miners went on strike, without making any application for a Board under the Industrial Disputes Investigation Act;

and that the defendants were still continuing to incite the striking miners to remain out, and to incite the plaintiffs' employees who were still at work to go out. The plaintiffs therefore claimed an injunction "restraining the defendants, and each of them from inciting, inducing, advising or requesting by or at meetings, by threats, intimidation, articles or appeals in the said publication 'The Searchlight,' or elsewhere, or by any other means, the employees of the plaintiffs, or any of them, from striking or continuing to strike, in contravention of the said The Industrial Disputes Investigation Act, or in breach of the said contract of the 20th of July, 1920." The injunction was granted by the Supreme Court of Alberta. (*Alberta—Rosedeer Mining Company, Limited, et al vs. Henry Beard et al.*)

#### **Magistrate's decision dismissing case against Mining Company for violation of Industrial Disputes Investigation Act upheld on appeal**

In the issue of the LABOUR GAZETTE for last May, on page 625, an account is given of a case in the police court at Calgary against the Canmore Coal Company, Limited, for alleged violation of the Industrial Disputes Investigation Act, 1907, and amendments. The matter arose from the posting of a notice by the manager of the company to the effect that on and after March 23, 1920, all miners who were eligible for membership in the United Mine Workers of America should sign the United Mine Workers of America check-off before

being allowed to work. It was claimed for the Company that this notice was issued in compliance with an order of the Director of Coal Operations. The case was dismissed by the police magistrate. An appeal by stated case was made to the Appellate Court but it was dismissed on October 7. The dismissal was based on the Act passed at the last session of parliament validating the orders of the Director of Coal Operations of Alberta and Southern British Columbia and continuing his authority. (*Alberta—Rex et Rel Lynch vs. Canmore Coal Company, Limited.*)

**Injunction issued in New York against picketing**

A preliminary injunction was recently issued in the Supreme Court of the State of New York against members of the Fur Workers' Union prohibiting them from picketing during a strike against certain retail furriers' of New York City. It was claimed by the employers who applied for the injunction that the members of the defendant union were attempting to force them to enter into a contract that was unfair, unreasonable, against public policy and against the laws of the land. Affidavits were also submitted disclosing assaults, intimidation, threats and violence. In reply, only one affidavit was submitted, that of the president of the defendant union, who made a general denial of any attempt to injure, but claimed that the strike was to enforce a forty-four hour week, and that it became inevitable by reason of the discharge of large numbers of workmen because of the unsettled condition of the industry. In the opinion of the

Court the case was summed up as follows: "It is clear from the affidavit of the defendant Kauffman and the brief submitted on behalf of defendants that the strike is not for the purpose of an increased wage, nor for the purpose of bettering the conditions of the employees, but rather an attempt to meet a situation caused by depression in business to obtain employment for men conceded by defendants to have been properly discharged. It is apparent that the means pursued by the defendants were unlawful and tended to injure plaintiffs in their business and cause great loss. It is well settled that labour organizations may by lawful means secure adequate compensation for their services, fair hours of labour, and that picketing, while lawful if peacefully conducted will, however, not be permitted when its purpose is to effect an interference with another's business." (*New York State—Various retail furriers vs. Kauffman et al.*)

# THE LABOUR GAZETTE

Prepared and edited in the Department of Labour, Ottawa

MINISTER—THE HONOURABLE GIDEON D. ROBERTSON.  
DEPUTY MINISTER—F. A. ACLAND.

Volume 20

DECEMBER, 1920

Number 12

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

### **The month in brief**

This issue of the LABOUR GAZETTE contains an account of the work of the Junior Employment Service of Canada which was recently formed in connection with the Employment Service branch of the Department of Labour, and a summary of similar work carried on in other countries. It also contains a report of the Fifth Meeting of the Governing Body of the International Labour Office.

The cost of the weekly family budget of staple foods showed a decline, averaging \$15.32 at the middle of November, as compared with \$15.83 in October, \$14.27 in November, 1919, and \$7.96 in November, 1914. The index number of wholesale prices also declined, being 304.2 for November as compared with 317.6 for October, 307.7 for November, 1919, and 137.5 for November, 1914.

At the beginning of November, the percentage of unemployment among trade unions was 6.35 as compared with 3.25 at the beginning of October and 2.57 at the beginning of November, 1919. According to returns from over 5,100 firms, there was a steady decrease in the general average of employment throughout the month.

The time loss due to industrial disputes was less during November than during October, 1920, or November,

1919. There were in existence during the month 20 strikes involving about 1,959 workpeople and resulting in a time loss of 23,442 working days. At the end of the month there were on record 6 strikes involving about 703 workpeople.

### **Proceedings under the Industrial Disputes Investigation Act**

During November two applications were received for the establishment of Boards of Conciliation and Investigation, and Boards were established in connection with two disputes for which applications had been received during the preceding month.

### **International Migration Commission**

Reference was made in the July, 1920, issue of the LABOUR GAZETTE, to the appointment by the International Labour Organization of a Commission to study the question of regulating emigration and immigration and protecting the interests of wage earners not residing in their own country. The Migration Commission has since been organized under the chairmanship of Viscount Cave, British Government delegate. No meetings of the Commission have been held, but a questionnaire, addressed by the Director of the International Labour Office to the Governments of the different countries

who are members of the International Labour Organization, has been received by the Dominion Government. The replies of the Canadian Government to this questionnaire were forwarded during October through Mr. J. Obed Smith, the Superintendent of Immigration in London, and the Canadian Government representative on the Commission. The questionnaire referred to deals with three different points: (1) the actual position of immigration and emigration in the respective countries, including statistical returns showing movements of populations; (2) the existing legislation and regulations in the respective countries; and (3) questions intended to bring out an expression of the views of the respective countries on the questions involved, including the co-ordination of the legislation of the different countries, equality of treatment of foreign workers, and international co-ordination of effort for the protection of immigrants through the International Labour Office.

#### **International conference on working hours in ships**

The question of hours of labour in ships is to be discussed by representatives of the International Shipping Federation and the International Seamen's Federation at a joint meeting to be held in January under the independent chairmanship of M. Albert Thomas, Director of the International Labour Office. This decision has just been taken by the joint committee of representatives of ship-owners and seamen, which was appointed by the International Labour Conference at Genoa in June and July, and held its first meeting in Geneva in November. At the Genoa conference (an account of which appeared in the LABOUR GAZETTE, October, 1920), a Draft Convention for the universal application of the eight-hour day, or 48-hour week to seafarers failed by a fraction of a single vote to obtain the two-thirds majority required by the Labour Section of the Peace Treaty to make it effective. The rejection of the Draft Convention gave rise to some unrest among maritime workers,

and a congress of the International Seamen's Federation, held in Brussels in August, decided in favour of the declaration of a world strike of seamen unless the employers consented to reopen the question. M. Albert Thomas, at the request of the seamen, approached the International Shipping Federation, and conveyed to them the proposal of the workers for a reconsideration of the hours problem. As a result the Executive Committee of the Federation resolved by a majority that they were prepared to meet representatives of the seamen, and the way was thus paved for the important decision now announced.

#### **Proposed amendments to the Manitoba Mothers' Allowances Act**

The Mothers' Allowances Commission of Manitoba has recommended that certain changes be effected in the Mothers' Allowances Act of the province, and that the necessary order-in-council be passed to extend the operation of the Act, to enable assistance to be given where the father is living but is physically disabled, or where the father of a young family is in a penal institution, and where a mother is a Canadian citizen by birth, irrespective of her nationality assumed through marriage; to make cases of desertion eligible under the Act; to raise the age of children coming within the meaning of the Act from 14 to 16 years; to make it obligatory upon all children of earning age to contribute toward the support of their parents where the latter are forced to appeal for assistance. They also recommend that mothers of one child only should not benefit under the Act.

#### **Mine rescue equipment in Alberta and British Columbia**

Addressing the Canadian Institute of Mining and Metallurgy at their recent convention in Winnipeg, Mr. Duncan McDonald, general superintendent of mine rescue work in Alberta, claimed that that province had taken a leading part in the provision of mine-breathing apparatus and in the

training of men in rescue and first-aid work, this work having been placed under the supervision of the Workmen's Compensation Board in 1919. Three rescue cars and six stations, he said, are now established in Alberta under the direction of the Provincial government, each car and station being in charge of a fully qualified superintendent. This equipment contains ninety sets of "Proto" apparatus, and 1,388 men have been trained in its use. Similar equipment provided by the government of British Columbia is described in the *Canadian Mining Journal*. At Fernie there are six sets of Gibbs apparatus, one pulmotor, an oxygen inhaler and six sets of Draeger apparatus. The latter, however, is being replaced by a more modern apparatus. The government also maintains similar stations at Nanaimo, Cumberland and Merritt. That at Nanaimo is fitted with six sets of the Paul and four sets of the Gibbs apparatus; that at Cumberland is still equipped with Draeger apparatus, while that at Merritt has six sets of Draeger and four sets of Gibbs.

#### **Workers' Educational Association of Ottawa**

A meeting of the Workers' Educational Association of Ottawa was recently held and arrangements were made for the organization of the Association and for the holding of classes during the present season. Dr. J. H. Putman, Inspector of Public Schools, was elected president, and Mr. W. T. McDowell, a prominent trades union official, was elected secretary. Classes were enrolled in Canadian history and economics, the history course to be conducted by Dr. Adam Shortt, formerly of Queen's University, Kingston, and the course in economics by Professor S. Cudmore, B.A., formerly of University of Toronto. It is hoped that a class in English literature will be formed later on under Mr. W. T. Sykes, B.A. Each class will meet once a week for fifteen weeks. To establish a class a nucleus of ten or twelve trade unionists will be required after

which others may join. The fee for the courses is \$1.

#### **Company Co-operative Stores in France**

Three years ago eleven of the largest industrial companies in France employing about 250,000 workpeople organized a society which is called the Sapeco, an abbreviation of Société Générale d'Approvisionnement Economiques, for the purpose of purchasing supplies on a large scale, and distributing them at the various industrial centres. The employees of these companies share in the profits realized on the sale of the commodities. In addition to the distribution stores, the society maintains grocery warehouses at Paris, Havre, Creusot and Bordeaux, coffee roasting plants and furnishing depots at Paris, Havre and Creusot, and a meat storage plant at Havre.

#### **Plans for better industrial relations**

Four plans for the promotion of better industrial relations have been submitted by the Labour Relations Committee of the Seattle Chamber of Commerce, as a result of 118 months' investigation of labour problems. These have met with the approval of the Board of trustees, and the Chamber has recommended that such portion of the plans be applied as seems best adapted to the industry concerned: The plans are: (1) Scientific management by functional foremen. This includes scientific motion studies, time studies, fatigue studies, task setting, rate setting, cost accounting, routing, dispatching, bonus calculation, and other important features. The report says "In this highly refined type of industrial management there is a large increase in the forces of supervision. Instead of one, there are five to eight foremen, each an authority in his special field, and each in direct contact with the workers." (2) Employment management by specially trained executives. An executive officer, trained in scientific selection and assignment of workers, en-

gages, rewards, and discharges all employees, and investigates all cases of workers leaving their employment. It is recommended that this office be held by one of the executive officers of the company, specially trained for the work.

(3) Shop committee system of employment representation. This plan is based on the result of two years' use and study of shop committee systems, including such concerns as the Standard Oil Company, the International Harvester Company, and the General Electric Company. The report points out that the true committee form is one wherein a committee, elected by the employees, meets jointly with a group representing the management, the authority of the two being usually equal; the shop committee comprises committeemen elected by different sections or precincts of the plant and in some cases committeemen at large are added; the chairman and other officials are elected sometimes by general vote and sometimes by the committee. (4) Wage technique. The report states:

"Any attempt to hold down to the common wage level those persons who would do better work if paid to do better work, is not democracy. The scientific standard of performance, with its equivalent of ordinary day pay is based, not upon the doings of some expert individual pace-maker as of yore, but upon an average of all, intelligently and sanely arrived at, and in this special study is given also to fatigue, waste motion, and like subjects."

**Labour  
efficiency in  
Massachusetts**

In order to determine the effect upon the efficiency of labour of conditions arising out of the

late war and the subsequent period of reconstruction, the Department of Labour and Industries of Massachusetts recently undertook an investigation of certain selected industries, the results of which are given in the first number of the *Industrial Review*, a publication of the Department. The inquiry was of a tentative character, undertaken in the hope that a preliminary discussion would

open up new sources of information and thus provide tangible facts with which to test the statements commonly made that labour has recently declined in productiveness. The facts so far gathered appear to be insufficient to justify inferences as to any marked upward or downward trend. The results, in fact, are so conflicting as to suggest a suspension of opinion until enough ground has been covered by the investigations to allow the workings of the law of general averages to become evident. The months of October in the years 1914, 1918 and 1919 were selected as representative of the pre-war, war and post-war periods respectively. Standard units of production were taken, the process of manufacture of each unit being alike in each year. Seven establishments were chosen, namely two shoe factories, and one factory each for paper, chairs, shirtings, candy and rubbers. The investigation showed that between the years 1914 and 1918 the hourly productiveness of labour declined in all these establishments with the exception of the two shoe factories. A marked increase in efficiency, however, was evident in 1919, as compared with both the preceding year and 1914, gains being apparent in all establishments except those for the manufacture of chairs, shirtings and rubbers, the latter industry especially showing a steady decline over the whole period under review. Comparing 1918 and 1919 the report concludes that "while it should not be assumed that these returns are typical, they indicate that, with respect to hourly production per employee, the showing in all except two of the seven establishments was better in 1919 than in 1918."

An attempt was further made by the investigators to correlate wage increases with the efficiency of the workers, the percentage of increase of wages in 1919 over 1914 being shown in a parallel column with the percentages of efficiency. The result so far does not establish any clear relationship between wage increases and productiveness, for while three establishments where wages were

most substantially increased showed declines, gains in efficiency occurred in the remainder, though the wages had increased in a somewhat less degree. The variations in the several industries, however, are so wide as to render generalizations difficult.

#### Oil industry

#### plan for settlement of industrial disputes

A working agreement of a new type is reported from the oil industry in California. The arrangement, which pledges the workers to continuous production for a period of 14 months, was evolved through the efforts of a special Federal Mediation Commission named by President Wilson, and consisting of J. L. Spangler, a former coal operator, representing the capitalists; Charles T. Connell, representing the public; and E. P. March, a former union officer, representing the workers. The purpose of the Commission according to the memorandum containing their proposals, was "to provide the necessary machinery to function in the preliminary stages of every dispute, with due recognition of the rights of all concerned." The main features of the agreement are described in the *National Labor Digest* as follows:—The basic wage, which is also a minimum wage, is fixed at 15 per cent higher than the wages provided under the agreement of the previous year. In addition, a bonus of 25 cents a day is allowed to every worker who has been in continuous employ of any company or operator for thirty days. Membership in any labour union affiliated with the American Federation of Labour must not be a bar to employment, and discrimination against an employee for membership in such a union is not permitted; intimidation or coercion, however, may not be used for the purpose of inducing or compelling a man to join a union at any time. For the adjustment of differences it is required that each individual employee having a grievance shall first seek direct adjustment through the foreman in charge of his work. Failing to secure a personal adjustment he may carry his complaint

before the "Workmen's Committee," a body of three or seven members, according to the size of the plant, elected from the workmen employed in each plant; the members of this Committee must be American citizens, who have been engaged in the oil industry in California for one year preceding their election, but no official, foreman, straw-boss, gang-pusher, or employee having authority to hire or discharge men, is allowed to serve. Still failing of adjustment, the Workmen's Committee, on behalf of the complainant, shall bring the matter of issue before an official named the "Adjuster." The Adjuster's duty is to familiarize himself with operating conditions, and to make any suggestions to either party for the good of the industry; he is also constituted as the final court of appeal within the industry in regard to all disputes which have failed of adjustment by other means.

About 50,000 workers of the fourteen oilfields in California are now bound by this agreement, together with most of the operators, the only important exceptions among the latter being the Standard Oil and Union Oil companies of California.

#### Jottings

By an order-in-council approved on September 25, 1920, the Department of Soldiers' Civil Re-establishment is authorized to manufacture and supply artificial arms, legs and other prosthetic appliances to any other Department of the Government of Canada, and to the various Workmen's Compensation Boards upon request at prices to be determined from time to time by the Department, during such time as facilities exist for manufacturing and supplying such appliances to ex-members of the Forces.

Representatives of the Trades and Labour Congress of Saskatchewan recently waited upon the Saskatchewan government and presented requests for state insurance, amendments to the Factories Act and the Cities Act, and a protest against the civic income tax. Minor matters affecting public health,

mothers' pensions, and the Fair Wage Act were also discussed, and slight amendments sought. The government conceded some of the points raised, but the more important issues were left for the consideration of the Legislative Council.

The personnel of the Minimum Wage Board of Ontario was announced by order-in-council of November 17 last. Professor J. W. Macmillan of Victoria College, Toronto, is chairman. The other members of the Board are: Mr. R. A. Stapells, Managing Director of the McElroy Manufacturing Company, Toronto, and Miss Margaret Stephens, of the Garment Workers' Union, Toronto, each appointed for two years; Mrs. H. W. Parsons, Secretary of the Women's National Council, Toronto, and Mr. H. G. Foster, secretary of the Hamilton Trades and Labour Council, appointed for one year.

According to a notice issued by the Trades and Labour branch of the Ontario Department of Public Works, all war-time special permits and other concessions with reference to Sunday work in bake shops are cancelled, the setting of a sponge being the only work permissible. No employee is permitted to work more than sixty hours in one week, nor more than twelve hours in any twenty-four hours. This notice became effective on November 23.

By over 1,000 majority, the Civil Service at Ottawa have voted in favour of affiliation with organized union labour.

By an amendment to the Civil Service Insurance Act passed at the last session of Parliament, all permanent members of the naval as well as those of the civil

and military services may avail themselves of the privileges of the Act. The maximum amount of insurance has been increased from \$5,000 to \$10,000, and in lieu of payment in one sum a death claim or any portion thereof may be paid in equal annual instalments.

A new co-operative union pattern-makers' shop is being organized at Cleveland, Ohio, by the Patternmakers' League of America. They are selling stock at \$50 a share and restricting holdings to fifty shares for a member. It is expected that 100 union members will eventually be employed by the shop which will solicit business from foundries in Cleveland.

A referendum on the introduction of the eight-hour day in Swiss railroad, telephone and postal telegraph and administrative services resulted in favour of its adoption by a vote of 369,000 to 271,000.

The Belgian Trades Union Congress, on October 19, unanimously passed a resolution urging the socialization by successive stages, of various industries; the commencement to be with the railways, shipping concerns, coal mines, insurance companies, credit and banking institutions, and light and power organizations.

At a congress of the International Union of Clothing Workers held at Copenhagen, Denmark, on August 19, it was decided to establish an international bureau at Amsterdam to be a clearing house of information for the needle trades of the world. The congress also adopted resolutions in favour of week work, and for the abolition of piece work and home work.

## INDUSTRIAL CONDITIONS DURING NOVEMBER, 1920

## 1.—General Review

During November the total average volume of employment continued to decline throughout Canada, all the Provinces taking part in the downward movement, which, however, was less marked in the Prairie Provinces. In the group comprising the Metal, Machinery and Vehicle trades the decline was general and was attributed largely to continued inactivity in the automobile and shipbuilding industries as well as in forging and steel manufacture. In Food and Drink manufacturing, activity continued fairly steady in abattoirs and meat packing plants, but further declines in the canning, sugar and starch industries reduced the general percentage of employment throughout the group. The Textile and Clothing groups still recorded marked decreases, these being most pronounced in the garment, thread, yarn and cloth factories in Ontario, Quebec and Nova Scotia; the boot, shoe and rubber footwear industries also continued to drop. The Pulp and Paper industry was still affected at several points by the shortage of power caused by low water, and by the closing of some mills for the season, especially in Quebec. The Woodworking, and Clay, Glass and Stone Groups shared depression resulting from the beginning of the period of seasonal inactivity in Building and Construction, though the glass-working trade in Ontario and the brick and cement trade in Quebec still experienced considerable activity. Railway transportation showed some increase in employment, which was more pronounced in the Maritime Provinces due to the commencement of activity resulting from the opening of the winter ports. The opening of coast winter ports and the closing of summer ports on the St. Lawrence effected the

usual seasonal shifting of employment among water transport workers; in British Columbia this industry made steady gains. Mining showed increased activity in all coal-fields, but declines were recorded in the lead, tin, zinc and copper group in Quebec, and in the smelting and refining industries of Ontario, particularly in nickel refining, owing partly to shortage of power; the asbestos industry in Quebec was affected by the closing of one large plant for one week during the month. The lumber mills continued on the period of seasonal slackness, many being closed down. Logging operations continued to extend in Ontario, Quebec and the Eastern Provinces, but in British Columbia a sharp drop occurred, which was attributed to adverse conditions in the lumber market.

The loss of time on account of industrial disputes was less during November than during October, 1920, or November, 1919.

**Strikes** There were in existence at some time or other during the month 20 strikes, involving about 1,959 workpeople, and resulting in a time loss of 23,442 working days, as compared with 20 strikes, 5,147 workpeople and 65,556 working days in October, 1920; and 25 strikes, 5,160 workpeople and 73,119 working days in November, 1919. On November 1, there were on record 10 strikes, affecting 923 workpeople. Ten strikes were reported as having commenced during November, as compared with 8 in October. Seven of the strikes commencing prior to November and seven of those commencing during November were reported terminated, leaving 6 strikes, involving about 703 workpeople on record at the end of the month.

The prices movement continued downward, decreases appearing in both the wholesale prices index number and the weekly family food budget. The Departmental index number of wholesale prices was down to 304.2 for November as compared with 317.6 for October, 307.7 for November, 1919, and 137.5 for November, 1914. In retail prices the average cost of a list of staple foods in 60 cities was \$15.32 at the middle of November as compared with \$15.83 at the middle of October, \$14.23 for November,

1919, and \$7.96 in November, 1914. In wholesale prices the chief decreases were in grains, animals and meats, miscellaneous foods, textiles, metals, coke, paints, oil and glass, chemicals and raw furs, and there were slight increases in dairy products, and fresh vegetables. In retail prices, the chief decrease for the month was in sugar, but there were slight decreases in the other items, except potatoes and eggs in which there were slight increases. In fuel and rent there were also some increases.

## II.—Industries and Trades

The Nova Scotia steel industry showed a marked falling off during November, in consequence of a strike of yard trainmen which threw out of work about 3,000 men at the Sydney steel plant and about 700 at Sydney Mines. The month's production at SYDNEY was as follows: pig iron, 15,589 tons; ingots, 19,534 tons; blooms and billets 5,100 tons; rods, 6,346 tons; plates, 3,339 tons; wire, 150 tons; nails, 1,150 tons; three blast furnaces were in operation up to November 20 when one furnace closed down, the other two closing two days later; the open hearth and mills also shut down on the 22; the stove, furnace and metal roofing foundries continued active. The production of the mills at SYDNEY MINES was 3,240 tons of iron and 8,150 tons of steel; the open hearth and blast furnaces closed down about the middle of the month. AMHERST reported busy conditions in the malleable iron, tin and sheet metal works. At CHARLOTTETOWN electrical workers were very busy, engine and boiler shops were fairly active and blacksmiths had a good month. The rolling mills at St. JOHN continued active and sheet metal workers were well employed throughout the month. Foundries and machine shops at MONCTON and FREDERICTON were normally active. BATHURST reported activity among machi-

nists, linemen and blacksmiths. MONCTON reported a considerable reduction in employment in the metal trades; the structural steel, engine and boiler shops were quiet, but farm implement and sheet metal factories continued fairly active and the electrical trade was normal. At QUEBEC and SHERBROOKE architectural and structural iron and stationary and portable engine workers had a very slack month, hours being reduced and workers laid off at many factories. Experienced moulders were in some demand at St. HYACINTHE at the foundries, and metal and machine shops were busy, though work on repairs was less plentiful than in the corresponding month of last year. The iron foundries at THREE RIVERS worked to capacity. At St. JOHN's and IBERVILLE the sewing-machine factory ran full time, but other metal working plants were slack. SOREL reported considerable unemployment in machine shops, foundries and other metal working plants. OTTAWA and HULL reported foundry work rather brisk, with some demand for mounters and moulders; steel equipment workers were affected by the slump in the automobile trade; the ROYAL MINT was very active with frequent overtime work. At TORONTO the metal and machinery trades were generally quiet, with many men out of work; engine, boiler, machinery and tool makers had

little work, but stove, furnace and electrical plants were more active; some men were laid off at the farm implement factories. The metal trades at HAMILTON continued fairly active, with the exception of one large and several small machinery plants; farm implement factories, foundries and steel, electrical and bridge plants worked with full staffs and without curtailment in hours of labour. Metal workers at NIAGARA FALLS were well employed, with female help in demand in the cutlery and plating industry. Boiler makers at ST. CATHERINES were well employed; electrical workers continued active. At BROCKVILLE the tin, tool and hardware industries were unusually busy; the stove and furnace trades were fairly active. At BELLEVILLE employment continued good in the metal trades; day and night shifts were worked at the rolling mills; engine and boiler shops and foundries were fairly busy, staffs being maintained at full strength. The iron foundries at PETERBOROUGH were mostly active; at the electrical factories night shifts were discontinued, and in some departments the employees worked on alternate weeks; farm implement workers were slack, except those in moulding shops; dairy machinery plants were very busy; machinery factories were active in all departments. GALT reported machine shops as continuing fairly busy but some worked only four or five days a week; the other metal working industries were also active. At BRANTFORD the stove and furnace industry continued busy; electrical manufacturing plants were fairly active, but a number of workers were laid off, as well as in the scale, engine and farm implement factories. At KITCHENER farm implement and engine factories were still fairly active; foundries ran full time, a few men being added to the staffs; tinmiths were steadily employed; electrical fixture plants were somewhat slack. Quiet conditions prevailed at GUELPH in the metal trades, but the castings and hardware plants were busy on orders for export; staffs

were reduced at the piano plate factory. The machine and repair shops at STRATFORD had a rather quiet month. Employment was reported good at WOODSTOCK among moulders, polishers and stove mounters. At LONDON the rolling mills, wire and iron works, and structural steel and farm implement factories were busy; furnace and galvanized iron workers were well-employed. Foundry workers at ST. THOMAS had normal employment during the month. At WINDSOR the bridge and trussed concrete steel plants still ran double shifts in producing building materials; stove foundries also retained full staffs and the injector plant was very busy on foreign orders. The iron industries and machine shops at OWEN SOUND were still fairly active. At ORILLIA the farm implement and stove factories were busy. The steel mills at SAULT STE. MARIE were shut down for about two weeks owing to a dispute arising out of a proposal to reduce crews, but they reopened before the close of the month. WINNIPEG reported all branches of the metal industries fairly well engaged during the month, without material change in the number of employees. The machine and engine shops at BRANDON had a busy month. The steel industry at REGINA was very quiet; the farm implement, tractor and sheet metal trades were also slack, but electrical workers were well employed. The iron works at LETHBRIDGE continued fairly active. Ironworkers, tinmiths and sheet metal workers at EDMONTON were well employed. The engineering shops and sheet metal works at NEW WESTMINSTER were fairly active and the electrical trade was busy. Sheet metal and electrical workers at PRINCE RUPERT were fairly well employed. At VANCOUVER the structural iron and steel, electrical apparatus, metal roofing and sheet metal industries were quiet, and the stove and furnace industry slowed down. VICTORIA reported moderate activity in iron foundries, but stove foundries and electrical apparatus factories were fairly busy.

The boat and shipbuilding and repairing industry at SYDNEY continued steadily active during

**Vehicles (land and water)** November; railway repair shops were still active. The carshops at

AMHERST continued busy, but the rolling mill department was closed for several days for repairs. CHARLOTTETOWN noted great activity in the locomotive and car repair shops of the Canadian National Railways; engine and marine boiler makers were fairly active. Working conditions in the locomotive and car repair shops of the Canadian National Railways at MONCTON remained steady throughout the month, and no reductions in staff were anticipated. Railway repair shops at FREDERICTON had a busy month, but garages were quiet. At MONTREAL the shipyards were quiet, but tractor factories were fairly active. QUEBEC reported fair activity at the shipyards, about 600 men being at work, mostly on repairs, with the prospect of employment on new constructions shortly; locomotive and car shops were active. The shipyards at THREE RIVERS reduced their staffs almost by half. SOREL reported considerable unemployment among boiler makers and iron shipbuilders. OTTAWA and HULL reported a quiet month at the carshops, with the probability that many men would soon be laid off in the machine department. At TORONTO railway repair shops were fairly busy, but automobile plants were very slack. The steel car factory at HAMILTON continued working full time. NIAGARA FALLS reported the steel shipbuilding plant at BRIDGEBURG entirely shut down; the Michigan Central shops laid off a number of men. At BROCKVILLE the motor car industry was very quiet, activity being confined for the most part to finishing or repair work; motor engine factories were also rather slack. The locomotive works at KINGSTON had a busy month with about 685 men employed; the shipyards were quiet, with the likelihood of many men being laid off. The Grand Trunk Railway shops at BELLEVILLE were fairly active, and automobile repair shops busy. At BRANTFORD the malleable iron works

were busy on orders for car parts for the C. P. R.; the carriage and wagon factories were also busy. At KITCHENER the motor and cycle trades were quiet; about 600 men were laid off at the rubber tire factories. Some men were laid off at the Grand Trunk railway shops at STRATFORD. The wagon factories at WOODSTOCK were still busy, with good prospects for winter. At LONDON there was a seasonal slackening-off in the motor factories; boiler and engine shops also slowed down; many railway carshop employees were laid off. Heavy reductions were made at ST. THOMAS during the month in the staffs at the railway car shops. WINDSOR reported conditions in the automobile factories very unsettled, some being entirely shut down. At the carriage factory at ORILLIA the staff was reduced to one-third of its normal strength, as the result, it was said, of the collapse of the automobile industry. The shipyards at PORT ARTHUR and FORT WILLIAM took on additional men during the month. WINNIPEG reported all departments of the railway shops maintaining their usual number of employees; automobile repair shops were fairly active, but the Ford plant practically shut down, only about 20 men being retained. The railway shops at BRANDON and REGINA were busy, but at CALGARY the railway shops reduced their staffs. Machinists in the C. P. R. shops at LETHBRIDGE were fairly active. VANCOUVER reported quiet conditions in engine and boiler, cycle and motor engine works; one shipyard was busy on two steel boats, but another yard was idle, owing, it was said, to shortage of steel, several hundred men being laid off. At VICTORIA slack conditions were noted in the shipyards, work being confined to repairs or finishing.

Continued activity was reported at SYDNEY throughout the food group, excepting the aerated **Foods, liquors and tobacco** water and soft drink industries which everywhere showed the usual seasonal slackness. The milk factory at TRIURO continued active. At CHARLOTTETOWN abattoirs and meat

packing houses were very busy, and bakers, confectioners, milk and tobacco factories were active. ST. JOHN reported steady conditions in the flour mills; the sugar refinery remained closed; bakers and confectioners were increasingly active; and creameries and dairies fairly busy, but breweries were rather quiet. At MONCTON bakeries were busy, but the biscuit factory reduced its staff. FREDERICTON reported steady activity in the flour mills and bakeries. At MONTREAL bakeries and confectionery plants increased activity as the result of the lower prices of flour and sugar and the approach of the Christmas season; flour and feed plants, abattoirs and meat packing houses were also busy, and cigar makers were fairly active. QUEBEC reported quiet conditions among bakers and confectioners, the high price of bread, together with the lower cost of flour, it was said, encouraging home baking; breweries were busy, but tobacco factories were quiet. Fair conditions continued in the food group at SHERBROOKE, but tobacco factories were quiet. At ST. HYACINTHE the flour mills, bakeries and confectionery plants were active, but butter factories were quiet; tobacco workers were only fairly active, working in some cases only for or five days a week. THREE RIVERS reported general activity in the food group. At OTTAWA and HULL abattoirs had a normal month, dairies continued active and confectionery plants were fairly busy. At TORONTO flour, feed and cereal workers were fairly active; abattoirs and packing houses worked steadily; bakers and confectioners had a fair month, and as far as women workers were concerned, full staffs were retained, but without the rush usual at this season and sometimes on short hours; fruit and vegetable canners were active, and cigar makers fairly active, but breweries and soft drink plants were quiet. HAMILTON reported fair activity at the flour mills and in soft drink and tobacco factories; breweries were active and bakers and confectionery plants busy in view of Christmas; the Armour Company closed its local plant, but other packing houses were fairly active. At

NIAGARA FALLS the canning factories reduced their staffs and the Port Colborne flour mills laid off some men. ST. CATHERINES, BROCKVILLE and GALT reported general activity in the food trades, excepting soft drink plants. The flour mills at BELLEVILLE were in steady operation in the latter part of the month when electrical power was restored; bakers and confectioners were active and creamery workers exceptionally busy. At PETERBOROUGH the cereal plants were not so busy as last month, some employees being laid off; but packing houses, bakeries and confectionery plants and dairies were all active. At BRANTFORD some workers were laid off at the baking, confectionery and preserving plants; meat packing houses and creameries were fairly busy. At KITCHENER all the food working trades except soft drink and tobacco workers were busy, especially those in the sugar factory which ran continuous 12-hour shifts. The brewery at WATERLOO continued busy, but without overtime work. Active general conditions were also noted at GUELPH and STRATFORD. At LONDON biscuit and candy factories experienced an unexpected slackness, due, it was stated, to the drop in the price of sugar which led consumers to expect a drop in the finished product and withhold their orders, and some help was laid off and working hours reduced; the flour mills continued fairly busy; cigar factories worked only about half their usual staffs. At ST. THOMAS the flour mills and the chocolate factory were busy. WINDSOR reported all food industries busy, with the exception of the breweries and soft drink and tobacco factories. Flour and cereal factories, bakeries and confectionery plants at OWEN SOUND were active; the saving of the apple crop was hindered by the shortage of barrels and of labour. The flour mills at ORILLIA were busy. Staffs were reduced in the vegetable canneries at WINNIPEG; confectionery plants continued to employ the same force of labour; meat packing houses and abattoirs were quiet, a large number of workers being laid off at one plant; creameries were steady and bakeries active as

regards experienced workers. The flour mills and bakeries at BRANDON continued busy; creameries and breweries were fairly active, but soft drink and tobacco factories were quiet. Flour and other food workers at REGINA were fairly well employed, abattoirs and packing houses being normally active. The flour mills at LETHBRIDGE worked steadily. CALGARY reported very quiet conditions in flour and feed plants, staffs being reduced; bakers and confectioners were fairly busy, but soft drink plants and breweries were quiet. The biscuit factory at EDMONTON was fairly active. FERNIE reported much activity in dairies, breweries and soft drink plants. At VANCOUVER flour, feed, cereal and sugar plants were fairly active; abattoirs and meat packing plants were rather quiet; the baking and confectionery trades, creameries, dairies and breweries were busy; fruit and vegetable canning plants closed for the season and soft drink factories were quiet; tobacco workers were fairly active. At NEW WESTMINSTER the breweries and cigar factories were busy. VICTORIA reported activity in the feed and cereal plants, creameries, dairies and breweries; the baking and confectionery trades were normally active, but fruit and vegetable canning and the tobacco industry were quiet: BRITISH COLUMBIA'S salmon pack for 1920 was reported as amounting to 1,177,047 cases, compared with 1,393,156 cases in 1919; the selling value this year was \$13,307,719.

At TRURO the woollen mills resumed work with usual staffs on full time. The cotton mills at MARYSVILLE continued steadily busy. MONTREAL reported steady employment in the woollen and knitting mills, but tent and sail factories were quiet. At QUEBEC the cotton mills were very busy but sail factories were very quiet. Slack conditions were noted at SHERBROOKE in the textile group, the cotton mills discharging some of their employees and working only about half time. Woollen and knitting mills at St. HYACINTHE were quiet

**Textiles,  
cordage and  
carpets**

towards the end of the month, some temporary employees being discharged. The cotton mills at THREE RIVERS ran steadily, without change in the number of employees. At TORONTO woollen, hosiery and knitted goods concerns were fairly active at the beginning of the month, but activity declined later, many operatives, many of them women, being laid off; hosiery plants were fairly busy; tent and awning factories were quiet; the carpet plant worked only four and a half or five days each week. At HAMILTON knitting and hosiery workers were fairly busy; carpet, tent and sail makers were fairly well employed. The cotton factory at WELLAND discontinued night staffs. The woollen mills at St. CATHARINES were less busy than in recent months, but knitting and silk workers continued well employed. The tent, awning and sail works at BROCKVILLE were quiet. Textile workers at KINGSTON were normally employed. At PETERBOROUGH the textile industry was quiet, factories running short handed or on short shifts; knitting factories, however, were very busy. At GALT the cotton and woollen mills were busy, some working overtime; the silk mill worked only four days a week; bleaching and dyeing textile plants were still busy. BRANTFORD reported the textile industry as generally dull, though the woollen, silk and cordage factories were fairly busy. KIRCHENER reported the knitting, felt and twine factories active. The linen, cotton and worsted spinning mills at GUELPH were active, and carpet and rug workers were fairly well employed. Female help was in demand in the woollen and knitting factories at STRATFORD. Quiet conditions were noted among textile and knitted goods workers at WOODSTOCK, the outlook in the industry being uncertain, but none were laid off. Many workers, including many women, were laid off in the hosiery and underwear factories at LONDON. The knitting factory at St. THOMAS was normally active. At OWEN SOUND the woollen and hosiery trades were active, but the tent factory was very quiet. The woollen mills at ORILLIA enlarged its

capacity and engaged more help. At WINNIPEG the cotton and jute works reduced their staffs; but one bag factory reported increased activity; knitting factory workers were busy, but the tent and awning trade was quiet. Knitting factories at VANCOUVER were not very busy, and tent, awning and sail factories were slack.

SYDNEY reported continued activity in the steam laundries. The hat and

**Clothing,  
boots, shoes  
and laundering**

cap factory at TRURO resumed running on full time with full crew and the shirt factory was also running with cap-

acity help. At CHARLOTTETOWN employment continued good in the steam laundries and dyeing plants; tailors and garment makers and boot and shoe workers had a busy month. Readymade clothing factories at ST. JOHN were fairly active, and steam laundries were busy, with good prospects ahead in view of the opening of the winter port. Boot shoe and larigan workers at FREDERICTON were less active; but tailors were busy. MONTREAL reported dull conditions in the readymade clothing industry, many factories being closed and other working on short time; within recent months very few garment workers have been employed full time, some working only two or three days each week; about 3,500 of the 6,000 garment workers in the city were said to be women; hat, cap and whitewear workers were also slack, one women's whitewear factory closing down, throwing from 50 to 60 workers, mostly women, out of work; shirt makers, however, continued steadily employed; laundries were less active on the close of navigation; boot and shoe factories were quiet. At QUEBEC the clothing and women's whitewear trades were dull, but glove factories were active; steam laundries were quiet. Ready-made clothing and boot and shoe factories at SHERBROOKE were quiet, but laundries and cleaning plants were fairly active. Garment workers at ST. HYACINTHE were fairly well employed, though a few were laid off at some plants; the boot and shoe

factories employed only about one-fourth of their normal staffs; steam laundries were busy. At THREE RIVERS glove makers were fairly active, and laundries and cleaning plants had a busy month; the boot and shoe industry was rather quiet. The shirt and collar factory at ST. JOHN's and IBERVILLE ran full time with full staff. The clothing trades at SOREL has a good month. At OTTAWA and HULL clothing workers had a quiet month; laundries were normally active. At TORONTO ready-made clothing, hat and cap and women's whitewear factories were quiet, with some plants closed down and many employees laid off; unions reported about 400 of their women members unemployed, factories working either short-handed or on short time; glove factories were fairly busy; the boot and shoe trade was very quiet; steam laundries and dyeing establishments were normally active. At HAMILTON the ready-made clothing factories were quiet, working four days in the week, with some out of work. The clothing trades at NIAGARA FALLS were active. Rubber footwear workers at ST. CATHARINES were well employed. At BROCKVILLE the hat factory let out some employees while new machinery was being installed; glove, fur, boot and shoe and laundry workers were all fairly active. The shirt and hat factories at BELLEVILLE had an active month; steam laundries were also busy. Women's whitewear and children's clothing factories at PETERBOROUGH were fairly active. Help was in demand for the shirt factory at PETERBOROUGH, but the boot and shoe industry was quiet, though the largest factory, which was shut down for six weeks for renovation, reopened and was working five days a week. At BRANTFORD the overall and shirt factories were practically idle; boot and shoe workers were employed but not busy. KITCHENER reported considerable unemployment, especially among females, in the shirt and collar factories; robe and clothing makers worked only five days in the week, but button and glove factories and laundries were busy; the boot and shoe trades

were rather quiet, some working only 40 hours a week; felt shoe factories were busy, but many rubber shoe workers, including female help, were laid off. The women's whitewear factory at GUELPH was fairly busy. Ladies' costume workers at LONDON were well employed, but makers of men's clothing were less active than in the preceding month, this being the period between seasons; boot and shoe workers were employed about two-thirds of their time, mostly on piece-work. The shoe factory at ST. THOMAS, which recently closed, resumed operations, but a full staff was not yet employed. Very slack conditions were noted at WINDSOR among clothing workers, the overall factory being practically closed and the shirt and button plants very quiet; laundries and cleaning plants were increasingly active. The whitewear factory at OWEN SOUND materially reduced its staff. The ready-made clothing trade at ORILLIA had a quiet month. At WINNIPEG ready-to-wear and whitewear and shirt workers were on short hours, one shirt factory being practically shut down; the cap plant worked only half time, but glove makers worked with full staff and on full time; laundries and cleaning plants were fairly active. Ready-made clothing, shirt and overall factories at VANCOUVER were very quiet, and steam laundries and dyeing plants were also rather slack; the boot and shoe trade was fairly busy. VICTORIA reported fair activity in the shirt and overall factories and steam laundries.

The pulp and paper mills in the Maritime Provinces continued to operate steadily, the employees in the large mill at MURRAY and at the LIVERPOOL mill (both in Nova Scotia) numbering about 800 at the close of the month, and those at BATHURST, ST. JOHN and CHATHAM, in New Brunswick, numbering about 1,050; about half the latter number were employed at Bathurst pulp mills where the daily production averaged about 100 tons. In the Province of Quebec employment showed gains from the pre-

ceding month in the pulp and paper mills at HULL, WINDSOR MILLS and CHANDLER. Steady conditions were maintained in the mills at LA TUQUE, CHICOUTIMI and DONNACONA, while reductions in staffs occurred at THREE RIVERS, SHAWINIGAN FALLS, EAST ANGUS, KENOGAMI and CAP MAGDELAINE. In Ontario reductions in staffs were reported in the pulp and paper mills at IROQUOIS FALLS, ESPANOLA and CORNWALL; slight increases were noted at OTTAWA over the previous month, but owing to continued difficulties with the water supply employment was still much below normal; the mills at SAULT STE. MARIE, THOROLD and SMOOTH ROCK FALLS, also showed small gains; conditions were fairly steady in the mills at TORONTO, STURGEON FALLS and HAWKESBURY. VANCOUVER reported fair activity in the pulp and paper mills in British Columbia. The rubber roofing, felt and tarred paper plants at VICTORIA were busy.

The printing trades continued steadily employed at SYDNEY and AMHERST.

#### Printing, publishing and paper goods

Linotype operators were in demand at TRURO. Employment was good among printers at CHARLOTTETOWN. At ST. JOHN printers were in demand, and binders and engravers were also active, but some paper box factories reduced staffs. The printing and publishing trades had a good month at MONCTON and FREDERICTON. At MONTREAL printers, bookbinders and lithographers were fairly active in connection with the Christmas trade, and makers of paper boxes, bags, novelty and allied products were busy. At QUEBEC printers and binders were busy, but paper box and bag factories were quiet. Fair conditions in the publishing trades were reported at SHERBROOKE and ST. HYACINTHE. OTTAWA and HULL reported a busy month among lithographers, photo-engravers, printers and bookbinders, with good prospects for the coming month; paper box factories entered their busy season. At TORONTO printers and allied trades were

#### Pulp, paper and fibre

generally well employed, but paper box and bag factories were quiet, many orders being cancelled. Some unemployment resulted at HAMILTON from the closing of an old-established publishing plant; job printers were only fairly active; lithographers and bookbinders were fairly well employed. Activity was noted in the printing and allied trades at ST. CATHARINES, BROCKVILLE, KINGSTON, BELLEVILLE, PETERBOROUGH, and GALT. The stationery factory at BRANTFORD was very quiet, but printers were busy. At KITCHENER some job printers were out of work, but newspaper offices were busy, bookbinders fairly active, and paper box factories worked full time. GUELPH reported a quiet month among printers. Activity continued in the printing and publishing trades at STRATFORD and WOODSTOCK, and at LONDON the printing and allied trades were all very busy. ST. THOMAS reported printers busy, especially in job offices. At WINDSOR job offices were rather less active, but a new newspaper which was started during the month increased employment; paper box factories were busy for the Christmas season. At WINNIPEG some unemployment resulted from the closing down of a daily newspaper; otherwise conditions remained practically without change, sufficient help being available to meet the demand; in the job plants a small number of men were unemployed; bookbinders were normally active, without change of staffs; paper box factories were fairly busy. The printing and allied trades continued well employed at BRANDON, REGINA and EDMONTON, but at CALGARY conditions were quiet for most of the month, improving only in the last week. VANCOUVER and VICTORIA reported activity in the printing trades in connection with the Provincial elections and the Christmas season: paper box makers were also fairly active. Good conditions were noted among printers at NEW WESTMINSTER and PRINCE RUPERT.

The sash and door factories and planing mills at SYDNEY continued running steadily. The piano factory at AMHERST was slack, a reduction of staff being expected; other woodworking trades were steady. Woodworkers at TRURO were on reduced time; the mattress factory ran full time. The sash, door and planing mills at CHARLOTTETOWN were busy, but the broom factory laid off a few employees; coopers had a very busy month. At ST. JOHN the mills were busy, and the wooden box, brush and broom factories were also active; the sash, door and planing mills were busy replenishing stocks on the completion of the building season. At MONTREAL wooden box, furniture and piano workers had a fair month. The mills at QUEBEC continued busy, but the wooden box, furniture and chair factories were quiet. SHERBROOKE reported fair conditions in the planing mills, and chair factories. The mills at ST. HYACINTHE were also active but the chair factory shut down. At THREE RIVERS the woodworking trades were reported active. At OTTAWA and HULL general slackness was noted, staffs being reduced in the wooden box, washing machine, piano and furniture factories, while the broom plant practically closed down; sash and door factories were active, with some exceptions. At TORONTO the sash, door and planing mills and furniture and upholstery factories were active, but wooden box, piano, organ and phonograph plants were quiet, with many out of work. HAMILTON reported some slackness in the furniture industry, short time being worked. The woodworking trades at ST. CATHARINES were well employed. At BROCKVILLE the office furniture factory ran six days of 10 hours each per week; planing mills were also busy. BELLEVILLE and PETERBOROUGH reported work fairly brisk in the sash, door and planing mills. At GALT the mills were busy, but furniture factories were less active, though no workers were laid off. General slackness

was noted at BRANTFORD in the wood-working group. At KITCHENER the sash door, wooden box, toy, ladder and cooperage factories were still active, but furniture plants were slack; many upholsterers, finishers and machine hands being out of work; piano and broom factories were fairly active. GUELPH reported activity in the planing mills and sash and door factories, but piano and sewing machine workers continued slack. At STRATFORD quiet conditions were noted in the planing mills and sash, door and wooden box factories. WOODSTOCK reported slackness in the furniture and piano factories, staffs being reduced and short time worked; the organ factory was fairly active. At LONDON the planing mills were very busy on sashes, doors and interior house finishings; box factories were busy except those for cigar boxes; cooperage plants were slack, working only 35 hours a week, with many out of work; the piano factory was rather quiet. St. THOMAS reported that temporary unemployment resulted when a cabinet factory changed ownership. The woodworking trades at WINDSOR were still rushed with orders for building materials; the piano factory closed for a few weeks. At OWEN SOUND the furniture industry was at a standstill, one factory having shut down completely and reopened with a greatly reduced staff; the sash, door and box factories were active. The planing mills at ORILLIA slowed down, though bench workers were still active; the furniture trade was also quiet, but no workers were so far laid off. The sash and door factories at BRANDON were busy; but at CALGARY conditions were quiet. Sash and door factories at FERNIE were practically inactive. At VANCOUVER the wood-working factories were quiet. Furniture makers at NEW WESTMINSTER had a fair month. VICTORIA reported moderate activity in the sash and door factories and planing mills and dulness in the wooden box factories.

The trunk and bag industry at AMHERST was steadily active; tannery workers at St. JOHN were well employed. At MONTREAL the tanneries and trunk, bag and harness plants were fairly active, but about 200 employees were laid off at the rubber factories. Trunk, bag and leather goods factories at QUEBEC were dull. The tannery at St. HYACINTHE worked only four or five days a week. The saddlery factories at OTTAWA and HULL reduced their staffs. The leather and rubber industries at TORONTO were all very quiet. HAMILTON reported fair activity among trunk, harness and leather goods workers. Harness and belting makers at BROCKVILLE were fairly busy. The tannery at KINGSTON laid off a number of men. At KITCHENER both tanneries ran full time; trunk and bag factories were fairly active; rubber factories at GUELPH were active. At STRATFORD tannery and harness workers were rather quiet. Tannery, harness and leather factories at LONDON were slack. The tanneries at OWEN SOUND and ORILLIA were normally active. At BRANDON trunk makers were busy, but tanneries worked only part time. Trunk bag, harness and horse goods workers at CALGARY had a quiet month.

Stone and granite cutters at St. JOHN had a quiet month. Cement plants at MONCTON operated on a smaller scale on account of weather conditions. The glass factories at MONTREAL continued in steady operation. At QUEBEC stone cutters were slack and brickyards for the most part finished for the season.

Employment was fairly good in the cut stone and granite trades and brickyards at SHERBROOKE. Artificial stone workers at THREE RIVERS had a good month. Brick and sewer pipe workers at TORONTO were less active, the demand falling off as the season advanced, but glass factories were in steady operation. HAMILTON reported fair conditions among glass workers, and in the brick,

**Leather and  
rubber (other  
than clothing)**

**Clay, glass,  
stone, cement,  
etc.**

stone, lime, sand and sewer pipe yards. The cut stone, granite and brickyards at BROCKVILLE were quiet. The brickyards at BELLEVILLE had a fairly busy month; day and night shifts were worked at the cement plant. At KITCHENER stone and marble cutters worked full time, and brick, tile and pipe makers were steadily employed. At LONDON stone cutters were very busy, but the brickyards were closing owing to severe weather. At VICTORIA brick and tile plants were quiet; but cement factories were busy, large shipments being made to the Orient.

Continued activity was reported in the various chemical industries at SYD-

**Paints, oils,  
chemicals,  
explosives**

NEY, including the tar, naphtha, carbolic acid, creosote, dead oil, naphthaline and pitch plants.

At MONTREAL the paint and varnish industry was rather quiet, but the chemical, drug and medicine trades were active. Dullness was noted at QUEBEC in the soap factories, and the cartridge and ammunition factory closed down temporarily. At SHERBROOKE fair conditions prevailed in the lubricating oil and grease, gunpowder, acid, extract, drug and chemical plants. The paint factories near THREE RIVERS were fairly active. Paint and varnish workers at TORONTO were fairly busy. HAMILTON reported activity in most of the factories for drugs, extracts, soap and toilet requisites, but some factories shut down. The electro-chemical plants at NIAGARA FALLS were active, but at CHIPPAWA the abrasive factory laid off a number of its employees. The oil and grease plant at KITCHENER had a good month. The paint and varnish industry at WINDSOR was rather slack, but pharmaceutical workers were busy. VANCOUVER reported activity in the neighbouring oil refinery but the paint and varnish industry was quiet. At VICTORIA the paint and soap factories were fairly active; powder and explosive plants were rather quiet.

The gross earnings of the Canadian Pacific Railway in October were \$24,-800,632, as compared with \$18,296,652 in October of last year. The gross earnings of the Canadian National Rail-

**Railways,  
shipping and  
'longshore work**

ways for November were \$12,426,824, as compared with \$8,949,583 in the same period of last year. During November the number of persons employed by the Canadian Pacific Railway, Grand Trunk Railway and Canadian National Railways, in railway operation including general offices, trainmen, and engine crews, station employees, sleeping, dining and parlor car employees showed an increase over the preceding month of about 1,100 persons, the total employees at the end of the month being 71,500 in comparison with 70,400 at the end of October. This increase was more than accounted for by additions to the Canadian Pacific Railway staffs. There were slight decreases made in the staffs of the Canadian National Railways. Reductions in the railway operating staffs of these three companies occurred in October, but the increases during November brought the total back to about the same number as were employed during September.

During November steady activity continued at SYDNEY on steam and electric railways, in navigation and 'longshore work and in transfers, liv-  
ries and garages. TRURO reported some slackness of employment among railwaymen, but at CHARLOTTETOWN the railway was unusually busy, the car-ferry making five trips daily to keep freight clear. At ST. JOHN the railways had a busy month, with the prospect of increased activity on the opening of the winter port; street railwaymen were also well employed; 'longshoremen were better employed owing to an increase in shipping; transfers and garages were busy. Railway transport conditions at MONCTON continued good; express and transfer workers were busy. At FREDERICTON navigation closed on the river, and railways increased activity. MONTREAL reported a reduction of staffs on the railways; about 2,000

workers were said to be unemployed in consequence of the closing of navigation.

At QUEBEC railways were running on their winter schedules, but fewer trains were taken off than during the past three of four years, passenger and freight traffic being still heavy; navigation closed towards the end of the month; street railways also reduced their service of cars but a new suburban route was opened. Railwaymen at SHERBROOKE were reported busy, and street car and transfer workers were fairly active. Transport workers at THREE RIVERS had a good month, navigation closing after a busy season. At ST. JOHN'S and IBERVILLE navigation closed on the Chambly Canal; railwaymen were well employed throughout the month. Good conditions were also noted at SOREL. TORONTO reported a decline of railway activity, a number of men, mostly unskilled workers, being discharged; street railwaymen were well employed; navigation continued fairly active for the season, but declined toward the end of the month; garages had a busy month. HAMILTON reported 'longshoremen slack, steamships being laid up for the year; railway freight was also light, but passenger traffic was heavy on both steam and electric roads. Transport workers were well employed at NIAGARA FALLS. Lake navigation practically closed at PORT COLBORNE. Railwaymen were well employed at ST. CATHARINES; Section 1 of the Welland Ship Canal closed early in the month. BROCKVILLE reported navigation closed; railwaymen were well employed but garages were quiet on account of snow. Passenger and freight traffic on the three lines operating at BELLEVILLE was heavy, and longshoremen had some work unloading coal; transfers and garages were also busy. All branches of transportation were reported busy at GALT, but at BRANTFORD both freight and passenger traffic was lighter. KITCHENER reported heavy freight on the railways, and general activity among transport workers. At LONDON railway workers had reduced employment. ST. THOMAS reported a falling-off in railway traffic

during the month. The Grand Trunk Railway reduced its freight train schedule at OWEN SOUND, but the Canadian Pacific continued as usual; navigation closed at the end of the month. During October 299,555 tons of freight passed through the Canal at SAULT STE. MARIE compared with 308,900 tons a year ago (figures for November are not yet available.) At PORT ARTHUR and FORT WILLIAM marked activity was reported at the freight sheds, elevators and coal docks in view of the short period before the close of navigation. Street railwaymen at WINNIPEG continued active without any change in the number of employees. Railway traffic was heavy, especially on the line running north. At CALGARY the railways had a fair volume of through traffic, but local freight sheds were very quiet; also transfers, liveries and garages. Freight handlers and transfer workers at NELSON and TRAIL were well employed. At VANCOUVER the railways, both steam and electric, were fairly active; navigation and longshore work was slack at the beginning of the month, improving towards the end; transfers and garages were normally active. At PRINCE RUPERT railway and longshore work was slow. VICTORIA reported a considerable decline in transportation, both by rail and water; longshoremen were active, but transfers and garages were quiet.

As the result of the closing of the steel plant at SYDNEY MINES the quarries at

<b>Mining (other than coal) smelting and quarrying</b>	Pt. Edward curtailed activity during the month, a large number of workers being affected. Stone quarrying at QUEBEC practically ceased for the season. At SHERBROOKE the granite quarries and gravel pits continued fairly active; chrome iron mines were active but the copper mines were quiet; asbestos workers continued fairly well employed. Activity at the mines at TIMMINS were affected by shortage of power. The nickel plant at SUDBURY curtailed its staff during the month. The silver mines in COBALT district
--	---

shipped 16 cars containing approximately 1,266,934 pounds of ore; this compares with 46 cars containing approximately 3,578,468 pounds in the previous month; bullion shipments amounted to 340 bars containing 411,040 fine ounces of silver, as compared with 425,098 fine ounces in October; underground work for the month was considerably below normal owing to the shortage of electric power, and the labour supply was reported adequate for existing conditions. SAULT STE. MARIE reported that the Michipicoten iron mines worked full time with full crews; the 12 and 18-inch mills of the Steel Corporation closed down for about two weeks, the men refusing to agree to reductions in the number of working crews, but they reopened before the close of the month. FERNIE reported normal activity in the metalliferous mines in the district. The mines at ROSSLAND continued shipping nearly one thousand tons of ore daily to the smelter at TRAIL; at the latter one copper and two lead furnaces were still in operation and the concentrator increased its capacity; the lead refinery turned out daily about 55 tons of refined lead, and the copper refinery about 20 tons of copper; the zinc and silver refineries ran as usual. Miners and timbermen were in demand at SLOGAN. PRINCE RUPERT reported that the drop in copper prices resulted in the discharge of several hundred men at ANYOX.

The coal mines in Nova Scotia showed considerable gains in production during November. SYRNEY reported that the Dominion Collieries produced

**Mining (Coal)** 296,367 tons of coal compared with 271,000 tons (revised figure) in the previous month; 23,450 tons of coke was produced. SYDNEY MINES reported that at the Nova Scotia collieries 55,304 tons of coal was raised, compared with 50,800 tons in the previous month; the amount of coke produced was 4,950 tons. Steady activity continued at the MINTO coal mines during the month. Activity in the coal mines in the Prairie

Provinces was reported from the various employment centres, with miners in demand at the beginning of the month, this demand, however, being filled later, leaving a surplus of men without employment. LETHBRIDGE reported continued activity in the local mines, but the mild weather tended to reduce the demand for coal. FERNIE reported normal activity in the coal industry, the mines there and at MICHEL working full time with a plentiful supply of labour available (the production of the Crow's Nest Pass coalfield in the previous month was 48,240 tons). NANAIMO reported good conditions and prospects in the Vancouver Island Coal mines; development work was proceeding, and with the opening of new mines employment was expected to increase; the production of coal during November showed a considerable advance over the previous month, (The production in October in the Vancouver Island mines was 166,400 tons.)

The value of the building permits in 56 cities during October amounted to \$9,660,538 as compared

**Building and construction** with \$8,921,374 in September. During November considerable building was still in progress at SYDNEY. At HALIFAX outside operations slowed up during the month. Street paving work at CHARLOTTETOWN discontinued for the season, but work continued on buildings in course of construction, plumbers and pipefitters being busy, but masons and bricklayers quiet. St. JOHN reported some building still in progress; work was proceeding on the dry dock at Courtenay Bay; street work was at a standstill. Mild weather permitted new buildings to be completed at MONCTON and BATHURST. MONTREAL reported the building trades fairly active, some large buildings being under construction. At QUEBEC outside work was for the most part finished, and interior work proceeded under cover. Fair activity continued at SHERBROOKE, THREE RIVERS and SOREL. Considerable activity was noted in the building trades at OTTAWA and HULL, few men

being so far laid off. At TORONTO building showed a marked slackening in activity as regards new contracts, as owing to uncertainty as to the cost of materials and labour there was a disposition to postpone new undertakings until conditions become more settled; except, however, for interruptions caused by bad weather the building trades were well employed and construction in progress was likely to furnish work for some time. Similar conditions prevailed at HAMILTON as regards new buildings better prices being awaited, but plumbers, furnacemen, electricians and painters were well employed. The building trades were fairly active at NIAGARA FALLS and PORT COLBORNE, and at ST. CATHARINES, canal construction was still proceeding. Unusual activity in industrial and commercial building and dwellings was noted at BROCKVILLE but at KINGSTON outside work practically ended for the season. At BELLEVILLE and PETERBOROUGH the building trades were still fairly active. At GALT many new buildings were in progress; the C.P.R. had a large gang engaged on road construction. The building trades at BRANTFORD were reported very slack. KITCHENER reported the season's work being completed, one hundred dwelling houses having been built this year. Bricklayers and masons at GUELPH were slack, but the other building trades were fairly active. Employment continued brisk at WOODSTOCK. At LONDON bricklayers plumbers and carpenters were busy, but painters were slack. Fifty houses were built at WINDSOR during the season under the Housing plan; only 20 carpenters out of 600 members of the union were reported idle. Building operations concluded for the season at SAULT STE. MARIE. At WINNIPEG conditions in the building trades remained good until the middle of the month, when activity slowed down, almost ceasing entirely before the close of the month, except that a few mechanics were retained for inside work. Similar conditions prevailed at BRANDON, REGINA and MOOSE JAW, although the open weather allowed operations to continue

unusually late. Building construction was very quiet at CALGARY, but at EDMONTON the decline in activity was less marked. VANCOUVER and NEW WESTMINSTER reported slackness in all building trades. VICTORIA reported that construction work on the Island divisions of the C.N.R. was suspended pending completion of bridges on the route. At PRINCE RUPERT the building trades continued fairly active, although many carpenters were out of work.

Railway construction employment showed a large decrease during the month of November, the number of persons employed by the Canadian Pacific Railway, Grand Trunk and Canadian National Railways (including Maintenance of Way) being 36,200 at the end of the month in comparison with 35,500 at the end of October or a total decrease of 9,200 persons. This reduction was made up by decrease of 2,800 persons by the Canadian Pacific Railway, 1,900 persons by the Grand Trunk Railway and 4,500 persons by Canadian National Railways. The reductions were spread evenly over the whole month, over 2,000 persons being let out weekly.

Lumbering operations during November were reported at CHARLOTTETOWN to be quiet. At ST. JOHN several sawmills closed for the season. At FREDERICTON a greatly reduced production of logs was anticipated in the coming winter, some former large operators remaining out altogether. The demand for men was reported at BATHURST to be slowing down, some of the camps having filled up. In QUEBEC district a demand was noted for men for the woods, but as wages were only about half those of last season men were unwilling to go; it was anticipated that next winter's cut would fall far short of that a year ago; the saw mills all closed down for the season. SHERBROOKE reported lumber, tie and pole camps all busy, and saw and shingle mills fairly active. The lumber industry was reported at SOREL to be quiet. At OTTAWA and HULL between 600 and 700 men

were thrown out of work by the closing of a large sawmill. Logging was less active in PETERBOROUGH district, but the sawmills worked to capacity. OWEN SOUND reported that the lumber camps on the north shore of the Georgian Bay were busy, but some of the sawmills closed down for lack of logs. SAULT STE. MARIE reported the lumber camps well filled, with no demand except for experienced woodmen; lumberyards were quiet. A demand for loggers was noted early in the month at COBALT, NORTH BAY, SUDBURY, PEMBROKE and TIMMINS, but most of these camps were filled up later. WINNIPEG reported the logging camps filling up in Northern Manitoba, but some demand for labour continued in The Pas district. REGINA noted similar conditions in Saskatchewan, vacancies in the camps being filled by men lately working in the harvest fields and in threshing. At PRINCE ALBERT many men were unemployed and wages were reduced. In Alberta logging operations were rather quiet, some closing camps down and the demand for men generally falling off. FERNIE reported the period of depression in the

lumber industry as having reached an acute stage during November, the lower price of lumber products being credited with the decline; not a sawmill in the district was working, and few logging camps were open, wages being reduced, and many loggers unemployed. NELSON reported many sawmills closing for lack of market. At CRANBROOK the lumber camps were filled, no more men being taken on. VANCOUVER reported that almost all lumber camps were practically closed down; saw and shingle mills were also very slack, many being idle. At NEW WESTMINSTER one lumber mill closed for two months and the other mills ran much below capacity. Similar slackness was reported in the camps at PRINCE GEORGE and PRINCE RUPERT, many large camps closing down, the only demand being for tie-makers along the line of the Grand Trunk Pacific Railway. VICTORIA reported dull conditions in the industry on Vancouver Island. NANAIMO reported that the closing down of logging camps and mills in all parts of the Island had thrown many men out of employment.

---

## INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907

---

### PROCEEDINGS FOR THE MONTH OF NOVEMBER, 1920

**D**URING the month of November two applications were received for Boards of Conciliation and Investigation, and Boards were established in connection with two disputes for which applications had been received during the preceding month.

#### Applications received

During the month of November applications were received for Boards as follows:

(1) From the employees of the Nova Scotia Steel and Coal Company, Limited, Sydney Mines, N.S., being engineers and firemen, conductors and trainmen, members of the Brotherhood of Locomotive Engineers and Firemen and the Brotherhood of Railway Trainmen. The dispute was taken up immediately with the President of the Company, who was at the time at Montreal engaged in an attempt to secure an adjustment of differences between the Company and

its coal miners. The President undertook to renew direct negotiations with the workers concerned in the railway dispute as soon as the negotiations in the coal workers' case would permit his return to the east. In the meantime the workers concerned ceased work and the application remained in abeyance.

(2) From the Humberstone Coal Company, Edmonton, Alberta, in connection with a dispute with its miners. In this case the workmen had gone on strike without making application for a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act, and in the Minister's view, there being several other companies equally involved, no good purpose would be served in the meantime in establishing a Board. The disputants were advised that if the miners returned to work and made application for a Board of Conciliation and Investigation the application would receive the attention of the Department. In the meantime a special officer of the Department visited the locality with a view towards securing the adjustment of the dispute if possible without Board reference.

The following application was omitted in the article covering the proceedings under the Act for the month of October:

From the employees of the Wallace Shipyards, Coughlan Shipyards, Vulcan Iron Works, and British Columbia Marine Company, members of the Metal Trades Council of Vancouver. In this case the disputants were advised that joint consent to a Board reference would be necessary, as this dispute was not one which fell within the direct scope of the Industrial Disputes Investigation Act, also that it would be necessary for them to agree upon one representative in the event of a Board being estab-

lished. Consent to the establishment of a Board was, however, refused by the employing companies. An officer of the Department of Labour visited the locality and at the end of November efforts were in progress looking towards conciliation.

#### Other proceedings under the Act

During the month of November other proceedings under the Act took place as follows:

(1) The Board established to deal with the dispute between the Canadian National Transfer Company and certain of its employees, being teamsters and chauffeurs, members of the Canadian Brotherhood of Railway Employees, was completed by the appointment of Mr. Philip C. Locke, Winnipeg, as chairman. The appointment was made by the Minister in the absence of a joint recommendation from the other two members, Messrs. R. G. Persse and David Campbell, Winnipeg, nominees of the company and employees respectively.

(2) A Board was established to deal with the dispute between (1) the British Columbia Electric Railway Company, (2) Vancouver Power Company, Limited, and (3) Vancouver Island Power Company, Limited, and certain employees of each of the said companies, being members of Local Unions Nos. 213 and 230, International Brotherhood of Electrical Workers. The Board was composed as follows: Mr. M. H. McGough, Vancouver, chairman, appointed by the Minister in the absence of a joint recommendation from the other two members, Messrs. A. G. McCandless and Edmund H. Morrison, Vancouver, nominees of the company and employees respectively.

## PROCEEDINGS OF THE CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1

**F**OUR new decisions of the Canadian Railway Board of Adjustment No. 1 have been received by the Department. Case No. 88 has reference to the payment of a passenger crew for handling freight trains between regular runs. Case No. 89 relates to a controversy over the payment of locomotive engineers and firemen on the Western Lines of the Canadian Pacific Railway when operating electric trains in the mountain and valley districts. Case No. 90 has reference to the payment of firemen for watching and caring for engines. Case No. 91 deals with the age limit with respect to increases for office boys, messengers, etc., and the retention of existing minimums for inexperienced help.

### **Case No. 88.—The Toronto, Hamilton and Buffalo Railway Company and the Order of Railway Conductors and the Brotherhood of Railroad Trainmen.**

A conductor and crew of the Toronto, Hamilton and Buffalo Railway Company in assigned passenger service were used during the interval between trips to operate freight cars, being occupied on this work on two days for a little over one hour each time. The employees contended that the conductor and crew being in assigned passenger service when used in this way should be paid a minimum day at through freight rates in addition to their passenger earnings. They based their claim on Articles 6 and 10 (a) of the schedule which read as follows: "(6) Trainmen assigned to regular passenger service will not be required to do work other than their regular service on assigned runs when other competent crews are available." "(10) (a) In all road service, except passenger service, 100 miles or less, eight hours or less (straight-away or turn-around), shall constitute a day's work. Miles in excess of 100 will be paid for at the

mileage rates provided." The company contended that the conductor and crew having performed more than one class of road service during a day should be paid for their entire service at the highest rate applicable, the overtime basis for the rate to apply for the entire service on the dates in question. The company based its claim on Article 10 (c) of the schedule which reads:—"Road conductors and trainmen performing more than one class of road service in a day or trip will be paid for the entire service at the highest rate applicable to any class of service performed. The overtime basis for the rate paid will apply for the entire trip."

The Board declared that it could not recognize as consistent with existing schedule provisions the claim of the Company that irregular or intermittent freight service can be required of a regularly assigned passenger crew, and payment made to such crew for such service on the basis of the highest rate applicable to any class of service handled by the crew for the entire day.

The decision of the Board was as follows:

The claim of the employees is sustained, and payment shall be made to this passenger crew for the service in question on the basis of one day's extra compensation for each day involved at freight rates for the extra service performed between Dunnville — Port Maitland and return, February 26 and March 1, 1920.

### **Case No. 89.—The Canadian Pacific Railway (Western Lines) and the Brotherhood of Locomotive Engineers and the Brotherhood of Locomotive Firemen and Enginemen.**

A controversy arose between the management of the Canadian Pacific Railway (Western Lines) and its locomotive en-

gineers and firemen as to the application of mountain and valley differentials in electric service. The employees claimed that rates for electric service were awarded in Supplement 15 according to weights on drivers and that the mountain and valley differentials should be added just as on steam locomotives. In support of their claim the men submitted an account of their negotiations and correspondence relating to it. They stated that in accordance with the decision of the Board in Supplement No. 1 to Case 40 (see LABOUR GAZETTE, May 1920, page 524) an agreement was reached on April 6, 1920, concerning mountain and valley differentials in steam service, but the question of differentials in electric service was left for further negotiations. When the employees brought up this matter the representatives of the company stated that in the event of an electric service being established in the territory where differentials were being paid, it would be a question for further negotiations, but as the company had no electric service there was no need to enter into such negotiations at that time. When meeting the management in order to get out a supplement embodying increased rates in accordance with the United States Railroad Labour Board Decision No. 2. (see LABOUR GAZETTE, August, 1920, pp. 1068-75) the men wished to provide that electric service should receive the mountain and valley differentials, and they contended that the reference to electric service following the rate sheet in the existing schedule should not be perpetuated in the supplement. The management of the Company would not agree to this, but expressed their willingness to submit the question to the Canadian Railway Board of Adjustment No. 1.

In the opinion of the Board the question was not specifically covered in General Order No. 27, and supplements, but it appeared to be evident that the general intent of the provisions of supplements 15 and 24 was that the same rates should apply for electric service as for steam service, with certain stated exceptions.

The decision of the Board was as follows:

Unless otherwise mutually agreed, the same differentials shall apply as between Mountain and Valley and Prairie territories in electric locomotive service as obtain in steam locomotive service.

**Case No. 90.—The Canadian Pacific Railway (Western Lines) and the Brotherhood of Locomotive Engineers and the Brotherhood of Locomotive Firemen and Enginemen.**

A controversy arose as to the hourly rate to be paid firemen for watching and caring for engines on the Western lines of the Canadian Pacific Railway. The men claimed that the firemen should be paid as high a rate for service rendered as firemen on competing lines, as well as on other parts of the Canadian Pacific Railway, where one-eighth of the minimum daily rate for freight service was paid. The Company contended that the rate which had been established for firemen doing this work, namely, 56½ cents per hour, had been arrived at in a regular and proper manner. The application of General Order No. 27 increased the rate from 37½ cents to 42½ cents per hour. Supplement No. 15 increased it to 43½ cents, and the application of the Chicago labour award increased it to 56½ cents. The employees' representatives admitted that the company's statement was correct, but claimed that a mistake had been made in

computing the rate of 1919, which should have been about 481½ cents instead of 431½ cents per hour, and they were now attempting to have the mistake corrected. On this basis the rate should be approximately 611½ cents per hour.

The decision of the Board was as follows:

The rate of pay per hour for firemen watching engines shall be adjusted and made at least equal to one-eighth of the minimum daily rate for firemen in passenger service.

**Case No. 91.—The Canadian Pacific Railway (Western Lines) and the Brotherhood of Railway and Steamship Clerks, Freight Handlers and Station Employees.**

In drawing up an agreement between the Canadian Pacific Railway (Western Lines) and the Brotherhood of Railway and Steamship Clerks, Freight Handlers, and Station Employees, the two parties failed to agree on two points: (1) the age limit of eighteen years with respect to increase for office boys, messengers, etc., which was Item No. 5 of the agreement, and (2) the retention of existing minimums for inexperienced clerical help, which was Item No. 10.

Decision No. 2 of the United States Railroad Labour Board\* provides in Section 6, Article 2, for a stipulated increase for office boys, messengers, etc., under eighteen years of age. The company contended that this increase should apply to occupants of these positions irrespective of age, while the employees claimed that this article should read exactly as it appears in the original award of the United States Railroad Labour Board. The company further contended that the existing minimum rates as named by the Railway Association of Canada for inexperienced clerks during their first three years should be con-

tinued, but the employees contended that to the minimums quoted should be added the amount of increase provided in Section 6, Article 2 of the United States Railroad Labour Board Decision No. 2. The minimum monthly rates claimed by the employees were \$100.76 for clerks with less than one year's experience in clerical work, and \$114.02 for clerks with experience of one year or more, these rates being arrived at by the addition of \$13.26 and \$26.52 respectively to the minimum rate of \$87.50 for clerical positions as provided for in Supplement 7 to General Order No. 27 of the Director General, United States Railroad Administration.

The Board stated that as one of the conditions under which the Board was organized was an agreement on the part of the railways to apply the provisions of General Order No. 27, and amendments, it could not consistently decide upon a minimum rate of less than \$87.50 per month for clerks over 18 years of age, but that there might be some justification for lesser rates for inexperienced clerks, inasmuch as agreements had been concluded between the different railways and organizations providing for such lesser rates.

The decision of the Board was as follows:

In respect to Item 5 of the agreement the contention of the employees is sustained.

With regard to Item 10, unless mutually agreed otherwise, the minimum rate for clerks over 18 years of age covered by the agreement shall be \$87.50 per month, and for office boys \$45 per month. To the minimum rates for clerks under 18 years of age, as named in the submission, shall be added \$10.20 per month as contended for by the employees. Any clerk over 18 years of age, appointed to a position for which a rate is specified in the agreement, shall be paid the full rate named for such position.

\*See LABOUR GAZETTE, August, 1920, pp. 1038-75.

## NATIONAL JOINT CONFERENCE BOARD OF THE BUILDING AND CONSTRUCTION INDUSTRY OF CANADA

### Rules and By-laws, and Report of Second Quarterly Meeting

**M**ENTION has been made in previous issues of the LABOUR GAZETTE of the creation of the National Joint Conference Board of the Building and Construction Industry of Canada. The rules and by-laws governing the establishment and operation of the Board are reproduced herewith.

#### Rules and By-laws

1. **MEMBERSHIP.** (a) The National Joint Conference Board of the Building and Construction Industry of Canada shall be composed of five (5) representatives elected or selected by the Association of Canadian Building and Construction Industries, and five (5) representatives elected or selected by the representatives of the Building Trades International Unions.

(b) The two parties, members of the National Joint Conference Board, shall have the power to change their representatives at any time, and no organizations other than those already included shall be admitted to membership except by majority consent of the members of both groups.

2. **CHAIRMAN-SECRETARY.** (a) The Chairman-Secretary of the National Joint Conference Board shall be appointed by the Department of Labour.

(b) The Chairman-Secretary shall preside at all meetings of the National Joint Conference Board, and shall perform such other duties as are usual for such an officer, provided, however, he shall have no voting powers.

#### 3. **PURPOSE OR OBJECT OF BOARD.**

(a) The functions of the National Joint Conference Board shall be of an educational and advisory nature, furnishing a common meeting ground for the discussion of questions affecting employ-

ers and workmen in the building and construction industry of Canada.

The National Joint Conference Board shall remain in this advisory and educational form for an indefinite period, but it may exercise such powers as may be granted to it from time to time by the affiliated memberships.

(b) The National Joint Conference Board shall undertake to present to the Government such measures as may be requested by both groups, parties to the Board.

(c) The National Joint Conference Board shall advise with the organizations affiliated with it on measures which are considered to be of value in improving the building and construction industry, such as technical education, apprenticeship system, movement of labour, etc.

4. **RELATION TO LOCAL BOARDS.** (a) The National Joint Conference Board shall encourage the organization of the employers and workmen in the groups represented by this Board into Local Joint Industrial Boards, for the settlement of disputes in the building and construction industry of Canada.

(b) The National Joint Conference Board may deal with disputes referred to it for settlement by affiliated organizations or established Local Joint Industrial Boards, provided they have been submitted in writing to the Chairman-Secretary, and in his judgment are deemed of sufficient importance to be brought to the attention of the Board.

5. **MEETINGS.** (a) Regular meetings of the National Joint Conference Board shall be held on the third Wednesday in the months of August, November, February and May.

(b) Special meetings may be called, within seven (7) days on the request of any three (3) members of the Board, made in writing to the Chairman-Secretary.

(c) At least two weeks' notice in writing shall be given to members of all regular meetings of the Board.

(d) At all meetings of the Board, at least three (3) representatives from each group shall be present, in order to transact business.

(e) Voting powers of each group shall always remain equal.

6. AMENDMENTS. These rules and by-laws may be amended by a two-thirds vote at any regular meeting of the Board, or a special meeting called for that purpose, provided that at least two weeks' notice in writing of such proposed amendment has been given by the Chairman-Secretary to the members of the Board.

#### Report of Second Quarterly Meeting

The second regular quarterly meeting of the Board was held in Ottawa on November 17, with Mr. E. McG. Quirk, representing the Department of Labour, as chairman. Representatives were present from the Association of Canadian Building and Construction Industries and the building trades unions including electricians, bricklayers, plumbers, painters and carpenters. A report was

presented outlining the modus operandi of the Employment Service of Canada. The chairman was asked to secure from the Employment Service such information as would enable employers and others to take advantage of the reduction in fares provided. The question of standard wage zones was discussed. It was deemed necessary to secure additional information on the weekly family budget to that at present supplied by the Department of Labour. A committee comprising the chairman, a representative of the employers, and a representative of the employees was appointed to consult the Department and to prepare what information they could obtain for presentation to the next meeting. A similar committee was appointed to bring to the attention of the Dominion Government the necessity of additional housing schemes. It was felt that a man who owned a lot, but who was unable to erect a home, should be given financial aid. As no report had been received regarding apprenticeship two members were appointed to make a further study of this matter. A committee was appointed to place the matter of creating an industrial board in Montreal before the General Contractors' section of the Montreal Association. The chairman was requested to visit the existing joint industrial boards with a view to standardizing their practices, and to familiarize himself with their work. It was decided to hold a special meeting of the Board on January 3, 1921.

#### STRIKES AND LOCKOUTS IN CANADA DURING NOVEMBER, 1920

TEN strikes, involving 1,036 employees were reported as having commenced during November. There were in existence at some time or other during the month 20 strikes, involving about 1,959 workpeople. The total time loss on account of industrial disputes was estimated at 23,442 working days, as compared

with 73,119 in November, 1919. The time loss occasioned by the 10 strikes which began in November was 10,943 working days, while a loss of 12,499 is charged to the 10 strikes that commenced prior to November. Termination was reported in the case of seven disputes which commenced prior to November. Seven of

<b>MINES, SMELTERS, QUARRIES AND CLAY PRODUCTS, ETC.—</b>			
Asbestos miners, Thetford Mines, Que.....	Commenced October 11. For increased wages. Settled by negotiations: men returned under same conditions as existed prior to strike. Work resumed November 11.	600	5,400
Miners, muckers, etc., Sidney Inlet, B.C.....	Commenced October 24. Against discharge of employees. Settled by replacement of strikers by other workers: work resumed November 4.	47	141
<b>BUILDING AND CONSTRUCTION—</b>			
Lathers, Hamilton, Ont.....	Commenced September 11. Alleged non-payment of union rates. Settled by mediation of Industrial Council. Work resumed October 29.		
Painters, Ottawa, Ont.....	Commenced October 11. In sympathy with a strike of the firm's employees in New York. Settled by cancellation of New York contract. Work resumed November 16.	6	78
Plumbers, Montreal, Que.....	Commenced October 4. For increased wages. Unterminated.	140	3,500
<b>METALS, MACHINERY AND CONVEYANCES—</b>			
Engineers, Hamilton, Ont.....	Commenced May 1. For increased wages and better conditions. Information received in the Department indicates that some men returned to work while others secured employment elsewhere.		
Machinists, St. John, N. B.....	Commenced January 26. For increased wages and shorter hours. Information received in the Department indicates conditions no longer affected.		
Moulders, Collingwood, Ont.....	Commenced June 2. For increased wages. Unterminated.	10	250
Moulders, Hamilton, Ont.....	Commenced May 5, 1919. For increased wages and shorter hours. Information received in the Department indicates that the Union has stopped strike pay.		
Moulders, Montreal, Que.....	Commenced May 5. For increased wages and shorter hours. Information received in the Department indicates this strike was settled by negotiations when a compromise was effected and work was resumed during October.		
Moulders, Toronto, Ont.....	Commenced May 1, 1919. For increased wages and shorter hours. Information recently received in the Department indicates that the strike was reported off.		
Plumbers, steamfitters and sheet metal workers Vancouver, B.C.	Commenced October 4. For increased wages. Unterminated.	120	3,120

## STRIKES AND LOCKOUTS DURING NOVEMBER, 1920—Continued.

Industry or Occupation.	Particulars.	No. of employees affected.	Time loss in working days.
<b>Strikes commencing during November, 1920</b>			
<b>LUMBERING—</b>			
Loggers, Cowichan Lake, B.C.....	Commenced November 6. For recognition of the union. Settled by replacement of strikers. Work resumed November 11.	40	160
Labourers, North Thompson River, B.C.....	Commenced November 2. Objection to an extra hour being added to the regular working day. Settled by replacement. Work resumed November 19.	150	2,250
<b>MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.—</b>			
Coal miners, Edmonton, Alta. ....	Commenced November 20. For increased wages. Unterminated...	140	1,260
<b>RAILWAY, CANAL AND HARBOUR CONSTRUCTION—</b>			
Engineers, scowmen and labourers, Prince Rupert, B.C.	Commenced November 5. Against discharge of a union delegate and refusal by company to transport some of the workers from their place of employment to the town of Rupert. Settled by negotiations when the company agreed to transport the employees and reinstate the delegate. Work resumed November 8.	15	45
<b>METALS, MACHINERY AND CONVEYANCES—</b>			
Railway employees, Sydney, N.S.....	Commenced November 22. For increased wages and improved working conditions. Unterminated.	253	1,771
Steel workers, Sault Ste. Marie, Ont.....	Commenced November 16. Against discharge of employees. Men returned to work on company's terms. Work resumed November 30.	200	2,500
<b>PRINTING AND PUBLISHING—</b>			
Printers, Edmonton, Alta.....	Commenced November 10. For increased wages. Settled by mediation: compromise effected. Work resumed November 26.	38	532
<b>CLOTHING—</b>			
Shoe workers, Montreal, Que.....	Commenced November 8. Against reduction in wages. Unterminated.	40	800
<b>FOODS, LIQUORS AND TOBACCO—</b>			
Butchers and casing employees, Calgary, Alta.	Commenced November 4. Demanded a signed agreement. Settled by strikers returning to work under same conditions as existed prior to the strike.	70	1,085
<b>TRANSPORTATION—</b>			
Longshoremen, Montreal, Que.....	Commenced November 3. For increased wages. Men returned to work under conditions existing prior to strike. Work resumed November 10.	90	540

the disputes which commenced during November terminated during the month, leaving the following six strikes affecting 703 workpeople on record on November

30:—coal miners, Edmonton; plumbers, Montreal; moulders, Collingwood; plumbers, steamfitters and sheet metal workers, Vancouver; railway employees, Sydney, and shoe workers at Montreal.

### Disputes by Industries

The following is a review of the disputes by industries in the order in which they appear in the statistical table. A brief summary is given of the more important strikes.

**LUMBERING.**—There were two strikes in this group, both being in British Columbia. Together, they involved about 200 employees and were settled by the replacement of the strikers by other workers.

**MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.**—The strike of 600 asbestos miners at Thetford Mines, which commenced on October 24 for a wage increase, terminated on November 11, the miners resuming work at the rate prevailing prior to the strike. A brief strike of 47 miners and muckers at Sidney Inlet, B.C., was settled on November 4 by the replacement of the strikers. One hundred and forty coal miners at Edmonton struck for increased wages. This strike remained unterminated. During the month, in this group, there were 787 employees involved with an estimated time loss of 6,801 working days.

**BUILDING AND CONSTRUCTION.**—The strike of plumbers and steamfitters, which commenced in Montreal on October 4, was unterminated. Approximately 140 employees were still involved. In Ottawa, there was a strike of painters employed on the parliament buildings in sympathy with the decorators working for the same employers in New York. This strike was settled by cancellation of the contract with the New York firm.

**METALS, MACHINERY AND CONVEYANCES.**—Eight strikes, involving 583 employees and an estimated time loss of 7,651 working days, was the summary for this group. The principal strikes in the group were those of railway employees at Sydney and of steel workers at Sault Ste. Marie. In the former strike, which commenced on November 22, the employees demanded wage increases of from 37½ per cent to 62 per cent which would bring their rates to the standard of the McAdoo award. This strike remained unterminated. Two hundred steel workers at Sault Ste. Marie struck when the steel company, to reduce operating expenses, laid off a number of men from each shift. The employees resumed work on November 30. The steamfitters and sheet metal workers, in two ship-building yards in Vancouver, who struck on October 4 for a minimum wage, were still out on strike at the end of the month, as were also the moulders at Collingwood.

**FOODS, LIQUORS AND TOBACCO.**—Seventy butchers of one Calgary firm struck on November 4, demanding a signed agreement instead of the existing verbal one. They resumed work on November 23 under the same conditions as prevailed before the strike.

**TRANSPORTATION.**—Ninety longshoremen were on strike in Montreal for a week. Their demands included a wage increase, averaging 15 cents per hour, but they resumed work on the scale existing prior to the strike.

## STRIKES AND LOCKOUTS IN THE UNITED KINGDOM DURING OCTOBER, 1920

**T**HE following details with regard to strikes and lockouts in the United Kingdom during October, 1920, based on returns from employers and workpeople are taken from the November issue of the British *Labour Gazette*.

**NUMBER, MAGNITUDE AND DURATION.**—The number of trade disputes, involving a stoppage of work, reported to the Department as beginning in October was 71, as compared with 93 in the previous month, and 53 in October, 1919. By far the most important of these disputes was that involving coal miners throughout Great Britain, which began on October 18, and was still in progress at the end of the month. In the 70 other disputes beginning during October about 31,000 workpeople were directly involved, and 1,000 indirectly involved (i.e., thrown out of work at the establishments where the disputes occurred, though not themselves parties to the disputes). In addition, about 68,000 workpeople were involved, either directly or indirectly, in 93 disputes which began before October and were still in progress at the beginning of that month. The total number of disputes in progress in October was thus 164, involving about 1,200,000 workpeople, as compared with 104,000 workpeople involved in disputes in progress in September, 1920, and 630,000 in October, 1919, when 500,000 railway workers and over 60,000 ironfounders, etc., were on strike.

**CAUSES.**—Of the 71 new disputes, 35, directly involving about 1,118,000 workpeople, arose on demands for advances in wages; 6, directly involving over 3,000 workpeople, on other wages questions; 12, directly involving nearly 3,000 workpeople, on questions respecting the employment of particular classes or persons; 6, directly involving about 2,000 workpeople, on details of working arrangements; 8, directly involving nearly 1,000 workpeople, on questions of Trade

Union principle; and 4, directly involving nearly 4,000 workpeople, on other questions.

**RESULTS.**—Of the disputes in progress in October settlements have been effected in the case of 39 new disputes, directly involving nearly 1,120,000 workpeople, and 29 old disputes, directly involving nearly 8,000 workpeople. Of these disputes, 13, directly involving nearly 4,000 workpeople, were settled in favour of the workpeople; 27, directly involving nearly 9,000 workpeople, in favour of the employers; and 28 directly involving nearly 1,115,000 workpeople, were compromised. In the case of 15 disputes, directly involving about 6,000 workpeople, work was resumed pending negotiations.

Groups of Trades	Number of Disputes			Number of workpeople involved in all disputes in October.	Aggregate loss of working days during October
	Started before October 1st.	Started in October.	Total.		
Building.....	20	10	30	6,000	117,000
Mining and Quarrying.....	13	12	25	1,122,000	12,800,000
Metal, Engineering and Shipbuilding	23	9	32	5,000	98,000
Textile.....	10	5	15	45,000*	*251,000
Transport.....	4	10	14	13,000	93,000
Other Trades.....	23	25	48	9,000	115,000
Total Oct., 1920...	93	71	164	1,200,000	13,474,000
Total, Sept., 1920...	119	93	212	104,000	†1,109,000
Total, Oct., 1919....	83	53	136	630,000	†4,670,000

\*These numbers are mainly accounted for by the dispute which began in September in the cotton industry at Oldham. (See GAZETTE for October.)

†Revised figure.

The foregoing table classifies the disputes by groups of trades and indicates the number of workpeople involved (whether directly or indirectly) at the establishments concerned, and the approximate time lost by these workpeople during October.

Of the 13,474,000 working days lost in October by all disputes in progress, about 530,000 were lost by disputes which began before October and were still in progress at the beginning of that month, and about 12,944,000 by disputes which began in the month.

---

## THE GOVERNING BODY OF THE INTERNATIONAL LABOUR OFFICE

---

### Fifth Meeting of the Governing Body held at Geneva, Switzerland, October 5-7

A meeting of the Governing Body of the International Labour Office was held at Geneva, Switzerland, on October 5-7, under the chairmanship of Mr. Arthur Fontaine, the French Government delegate. The four previous sessions had been held at Washington, Paris, London and Genoa, this being, therefore, the first meeting at the permanent headquarters of the International Labour Organization in Geneva.

Eleven of the twelve government delegates were in attendance, together with a full representation of the employers' organizations and workers' associations, each of which holds six seats on this Body. Mr. R. H. Coats, Dominion Statistician, attended as substitute Government delegate for Canada, on behalf of the Honourable G. D. Robertson, Minister of Labour, who was unable to be present. Mr. E. W. A. O'Dell, of Hamilton, Ontario, attended as one of the workers' delegates, on behalf of Mr. P. M. Draper, of Ottawa, who was unable to be present.

The Chairman, in opening the session, expressed his great pleasure that the Governing Body were able finally to hold their meetings in the International Labour Office itself, in the congenial atmosphere of a democratic country, than which no better stronghold could have been chosen for organizations,

such as the International Labour Office, devoted to furthering social progress.

It was announced that Mr. Robert Pinot, Secretary-General of the Comité des Forges de France, had been appointed to fill the vacancy on the Governing Body caused by the death of Mr. Guérin, one of the employers' representatives.

A resolution was adopted authorizing the Director of the International Labour Office to communicate to the states which are members of the International Labour Organization the minutes of the Governing Body as soon as they have been regularly approved by the Governing Body itself.

A report was received from the Director on the organization of the Office and its activities since the previous meeting of the Governing Body in June. It was decided that annual reports should be prepared by the Scientific Division based on a study of questions concerning security and the prevention of accidents. Attention was given to the information presented by the Director as to the steps taken in the various countries regarding the draft conventions and recommendations adopted by the Washington Conference. The representative of the German Government supplied information with regard to the convention on the eight-hour day, which allows of

hope that Germany will shortly ratify this convention. The International Labour Office was asked to prepare for the next session of the Governing Body a memorandum setting forth the juridical and constitutional difficulties confronting the various members of the International Labour Organization as regards the procedure of ratifying the Washington conventions.

It was announced that since the last meeting of the Governing Body the International Labour Office had instituted in Upper Silesia an enquiry into the production of coal and the conditions of labour in the coal mines. On the proposal of the Director, the Governing Body adopted the following resolution:

In the case of future enquiries asked for by bodies which have a right to address themselves to the Office, the Director, without awaiting the next session, shall consult by letter the members of the Governing Body, and shall then decide to accept or refuse the enquiry after consultation with the Chairman and the Vice-Chairman; if their assent is given he could at once send members of the Office, or even members of the Governing Body, to undertake those missions which are of first-rate interest only at the time when application is made for them.

The International Miners' Congress, which was held at Geneva in August last, passed a resolution calling for the creation of an interprovincial office for the distribution of fuel, ores and other raw materials. The Congress also asked the International Labour Office to consider this problem conjointly with the Sections concerned of the League of Nations. This question gave rise to a lengthy discussion in the Governing Body and resulted in the adoption of the following proposal put forward by the Director:

The Director is authorized to continue negotiations with the League of Nations on the following bases:

1. The constitution of an International Office of Statistics of prices and supplies (the first section of which might deal with coal) attached to the Economic and Finance Section of the League of Nations.

2. This Office shall be constituted in such a manner that the International Labour Office

shall be represented on it and that, through the medium of its officers or of the members of the Governing Body, it can follow carefully, from day to day, the investigations made and the results obtained and thus respond practically to the aspirations and desires expressed in the resolution of the International Miners' Conference.

It was decided by the Governing Body that a Government Seat on the International Commission on Immigration should be offered to the United States.

A resolution was adopted with reference to the procedure for determining the agenda of the annual conferences. It was also decided to propose to the 1921 conference the addition of a new article to the Standing Orders of the Conference fixing the electoral procedure at elections to the Governing Body.

A request was received from the German Government that the reports and records of the International Labour Conference should be published in German. A lengthy discussion took place on this point and a resolution was adopted unanimously authorizing the Director to take measures in conformity with Article 396 of the Treaty of Peace and within financial limits of the Budget for the translation of the bulletin and eventually of all the documents published by the Office into such languages as may appear necessary to ensure a wide circulation.

The Joint Maritime Commission of the International Labour Office was completed by the selection of Mr. Pinot, French employers' delegate, and Mr. Oudegeest, Dutch workers' delegate, as representatives of the Governing Body thereon.

A resolution was adopted calling the attention of the League of Nations to the embarrassment created to the International Labour Office by the fact that the full sums required for its work and provided in the budget for the purpose have not been available when they are needed, and expressing the hope that arrangements would be made to enable payment to be made of the

balance due to the International Labour Office up to December 31 next, before the end of the year.

On the proposal of the Committee on Standing Orders, the Governing Body expressed the opinion that the Office might draw the attention of the Governments to the value of including re-

presentatives of the Consumers' Co-operative Societies among the Government Advisers for future conferences.

The date of the next session of the next Governing Body was fixed for January 11, 1921, at the seat of the International Labour Office at Geneva.

## INTERNATIONAL LABOUR OFFICE

### Exchange of Letters between the Right Hon. G. N. Barnes, M.P., and Director Thomas

THE Bulletin of the International Labour Office No. 8, issued under date of October 27, contains the text of interesting communications exchanged between the Rt. Hon. G. N. Barnes, M.P., formerly Labour Member of the British War Cabinet and Delegate to the Peace Conference, and Monsieur A. Thomas, Director of the International Labour Office.

Rome, 2nd October, 1920.

My Dear M. Thomas,—While the matter is fresh in my mind I venture to write you a few lines in regard to my visit to Geneva. The visit was to me a great pleasure because I saw an idea assuming practical shape and form. I felt how the hearts of the pioneers of the Association for promoting international labour legislation would be gladdened by the knowledge that, at last, their advocacy had borne fruit and had matured into an organization of so much promise. For my visit was an inspiration as well as a pleasure. I could visualize the time when the International Labour Office will be the effective agency for the inauguration of social justice in the world of industry. It will play a great part in the future readjustment of economic and social relations because it will at once promote, and appeal to, a growing social consciousness.

Changes are inevitable because Labour is insurgent. But changes can be effected in an orderly manner by the co-operation of governments and peoples. To promote that co-operation is the distinctive work of the International Labour Organization and I congratulate you on having been called to be its first Director. I am sure that the work will be congenial to you and I sincerely hope that it may be as successful as congenial.

May I add that, in my opinion, the most important thing at the moment is to get endorsement by governments of the Conventions and Recommendations to which they were pledged by their representatives at Washington? It is essential that governments should carry out Conventions adopted at Conferences, or otherwise the organization will lose in moral authority and prestige—especially in the ranks of labour. That is why I have always emphasized the need for adopting only such Conventions as those upon which there is common agreement.

I shall continue to do all I can to get endorsement by our Parliament of those Conventions to which the British Government is pledged by the votes given by me and my colleagues at Washington.

With best wishes to yourself and staff, I remain,

Yours sincerely,

(Sgd.) Geo. N. Barnes.

The Director replied in the following terms:

Paris-Cologne,

16th October, 1920.

Dear Mr. Barnes:—I wish to thank you for the very cordial and helpful letter you were good enough to send me after your recent visit to the International Labour Office.

In the difficult and absorbing task which we have undertaken, my colleagues and I need to feel ourselves constantly supported by the encouragement and approval of our predecessors, the pioneers and initiators of our labours. The encouragement of none of these could be more appreciated than that of yourself. We know, indeed, with what faith, understanding and devotion you, in your capacity as a militant worker, as a Member of Parliament, as a Minister and as the representative of your country at the time

when peace negotiations were proceeding, have devoted every effort to the creation and development of international labour legislation.

The fact that you are kind enough to see to-day in our initial organization the living realization of the ideal which has been upheld by all pioneers in international legislation, that you do not deem it all unworthy of the hopes which they had formed, is certainly for all of us most valuable and encouraging.

You are, however, quite right to point out that in order to accomplish our task successfully, we need unlimited assistance from every one who has confidence in our enterprise, and I am grateful to you in particular for having expressed the desire to do everything in your power to further the ratification of the Washington Conventions by the British Parliament.

In this respect I quite agree with you that our first duty is to ensure ratification of the Conventions as early as possible by all the States Members of the Permanent Labour Organisation.

Now that the Office has been in some degree organized, I intend to devote myself to this task. The Draft Conventions adopted by the Conference for the purpose of incorporation in national laws must not long be allowed to remain a dead letter. The International Organization will only be a reality when it has proved that it is capable of introducing equitable and beneficent reforms in the several States. I believe, again with you, that it is always desirable to endeavour to obtain unanimity of vote in the case of these Conventions. This would make our task easier. Without raising unnecessary difficulties, however, there are obviously cases in which it might be useful for the International Organization to try to induce the more backward countries to adopt a progressive policy.

It will be thus, by the actual working of the institutions established by the Peace

Treaty, that we shall respond to the high aspirations which animate the workers of the world at the present time, and to the high hopes which they have been able to place in our organization.

We all feel in our hearts the conviction which you also feel, that the Office will be, in the near future, an instrument of social justice, and that it will be the means of bringing about, in an orderly manner, those great changes which you consider to be inevitable.

In order, however, that the office may fulfil its duty, two conditions are essential.

The first is that the government of each country should use that sovereignty which the Peace Treaty has respected, for the purpose of putting the provisions of the Conventions into practice. It must place its power at the service of these ideas of justice to determine and define which will be the constant care of the Conference and the Office; it must collaborate whole-heartedly and unreservedly with its people in the work which was inaugurated at Washington.

The second is that the nations should continue to regard the work of international legislation as the most rapid means of securing justice. There can be no social legislation, no national legislation, no international legislation, unless the people are themselves determined to obtain it.

While we are endeavouring to secure the ratification of the Washington Conventions, we are also endeavouring to obtain the entire sympathy and adherence of the masses of workers. Your long record of hard campaigning in the ranks of the workers will enable you to understand, better than anyone else, the significance of this propaganda.

Once more, allow me to express my pleasure in your willingness to help us with your experience and great influence.

Yours sincerely,

(Signed) Albert Thomas.

## JUNIOR EMPLOYMENT SERVICE IN CANADA

### With a Summary of Junior Placement Work in Other Countries

LAST January there was formed a junior employment division of the Employment Service Branch of the Department of Labour, under Mr. J. M. Wyatt, formerly Chief Probation Officer of the Toronto Juvenile Court. The aims of this division are: (1) To refer back to school every boy or girl not yet ready

for employment; (2) To know the prospective worker through his physical, mental and social records in order to become acquainted with his special ability, adaptability, inclination and ambition; to know the opportunities afforded by industry, the requirements and character of each position offered, and by means

of this knowledge of the worker and of the position offered, to refer intelligently the worker to the job; (3) To assist the young worker by means of "follow-up" work so that by taking advantage of the educational resources and the facilities for suitable recreation, he may develop greater efficiency in his work; and to continue with further care until he becomes able to mark out for himself his own progress in the field of industry.

The method proposed for carrying on this work is, first to make a complete survey of the industrial life of the community with a view of ascertaining the number of positions available for young workers and the character of the opportunities. It is equally important to have as full information as possible about each prospective young worker. By means of a visit to the child's home and personal contact with his parents, the placement officer is enabled to ascertain whether it is really necessary for the child to go to work and if not, to endeavour to have the child return to school for further education. By this means the officer may also ascertain something of his personal inclinations and abilities. Through co-operation with the school superintendent, the principals and the teachers, the applicant's school record may be secured. The medical history sheet will afford valuable information for placement purposes. The Club Leader in the neighbourhood house, the Boy Scout Leader, the Librarian, all have valuable placement information.

Careful follow-up work is essential. The young worker is easily discouraged and because of his immaturity may prove to be unstable. He may need to be encouraged to stick to the job or guided into the proper technical class for training in subjects which will enable him to master the difficulty and become more efficient in his work. A mistake may have been made in placement, or family necessity may occasion a temporary change in order to secure a larger wage. These contingencies can be dealt with only by good follow-up action.

It is advised that each community having a junior placement office should have a junior advisory council. The council might consist of representatives of the School Board, Inspectors, the Principals' and Teachers' Association, Primary, Secondary, Technical and Commercial Schools, Home and School Association, School Attendance Officer, Manufacturers' Association, Builders' Exchange, Employment Managers' Association, Trades and Labour Council, Factory Inspection Department, Department of Public Health, Psychiatric Clinic, After Care Committee, Big Brother and Big Sister Associations, Child Welfare Association, Boy Scouts, Girl Guides, Young Men's Christian Association and Young Women's Christian Association. The juvenile counselors or placement officers should also be members of the Advisory Council, and the Local Advisory committee of the adult branch of the service might also be linked up with it. An analysis of the suggested council will show that the aim is to conduct the business of juvenile placement in harmony with the laws relating to child labour and compulsory education. The school attendance officer might act as a clearance officer between the school and the placement office, notifying the latter in advance as to the dates when certain children will be leaving school to go to work. After the organization has passed through its initial stages it is hoped that a clinic of the Department of Public Health may be established in connection with each junior placement office, where every child before being placed may have a thorough examination so that any physical defect may be known, and children will not then be referred to positions for which their physical condition makes them unsuitable. Mental tests to discover the general intelligence of a child and tests to show mental aptitude for particular trades will reduce the chances of mistakes in placement.

Last May, a committee on Junior Employment was formed at Winnipeg along the lines of the Junior Advisory Coun-

cil to which reference is made above. At the request of the committee, a survey on employment of junior workers in Winnipeg was made by Mr. J. M. Wyatt, juvenile employment specialist of the Employment Service of Canada. Definite information was received from over 1,400 manufacturing plants, business houses and wholesale and retail stores in regard to the processes within various industries and the necessary qualifications of young workers for particular duties. It was felt that the survey showed that a large number of employers were very sympathetic to the contemplated plans on behalf of the young workers; that young workers not only needed help in the early stages of their industrial career, but also that they wished to be helped; that a large number of boys and girls through lack of a clearing house of information in regard to junior employment were unable to secure the opportunity they wished, and consequently they were taking up some line of work entirely out of relation to the work at which they would like to be engaged, or for which they were best fitted; and that positions were going vacant because boys and girls of the right type were not in touch with the opportunity.

#### **Junior Placement Work in Great Britain**

While various towns in England and Scotland have for years carried on some form of junior advisory and placement work, the present system is based on the Labour Exchange Act of 1909, since called the Employment Exchanges Act, and the Education (Choice of Employment) Act of 1910. The employment Exchanges Act provides that juvenile applicants for employment shall register on prescribed forms, and that special advisory committees for juvenile employment shall be established in such areas as the Ministry of Labour may think expedient. These committees are to give advice with regard to the management

of any labour exchange in their district in relation to juvenile applicants for employment. Labour exchange officers designated by the Ministry of Labour and School Inspectors designated by the Board of Education may be present at meetings of advisory committees but shall not be members thereof. Advisory committees may take steps either by themselves or in co-operation with any other bodies or persons to give information, advice or assistance to boys and girls and their parents with respect to the choice of employment, but the Ministry of Labour and the officer in charge of a labour exchange shall undertake no responsibility with regard to any advice or assistance so given.

If any local Education Authority which has statutory powers to give advice, information or assistance to boys and girls with respect to the choice of employment, submits a scheme for the exercise of those powers, which is approved by the Board of Education after consulting with the Ministry of Labour, the following modification of the preceding rules shall apply:—The officer in charge of any labour exchange shall not register juvenile applicants except in accordance with the scheme. The Advisory Committee shall not take any steps along these lines except in accordance with the scheme. In lieu of any special advisory committee established under these rules, the Board of Trade may recognize one constituted under the scheme, provided that such committee includes an adequate number of members with experience or knowledge of educational and industrial conditions. The Ministry of Labour may, if circumstances require, either dissolve any special advisory committee or modify its area and constitution. These rules apply to England and Wales. The rules for Ireland are similar with the omission of the one referring to schemes of local education authorities. The Education (Scotland) Act, 1908, gave school boards power to maintain, or combine with other bodies to maintain, any agency for collecting and distributing information

as to the employments open to children upon leaving school.

Co-operation was secured between the two boards by the Board of Trade refraining from setting up juvenile advisory committees where local educational authorities wished to form them, allowing the latter to take the initiative. When the educational authorities do not wish to do so, the Ministry of Labour sets up a committee and arranges for not less than six members to be appointed by the local educational authority.

The national system of employment exchanges in Great Britain comprises about 400 main employment exchanges and about 1,200 branch offices. All the main exchanges and some of the local offices deal with juvenile employment. The functions associated with juvenile committees have always been regarded by the authorities in Great Britain as the principal features of the juvenile work. In the spring of 1919, there were about 250 of these committees, and hardly any important industrial area was left uncovered. In addition to placing the juveniles in suitable occupations most of the committees have successfully built up a system of exercising supervision over such of them as needed help until their eighteenth year. This is carried on through co-operation with existing agencies such as care committees, clubs, scout troops, guilds, etc., and with independent voluntary workers. This system of after-care supervision is regarded as an essential feature of juvenile placement work. The visitor should bring the parents into touch with the work of the advisory committee. He should if possible persuade the child to consult him if difficulties arise or if the work is uncongenial. He should encourage the child to attend continuation or technical classes, and where it is desirable to do so advise the child to join a boys' or girls' club, brigade, scout company or similar organization. If a child is in a blind alley type of work, or is out of work, the visitor should inform the secretary of the advisory committee.

### Junior Placement in Germany

There is no nationality organized junior placement work in Germany, but many labour bureaus, particularly the municipal bureaus, have special divisions for this purpose. In Munich a system was established in 1902 based on the co-operation of the Municipal Employment Office with the educational authorities and the trade organizations. A questionnaire sent out by the employment office is filled in by every child who is leaving school at the end of the term. The teachers supply all the information possible about these pupils while the employment office collects information about industrial opportunities, etc. Application forms are filled in by children wishing to obtain work through the employment office. The example of Munich was followed by other Bavarian municipalities. In Strassburg, under the German régime, Junior replacement was established in 1905 with the support of labour and the Chamber of Commerce. The municipal health officer co-operates in this work, and various conferences are held in connection with it. Twice a year, the Mayor of Strassburg calls a conference of teachers at which a representative of the employment office and the school inspectors are present. At this meeting the employment office representative reports which occupations are over-supplied with labour and which offer the best opportunities for advancement. Later the boys and girls leaving school are summoned with their parents for an evening conference at which the purposes of the system are explained. The employment office then sends out cards which are filled in partly by the pupils themselves and partly by the teachers. Finally the Municipal Health Officer examines these pupils and enters on their cards notes as to their suitability for various types of occupations. The plan of holding parents' conferences has been adopted by a number of other German towns.

### Junior Placement in the United States

Within recent years very active interest has been shown in the United States in the after-school careers of boys and girls, and junior placement work has been conducted by philanthropic agencies, educational agencies, business organizations, public employment offices and the employment service of the Federal government. In June, 1914, about 50 cities reported the organization of vocational guidance in connection with their public schools. An inquiry conducted in 1918 as to the extent of placement work in connection with high schools showed that 932 out of 10,400 to which inquiries were sent and out of 5,628 which reported, conducted some system of placing their pupils in occupations. No statistics are available indicating the total volume of placement by school bureaus.

Legislation providing for junior placement by Public Employment Offices has been enacted in the states of Indiana, New York and Pennsylvania. The work is most advanced in New York where the law relating to public employment offices was amended in 1917, by requiring the industrial commission to organize a separate juvenile placement department in each branch office of cities of the first and second class. In Greater New York the territory is divided into districts for the purpose of this work. All the jobs in any district which cannot be filled are pooled in a clearing house and distributed among the districts where they are needed. The work

of the juvenile departments consists in investigation of work-places, interview with and registration of applicant, testing of applicants for clerical positions, and placing them in their jobs.

On December 6, 1918, the junior division of the United States Employment Service was created for the purpose of caring for wage-earning boys and girls under 21 years of age. Upon request from local authorities the national office furnishes experts to co-operate in studying local needs and to make definite suggestions for meeting them. If local organization be decided upon and financial assistance be sought from the Federal government, the final plans for organization, administration, and development must receive the approval of the national office, which will share equally in the responsibility of seeing that the standards instituted are maintained and developed. If the entire expense is assumed locally the work of the national office will be confined to giving assistance and advice upon request. In future much of the work of the national office will consist in the collection and dissemination of occupational information in such a way that analysis of the sources of labour supply and demand, information as to job specification, statistical records, etc., may be uniform.

The first Federal junior placement department was established in Providence, R.I., in March, 1919. At the present time junior departments are in operation or in process of organization in twenty-one cities.

## VOCATIONAL OPPORTUNITIES FOR YOUNG WORKERS IN THE GARMENT-MAKING INDUSTRY OF ONTARIO

**A** SURVEY of the garment-making industry is made in Bulletin No 4 of the series entitled "Vocational Opportunities in Ontario" published by the Department of Labour of Ontario. (Bulletins Numbers 1 to 3 were reviewed in the LABOUR GAZETTE for October, pages 1308-9). The purpose of this series is to assist young persons to choose their life work by means of detailed descriptions of the several trades. "The clothing industries", this report finds, "offer a field for a large number of workers. On the whole the wages compare fairly well with those in the majority of other industries considered in the survey. In the manufacture of women's clothing the weekly wages are frequently higher than in men's, but the work is usually more seasonal in the former. In one of the women's clothing industries, however, namely whitewear, work has been very much regularized by special sales in stores in what was formerly the dull season for the industry. There is a fair variety in the kinds of work in high grade firms, and for the few who are capable of becoming first-class designers garment-making offers some of the best opportunities in Canada. For those with executive gifts the opportunities are also good. In the making of men's outer garments the proportion of workers who reach the rank of higher executive is greater than in women's factory clothing, but the average salary of those who reach it is smaller. The spirit of co-operation and fairness evinced by the recent trade agreement augurs well for working con-

ditions and the progress of the industry."

In 1915, women's factory clothing, including whitewear and exclusive of knitted goods, ranked third among the industries of Ontario in the total number of employees, and was by far the largest employer of female labour. Of a total in that year of 8,521 workers, 5,379 were females. In the manufacture of men's outer clothing 3,242 workers were engaged in 1915, and of this number 1,385 were females. In 1917 the proportion of female employees showed an increase in both groups, rising from 63 to 68 per cent in women's clothing and from 42.7 to 52 per cent in men's clothing factories. In the women's clothing industry, while the proportion of workers in each occupation varies, machine operators are generally the largest subgroup, forming over 40 per cent of the whole; finishers, hand-sewers, cutters and trimmers being next in numerical importance. One of the most coveted positions in clothing factories is that of designer. Much of the success of a firm depends upon its designers and although fashions are set elsewhere, genuine ability is required in adapting the prevailing designs. Special adaptability is required by the designer of women's clothing, a basis of practical experience in pattern drafting being essential, together with a knowledge of drawing and design. Many of the designers are at present men of the Jewish race, but a good opening is expected as trade expands for women designers in Canada. Much of the designing for garments of

lighter fabric is already done by Canadian women. "No limit can be set to the earning power of designers of first rank", the report says. Cutting is for the most part a man's occupation, only ten women, all in women's clothing firms, being found out of a total of 125 cutters. This occupation is said to call for average intelligence, great accuracy, and some mastery of arithmetic; the standing and reaching across wide tables is considered trying for women, even when the materials are light. Of the trimmers, also, the majority are men and boys, even in women's factory clothing. In the operating department, however, where higher degree of specialization is called for, women form a large majority of the workers, the men working mostly on the heavier material. At present the latter are mostly Jews or Italians, but the number of non-Jewish Canadian men so employed is said to be increasing. Good workmanship is more important than speed, and consequently a good demand exists in normal times for good operators. The chief drawbacks to this occupation are nerve strain due to piece-work and the jarring of the machines, the sedentary nature of the work, and the danger of eye-strain.

Considering the light nature of the work and the large number of female workers employed, the wages of clothing

workers compare favourably with the rates in other industries, such as boots and shoes, furniture, and wooden boxes. Of the female workers, 80.5 per cent are paid under \$15 a week, while 72.6 per cent of the men receive under \$25 a week. Factory made clothing, however, has a higher proportion of women receiving \$12 a week and over than is found in any other large industrial group. The executive staffs in women's clothing factories receive higher average salaries than in any other industry considered, men's clothing factories being considerably lower in this respect. This difference is probably explained by the fact that the former plants are larger, the average number of employees being 105 in women's, as compared with 56 in men's clothing factories. The investigators found considerable variety in the methods of payment, piece work being the general rule in some plants, while in others the employees are allowed to choose between time or piece work, or serve a preliminary period on time before going on piece work. The report concludes with an outline of the agreement entered into in Toronto in August 1919 between the Associated Clothing Manufacturers and the Amalgamated Clothing Workers of America which secured favourable conditions for the workers, as noted in the passage quoted above.

## INDUSTRIAL STATISTICS OF PRINCIPAL CITIES OF CANADA

**A** preliminary statistical survey of forty-four industrial cities and towns of Canada, based on returns for the year 1918, has recently been issued by the Dominion Bureau of Statistics. The figures show Montreal as leading Canada in the number of employees, amount of salaries and wages, capital

invested and annual value of products. Toronto takes the second place, though individual establishments there are more numerous; the average annual rate of wages in Toronto is also greater than that in Montreal. The statistics covering employment and wages for the forty-four cities are reproduced in the following table:

Cities and Towns	Establishments	Employees	Salaries and wages
	No.	No.	\$
Montreal, Que. ....	2,375	157,878	110,196,219

## WORLD PROGRESS OF THE CO-OPERATIVE MOVEMENT

THE June issue of the LABOUR GAZETTE contained a brief account of the first post-war meeting of the Central Committee of the International Co-operative Alliance, which took place in Geneva in April last. Since that time the International Alliance has issued an interesting memorandum which deals, among other things, with the growth of the co-operative movement in recent years throughout the world.

With respect to Consumers' Co-operative Societies, approximate figures showing the extent to which these had developed in 1914, are given as follows:

Country	Number of Societies	Number of members (in thousands)	Total of sales. (in millions of francs.)
British Isles. ....	1,385	3,054	2,200
Germany. ....	2,375	2,000	700
Russia. ....	13,000	1,500	800
France. ....	3,261	881	321
Austria. ....	1,471	500	180
Italy. ....	2,283	450	170
Switzerland. ....	396	276	144
Denmark. ....	1,560	250	150
Hungary. ....	1,750	200	80
Belgium. ....	205	170	48
Sweden. ....	608	153	61
Holland. ....	135	108	26
Finland. ....	512	100	63
Poland. ....	950	96	42
Spain. ....	200	40	16
Norway. ....	172	39	23

It is stated, however, that in addition to those tabulated above, there are some hundreds of consumers' co-operative societies in the Balkan States and in Portugal, and about a thousand outside Europe, in the United States, Canada, Japan, the Cape, India and the West Indies. "Altogether it is possible to reckon . . . that the number of consumers' societies existing throughout the world before the war was at least 30,000, that their members numbered about 10 millions, and that their sales were nearly 5 milliards of francs. As each co-operator as a rule represented a family, the ten millions of co-operators represented from 40 to 45 millions of population. At the present time 100 millions of persons may be accepted as showing how large consumers' co-operation looms in the community." The approximate increase of members in 1919 as compared with 1914, occurred mainly in the following countries: Norway, 119 per cent; Sweden, 102 per cent; Switzerland, 64 per cent; British Isles, 31 per cent; Denmark, 30 per cent.

The war, according to the memorandum, so far from having injured the co-operative movement, has added to its strength, enlarged its recruitment, and increased the amount of business undertaken by retail and wholesale co-operative societies "in a far higher propor-

tion than can be explained as the simple result of the general rise of prices." In proof of this claim, the following table is given to illustrate approximately the increasing commercial importance of the Wholesale Societies:

Wholesale Societies	Amount of Sales to Retail Societies (In thousands of francs at par.)		Increase (1913: = 100)	Index numbers July, 1919 (1914 = 100)
	1913	1919		
C.W.S. Manchester	784,275	2,235,700	284	217

## HEALTH INSURANCE IN THE UNITED KINGDOM

**U**NDER the National Health Insurance Act which came into force in the United Kingdom on July 5 of the present year, the provisions of the National Insurance Act of 1911 in regard to health insurance were amended to correspond with the lessened value of money and the higher cost of living. About fifteen million workers, and almost all the employers in the country are affected by the new rates of money contributions payable and by the new benefit rates. The new act raises the total weekly contribution

normally payable for male employees to 10d, and for female employees to 9d., instead of 7d. and 6d. respectively. Of these amounts 5d. is contributed by employers in every case, leaving 5d. as the weekly contribution to be deducted from the wages of male, and 4d. from the wages of female employees. Under the Act of 1911, the workers' share was 4d. weekly for men and 3d. for women. Special provision is made for low-wage earners, aged 18 years and upwards, that is, those who are not in receipt of

board and lodging from their employer, and whose remuneration does not exceed 4s. a working day; the amount of weekly contributions deducted from workers in this category continues at the old rates of 4d. and 3d. respectively for men and women. The benefits provided under the new Act are substantially advanced, the allowance in case of sickness being raised from 10s. to 15s. weekly for men, and from 7s. 6d. to 12s. for women; the dis-

ablement allowance is raised in every case from 5s. to 7s. 6d. weekly; and the maternity benefit from 30s. to 40s. a week. While the amount of benefit, therefore, is advanced about 50 per cent, the contributions payable by the insured worker are increased only by 25 per cent in the case of men and 33½ per cent in the case of women, the new act thus providing much higher benefits relatively to the workers' contributions.

### NEW BRITISH RENT RESTRICTIONS ACT

**T**HE new British Increase of Rent and Mortgage Interest (Restrictions) Act, 1920, which became law on July 2, repeals previous Acts, but renews, with some modifications, their provisions with regard to working class houses. It will continue in force until June 24, 1923. Increases in rent permitted by the Act are based on the standard rent which is the rent of houses on August 3, 1914. If the rent of a house is higher than the Act allows, the amount of the excess shall be irrecoverable by the landlord in spite of any agreement to the contrary. Increases in rent are permitted as follows:—

(a) An addition of rent equal to 6 per cent per annum of the amount spent on improvements or structural alterations.

(b) An amount equal to any increase in rates since August 3, 1914.

(c) An increase of 5 per cent calculated on the net rent, which is the standard rent, less the rates when they are included in it, or in other cases the standard rent. One year after the passing of the Act rents may be increased by 10 per cent calculated in the same way.

(d) When the landlord is responsible for the whole of the repairs he may increase the rent by 25 per cent calculated on the "net rent." No increase in rent is authorized, except in respect of a period

during which the landlord would be entitled to obtain possession, if it were not for the "security of tenure" provisions of the Act, and he must serve a valid notice in writing of his intentions to increase the rent.

No order or judgment for the recovery of possession by the landlord shall be made or given, unless under the following conditions:—(a) If the tenant is in arrears in rent, or (b) if the tenant is guilty of conduct which is a nuisance or annoyance to adjoining occupiers or has allowed the house to deteriorate owing to acts of waste on his part, or (c) if the tenant has given notice to quit and the landlord has taken steps to sell or let the house so that he would be seriously prejudiced if he could not obtain possession, or (d) the landlord may obtain possession if he requires the house for his own residence or for some one in his whole-time employment and if the Court is satisfied that alternative accommodation reasonably equivalent is available for the tenant. When a house is desired for the occupation of an "ex-service man," who used to occupy the house and gave up occupation in consequence of his service, the landlord need not show the existence of alternative accommodation. If an ex-service man became the landlord after service, he may obtain possession if he requires the house for his own occupation and offers the tenant sufficient accommodation on reasonable terms in the same house.

## REPORT ON MINING AND QUARRYING IN THE UNITED KINGDOM DURING 1919

---

THE report of the Chief Inspector of Mines of the United Kingdom for the year 1919 (Cmd. 1007) shows that the total number of persons ordinarily employed in the mines was 1,212,974, and in quarries 57,076, an increase over the previous year of 183,286 and 13,861 respectively. Of those employed at the mines 958,133 worked underground, and 254,841 above-ground (of the latter number 9,647 were females). Compared with the preceding year an increase appeared in 1919 of 151,047 males working underground, and an increase of 34,353 males and a decrease of 2,114 females working above-ground.

The only legislation affecting mines and quarries passed during the year was the Coal Mines Act of 1919, which reduced the hours of daily work from eight to seven; the new Act also included amendments affecting the hours of employment of firemen, examiners or deputies, and of onsetters. Investigations of certain dangers, especially those due to coaldust and spontaneous combustion, suspended during the war, were resumed in 1919, and resulted in new regulations being issued during the present year with reference to the prevention of accidents from these causes, rescue work and other matters.

As throwing light on the miner's average production of coal the statement may be quoted that many returned soldiers, partially disabled during the war, were placed temporarily on light work such as repairing, and the effect of their return was not immediately realized.

A large section of the report is concerned with accidents and accident prevention. A gratifying result of the year's work is noted in the fact that for the first time on record the death-rate was less than one per thousand persons employed above and below ground at coal mines under the Coal Mines Act, while the death-rate per million tons of mineral raised at mines under the Coal Mines Act during 1919 was 4.67, as compared with the average figure of 5.18 for the decennial period 1909-18.

The number of separate accidents causing fatalities during the year was 1,166, resulting in 1,229 deaths (1,183 occurring at mines and 46 at quarries), a decrease of 258 fatalities as compared with the previous year. These figures show the death-rate from accidents per 1,000 persons at all mines to have been, for surface and underground workers, .975 in 1919, compared with 1.379 in 1918. For underground workers alone the death-rate was 1.109 per thousand workers, and for surface workers .471, these figures being the lowest recorded since full statistics were kept. Of the fatalities at mines 51.3 per cent (or 57.1 per cent of the deaths underground) were caused by falls of ground, 607 deaths resulting during the year from falls underground; explosions of fire-damp or coaldust caused 27 deaths; shaft accidents 78 deaths, while 351 deaths or 29.7 per cent of all deaths at mines resulted from accidents due to miscellaneous causes, the chief of these being haulage operations.

## PROFIT-SHARING IN THE UNITED STATES

**A** VOLUME on profit-sharing\* has recently been issued by the National Civic Federation in the United States, as a revised edition of a similar work published in 1916. Brief statements are given of about 460 specific plans furnished by the leading men of the firms or companies that have tried it. In cases where profit-sharing schemes have been tried and abandoned reasons for their failure are supplied by the management. The volume contains an address by the late Mr. George W. Perkins, former chairman of the Federation's profit-sharing department, delivered before the National Civic Federation on September 11, 1919, in favour of profit-sharing along certain lines. Elsewhere in the book various labour leaders express the views of organized labour on profit-sharing. Some types of profit-sharing in France and England are also described.

Arguments in favour of profit-sharing are summed up in the introductory chapter as follows: It promotes more continuous service; reduces cost of production; secures more regular attendance at work; builds up confidence and creates a spirit of co-operation; gets rid of rolling stones; encourages home building; enables a company to keep its employees during rush seasons; keeps down expenses; induces salesmen as well as others interested to work harder; promotes efficiency, interest and loyalty; and increases the profits of the business. Employers who have discontinued profit-

sharing schemes give the following reasons: the efforts of the employers were not appreciated by the men; they seemed to prefer their total earnings in fixed wages with no variable element; they were suspicious of the employer's motives; they insisted upon joining unions and presenting demands in spite of the employer's efforts to give them a share in the extra gains of the business; when stock was sold to employees upon favourable terms they would dispose of it at a profit when its value rose, and so get the habit of watching the stock market; when the profit distribution was large the employees learned to expect a similar bonanza every year, and were disgruntled if they did not get it, to say nothing of their discontent if conditions forbade an extra payment at all; and all schemes of this sort are necessarily complicated and hard to understand, so that the workers, especially of the less intelligent grades, are not easily convinced that the system really benefits them and is not merely a device to withhold a part of what they might otherwise demand and get.

The profit-sharing plan advocated by Mr. Perkins is based on the following principles: (1) Every business has, first of all, to earn operating expenses, depreciation, and fair returns on honest capitalization. (2) Every business should consider that the compensation paid employees is for the purpose of earning a sum of money sufficient to pay the above-mentioned items. (3) Any profits over and above such sum should, on some percentage basis, be divided between the capital used in the business and the em-

\*Profit-sharing by American Employers—Profit-Sharing Department, National Civic Federation, Metropolitan Tower, New York City, U.S.A.

ployees engaged in the business. (4) In neither case should these profits be immediately withdrawn from the business; they should be left in the business for a reasonable length of time, to protect and increase its financial strength and safety; in the case of capital, its share of these profits should be carried to surplus; in the case of employees, their share of these profits should be distributed to them in some form of security representing an interest in the business, and each employee should be required to hold such security for a reasonable length of time, say three to five years. (5) The employees' share of these profits should be allotted to them as nearly as possible on the basis of the compensation they receive. Up to this date, he claimed, this has proved to be the best method. He also advocated that a detailed annual statement of the business be furnished to all the employees, so that they may know the amount of business done and on what basis profits were distributed.

This scheme is criticized by Mr. W. O. Lichtner, a consulting engineer, on four grounds: (1) The employees naturally distrust the correctness of the financial statements. Any one who has any knowledge of costs and accounting knows that accounts can be juggled to show almost anything, and the workmen know this. (2) The plan is based on the business as a whole, which involves many variables over which the employees have no control. (3) The plan forces the employee to invest money that he earned by his extra effort, and does not consult him as to whether he would not prefer being paid individually the full return for his increase in effort. (4) The plan withholds from the employee money which he should have had from week to week. "The 'fairer remunera-

tion' of which Mr. Perkins speaks should be a remuneration in proportion to individual effort, and it should be certain, not subject to the efforts of other men or the general functions of the management. The only practicable plan to give a fairer remuneration to the employees is to determine definite standards as to output, quality, and saving in waste of material, and then pay them fairly for reaching the standard."

The objections of employees to profit-sharing by cash distribution is summed up as follows: That market wages are not paid where such cash distributions are made; that they prefer to have a fixed wage scale upon which they can count; and that when such percentages of profits are received they are regarded as gifts, which place the workers under obligation to the employer and in a position in which they cannot ask for increases in wages or salaries to which they may be justly entitled. With regard to stock selling plans, their criticisms are: That foremen will keep down the wages of the rank and file in order that the dividends on stock owned by the foremen may be higher; that the aim of the company in selling stock is sometimes circumvented, as in the case of the Northern Pacific Company, which experienced disappointment because the stock was sold to the employees at a low price and when it rose the employees promptly sold it instead of remaining participators; and that, although stock may be sold on the instalment plan, comparatively few in the rank and file can afford to take advantage of such opportunities; then there is the question of possible loss by a company in any given year and employees who are owners of stock are likely to become interested in watching the market and to cultivate the gambling instinct.

## ANNUAL CONVENTION, DIVISION No. 4, RAILWAY EMPLOYEES' DEPARTMENT, A. F. OF L.

THE Third Annual Convention of Division No. 4 of the Railway Employees' Department, American Federation of Labour, was held at Winnipeg on October 11 to 16. There were 145 delegates present representing 20,000 members who were employed in the shops of all the principal railways in Canada. President Tallon, who occupied the chair, referred in his opening address to the steps taken since the last convention to secure affiliation with the Railways Employees' Department of the American Federation of Labour, which was effected in February, 1919. The Secretary-Treasurer reported that despite the defection in their ranks which occurred a little over a year ago they were receiving per capita fees on a greater membership than at any other time since the Division was formed. A large number of resolutions were discussed, among the most important ones being the following. A resolution was passed instructing the Executive Board of Division No. 4 to do everything possible to bring about a pact between the different standard railway organizations in Canada similar to the pact signed between the sixteen standard railroad organizations in the United States in 1919 in connection with wage negotiations and other matters of mutual interest. By another resolution it was decided to take the initial steps for affiliation with the railway organizations known as the "Big Six Divisions." (These are the organizations which, in conjunction with the railway companies, had formed the Canadian Railway Board of Adjustment No. 1). A resolution was passed in favour of taking immediate steps to have the piece-work system abolished. Another resolution was in favour of all employees when laid off for old age being granted the same pension remuneration. The Convention declared itself in favour of a free transfer card system between all the organizations affiliated with the Railway Employees' Department, and recommended to the

Grand Lodges concerned the advisability of standardizing their death benefit laws. It was resolved that Division No. 4 endeavour to have all decisions and rulings rendered by the United States Wage Adjustment Board made applicable to Canada, and to make every effort to have a Canadian wage adjustment board established. In view of the alleged employment of Orientals as car cleaners at points on the Pacific Coast at wages below those established by the wage agreement tending to deprive white men of employment, the executive was instructed to take the necessary steps as soon as possible to secure the same rates of pay and conditions of employment for Orientals in the yards and shops as now in force for white men. It was resolved that Division No. 4 take the necessary steps to have labour represented on the board of directors of the Canadian National Railways. The Convention went on record as favouring the appointment of Mr. Calvin Lawrence on the Board of Railway Commissioners, and the officers of the Division were instructed to advise the locomotive engineers and all other organizations who seek their support in such matters that in future such nominations must be made at a joint Conference of the representatives of all the labour organizations affected.

A resolution was passed protesting against the instructions issued by the president of the Canadian National Railway that any employee of the railway who permits himself to become a candidate for any federal or provincial constituency automatically severs his connection with the Company. The incoming executive was instructed to take this matter up immediately with the president of the railway, with a view to having the full rights of the employees restored.

The following officers were elected: President, R. J. Tallon (re-elected); Vice-president, F. McKenna; Secretary-treasurer, Charles Dickie, Winnipeg.

## REPORT OF THE EMPLOYMENT SERVICE OF CANADA FOR FOUR-WEEK PERIOD OF OCTOBER 11 TO NOVEMBER 6, 1920

**R**EPORTS from Employment offices to the Dominion Headquarters of the Employment Service of Canada, Department of Labour, for the four-week period of October 11-November 6, show a decrease in the number of placements as compared with the preceding period. The offices reported that 28,854 placements were effected during the period as compared with 33,483 reported during the previous four weeks, a decrease of 4,629.

During the period under review, regular placements by weeks were reported as follows: week ended October 16,—7,534; week ended October 23,—7,084; week ended October 30,—7,389; week ended November 6,—6,847. In addition 6,679 casual jobs (employment of a duration of less than one week) were supplied and were reported by weeks as follows:—Week ended October 16,—1,721; week ended October 23,—1,600; week ended October 30,—1,765; week ended November 6,—1,593. Placements in casual work during the preceding period totalled 6,490, representing a decrease during the present period of 189.

The accompanying chart shows graphically the number of applications, vacancies, and placements week by week since the beginning of April, 1919. The chart indicates that during the period October 11 to November 6, a downward tendency was shown by the curves for placements and vacancies. The curve for applications indicates that there was a decrease for the first two weeks of the period and a recovery during the last two weeks. On the whole, however, the number was not so high as during the preceding four weeks. On the other hand, the number of vacancies reported to the Service decreased to a point where applications exceeded vacancies—or the supply of labour was in excess of the demand. Placements showed a steady falling off throughout the period.

The accompanying table presents in some detail the work of the offices for the four-week period ended November 6. It will be noted that at the beginning of the period, October 11, there were 4,279 applicants unplaced. This compares with 7,262 applicants unplaced on November 6 after allowance had been

made for cancellations and placements. The number of vacancies remaining unfilled on October 11, totalled 18,001 as compared with 9,969 vacancies unfilled at the end of the four weeks' period, after making allowance for vacancies filled and cancelled. In comparing the above with corresponding period of last year, it will be of interest to note that the total number of applicants unplaced on November 8, 1919, was 7,005, and the number of vacancies unfilled was 16,868,

as against 7,262 applicants unplaced and 9,969 vacancies unfilled on November 6, 1920. During the period at present under review the number of applicants registered at the offices totalled 42,388, while the number of vacancies notified by employers to the Service was 32,156. When compared with the report for the preceding period, this represents a decrease in registration of 1,069 applications and a decrease in vacancies of 16,312.

### UNEMPLOYMENT IN TRADE UNIONS AT THE CLOSE OF OCTOBER, 1920, AS REPORTED BY UNIONS MAKING RETURNS

THE present article on unemployment among the members of local trade unions deals with unemployment as at the end of October, 1920, and is based on returns received from 1,509 labour organizations with a total membership of 215,212. For all occupations reporting, 5.99 per cent of the members were unemployed, as compared with 3.25 per cent at the end of September, 1920, and with 2.57 per cent at the close of October, 1919. Unemployment, as used here, has reference to involuntary idleness due to economic causes. Persons occupied in work other than their own trades, or who are idle because of sickness or as the direct result of strikes and lockouts, are not considered as unemployed. As the number of unions making returns varies from month to month with consequent variations in membership upon which the percentage of unemployment is based, it should be understood that the percentage of unemployment figures have reference only to those unions reporting.

That the percentage out of work at the end of October was somewhat larger than in the preceding month and also than in the corresponding month of 1919, may be attributed to increased slackness in the manufacturing and mechanical industries, particularly among garment and boot and shoe workers, and lumber workers.

Table I on this page summarizes the returns by provinces. There were declines in employment in every district as compared with the reports for September, 1920, the decreases in Quebec and British Columbia being specially noted.

TABLE 1.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

\* Revised figures.

worthy. As compared with the returns for October of last year, improvement was shown in Nova Scotia, Prince Edward Island, New Brunswick, Saskatchewan and Alberta, while conditions in the remaining districts were not as good.

The percentages reported unemployed in the different groups of industries are indicated in table II on this page.

Unemployment in the manufacturing and mechanical industries, as indicated by 384 unions, having a combined membership of 56,034 persons, was more prevalent at the end of October than in September, 1920, and also than in October, 1919, 11.90 per cent of the members having been out of work as compared with 8.80 in the preceding month, and with 2.27 per cent in the corresponding month of last year. Most of this increase in unemployment occurred in the clothing and boot and shoe industries, largely in Quebec and Ontario. Workers in metals, machinery and conveyances

showed slightly more activity than in September, 1920, and October, 1919. This was true also of glass workers. In the food, tobacco and liquor, textile, cordage and carpets, pulp, paper and fibre, printing, publishing and paper goods, wood working and furniture industries, the percentages out of work were somewhat larger than in both September, 1920, and October, 1919. Jewelry workers, as registered by 3 organizations, recorded a slight decline in unemployment as compared with the returns for the preceding month; in October of last year, however, no members were shown as out of work. Considerable short time was reported by unions of moulders, machinists, boilermakers, metal polishers, pattern-makers, bakers and confectioners, cigar makers, brewery workers, tailors, garment workers, hat and cap makers, pulp and paper makers, compositors, pressmen, piano workers, leather, boot and shoe workers and jewelry workers.

Reports from 614 organizations of transportation workers, having a combined membership of 77,969 persons, indicated that .91 per cent of the members were unemployed, as compared with .98 per cent in the preceding month, and with 2.61 per cent in the corresponding month of 1919. Employment for steam railway employees (whose returns constitute about 75 per cent of the entire group membership reporting) showed greater activity than in both of the months used here for comparative purposes. The percentage out of work among street and electric railway employees was somewhat larger than in September, but it was considerably smaller than in October, 1919. The same is true also of workers in the navigation sub-group. Among teamsters and chauffeurs there was slightly less unemployment than in the preceding month, and also than in October of last year. Some unions of conductors, engineers, firemen, trainmen, carmen, maintenance of way employees, longshoremen, and teamsters reported that their members were working on short time.

In the mining, quarrying and refining of ores group, as reported by 35 organizations with an aggregate membership of 11,184 persons, the percentage out of work was .11 as compared with percentages of .06 and .91 in September, 1920, and October, 1919, respectively. Miners were not quite as fully employed as in the preceding month, but the percentage of unemployment was considerably smaller than that recorded in October of last year. Quarry workers and mill and smelter men, as indicated by 2 unions in each sub-group, continued to be busy.

The percentage out of work in the building and construction group, as registered by 261 organizations, having a combined membership of 34,143 persons, was 3.70, as compared with 2.04 per cent in September, 1920, and 15.42 in October, 1919. The increase in unemployment as compared with the preceding month may be attributed largely

to seasonal causes. Bricklayers, masons and plasterers, plumbers and steam fitters, tile layers, lathers and roofers, steam shovel and dredgemen, and hod carriers and building labourers reported more unemployment than in both the preceding month and the corresponding month of last year. The percentages out of work among carpenters and joiners, electrical workers, and painters, decorators and paper hangers were more pronounced than in September, but smaller than in October, 1919. On the other hand, granite and stone cutters and bridge and structural iron workers registered smaller percentages of unemployment than in the previous month, but they were larger than in the corresponding month of 1919. Considerable short time was recorded by unions of bricklayers, masons and plasterers, carpenters and joiners, electrical workers, painters, decorators and paper hangers, plumbers and steamfitters and lathers.

In the public employment group, as indicated by 75 unions, having a combined membership of 6,687 persons, the percentage out of work was .01, as compared with .02 per cent in September, 1920, and .06 per cent in October, 1919. Civic employees recorded the same percentage of unemployment as in the preceding month, with a slight improvement in comparison with the returns for October, 1919.

The percentage out of work among lumber workers, as reported by 4 organizations with an aggregate membership of 14,375, was substantially larger than in September, mainly on account of the closing of saw mills for the season. Reports for October, 1919, for this group are not available for comparison.

Unemployment in the group of miscellaneous trades, as indicated by 131 organizations with a total membership of 12,679 persons, was slightly more prevalent than in September, 1920, and also than in October, 1919, the percentage of unemployment standing at 4.4, as compared with percentages of 1.86 in the

former month, and 2.95 in the latter. Retail clerks, as registered by 3 unions, showed a small percentage of unemployment as compared with no members out of work in September, and with a slightly greater percentage in October of last year. Hotel and restaurant employees, musicians and theatre employees, and stationary engineers and firemen registered larger percentages unoccupied than in September, but some improvement was shown in comparison with the

returns in October, 1919. In the unclassified trades unemployment occurred mainly among camp and agricultural workers in Manitoba, largely on account of seasonal causes. Some unions of barbers, stationary engineers, musicians and theatre employees, and unclassified workers reported that not all their members were working full time.

The tabular statement on pages 1632-3 presents the returns in some detail.

### EMPLOYMENT CONDITIONS IN CANADA DURING THE PERIOD OCTOBER 30 TO NOVEMBER 20, AS REPORTED BY EMPLOYERS

**W**EEKLY reports from employers to the Dominion Headquarters of the Employment Service of Canada, Department of Labour, during the four weeks from October 30 to November 20 inclusive, show a decline in the volume of employment afforded by these employers during each of the weeks under review.

The change reported for each week as compared with the preceding week is as follows:

Week ending October 30, a decrease of 2,671 persons or .4 per cent.

Week ending November 6, a decrease of 7,090 persons or 1.0 per cent.

Week ending November 13, a decrease of 4,850 persons or .7 per cent.

Week ending November 20, a decrease of 7,666 persons or 1.0 per cent.

During the four weeks' period under review employment conditions in the different parts of Canada, with the exception of the Prairie Provinces, were substantially the same, decreases being registered in the Maritime Provinces, Ontario and Quebec and British Columbia during all four weeks of the period. In the Prairie Provinces, however, increases occurred during the first three weeks with a decrease on November 20. In the provinces within the districts,

moreover, conditions were very similar. New Brunswick only of the Maritime Provinces, reported increased employment during the week ending October 30, while losses were registered by firms in that province in the three remaining weeks and in the other provinces during all four weeks. Quebec showed an increase also during the week of October 30 with reductions in the last three weeks of the period. In Ontario, steady declines were reported. Concerns in Manitoba and Alberta registered additions to their staffs during the weeks ending October 30, November 6 and 13, while in Saskatchewan there were gains during the first week of the period only.

A summary of the returns by industrial groups shows that firms in Logging and Coal Mining, only, registered increased employment during the four weeks of the period under review. Clay, Glass and Stone Products, Leather Goods, Telephone Operation, Retail and Wholesale Trade, Local and Railway Transportation, reported increases taking the period as a whole, with declines during one or more of the weeks under review. On the contrary, in Railway Construction, Edible Animal Products, Mineral Products, n.e.s., Non-Ferrous Metal Products, Wood Distillates and Extracts, Metallic Ores, Non-Metallic

Minerals other than coal, Hotels and Restaurants, Telegraph Operation and Water Transportation there were net reductions, with increases in employment during one or more weeks of the period. In Building Construction, Lumber and its Products, Edible Plant Products, Fur Goods, Iron and Steel, Pulp and Paper, Rubber Products, Textiles, Miscellaneous Manufacturing Industries (chiefly Tobacco and chemicals) and Personal Services (mainly laundries) there were reductions during all four weeks.

The most pronounced increases in the volume of employment afforded during this period, as during the last period considered, occurred in Logging, where the additions to staffs registered from week to week amounted to 2,450 persons. The bulk of this increase took place in Ontario and Quebec, though there were gains in other provinces also. The increases in this group and those reported in Coal Mining, which were also substantial, may be attributed to seasonal causes. In the latter, the additions were registered largely in Alberta and Nova Scotia. Most of the increases in Clay, Glass and Stone Products, were reported in the glass manufacturing sub-group, although some increases were also shown in the cement and brick industries. The increases in Leather while not particularly large, are interesting, because, since the beginning of June, weekly reductions in this group have been almost constant. In Retail Trade, the increases, which were recorded for the three weeks in November, indicate the commencement of Christmas activity in stores, and occurred largely in Quebec, Ontario and Manitoba.

The most substantial reductions reported during the four weeks under review took place in Lumber and Its Products, where 6,281 persons were released from employment during the four weeks. In Railway Construction, Textiles, and Iron and Steel Products, also, the decreases were large, in each group being over 3,800 workers. In the two groups

first named, the declines which were of a seasonal nature, were widespread in application. Most of the losses in Iron and Steel Products occurred in the vehicle sub-group and within that sub-group in the automobile and ship-building industries. There were also declines in the steel manufacturing and forgings sub-groups. In Textiles the bulk of the reductions were registered in the garment industry, but decreases in the thread, yarn, cloth, hosiery and knit goods sub-groups were also reported, particularly in the last weeks of the period. In Edible Plant Products, the declines were reported, for the most part, in the canning and sugar refining sub-groups, those in the former, which were seasonal in character, taking place in Ontario, while in the sugar industry they were reported in British Columbia and Nova Scotia. In Non-Ferrous Metal Products, the largest individual declines were reported in the lead, tin, zinc and copper sub-group in Quebec, but there were also decreases in the nickel refining industry in Ontario. In Pulp and Paper Products, most of the losses occurred in the Pulp and Paper sub-group largely in Ontario and Quebec, in some cases being caused by shortage of water and in others, by the closing down of mills for the winter months. Inactivity in the tire manufacturing and foot-wear sub-groups occasioned the decreases in Rubber Products, those in the former sub-group reflecting the slackness in the automobile industry. In the Rubber group the declines were reported almost entirely in Ontario and Quebec. In Miscellaneous Manufacturing Industries the reductions were spread over a large number of sub-groups, the losses in musical instruments, soap and beer manufacturing establishments, particularly in Ontario and Quebec, being the most pronounced.

The accompanying chart shows the weekly percentage of change in the number of persons on payrolls since the base week (January 17, 1920) as reported by those employers making returns, the number averaging over 5,100 firms a

week. The returns for the week of January 17 are being taken as base figures. It had been the intention to take the week of January 1, but this was found impracticable because of the abnormal situation at that time, due to the annual inventory and holiday period, and the consequent reduction in staffs. The week of January 17 coincides fairly closely with the termination of this season and accordingly reflects more normal conditions. The chart indicates percentage gains of varying size in the volume of employment during the weeks

under review, the curve showing, however, an almost steady downward tendency. The highest point reached during the period under review occurred in the first week, the statements for October 30 registering, for those employers reporting, an increase in staffs of 40,874 or 5.8 per cent over their payrolls on January 17. From then the curve dropped to 3.3 per cent over base on November 20, when the concerns making returns showed an increase of 22,597 employees as compared with their figures for the base week.

EMPLOYMENT IN THE BUILDING TRADES DURING OCTOBER, 1920, AS INDICATED BY BUILDING PERMITS

EMPLOYMENT in the building trades, as indicated by the value of building permits issued in 56 cities showed an increase during October as compared with the preceding month, the total value of building permits rising from \$8,921,374 in September to \$9,660,538 in October, an increase of \$739,164 or 8.3 per cent. Nova Scotia, New Brunswick, Ontario, Saskatchewan and Alberta registered

increases in this comparison, that of \$1,755,977 in Ontario being the most pronounced. Of the reductions recorded in the remaining provinces, that of \$1,418,954 in Quebec was the largest. As compared with the figures for the corresponding month in 1919 there was a decrease of \$729,916 or 7.0 per cent in the permits issued, the value for October, 1919, having been \$10,390,454. In this

comparison, however, increases were reported in all provinces except Nova Scotia, Quebec and Saskatchewan, that of \$1,321,412 or 27.9 per cent in Ontario being the most noteworthy. The most pronounced decrease in this comparison occurred in Quebec, where the value of building permits issued showed a decline of \$1,613,183 or 62.1 per cent.

Of the larger cities, Montreal and Winnipeg reported decreases both as compared with September, 1920, and October, 1919; but on the other hand, in Toronto there were increases in both comparisons. At Edmonton the value of building permits issued showed an increase over September, with a reduction as compared with the report for October of last year, while in Vancouver there was a decline as compared with the preceding month but an increase over the corresponding month of 1919.

Of the smaller centres, Sydney, Moncton, Brantford, Fort William, Kitchener, Ottawa, Peterborough, Sault Ste. Marie, Brandon, Calgary and South Vancouver registered increases in the value of building permits issued as compared with both September, 1920, and October, 1919.

The returns from 35 cities formerly used in this report (which are distinguished by asterisks, and which are also tabulated separately for statistical purposes), show that the total value of building permits issued by these cities amounted to \$9,018,593, an increase of \$1,075,430 or 13.5 per cent, as compared with the returns for September, 1920. In comparison with the figures for 1919, however, there was a decrease of \$457,034 or 4.8 per cent.

# REPORTS OF CIVIC EMPLOYMENT IN FIFTEEN CITIES, OCTOBER, 1920

**R** EPORTS from fifteen cities showing the number of workers temporarily engaged, and the wages paid to these employees during the month of October, showed a nominal decrease (.8 per cent) in the number of workers and a decline of 4.4 per cent in the amount of wages paid, as compared with the figures for the preceding month. In October, 1920, 10,489 persons were temporarily employed and the payrolls amounted to \$1,061,696.59 as compared with 10,578 persons and an aggregate payroll of \$1,110,175.94 in September.

In comparison with returns for the same period in 1919, increases of practically 5 per cent in the number of employees and of almost 25 per cent in the wages paid are indicated, there having been 9,993 employees with a total payroll of \$851,334.96 in October, 1919.

Ottawa, Toronto, London, Winnipeg, and Brandon registered increases in the number of persons employed on municipal work as compared with both September, 1920, and October, 1919. In Hamil-

ton, Calgary, Edmonton and Victoria there were gains in the former comparison with decreases as compared with the returns for October of last year. On the contrary, Montreal and Regina registered declines as compared with September with slight increases over October, 1919. At St. John, Moose Jaw, Saskatoon and Vancouver there were decreases in both comparisons.

As to wages, Ottawa, London, Winnipeg and Vancouver recorded increases both as compared with the preceding month and with the corresponding month of last year. At St. John, and Moose Jaw there were gains in comparison with the returns for September, with declines in comparison with the figures for October, 1919. On the other hand, Montreal, Toronto, Brandon and Regina registered reductions in the amount of wages paid as compared with September, but there were increases over October of last year. In Hamilton, Saskatoon, Calgary, Edmonton and Victoria there were decreases in both comparisons.

EMPLOYMENT (BOTH CONTRACT AND MUNICIPAL WORK) AFFORDED WORK PEOPLE TEMPORARILY EMPLOYED BY FIFTEEN CITY CORPORATIONS OCTOBER 1920, COMPARED WITH SEPTEMBER 1920 AND WITH OCTOBER 1919

## FAIR WAGE CONTRACTS, NOVEMBER, 1920

**D**URING November the Department of Labour received for insertion in the LABOUR GAZETTE the following information relative to sixteen fair wage contracts, of which fifteen were awarded by the Department of Public Works, and one by the Department of Railways and Canals. All the contracts contained the usual fair wage clause which provides for the prompt payment of such wages as are current in the district in which the work is to be performed, and for observance on the various works under contract of the prevailing hours of labour, and which otherwise prevents abuses and secures the legitimate rights of the labour employed.

A statement was also received as to supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, etc.

### DEPARTMENT OF PUBLIC WORKS.

New partitions, fittings, sewage tank, Machinery Building, Lansdowne Park, Ottawa, Ont. Name of contractors, Cooper, McDonell and Beatty, Ottawa, Ont. Date of contract, November 1, 1920. Amount of contract, \$8,913.

Repairs to breakwater, West Chezzetcook, N. S. Name of contractors, A. W. Girroir & W. F. MacKinnon, Antigonish, N. S. Date of contract, October 26, 1920. Amount of contract, schedule of prices.

Reconstruction and repairing of portion of the Shore Protection, Three Fathom Harbour, N.S. Name of contractors, Naugle & Hiltz, Lawrencetown, N. S. Date of contract, October 26, 1920. Amount of contract, \$6,079.

Repairs to Breakwater, Seaforth, N.S. Name of contractors, A. W. Girroir & W. F. MacKinnon, Antigonish, N.S. Date of contract, October 26, 1920. Amount of contract, schedule of prices.

Construction of wharf, Bass River, N.S. Name of contractors, Naugle & Hiltz, Lawrencetown, N.S. Date of contract, October 26, 1920. Amount of contract, schedule of prices.

Sheet-pile wharf, Rondeau, Ont. Name of contractor, William Bermingham, Kingston, Ont. Date of contract, November 1, 1920. Amount of contract, schedule of prices.

Wharf and execution of repairs to crib and dredging, Hollyburn, West Vancouver, B.C. Name of contractor, William Greenlees, Vancouver, B. C. Date of contract, November 2, 1920. Amount of contract, schedule of prices.

Repairs to public wharf, Cap St. Ignace, Que. Name of contractors, E. Caron & Frère, L'Islet, Que. Date of contract, November 4, 1920. Amount of contract, schedule of prices.

Repairs to Breakwater, Port Lorne, N. S. Name of contractors, Denton & Condon, Digby, N.S. Date of contract, November 10, 1920. Amount of contract, schedule of prices.

Addition to East Breakwater, Port Maitland, N. S. Name of contractors, Denton & Condon, Digby, N. S. Date of contract, November 10, 1920. Amount of contract, schedule of prices.

Supply and installation of Freight Elevator in East Block, (Finance Dept.), Ottawa, Ont. Name of contractors, Otis-Fensom Elevator Co., Ltd., Montreal, Que. Date of contract, November 16, 1920. Amount of contract \$3,337.

Alterations and additions to fittings in Post Office, Welland, Ont. Name of contractor, W. J. Hickey, Welland, Ont. Date of contract, November 12, 1920. Amount of contract, \$1,267.

Reconstruction of portion of super-structure of western pier, Toronto, Ont. Name of contractors, Border Cities Construction Co., Windsor, Ont. Date of contract, November 22, 1920. Amount of contract, schedule of prices.

Alterations to plumbing and toilet room in Post Office, St. Thomas, Ont. Name of contractors, Jones & Spry, London, Ont. Date of contract, November 25, 1920. Amount of contract, \$5,600.

#### DEPARTMENT OF RAILWAYS AND CANALS.

Sandblasting and painting Wellington Street and Seigneurs Street bridges on the Lachine Canal. Name of contractors, Canadian Sand Blast Co., Ltd., Montreal, Que. Date of contract, November 15, 1920. Amount of contract, Wellington Street bridge, \$1,375, Seigneurs Street bridge, \$750.

#### POST OFFICE DEPARTMENT.

The following is a statement of payments made in November for supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, and the performance of work under sanitary conditions:

Nature of orders.	Amount of orders
Making metal dating stamps and type and other hand stamps and brass crown seals.	\$3,945.93
Making and repairing rubber stamps, daters, etc.	128.04
Supplying stamping material, pads, and ink.	2,006.54
Supplying mail bag fittings.	6,995.49
Supplying mail bagging.	9,185.36
Making up and supplying letter carriers' uniforms, etc.	41,695.85
Scales, new and repaired.	11,487.50
Repairing letter boxes, etc.	207.35
Making and repairing miscellaneous articles	72.52

#### RECENT INDUSTRIAL AGREEMENTS

THE following is a summary of the more important industrial agreements recently received by the Department. While the conclusion of every industrial agreement implies the acceptance, to a greater or less degree, of the principle of collective bargaining, it should not be overlooked that in a number of cases the agreement was reached only after the employees had been on strike. By verbal agreement is understood a schedule of rates and conditions agreed upon between the employees and the majority of the employers, and in effect although not signed. The agreements are arranged by industrial groups.

##### Metals and Machinery

AMHERST, N. S. — THE ROBB ENGINEERING WORKS, LIMITED, AND THE SHOP COMMITTEE REPRESENTING THE MACHINISTS, SPECIALISTS AND APPREN-

TICES, AMHERST LODGE, No. 605. Agreement in effect from September 1, 1920, until September 1, 1921.

Hours of labour: forty-eight per week. Overtime, time and one-half; Sundays and holidays, double time.

Apprenticeship: apprentices to be between sixteen and twenty-one years when starting trade, and to serve four years. A boy wishing to learn trade to be employed on probation for three months and then notified if unsatisfactory. Wages: Per hour—first year, 25 cents; thereafter, hourly increase of 5 cents every six months.

Reductions: In times of depression, management to favour reduction of working hours to forty per week when practicable in order to maintain working staff; Tractor Machine and Assembly Department to be separately on its own merits. Married men and those with

dependents to be given preference of employment, seniority and efficiency to govern in lay-off. Grievance Committee to have right to discuss efficiency with Superintendent. One week's notice of lay-off to be given, men laid off to be given preference over new men when seeking employment.

Minimum wages: Per hour—Machinists, 72 cents.

Grievances: Company to meet representatives of the Union to adjust grievances. In case of disagreement, work not to cease until highest officials of Company can be reached.

MONTREAL, QUE. — CANADIAN STEEL FOUNDRIES COMPANY, LIMITED, AND THEIR EMPLOYEES, MEMBERS OF THE METAL TRADES COUNCIL OF MONTREAL. Agreement in effect from May 16, 1920, until April 30, 1921.

Hours of labour: forty-five per week.

Overtime—day work men, until midnight, time and one-half; thereafter, double time. Holidays, double time; no work Sundays or Labour Day except to save life or property. A second shift in twenty-four hours to be paid overtime.

No cessation of work in case of a disagreement until highest local representatives of each party have failed to come to an understanding.

Any dispute must be referred to those interested; no strike or lockout to take place until it has been found impossible to adjust dispute satisfactorily; grievances to be reported to foreman, and failing adjustment matters to be taken up with superintendent by a shop committee and the Company representative.

In event of a shortage of workmen local unions to be notified where possible and to endeavour to secure help.

Bonus or piecework not to be extended to any trade or section of the trade where not now in effect.

Necessary reduction of expense to be effected by reduction of working hours or reduction of staff, married men and men with dependents to be given preference, seniority to govern.

Hours of labour, nine per day, five on Saturdays. Engineers and firemen to be allowed and paid an extra half-hour in the morning and at night, and to be paid for noon hour, owing to being on duty.

Apprenticeship: one apprentice for shop, and one for every five mechanics employed; apprentices to serve four years, and to be between sixteen and twenty-one on entering.

Minimum wages: Per hour—mechanics—blacksmiths, carpenters, electricians, electric welders, machinists, millwrights, plumbers and steam fitters, and sheet metal workers, 82½ cents; engineers, 71½ cents; machinists' specialists, 68 cents; helpers, 60 cents; labourers, 45 cents; apprentices, first year, 30 cents; each additional six months, 5 cents per hour increase.

KINGSTON, ONT. — CANADIAN LOCOMOTIVE COMPANY, LIMITED, AND INTERNATIONAL ASSOCIATION OF MACHINISTS, LODGE No. 54. Agreement in effect from June 15, 1920, to June 15, 1921.

Hours of labour, forty-five per week, to be worked in five shifts of nine hours on the first five days.

Overtime and holidays, time and one-half. Second shift in twenty-four hours, time and one-half.

Minimum wages: Per hour—machinists, 70 cents; first class specialists, 52½ cents; non-skilled machine operators, including turret lathe operators, bolt threaders, bolt cutters, lassiters and automatic machine operators, 42 cent; drill operators on accurate work, 50 cents; drill operators on general work, 45 cents; air drillers, 44 cents; first-class helpers, 46½ cents; second-class helpers, 42 cents; grinders, 44 cents; belt men, oilers and pump men, 46 cents; first-class carpenters, 76½ cents; second-class carpenters, 58 cents; helpers for superheater tube fitters, 43 cents; pipe fitters, 58½ cents; pipe fitters' helpers, 43 cents; tinsmiths and sheet metal workers, 55 cents; sheet metal workers' helpers, 44 cents; night forces in machine shops, 3 cents per hour additional. Ap-

prentices: Per hour—first year, 17½ cents; second year, 21½ cents; third year, 25½ cents; fourth year, 30 cents.

Before any reduction in staff of machine shop be made, working hours to be reduced to eight per day, five days per week.

Apprentices to serve four years, and not to leave without reasonable cause.

Grievances to be taken up by shop committee with foreman; if not then settled, with supervisor of locomotive construction; and if still not settled, with executive members of the Company. In case of disagreement, no cessation of work to take place until the highest representatives of the parties have failed to come to an understanding.

Company to maintain right to discharge men for inefficiency or breaches in shop discipline.

All employees represented by the International Association of Machinists, Local No. 54, to receive an increase in their hourly rate of not less than ten per cent on and from June 15, 1920.

#### Foods, Liquors and Tobacco

FORT WILLIAM AND PORT ARTHUR, ONT. — MASTER BAKERS, AND BAKERS' UNION, CANADIAN FEDERATION OF LABOUR. Agreement in effect from May 1, 1920, to May 1, 1921.

Hours of labour: fifty-four per week; nine per day. Holiday work, time and one-half after forty-seven hours.

Wages: Per week—foremen, \$33; second men, \$30; third men, \$27; helpers, \$23; Sunday doughing, \$1 extra above regular wage.

Female employees to have same wages as men for same class of work.

If cost of living goes up or down five per cent, a joint committee to discuss same.

HAMILTON, ONT. — MASTER BAKERS, AND NATIONAL BAKERS' UNION, No. 2, CANADIAN FEDERATION OF LABOUR. Verbal agreement in effect from May 1, 1920 to May 1, 1921.

Wages: Per week of 50 hours—second men and oven men, \$33; round table hands, \$30. Helpers to receive 20 per cent over last year's wages.

Overtime for every hour worked over eight hours in any one day, excepting Fridays and holidays, when overtime shall be after ten hours.

CALGARY, ALTA. — TWELVE LOCAL FIRMS, AND BAKERY AND CONFECTIONERY WORKERS' INTERNATIONAL UNION OF AMERICA, No. 197. Agreement in effect from May 1, 1920 to May 1, 1921.

Minimum wages: Per week—foremen, \$39.25; doughmen, \$37.25; ovenmen, \$37.25; bakers and confectioners, \$34.25. Overtime, time and one-half; in a holiday week, time and one-half after 5¼ hours' overtime have been worked. Jobbers, per hour, \$1.00.

Hours of labour: eight per day.

No "early man" (maker of bread dough) to be asked to start before 3 a.m.

No man to be paid in any week less than his full weekly wage. Bread bakers working on Saturday, and cake bakers on Sunday, double time.

Apprenticeship: one helper or one apprentice to five or less men, and one additional for every additional five journeymen employed. Apprentices to be between sixteen and twenty years at beginning of period, except in case of returned soldiers, to whom every facility to be apprentices is to be given.

No bakery wagon driver to be allowed to do the work of a journeyman baker or confectioner.

Bakery and confectionery shops under this agreement to be "closed shops."

Disputes: workman concerned, with assistance of union officials, to endeavour to effect a settlement with firm. Failing settlement, dispute to be referred to a joint committee of two members of the Union and two representatives of employers—none of whom shall be actual parties to the dispute or members or employees of the firm involved; this committee to appoint an independent chairman not a member of the trade; decision reached to be binding.

Should cost of living increase or decrease, wages to be governed accordingly; thirty days' notice of change in wage schedule to be given by either party. Readjustments to be made September 1, January 1, and May 1. Calgary prices to govern increase or decrease.

MOOSE JAW, SASK. — GORDON, IRON-SIDES AND FARES, PACKERS, AND AMALGAMATED MEAT CUTTERS AND BUTCHER WORKMEN OF NORTH AMERICA, No. 305. Agreement in effect from June 1, 1920 to June 1, 1921.

Hours of labour: forty-eight per week; forty hours per week to be guaranteed excepting in holiday weeks, when number shall be thirty-three and one-third.

Overtime (after regular day's work), first four hours, time and one-half; thereafter, and Sundays and holidays (excepting in case of men who work regularly on Sundays or holidays) double time.

Grievances: appeals to be made to General Manager by employee with a committee of fellow-employees; failing adjustment an officer of local union to join the above at an additional conference. No employee to be suspended, reduced or dismissed without just cause, or because of trade union membership or activity.

No discrimination to be made against any employee or prospective employee on account of creed or colour.

In reducing or increasing forces, seniority to govern.

A permanent committee of seven to be appointed to adjust grievances.

Returned soldiers returning to work in any plant in which they were employed previous to enlistment to be assured of their seniority.

Wages: Per hour (minimum except where range is given). Cattle killing: butchers, 60 to 80 cents; labourers, 50 cents; freezers, 50 to 60 cents; box factory, 30 to 52½ cents; beef boning, labourers, 50 cents; hides department, 52½ to 57½ cents; lard refinery, 31½ to 50 cents; janitors, 50 cents; loading

gang, inexperienced, 52½ cents, experienced, 57½ cents; tank department and bones, 52½ to 59½ cents; country ship-ping, 52½ cents; produce department: labourers, 50 cents, girls, 31½ cents; temperature men, 50 cents; firemen, 60 cents; hog killing and cutting: butchers, 50 to 65 cents, labourers, 50 cents; export packing and cellars, 50 to 57½ cents; fertilizer department, 52½ to 59½ cents; pork trimming: labourers, 50 cents, girls, 31½ cents; sausage department: men, 30 to 62 cents, girls, 31½ cents; smoked meats: labourers, 50 cents, girls, 31½ cents; casings, 50 to 55 cents; ham boner, 60 cents; elevator operators, 50 cents; tripe department, 30 to 55 cents; labour in boiler room, 52½ cents; scalers, 50 cents. Boys under eighteen years of age, not less than 25 cents.

HAMILTON, ONT. — HAMILTON BREWERS, AND INTERNATIONAL UNION OF UNITED BREWERY, FLOUR, CEREAL AND SOFT DRINK WORKERS OF AMERICA, No. 312. Agreement in effect from April 1, 1920, to March 31, 1921.

Only union members to be employed. List of unemployed members to be kept by Union for use when vacancies occur.

Brewers and foremen to be exempt from the agreement.

Sickness not to constitute a reason for discharge.

Grievances to be adjusted by a joint arbitration committee consisting of two members from each side and a fifth disinterested member. No strike or lockout to occur until a board of arbitration shall have been appointed and award made.

Hours of labour: fifty per week from April to December inclusive, and forty-five hours from January to March inclusive. Overtime, time and one-half.

Minimum wages: Per week—April 30, 1920 to May 31, 1920—bottlers, machine operators, drivers, chauffeurs, stablemen, watchmen, cellarmen, fermenting room and cold storage, \$25; other bottlers, drivers' and chauffeurs' helpers, wash-

house men, \$23; engineers (56 hours per week and one week's holidays with pay), coopers, \$28; kettlemen, maltsters (54 hours per week), \$24. From June 1, 1920 to April 30, 1921, each item in above schedule to be increased \$1, with the exception of coopers, who shall receive \$32 on and after June 1. Foremen and other union members not mentioned above to receive a proportionate increase.

Certain specified holidays, double time; other legal holidays, time and one-half.

LETHBRIDGE, ALTA. — LETHBRIDGE BREWING AND MALTING COMPANY, AND INTERNATIONAL UNION OF THE UNITED BREWERY, FLOUR, CEREAL AND SOFT DRINK WORKERS OF AMERICA, No. 354. Agreement in effect from July 1, 1920 to May 31, 1921.

Only good-standing members of the union to be employed, or extra help, working under a permit card.

Hours of labour: forty-eight per week; eight and one-half per day, five and one-half hours on Saturdays.

Minimum wages: Engineering Department: Per month—chief engineer, \$210; per hour—operating engineer, 79 cents (working not less than 8 hours per shift, with an ash wheeler while brewing); machinists, 72½ cents. Brewing Department: Per week—washhouse and cellar helpers, \$34.50; first cellarmen, first kettlemen, \$36; men starting in brewery, \$31.50. Others: Per week—men starting in bottling department; first year, \$30; other men, after first year, \$33; tight barrel coopers, \$36; slack barrel coopers, \$36. Beer drivers, per month—\$140, 48 hours per week (exclusive of stable work).

Apprenticeship: one apprentice in each department; to serve two years. Minimum wages: Per week—first year, \$18; second year, \$21.

Sickness to be no excuse for discharge.

In event of stagnation of business, if reduction of staff is necessary, men to be laid off for equal periods of from one

day to one week, extra help being laid off two days previous to Union men.

All employees to receive their beer and soft drinks at wholesale prices.

Differences to be referred to a joint board of two from each side and a fifth disinterested member if necessary.

All materials to be union-made if procurable.

VICTORIA, B. C. — TWO LOCAL BREWERIES, AND INTERNATIONAL UNION OF UNITED BREWERY, FLOUR, CEREAL AND SOFT DRINK WORKERS OF AMERICA. Agreement in effect from July 1, 1920 to December 31, 1920.

Any competent man in his branch of the trade—brewer, cooper, bottler, engineer, fireman, or teamster, may be hired, and must then join the union within 15 days.

If union help is not procurable, as in busy season, non-union men may be employed. Extra help to have a permit card good for one month.

No discrimination against employees for upholding union principles.

Hours of labour: eight per day, six days per week; firemen, seven days.

Engineers and firemen, after one year, two weeks' vacation with pay, in August.

In event of reduction of working force, no man to be discharged; employees to be laid off impartially, never for less than one day at a time, first men in cellar and brew-house to be exempt.

Employees to receive beer during working hours, under the supervision of the management.

Work on Sundays and legal holidays, double time, except for engineers and firemen. Overtime, time and one-half.

Minimum wages: Per week—brewers in cellar and kettle, \$28; coopers with tools, \$30; wash-house men, \$27; engineers (seven days), \$31.50; firemen (seven days), \$29.50; bottlers, machine operators, \$26; all other labourers above 18 years, \$24.50; beer drivers (automobiles and operators) \$29; beer drivers (horses), \$28; helpers on autos and waggons, \$26; stablemen, \$28. Higher

paid men to receive an advance of 50 cents per day. Drivers and helpers to take care of their horses and waggons and autos as heretofore.

Apprenticeship: each brewery to be entitled to three apprentices in the bottling department, to be between sixteen and eighteen years, to serve two years.

Minimum wages: Per week—first year, \$20; second year, \$22.

Differences to be adjusted by a board of arbitration composed of two representatives from each side and one disinterested person (if necessary); decision to be binding. If board is unable to agree on choice of fifth person, either party to apply to Minister of Labour for the appointment; decision to be final.

Pending settlement of a dispute or arbitration of same, no strike or lockout to take place.

If no competent union men with references are available, company to have right to employ as they see fit. Union-made materials to be given preference.

All members of local 280 to be or become citizens of Canada as soon as residential qualifications have been complied with.

### Clothing

HAMILTON, ONT. — JOHN MCPHERSON SHOE COMPANY, AND BOOT AND SHOE WORKERS' UNION, No. 444. Agreement in effect from May 1, 1920 to April 30, 1921.

Wages: Per week, in sole leather department; channeller, \$35; outsole cutter, outsole sorter, stock fitter, lift cutter, \$28; insole cutter, insole sorter, \$26; rounder, \$24; lip turner, gemmer, \$22; general work, \$13 to \$23.

Overtime, time and one-half; Sundays and holidays, double time.

Hours of labour, forty-seven per week.

### Pulp and Paper

IROQUOIS FALLS, ONT. — ABITIBI POWER AND PAPER COMPANY, LIMITED, AND INTERNATIONAL BROTHERHOOD OF

PULP, SULPHITE AND PAPER MILL WORKERS, No. 109. Agreement in effect from May 1, 1920 to May 1, 1921.

Questions of jurisdiction to conform to the regulation as fixed by the American Federation of Labour.

Preference to be given by the Company, when hiring or laying off help, to union members, length of service being considered among equally efficient employees. New men to join union within fifteen days. Permanent employees to be good-standing union members.

Hours of employment: day workers, eight hours per day; six days per week. Overtime, time and one-half. Tour workers: three 8-hour shifts, starting at 8 a.m., from 8 a.m. Sunday to 8 a.m. Monday, time and one-half. Special rates for holidays.

No strikes or lockouts to occur during the life of this agreement.

Grievances: to be reported to the Superintendent, preferably in writing, reply to be given within 48 hours; if unsatisfactory, question to be referred to the General Manager or President of the Company and the President of the Union, and on their failure to agree, question to be left to arbitration. Arbitration Committee to consist of one man from each side, and a third selected by them or, in failure to agree, by the Minister of Labour.

Union agrees not to impose on Company higher minimum rates or more onerous conditions than are given to the chief competitors of the said Company.

Minimum of 72 cents for all mechanics; minimum of 60 cents for all mechanics' helpers.

#### Printing and Publishing

KINGSTON, ONT. — LOCAL EMPLOYERS, AND INTERNATIONAL TYPOGRAPHICAL UNION, No. 204. Verbal agreement in effect from September 30, 1920 to April 30, 1921.

In all printing offices under jurisdiction of this union, printers and foremen to be active union members.

Minimum wages: Per week of 48 hours —machinist operators, \\$33; operators, \\$31; all other journeymen employed by the week, \\$31; night work, \\$2 additional.

All work to be time work. Overtime, first 3 hours, time and one-half; thereafter, double time.

Night work 48 hours per week, worked on five nights.

Apprenticeship: one apprentice for five journeymen or major fraction—number in no office to exceed two. One member of union, as well as Proprietor, to be employed in the composing room before an apprentice may be employed. Apprentices to be not less than fifteen years of age and possessed of a common school education.

Wages: Per week—first six months of third year, \$10; \$2 per week increase every six months until end of term of apprenticeship. Term of apprenticeship to be five years.

ST. THOMAS, ONT. — THE TIMES-JOURNAL, LIMITED, THE SUTHERLAND PRESS, LIMITED, THE MUNICIPAL WORLD, LIMITED, OF ST. THOMAS, AND INTERNATIONAL TYPOGRAPHICAL UNION No. 459. Agreement in effect from February 1, 1920 to January 31, 1921.

Only union members to be employed in composing rooms.

Minimum wages: Per week—stone hands, floormen, operators and machine tenders, \$28; foreman, \$30.

Hours of labour: eight per day; seven and one-half per night. Overtime, time and one-half; Sundays and holidays, double time.

Apprenticeship: in composing rooms, one apprentice to four journeymen or fraction thereof. Hours same as journeymen. Wages: Per week—\$7, with not less than \$1 raise every six months.

In shops with five or more machines in operation, a machinist to be employed.

A superannuated member may be permitted to work, with permission from this union at less than regular journeymen's rate, provided there are journeymen in the office, not more than one such member to an office.

WINNIPEG, MAN. — EMPLOYING PRINTERS' AND BOOKBINDERS' ASSOCIATION, AND INTERNATIONAL TYPOGRAPHICAL UNION, No. 191. Agreement in effect from July 1, 1920 to June 30, 1921.

Disputes: Committees to be appointed and maintained by each party. In case of failure of adjustment by one party, an arbitration committee of three, one from each committee and a third member chosen by them to attempt settlement.

Parties guarantee each other against walkouts, strikes, lockouts or boycotts or any form of interference with operation.

Hours of labour: forty-eight per week, day, forty-five per week, night; on and after May 1, 1921, hours to be forty-four per week. Three shifts: day shift, eight hours; second shift, seven and one-half hours; third shift, seven hours, the last two being considered night work.

Overtime, first three hours, and until 6 p.m. Saturdays, time and one-half; thereafter, double time. Each day to stand on its own; maximum overtime in any one week, nine hours, except in emergency. Holidays, double time.

Union to furnish capable help at all times. Help may be borrowed between offices if union is unable to carry out obligations. Scale for members learning machine operation:

	Day.	Night.
First three weeks	\$15.00	\$18.75
Second " "	17.50	21.25
Third " "	20.00	23.75
Fourth " "	22.50	26.25
Fifth " "	25.00	28.50

Situations of men on active service to be restored to them on their return unless men are physically or mentally incapable, when if possible suitable positions will be given to them.

Wage scale: Per week, day work, July 1, 1920 to June 30, 1921, job compositors, composing machine operators, and proof readers, \$44; Per hour, July 1, 1920 to May 1, 1921, 92 cents; thereafter, \$1.00. Night work: Per week—\$47; per hour, until May 1, 1921, \$1.05; thereafter, \$1.15.

Apprenticeship: one for the house and one for every five men employed. Employing printer or local official examiner to examine applicants and determine if mentally and physically fitted to learn trade; apprentices to take a course of lessons in printing and to pass examinations.

Wages: Per week—third year, first half, \$21; second half, \$22.50; fourth year, first half, \$25; second half, \$27.50; fifth year, first half, \$30; second half, \$32.50. Right to increases in wages to be judged by standing in half-yearly examinations; if apprentice fails, extension of

three months to be given to current wage period.

**Monotype Caster Apprentices:** one for four casting machines or less, and one for each additional four. Apprentice to take course on Monotype Machine during second or third year, \$1 per week having been set aside from his previous wages for this purpose.

**WINNIPEG, MAN. — MANITOBA FREE PRESS CO., LIMITED, TRIBUNE PUBLISHING CO., TELEGRAM PUBLISHING CO., GRAIN TRADE NEWS, AND INTERNATIONAL TYPOGRAPHICAL UNION No. 19.** Agreement in effect from July 1, 1920 to July 1, 1921, and thereafter on thirty days' notice of change.

**Employers to employ only union members.**

Committees of two members from each party to be appointed. Union committee to take up questions about agreement, and joint committee to meet when questions are referred to it by officers of either party. Should committee be unable to agree, matter to be referred to a board of arbitration, of which one arbiter is selected by each pair of representatives, the two to agree on a third.

When machine work is substituted for hand composition, wages to be arranged by joint committee. Employers not to enter into any association or combination hostile to printing trades unions. Parties to agreement guarantee each other against walkouts, strikes, lockouts, or boycotts.

**Wages:** Per week—day work—machine operators, make-ups, proof-readers, bankmen, machinists and employees engaged in hand composition and distribution, \$45; 8 hours per day, Monday to Friday inclusive; night work, same classes, \$48, 7¼ hours per night, middle shift to come under night scale. Overtime, all shifts: first three hours, time and one-half; thereafter, double time. At end of six months' period, July 1, 1920 to January 1, 1921, wage scale to be opened for readjustment according to figures of weekly Budget in the LABOUR GAZETTE; basis to be the average figures

for December, 1919 to May, 1920 inclusive (\$24.84 per week). Should the average for June, 1920 to November, 1920 inclusive, show an increase over this basic figure, wages to be increased for period January 1, 1921 to end of contract in same proportion.

**Machine learners' scale:** Per week—first three weeks, \$16; second, \$18; third, \$21; fourth, \$24; fifth, \$27; sixth, \$30. Night scale, \$3 in advance of day. When learner has reached standard of efficiency he shall be employed on regular scales, if not competent at end of sixth three weeks he may be granted two months' extension.

Holidays, double time, not less than four hours per day and three hours forty minutes night being worked.

Overtime to be equally distributed where possible.

**Apprenticeship:** two journeymen and under ten, one apprentice; ten journeymen and under fifteen, two; fifteen and under thirty, three; thirty and under forty, four; five to be maximum. Apprentices to try yearly examination and show qualification for wage increase provided in following scale. Apprentices failing to qualify may have three months' extension.

**Wages:** Per week—start, \$16; six months, \$17; one year, \$18; one year and six months, \$19; two years, \$22; two years and six months, \$25; three years, \$28; three years and six months, \$32; four years, \$36; four years and six months, \$40. Night shifts, \$2 above scale.

Machinist's assistant to be classed as apprentice, not to interfere with allotment, and to receive apprentice scale.

**LONDON, ONT. — MASTER PRINTER AND BOOKBINDING ASSOCIATION, AND INTERNATIONAL BROTHERHOOD OF BOOKBINDERS, No. 206.** Agreement in effect from November 18, 1920 to May 18, 1921.

All offices conforming to this scale to be considered as "fair" offices.

**Wages:** Per week—November 18 to December 31, \$34; January 1, to April 30, \$35. Overtime, first four hours after

quitting time; no one to work more than three hours at time and one-half rate on any one day; thereafter, double time. Forty-eight hours to be worked before overtime commences, unless employee has lost time through lay-off, sickness, or holidays.

Hours of labour, per standard week, forty-eight hours.

Sundays and holidays, double time.

Night staffs, 15 per cent over day rates; forty-five hours per week; overtime after forty-five hours, time and one-half.

Apprentices to be indentured; no boy to be indentured under legal age. One boy for first four men or under, and one for each additional four.

Wages: Per week—first year, first 6 months, \$10; second 6 months, \$11; second year, \$14 and \$15; third year, \$18 and \$21; fourth year, \$24 and \$30; thereafter minimum wage scale.

Women's section: Female apprentice-ship term, three years.

Wages: Per week—first 6 months, \$8; second 6 months, \$9; second year, \$10 and \$11; third year, \$12 and \$15; thereafter minimum scale of \$16.50 per week.

Overtime for women, same as men. Holidays and Sundays, double time. Hours per week, forty-eight.

REGINA, SASK. — LOCAL PUBLISHING COMPANIES, AND INTERNATIONAL BROTHERHOOD OF BOOKBINDERS, No. 205. Agreement in effect from May 28, 1920 to April 30, 1921.

Men's scale:

Hours per week, forty-eight. Wages per week—journeymen, \$42.

Overtime, first three hours, time and one-half; thereafter and Sundays and holidays double time.

Apprentice scale: Per week—first year, first six months, \$10; second 6 months, \$12; second year, \$14 and \$17; third year, \$21 and \$25; fourth year, \$30 and \$35; thereafter, \$42. One apprentice to four journeymen.

Girls' scale:

Hours per week, forty-eight. Wages per week, \$21.

Overtime, first three hours, time and one-half; thereafter and Sundays and holidays, double time.

Wage scale: first 6 months, \$10; second 6 months, \$12; third 6 months, \$15; fourth 6 months, \$20; thereafter, minimum \$21.

Wages of bindery women in local 205 not to be less than 5% above the pending Winnipeg scale, same to be retroactive from May 1, 1920.

In event of reduction of staff, priority of employment to govern. Persons last discharged to be first reinstated.

Disputes to be submitted to arbitration.

TORONTO AND HAMILTON, ONT. — CANADIAN LITHOGRAPHERS' ASSOCIATION AND AMALGAMATED LITHOGRAPHERS OF AMERICA, Nos. 12 and 42. Agreement in effect from July 1, 1920 to July 1, 1921.

No discrimination against union labour on part of employers, or against non-union employees on part of union labour.

Hours of labour, forty-eight per week except in case of artists and engravers whose time shall remain as at present.

Apprentice committee of two members from each organization to review the labour situation each six months and agree on ratio of apprentices to journeymen for following six months.

Standing committee of four representatives from each party to be formed to consider all matters affecting the welfare of employees and the lithographic trade in general.

Minimum wage scale: Per week—process, crayon and stipple artists, engravers on stone and litho plates, \$45. Feeders, sizes up to 4½ size 36 x 52, \$25; sizes up to 5 and 5½ size 42½ x 62½, \$28; offset presses, \$30; one colour rotary, \$28; two colour rotary, \$30 (men on stone or direct rotary machines). Press men, flat bed presses: presses up to 4½ size 32 x 52, \$42; presses up to 5 and 5½ size 42½ x 62½, \$44. Rotary presses: single colour, size 30 x 40, \$41; single colour, above 30 x 40 up to 44 x

64, \$43; two colour, size 44 x 64, \$48; three colour size 44 x 64, \$53. Offset presses: one colour size 30 x 40, \$42; one colour size above 30 x 40 up to 34 x 48, \$45; one colour size above 34 x 48 up to 44 x 64, \$50; two colour, \$58. Proovers, \$43; commercial transferers, \$42; colour transferers, \$45; stone and plate preparers, \$30; photo lithographers, \$50.

Men incapable of earning the minimum wage to be classified by committee mentioned above.

Employees in shops included in this agreement to receive in July 1920 an increase of at least 10 per cent. of weekly wage as in effect for May 1, 1920.

Should cost of living as reported in the LABOUR GAZETTE, during period covered by this agreement, show an increase of over 5% over figures published in July 1920, wages to be advanced accordingly.

TORONTO, ONT. — CANADIAN PRESS LIMITED, AND COMMERCIAL TELEGRAPHERS' UNION OF AMERICA, CANADIAN PRESS DIVISION, No. 52. Agreement in effect from September 1, 1920 with 60 days' notice of change.

Only union members to be employed if available.

No telegrapher working under this agreement to participate in sympathetic strike or walkout of any nature.

Salaries—full time Morse leased wire telegraphers—salaries payable weekly, overtime twice monthly—Bureau offices at New York, Halifax, Ottawa, Toronto, Winnipeg, Calgary, Vancouver, Victoria and Seattle.

Bureau operators—Per week—day, \$50; night, \$51; line operators (extra operators engaged exclusively in individual newspaper offices) Per week—day, \$45; night \$46.

Hours of labour: eight, including 30 minutes for lunch by day or 45 minutes at night, and two rest periods of not more than 10 minutes each day and night; six days or six nights to constitute a week. Seventh day or night worked to be paid double time. All other over-

time, time and one-half, each day being reckoned separately.

Vacancies to be filled by promotion, other things being equal, length of service to decide.

Two weeks' vacation with pay to each telegrapher who has been in the service at least one year—holidays to be taken between May 1 and November 1.

In reduction of staff, junior operator to be first dispensed with.

In case of vacancies, appointments to be open only to operators in same division as vacancy, there being two divisions, Eastern and Western.

Grievances to be referred to District Traffic Manager or other official. Case may be presented in writing or in person, employee being accompanied by a fellow employee. Failing adjustment, case may be referred personally or through the general committee, to the General Manager. Failing settlement, case to be submitted to a Board of Arbitration.

Disputes in regard to this agreement to be submitted to a Board of Arbitration of three members—one representative of each party and a third, selected by these or by the Department of Labour. This shall be resorted to only if negotiations between general manager of Company and union chairman have failed.

#### Transportation—Electric Railways

QUEBEC, QUE. — QUEBEC RAILWAY LIGHT AND POWER COMPANY, MONTMORENCY DIVISION, AND WORKMEN EMPLOYED ON MAINTENANCE OF WAY. Agreement in effect from July 1, 1920, with 90 days' notice of change.

Hours of labour: eight consecutive hours, exclusive of meal hours, per day. The Company to have right to extend days' work to ten hours. Overtime after ten hours' work, time and one-half, holidays, time and one-half.

Permanent employees to be promoted to section foremen by grade of seniority, if qualified.

In case of reduction of staff, length of service to be considered. Employees dis-

charged in reduction of staff to be first reinstated when staff is increased. Preference to be given to actual employees in opening new lines or in extension work.

An employee with a grievance to be entitled to a just and impartial inquiry within ten days if he submits claim in writing. Employee may bring along to the enquiry two or more fellow workmen. cents; air brake fitters, 74½ cents; armature winders, first class, 80 cents; second class, 75 cents; third class, 72 cents; leading hands while so acting to receive 3 cents per hour additional.

Apprentices: Per hour—first year, 32 cents; second year, 37 cents; third year, 44 cents; fourth year, 49 cents.

Freight Shed Department: Per hour—checkers, 60 cents; truckers, 57 cents. Per month—auto drivers, switching clerk, first abstract clerk, \$128.50; rate and chief clerk, \$153.50; cashier, \$148.50; accountant, \$143.50; billing clerk, demurrage clerk, \$118.50; shedman, \$123.50.

Track maintenance men: Per hour—interurban, first 3 months, 50 cents; thereafter, 55 cents; city, first 3 months, 55 cents, thereafter, 60 cents. Per month—foremen, regular gang, \$133.50; extra gang, \$143.50. Where section houses are not provided, \$5 per month extra to be paid. Per hour—track welders, 71½ cents; track welders' helpers, 62 cents.

Monthly employees: Per month—baggage room, \$123.50 and \$128.50; auto drivers, \$128.50; interlocking tower men, \$118.50; depot master, \$128.50; ticket clerks, \$128.50; train dispatchers, \$188.50.

Bridge and building masters' maintenance gang: carpenters, painters and pipe fitters, per hour, 75 cents. Station agents: Per month—\$128.50 to \$148.50 according to station; assistant agents, \$123.50 and \$83.50.

#### Transportation—Water

PORT ARTHUR, ONT. — CANADIAN NATIONAL RAILWAYS, AND EMPLOYEES ON THE PORT ARTHUR COAL DOCK. Agreement in effect from May 1, 1920, to May 1, 1921, and thereafter with thirty days' notice of change.

Hours per day, eight. Men working less than one day to receive minimum of four hours' pay. Overtime, time and one-half. A man sent home during day in order to work at night to be paid overtime for night work; but if going home by own request, or if starting late

in morning, overtime to start after eight hours' work. Sundays and holidays, double time.

An employee to be disciplined or dismissed only after having been proven guilty on full and impartial investigation.

No discrimination against union labour. Promotion by seniority, fitness and ability.

Wages: Per hour—cable road men, 69¼ cents; tower hoisters, 83 cents; firemen (power house), engineer's helper, 72 cents; cable splicer, repairmen (over one year), 77½ cents, foreman, 74¾ cents; H. C. operator (scraper), 70½ cents; H. C. Shed foreman, 76 cents; engineers' assistant (power house), 83 cents; car loader operator, 73¼ cents; labourers, 65 cents.

FORT WILLIAM, ONT. — CANADIAN PACIFIC RAILWAY COMPANY, AND EMPLOYEES ON THE MEAD AND ISLAND COAL DOCKS AT FORT WILLIAM. Agreement in effect from May 1, 1920, to April 30, 1921, and thereafter with 30 days' notice of change.

Hours per day, eight. Men working less than one day to receive minimum of four hours' pay.

Overtime, time and one-half. A man sent home during day in order to work at night to be paid overtime for night work; but if going home by own request, or if starting late in morning, overtime to start after eight hours' work. Sundays and holidays, double time.

An employee to be disciplined or dismissed only after having been proven guilty on full and impartial investigation. No discrimination against union labour. Promotion by seniority, fitness and ability.

Wages: Per hour—Hulett Dock: Hulett operator, 88½ cents; Hulett bridge operator, 83 cents; Hulett transfer car operator, 72 cents; conveyor car operator, 74¾ cents; head repairman, 80¼ cents; repairman, 72 to 77½ cents; box car loader, 73¼ cents; oiler, 69¼ cents; weighman, 66¼ cents; coalman, 65 cents; watchman, 53¼ cents. Mead dock: tower or pick-up operators, start,

80¼ cents. after one year, 83 cents; trolley man, 83 cents; fireman on towers, 72 cents; fireman in boilerhouse, 69¼ cents; cable splicer, 77½ cents; boat repairman, 74¾ cents; repairmen, 67½ to 77½ cents; operator No. 5 hard coal sheds, 73¼ cents; scraper operator, 70½ cents; oiler, 69¼ cents; carpenter, 74 cents; bridge engineer, 72 cents; men changing cables, cable road men, 69¼ cents; car checker and sealer, 67½ cents; spur track foreman, foreman No. 5 hard coal shed, 74¾ cents; dockmen, car trimmers, 65 cents; night watchman, 53¼ cents; box car loader, 73¼ cents.

### Building and Construction

ST. CATHARINES, ONT. — BUILDERS' EXCHANGE, AND UNITED BROTHERHOOD OF CARPENTERS AND JOINERS OF AMERICA, Nos. 38 and 2632. Agreement in force from May, 1919, to April 30, 1921.

Agreement published in August, 1919, issue of the LABOUR GAZETTE, page 957.

Minimum wage rate per hour changed on May 1, 1920, from 70 cents to 85 cents.

SARNIA, ONT. — FOUR LOCAL CONTRACTORS, AND INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, No. 1004. Verbal agreement in effect from May 1, 1920, to May 1, 1921.

Hours of labour, eight per day; four hours on Saturday. Overtime, until midnight, time and one-half; thereafter and Sundays and holidays, double time.

Any workman reporting five or more minutes late to be docked one-half hour; if more than one-half hour late, to be docked one hour.

Wages: Per hour—journeymen wiremen, \$1.00; improver wiremen, 65 to 80 cents; apprentice, one year's experience, 55 cents. Electricians, same classes and rates as wiremen. Improvers to receive increases in pay on passing examination. Foreman to receive 50 cents per day above scale.

POINT EDWARD, ONT. — CENTRAL CANADA STONE COMPANY, LIMITED, AND JOURNEYMEN STONE CUTTERS' ASSOCIATION OF NORTH AMERICA. Agreement in effect from April 15, 1920, to

April 14, 1921, with three months' notice of change.

Wages: Per hour—journeymen stonecutters, 87½ cents; planermen, 72½ cents. Stonecutters employed as planermen or lathemen to receive 5 cents above regular rate.

Hours of labour: Per day—stonecutters, eight hours, machinemen, ten hours; in each case, four hours on Saturdays. Overtime in necessity only.

Apprentices: term for machine men who are not stonecutters, one year. Wages: Per hour—start, 45 cents; end of year, 72½ cents.

BRANDON, MAN. — GENERAL CONTRACTORS' SECTION OF BRANDON BUILDERS' EXCHANGE, AND BRICKLAYERS AND MASONS' INTERNATIONAL UNION, No. 2. Agreement in effect from May 1, 1920, until May 1, 1921—although not signed until October 25, 1920.

Hours of labour, eight per day, four hours on Saturdays. Time and one-half until 10 p.m., thereafter and Sundays and holidays, double time.

Minimum wage: Per hour—bricklayers and masons, \$1.25; foreman, at least 10 cents per hour above journeymen's rate.

Employer to pay car-fare if necessary or walking time to be allowed, three miles per hour.

Disputes to be referred to a joint committee of three from each party. No strike or stoppage of work to be permitted while readjustment is in process.

Parties to meet during February, 1921, to formulate a new agreement.

SASKATOON, SASK. — BUILDERS' EXCHANGE AND BRICKLAYERS', MASONS' AND PLASTERERS' INTERNATIONAL UNION, No. 3. Verbal agreement in effect from May 1, 1920.

Hours of labour, eight per day, four hours on Saturdays.

Wages: Per hour—\$1.25. Work on holidays, only when extremely urgent, double time.

VANCOUVER, B. C. — CONTRACTORS, AND PILE DRIVERS, BRIDGE, DOCK AND WHARF BUILDERS OF BRITISH COLUMBIA, CHARTERED BY THE UNITED

**BROTHERHOOD OF CARPENTERS AND JOINERS OF AMERICA, No. 2404.** Verbal agreement in effect from January 1, 1920.

Hours of labour, eight per day, four on Saturdays. Overtime, double. On road jobs outside twenty-five miles' radius from Victoria and Vancouver, forty-eight hours per week.

Wages: Per day—pile drivers; boom-men, \$7.50; bridge men, \$7; wharf carpenters, \$7; firemen and crew, \$7; foreman not less than \$2 per day more than crew. Double time for the second shift in twenty-four hours, and for holidays.

No personal grievance to be recognized by the union unless for promotion of union principles. Member accepting less than minimum to be fined or expelled or both.

Members may go on sympathetic strike to uphold union conditions and principles.

Union members not to work in open shop, under police protection or where an injunction has been issued against maintaining union principles.

#### **Glass, Stone, Cement, etc.**

**REDCLIFF, ALTA. — EMPLOYERS, AND AMERICAN FLINT GLASS WORKERS' UNION - CHIMNEY BRANCH.** Verbal agreement in effect from September 15, 1920, to September, 1921.

Piece rate earnings per turn, on listed move; off-hand chimneys: blower, \$4.60; gatherer, \$3.45. Special chimneys: blower, \$5.18; gatherer, \$3.74. Reflectors: per turn, gaffer, \$5.85; gatherer, \$4.00. Paste mould chimneys: (German system), blower \$5.18; blocker, \$4.31; gatherer, \$3.74; (American system) blower, \$4.89; gatherer, \$3.45. German method, chimneys blown in paste mould, two blowers, each, \$4.74½; one ball gatherer, \$3.74; or one blower, \$5.18; one blocker, \$4.31; one ball gatherer, \$3.74.

No work before 6 a.m. Monday or after noon on Saturday.

Hours per day, eight; nine if necessary. Four hours of turn to be worked

continuously; paste mould chimney shops, 4¼ hours per turn.

Every member to be fined \$5 if he does not insist on seeing all chimneys deducted from his wages broken down.

One new finishing boy once a year to each shop short of a boy. Eleven turns per year of 4½ hours' work on an average turn's pay. A new boy to be one who has had no experience in finishing.

Any disagreement to be settled in factory in which it occurs; in case of failure to agree, matter to be referred to manufacturers' and workers' committee for settlement. Pending decision, no lockout, strike or cessation of work by employer or employed. Decision of committee to be binding. Union to assist in procuring competent workmen to fill place of employees violating this rule.

#### **Domestic and Personal Services**

**BROCKVILLE, ONT. — CERTAIN MASTER BARBERS AND JOURNEYMEN BARBERS' INTERNATIONAL UNION OF AMERICA, No. 283.** Verbal agreement (By-laws) in effect from July 1, 1920.

Minimum wage: Per week—\$20, and half over \$28 on gross receipts.

No union man to work in non-union shop except when given permission.

One half-day off each week. Union shops to close Monday and Friday nights at 6 p.m., Tuesday, Wednesday and Thursday nights at 7.30 p.m., and Saturday nights, Christmas Eve, New Year's Eve at 10 p.m., and on all holidays, except when falling on Saturday, shops to close at noon. No Sunday work except in case of sickness.

Union shops to have their blinds raised or leave doors unlocked on holidays and Sundays.

Any member not taking his half-day off, or returning to work on night of his half-day, to be fined \$1.

Any member out of work to report same to secretary without delay.

**WINDSOR, ONT.—MASTER BARBERS, AND JOURNEYMEN BARBERS.** Agreement

in effect from May 1, 1920, until May 1, 1921.

Wages, guarantee, Per week — journeymen barbers, \$25 and 65 per cent of gross receipts over \$35.

REGINA, SASK.—MASTER BARBERS, AND JOURNEYMEN BARBERS. Agreement in effect from July 26, 1920, to July 26, 1921.

Wages: Per week—65 per cent with a minimum of \$25.

Hours of labour; nine per day, between 8 a.m. and 6.30 p.m.; Saturdays, between 8 a.m. and 10 p.m.

One week's holiday per year at minimum pay, after January 1, 1921.

Present Wednesday half-holiday to remain for balance of this year.

VANCOUVER, B. C.—EMPLOYERS, AND SOFT DRINK DISPENSERS. Verbal agreement in effect from January 1, 1920.

Only good standing members to be employed. Wages: Per day, men \$5. Eight hours per day. Overtime: 75

cents per hour. Extra shifts: men, \$6 per day of eight hours.

CALGARY, ALTA. — LOCAL THEATRES AND MOVING PICTURE OPERATORS, No. 302. Agreement in effect from September 6, 1920, to September 5, 1921.

Only union men to be employed.

Wages per week of six six-hour days, \$45. Extra work, per hour, \$1.25. Sunday work, \$2 per hour or less. Day work, \$1.25.

Employer to regulate working conditions and management of performances but not to enforce anything which conflicts with agreement.

If Government reports show an increase in cost of living in any quarter of term agreement, wage schedule to be increased or decreased for and during the succeeding quarter in the same proportion or percentage as said total increase or decrease in cost of living is shown in reports. Provided scale in this agreement shall be a minimum basis.

## WAGES IN THE AGRICULTURAL IMPLEMENT INDUSTRY IN CANADA

THE Dominion Bureau of Statistics continues its detailed industrial census of Canada with a preliminary report, issued in November, on the agricultural implement industry in 1919. The statistics presented in the report cover the operation of 86 plants distributed by provinces as follows:—Ontario, 51; Quebec, 20; Manitoba, 7; Alberta, 3; Saskatchewan, 3; and Prince Edward Island, 2. The selling value of factory products during the year aggregated \$36,703,943, the largest items in the list in value being harvesters, ploughs, drills and threshers. The total capital invested in the industry was \$83,276,450, while the annual expenditure including materials used, fuel and miscellaneous operating expenses, but excluding wages and salaries, totalled \$19,856,234.

The total average number of employees in the industry was 10,808 (of whom 566 were females), with wages or salar-

ies aggregating \$11,858,013. Of the employees 9,234 males and 301 females were on wages, which amounted to \$10,011,029 during the year; while officers and other salaried employees numbered 1,263, receiving \$1,844,940 for their services during the year. The employees on wages are classified in groups as follows:—

Wage group.	16 years and over		Under 16 years		Total
	Male	Female	Male	Female	
Under \$10 per week	114	9	80	11	214
\$10-\$15 per week..	611	111	32	..	754

## AGREEMENT IN THE ANTHRACITE COAL MINING INDUSTRY OF THE UNITED STATES]

---

ON June 3 last, a Commission was appointed by President Wilson to award a new scale of wages for anthracite coal miners after the failure of a joint conference of operators and mine workers to reach an agreement. The report of the Commission with its findings and award was made public on August 30. A minority report was also submitted by Commissioner Neal I. Ferry, representative of the men. On September 2, representatives of the miners and operators signed a two-year agreement embodying the terms of the award of the Commission.

The agreement provides for an increase in the contract rates at each colliery amounting to 65 per cent above the rates effective in April, 1916, as established under the agreement of May 5, 1916. The hourly rates of outside and inside company men receiving \$1.545 or more per day under the agreement of May 5, 1916, are increased by 17 per cent of the total rate in effect, namely, the base rate established under the agreement of 1916, plus the war allowance granted under the supplementary agreement of November 15, 1918, but the new rate must not be less than 52½ cents per hour for those employed on the basic eight-hour day. The shift rate is also increased 17 per cent but must not be less than \$4.20 per shift. Consideration miners also receive an increase of 17 per cent. The hourly rates of outside and inside employees receiving less than \$1.545 per day under the old agreement are increased 4 cents an hour over the total

rate in effect. Contract miners' labourers and consideration miners' labourers shall receive the same increase per day as company labourers, but in the case of contract miners' labourers the miner is to pay so much of the increase "as shall be represented by the application of 65 per cent to the rate per basic shift," the balance being paid by the operator. Monthly men coming under the old agreement shall be paid an increase of 17 per cent over the existing rate. The increased rates are made retroactive to April 1, 1920, and the amounts due to employees who have died since that date will be paid to their legal representatives. The case of inside pumpmen and inside and outside hoisting engineers working a 12-hour cross shift will be referred to a Board of Conciliation which shall work out a basis of 8-hour shifts and the rate to be paid for an 8-hour day. The Board of Conciliation shall report to the joint conference at the expiration of this contract, or sooner, on the matter of uniformity in day rates for the several occupations of day men of the respective collieries. Compensation for work of contract miners under abnormal conditions shall be referred to the grievance committee, if the foreman and men affected cannot agree upon the compensation. Work shall be continued pending adjustment, and whatever decision is made shall be retroactive.

A summary of an agreement similarly arrived at in the bituminous coal mining industry of the United States appeared in the LABOUR GAZETTE of May last.

## PRICES, RETAIL AND WHOLESALE IN CANADA, NOVEMBER, 1920

**T**HE downward movement in prices since the early summer continued, decreases appearing again in the wholesale prices index numbers as well as the weekly family food budgets. The chief changes were in grains, in live stock and meats, flour, and sugar. In textiles, metals, and in some lines of building materials, there were also considerable decreases.

In retail prices the average cost of a list of staple foods in sixty cities at the middle of November was \$15.32 as compared with \$15.93 at the middle of October, \$14.23 in November, 1919, and \$7.96 in November, 1914. The chief decrease for the month was in sugar, but there were slight decreases in nearly all of the 29 items included, except in potatoes and eggs which advanced. In coal, wood, and coal oil there were slight increases, and rents were higher in several of the cities.

In wholesale prices the departmental index number fell to 304.2 for November as compared with 317.6 for October, 307.7 for November, 1919, and 137.5 for November, 1914. The chief decreases for the month were in grains and fodder, animals and meats, miscellaneous foods, textiles, metals, coke, paints, oils, glass, chemicals, and raw furs. There were slight increases in dairy products and in fresh vegetables.

The accompanying tables and notes give details as to the prices movement during the month and as compared with the same month in previous years.

The table of retail prices gives statistics for some 60 localities in Canada, having a population of approximately 10,000 or over. Quotations are obtained by the correspondents of the LABOUR GAZETTE, resident in each locality, from representative dealers doing a considerable trade with workingmen at the middle of the month. All prices are for

delivered goods. The exact quality for which the quotation is given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The list of commodities includes over one hundred staple foods, and groceries, coal, wood and coal oil, the number of articles having been increased twice since January, 1910, when the regular publication of these statistics was begun.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts, with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central, without modern conveniences or with incomplete conveniences.

The weekly family budget calculated in terms of the average prices in the cities for which reports are received includes twenty-nine staple foods, laundry starch, coal, wood, coal oil, and rent, these being the items for which statistics have been obtained each month and published in the LABOUR GAZETTE since January, 1910. The quantities of each commodity included are modifications of those employed in similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance the only fruits are evaporated apples and prunes, and the only fresh vegetable is potatoes. As market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportion of expenditure on the various foods

therefore tends to be maintained.\* In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the difference in quality. It was estimated, when the budget was first published in 1912, that these calculations represented from sixty to eighty per cent of the expenditure of an ordinary family, according to the total income. For the average family of five the expenditure on these items of food, fuel, light, and rent would be perhaps two-thirds or about sixty-five per cent of the total income. While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province. The quantities of meats, dairy products, cereals, etc., included were designed to afford a liberal supply for the healthy family of a man at hard physical work. On the other hand an average family with an income sufficient to do so would buy less meat, etc., but more fruit, fresh and canned vegetables, etc.; so that the comparative expenditure would be little changed.

The index number of wholesale prices is based on the quotations for 271 commodities, and is the simple average of the percentages of current prices of the several commodities in relation to the average prices for the base period, 1890-1899, these being therefore made equal to 100. The quotations for most farm products are obtained weekly and averaged for the month, the quotations for other commodities are taken for the middle of the month. The table of index numbers shows the changes by groups and sub-groups for the previous

month and for corresponding months back to 1913.

### Retail Prices

In meats there were slight declines in nearly all lines following decreases in live stock, as is usual in the autumn. Lard averaged lower. Eggs advanced as is usual for the season, but averaged 5 to 7 cents per dozen higher than the year before. Milk was higher at Halifax, Moncton, Brockville and Kingston, but was lower at Toronto, Hamilton and Stratford. Butter averaged 2 to 3 cents lower, having declined in several cities, but there were slight advances in others. Bread, flour and rolled oats were lower. In tapioca there were decreases in a number of cities. Canned tomatoes declined in 5 cities and canned peas in 9. Beans averaged slightly lower. Potatoes were down in some of the cities, but up in others, the average being slightly higher. Evaporated apples and prunes were slightly lower. Sugar averaged 3 cents per pound lower, being down to 14 and 15 cents per lb. in Ontario and Quebec, but 18 to 20c. and 22c. in some cities. Anthracite coal was higher and bituminous coal also advanced in several cities. Wood advanced in a number of the cities. Rent was higher at Windsor, Winnipeg and Edmonton.

### Wholesale Prices

GRAINS AND FODDER.—Manitoba wheat, No. 1, Northern, had recovered slightly at the beginning of the month, reaching \$2.31 per bushel, but was down to \$1.87 in the last week. Ontario winter wheat was down from \$2.10 to \$1.70. Barley fell at Winnipeg from \$1.18 per bushel to 93c. At Toronto, barley fell from \$1.15 to 83c. Oats fell at Winnipeg from 68c per bushel to 53c. and at Toronto from 64c. to 48c. American corn fell from \$1.23 per bushel to \$1.05 at Toronto. Flaxseed fell at Winnipeg from \$2.80 per bushel to \$1.86 but recovered in the last week to \$2.00. Peas came on the market at \$2.10-\$2.15 per bushel at Toronto but fell to \$1.75-\$1.80. Rye fell

\*At times when the price of an article heavily weighted for this purpose rises (or falls) abnormally the increase (or decrease) in food prices so indicated is exaggerated and this should be taken into account in using the budget as an indicator of changes in the cost of living.

(a) In bottles.

(b) Hard coal.

(c) Including delivery charges.

\* Per load of 3 1/2 cord.

from \$1.75 per bushel to \$1.50. Hay at Montreal was down from \$33.00 per ton to \$30.00. Bran and shorts eased off to \$38 and \$48 per ton respectively.

**ANIMALS AND MEATS.**—Cattle at Winnipeg fell from \$10 per hundred pounds to \$9.50, and at Toronto from \$12.50 to \$11.50. Beef, dressed hindquarters, at Toronto fell from 25c. per pound to 23c. Flate beef was down to \$25 per barrel. Hogs had fallen to \$18.25 per hundred pounds at Toronto at the end of October and declined throughout November, being down to \$14.75 at the end of the month. Dressed hogs fell from 28c. per pound to 23c. Breakfast bacon declined from 50c. per pound to 48c. and medium weight hams from 40c. per pound to 36c. Lard declined from 30½c. per pound to 28½c. Sheep were firmer at \$6.00-\$7.50 per hundred pounds. Mutton declined 1c. to 14-19c. per pound. Dressed lamb fell from 24-27c. per pound to 23-26c. Fowl at Montreal was up to 33c. per pound. Turkeys eased off from 55c. per pound to 48-52c.

**DAIRY PRODUCTS.**—Butter had fallen to 50c. per pound at Montreal at the end of October but recovered to 52c. at the beginning of November and reached 55c. by the end of the month. Cheese fell from 24½c. per pound to 20½c. Eggs advanced from 75c. per dozen to 85c. at Montreal and Toronto. Milk declined at Toronto from \$3.25 per 8 gallon can to \$2.90.

**FISH.**—Dried cod fell to 9c. per pound and haddock to 6c. Canned lobsters fell from 45c. per pound to 40c. The export market for fish was still quiet. Salt rackarel advanced from 8c. per pound to 9c. and salt herrings from 2½c. to 3c. Lake trout at Toronto fell to 17-18c. per pound.

**FRUITS AND VEGETABLES.**—No. 1 apples were up to \$6.00-\$8.00 per barrel at Toronto. Late pears came on at 35-60c. per basket and rose to 50-65c. California lemons came on at \$5.50 per box and navel oranges at \$7.50-\$8.50. Evaporated apples were lower at 15c. per pound. Prunes came on the market at 14½c. per pound for 70-80 size. Potatoes advanced to \$2.40-\$2.50 in small lots

at Toronto. Quebec potatoes were up to \$1.85-\$1.90 at Montreal in car lots and New Brunswick potatoes were up to \$2.00. Beans were firmer at \$4.50-\$4.75 per bushel at Montreal. Onions were up to \$1.50-\$2.25 per hundred pounds. Turnips were firmer at 75c. per bag. Canned corn was lower at \$1.50-\$1.65 per dozen. Canned peas were down to \$1.75 and canned tomatoes to \$1.72½.

**MISCELLANEOUS FOODS.**—Flour was lower at \$12.20 per barrel for spring wheat patents at Toronto. Rolled oats fell to \$4.25 per bag. Tapioca was lower at 10-10½c. per pound. Several grades of tea were down 5c. per pound. Sugar was down to \$15.76 per hundred at Toronto at the middle of the month as compared with \$19.76 at the middle of October. In yellow sugar the decrease was from \$19.36 to \$14.76. Glucose, honey, pepper, cream of tartar, and baking soda were lower.

**TEXTILES.**—Ontario wool, unwashed, was down to 15-25c. per pound. A line of yarn was lower at \$1.70 per pound. Raw cotton at New York was down from 22c. per pound to 20c. Several lines of cotton goods were down 10 and 15 per cent. Raw silk was lower at \$6.50 per pound. Jute, hessians, flax products, and oilcloth were lower.

**HIDES, LEATHER, BOOTS AND SHOES.**—Beef hides were down to 8c. per pound, and calf skins to 10c. Harness leather was lower at 81-84c. per pound for No. 1 R.

**METALS AND IMPLEMENTS.**—Wrought iron scrap fell from \$25. per ton to \$20. Aluminum was 2c. lower at 33c. per pound. Brass was 2c. lower at 38½c. per pound. Copper was 2½c. lower at 19½c. Lead declined ½c. per pound to 8½c. Quicksilver fell from \$75 per flask to \$60. Silver bar was down to 74c. per ounce. Spelter was lower at 9c. per pound. Tin was 3c. lower at 47c.

**FUEL AND LIGHTING.**—Bituminous coal averaged higher in Vancouver Island, Connellsville coke, furnace, was down to \$10.00-\$12.00 at the ovens and foundry coke was down to \$8.00-\$10.00.

\*Preliminary figures. †Eight commodities off the market, fruits, vegetables, etc. One line of spelter was dropped in 1915.

**BUILDING MATERIALS.**—Lumber markets were reported easier as the demand was quiet for building and for wood-work in factories. In British Columbia several grades declined \$5. per M. Lead pipe was 1c. lower at 16c. per pound. Copper wire was 1c. lower at 19c. per pound. Sash cord was higher at Toronto owing to an increase in freight rates. Linseed oil was down to \$1.20 per gallon and turpentine was down to \$1.80. Window glass declined nearly 20 per cent.

**HOUSE FURNISHINGS.**—No changes were reported.

**DRUGS AND CHEMICALS.**—Bleaching powder, copperas, and soda ash were lower.

**MISCELLANEOUS.**—In raw furs, prices declined considerably, mink being down from \$12 per skin to \$10, muskrat from \$2 to \$1, raccoon from \$9.50 to \$5, and skunk from \$6.75 to \$2.50. In pulp and paper markets the demand was reported to be lighter and supplies were easier to obtain. Crude rubber was again lower at 20c. per pound. Manila rope fell from 33½c. per pound to 31c. and laundry starch from 10¾c. per pound to 9¾c.

## PRICES IN THE UNITED KINGDOM AND IN OTHER COUNTRIES

**T**HE accompanying tables and the following statistics as to the prices in the United Kingdom and in other countries.

### United Kingdom

In Great Britain, the Ministry of Labour reported a marked increase in the general level of retail prices of the principal articles of food, the average increase since July, 1914, in the cost of pre-war budget of foods being 191 per cent at the first of November as compared with 170 per cent at the first of October. About two thirds of this increase for the month is said to be due to the advance in the prices of bread and flour, following on the further reduction in the Government subsidy which was established during the war in order that flour and bread prices might not rise beyond the reach of the poorer classes. The maximum price of butter was raised by the Government 4d. per lb. Milk and eggs were also reported higher. Thus the transition from Government-controlled prices to prices fixed in the open market is marked by increased prices for foods in Great Britain.

Rents were estimated as having advanced about 42 per cent since July, 1914, one-half of this increase being due to higher local rates and water charges.

Clothing prices were declining, the prices of boots showing more numerous decreases during the month than those of other articles. Suits and overcoats, underclothing and clothing materials all showed some fall in prices on the average. The increase at the first of November since July, 1914, was estimated at 320 per cent as compared with 330 per cent at the first of October.

Little, if any, change for the month was noted in the cost of fuel and lighting.

In wholesale prices, the Economist's index number indicated a considerable decline in the general level during the month. Since April last, the decline has been continuous except in one month but in none of these months has the drop been so marked as in October. On October 1, the percentage change was estimated at 326.1. On November 1, the corresponding figure was 299.7. A fall in textile prices was responsible for a large part of the decline, but there were decreases also in rubber, timber, oils, cereals, meat, and minerals.

### France

In Paris, the general level of retail food prices in October rose 3.3 per cent

\*230 Commodities 1990—1999; 272, 1910—1914; 271, 1915—

over that of the previous month and is 320 per cent higher than in July, 1914.

Holland

Retail prices of food in Amsterdam rose in September 2.2 per cent as compared with August, the percentage increase over the level for 1913 being 123.4.

Sweden

In Sweden, the index figure for the cost of living was slightly lower in October than in September, food, fuel and lighting being included in the compilation. Prices in Stockholm decreased more than in the other centres. Compared with July, 1914, the increase in the principal towns was estimated at 206 per cent.

Finland

Official investigations into the cost of living in Finland were not made during the latter part of the war. Prices of certain of the more important necessities in various districts were published in the journal of the Finnish Ministry of Labour. The Department for Social Affairs has undertaken recently to conduct an investigation at the request of the employees of the public service of Finland. Preliminary results of this inquiry have been published and translated by the International Labour Office at Geneva. The accompanying table of index numbers is based on returns from 20 places and refers to the cost of maintaining the pre-war standard of living for a workingman's family of five members.

New Zealand

In New Zealand retail prices of foods in 25 towns increased during October 2.7 per cent over those of September. As compared with similar prices in July, 1914, the increase is estimated at 77.5 per cent, regard being had to the relative importance from the point of view of consumption of the various commodities before the war.

United States

The Bureau of Labour Statistics published in the Monthly Labour Review,

October, 1920, the accompanying table showing the changes in the cost of living in the United States from 1913 to June, 1920. The figures are averages based on the prices secured in 18 cities up to December, 1917, and in 31 cities from that date to June, 1920. The first column in the table shows what percentage the average expenditure for each group of items is of the average total expenditure per family. It will be noted that the total increase during this period is 116.5 per cent, the largest increase being that of 192.7 per cent in furniture and furnishings and the next highest being 187.5 per cent in clothing.

## INCREASE IN THE COST OF LIVING IN THE UNITED STATES.

Item of Expenditure	Per cent o total Expenditure	Per cent of increase from 1913 (average) to—

In wholesale prices, Bradstreets' index number for December 1st reflects a decrease greater than that for any previous month since the decline began in February. A fall of 13 per cent brings the index number to the lowest point reached since November, 1916, and the price level stands now at 56 per cent above that of August 1914.

That this decline, as no doubt was the case with the advance, has perhaps been rather more

precipitate than has been warranted by trade conditions, seems possible from the reports received since December 1st of rallies in some commodities, notably wheat, the other grains, flour, raw cotton, gray goods, lead, zinc and other products. As for month past and indeed since the decline began, the weakness in prices in November was most marked in the textile group, mostly raw materials and staple manufactured cotton goods. Coming next to these in importance of decline shown was the hide and leather, metal, oil, live stock, naval stores, and chemical and drug groups.

## RECENT LEGAL DECISIONS AFFECTING LABOUR

THE three legal decisions which are summarized below deal respectively with the power of provincial legislatures and governments with respect to

Japanese workers; a dispute between two trade unions over the ownership of funds; and the powers of a minor to bring an action under Quebec law.

#### The Legislature and Government of British Columbia cannot exclude Japanese from employment on public works

In response to four questions submitted, in pursuance of an order-in-council, to the British Columbia Court of Appeal by the Attorney General of that Province, an important judgment was recently handed down which was to the effect that the province had no power to exclude Japanese from employment on public works.

The order-in-council set forth that by

the Japanese Treaty Act, 1913, the Dominion of Canada had declared its adhesion to the Treaty between the United Kingdom and Japan, but that on April 2, 1902, a resolution had been passed by the Legislative Assembly of the province providing "that in all contracts, leases and concessions of whatever kind entered into, issued, or made by the Government, or on behalf of the Gov-

ernment, provision be made that no Chinese or Japanese shall be employed in connection therewith." Since the passing of this resolution the Government of the province had continuously inserted in its contracts for public works a provision that no Chinese or Japanese should be employed in connection therewith, and had caused a similar provision to be inserted in its contracts and leases in respect to public lands.

The questions submitted and the judgment of the Court were briefly as follows:

1. "Does the said Japanese Treaty Act, 1913, operate or apply so as to limit or affect the legislative jurisdiction or powers of the Legislative Assembly of the Province, and, if so, in what particular or respect?"

2. "If the said Act does not operate or apply so as to limit or affect the legislative jurisdiction or powers of the Legislative Assembly of the Province, does the said Treaty itself operate or apply so as to limit the legislative jurisdiction or powers of the said Legislative Assembly and, if so, in what particular or in what respect?"

In the opinion of the Court the answer to both questions is to be found in the judgment of the Privy Council delivered by Lord Watson in *Union Colliery Company, of British Columbia, vs. Bryden and the Attorney-General of British Columbia*, 1899, A. C. 580. The Provincial legislation in question in that case prohibited the employment of Chinamen underground in coal mines. The decision makes it clear that in all matters, which directly concern aliens and naturalized persons resident in Canada, the Dominion Parliament is invested with the exclusive jurisdiction. Therefore, the Legislative Assembly of the Province has no jurisdiction in the premises, not because of the Treaty or the Treaty Act but because power to

legislate was withheld by the British North America Act.

3. "Is it competent to the Legislature of British Columbia to authorize the Government of the Province to insert as a term of its contracts for the construction of Provincial public works a provision that no Japanese shall be employed upon, about, or in connection with such works?"

4. "Is it competent to the Legislature of British Columbia to authorize the Government of the Province to insert as a term of its contracts and leases conferring rights and concessions in respect of the public lands belonging to the Province, including the timber and water thereon and the mineral therein, a provision that no Japanese shall be employed in or about such premises?"

On these two points the opinion of the Court was as follows:

"It follows from the answer to the first and second questions, that it would not be competent to the Legislature to pass a law prohibiting the employment of Japanese in or about the works and premises referred to in the questions, but it was argued by the Attorney-General that the Government might, with propriety, insert in its contracts terms placing the other party under obligation to refrain from employing persons of a particular race just as the Government itself might, if it were the employer, pick and choose its employees.

"The answers to the other two questions, I think apply as well to these but, if not, then as the Treaty Act has made the Treaty the law of Canada, in so far as the subjects embraced in it are within the legislative powers of Parliament, any Act or resolution of the Provincial Legislature repugnant thereto would be contrary to the Dominion statute and, therefore, beyond the competence of the Provincial Legislature to enact or pass." (*British Columbia—In re the Japanese Treaty Act, 1913.*)

**Dispute between two Unions over Ownership of Funds**

An action was brought in the Court of King's Bench of Manitoba for the possession of certain funds claimed by two rival labour organizations. The facts of the case as set forth in the judgment were as follows: In April, 1919, Jubilee Lodge No. 6, a local branch of the International Brotherhood of Railway Carmen situated at Winnipeg, voted a sum of money to the One Big Union for propaganda work. The Grand Lodge of the International Brotherhood took the view that this action was a diverting of lodge funds to a purpose and object not recognized by the Brotherhood. On May 9, the General President wrote to the lodge making the charge that such action could only have been taken to destroy and depreciate the usefulness and standing of the Brotherhood, and intimating that unless their officers showed cause to the contrary within fifteen days the charter would be revoked. No action was taken by Jubilee Lodge on this letter, and it appeared that the Grand Lodge considered the charter revoked at the time stated. Similar steps were taken with regard to North Star Lodge of the same union also situated in Winnipeg.

At a general meeting of the Railway Carmen of Winnipeg, members of the three local lodges of the International Brotherhood, held on May 13, it was decided to form themselves into Carmen's Council, Sections A., B. and C., which was to come into being on the revocation of the lodge charters. Two days later the regular meeting of Jubilee Lodge No. 6 was held, and it was there decided that the executive officers of the lodge should consider themselves as executive

officers of Carmen's Council, Section A, when it came into existence.

On May 21, on a motion carried at a meeting of the Executive Committee of Jubilee Lodge, the money to the credit of the Lodge, over \$800, was withdrawn from the bank and placed in the hands of the treasurer, with the object of appropriating it for the Carmen's Council. Three days later the charter of Jubilee Lodge No. 6 was revoked.

On June 5, there took place a meeting of ex-members of the defunct lodge, or, as it was held by some, a meeting of Carmen's Council Section A. The meeting unanimously endorsed the action of the executive in transferring funds from Jubilee Lodge No. 6 to Carmen's Council Section A. The ex-treasurer of Jubilee Lodge apparently considered that he had become treasurer of Carmen's Council Section A, for a few days later he sent in his resignation as such. Soon after he handed over the funds of Jubilee Lodge to the newly appointed treasurer of Carmen's Council Section A. On June 20, the Grand Lodge of the International Brotherhood issued a new charter to Jubilee Lodge No. 6. Suit was then brought by this lodge in conjunction with certain of its members, laying claim to the funds of the defunct lodge.

The plaintiffs, in their pleadings, assumed that the original Jubilee Lodge was revived by the second charter and that the two might be considered a continuing organization. The court expressed the opinion that this was not the case, since there was not a single name appearing in one charter that appeared in the other, and the name in itself signi-

fied nothing as it could have been given to any new lodge. Nor was there anything that made the new lodge successors to or trustees for the old lodge. There was in short no continuity between them. For these reasons the Court held that the present Jubilee Lodge No. 6 could not sue, nor could its members either as such or as representing this lodge. Nor could old Jubilee Lodge No. 6 sue, as it was out of existence. For the same reason the plaintiffs could not sue in its name, but they could sue individually by virtue of having been members of it.

There was no provision for the distribution of unexpended funds in the constitution of the original Jubilee Lodge. In the circumstances the money left belonged to the original contributors, that is to the members of the original lodge who were in good standing when it went out of existence. The treasurer of the original lodge was right when he conformed to the orders of the Lodge Executive to withdraw the money from the bank, but he was wrong in transferring the funds to the new treasurer of Carmen's Council Section A.

The judgment of the Court was as follows: "With respect to the defendants, I would allow to amend the style of cause so as to embrace all members of Carmen's Council Section A. The action will be dismissed as to Jubilee Lodge suing in its own name, but without costs. The other plaintiffs are entitled to a declaration that the fund is the property of the members of Jubilee Lodge as originally constituted, who were in good standing on May 24, 1919. It will also be ordered that the defendants deposit the said fund into Court. This is advisable, as it has not been clearly shown that the Grand Lodge was formally notified, and it may be necessary to enquire further into the amount at one time claimed by the joint protective board. It may also be advisable that a receiver be appointed to make the distribution. There will also be an order for further directions. The individual plaintiffs should have their costs." (*Manitoba—Jubilee Lodge No. 6 et al vs. Carmen's Council Section "A" et al.*)

**Suit of minor under Quebec Workmen's Compensation Act must be brought in name of tutor**

A minor employed in a factory met with an accident when at work which caused the loss of the tips of two fingers of his left hand. He brought an action in his own name against his employers under the Quebec Workmen's Compensation Act. The plaintiff claimed that the accident was due to the fault of his employer as the machine on which he was working was defective. He further alleged that he was a flutist in an orchestra and that the loss of his two fingers compromised his musical career and caused him considerable loss. The defendants produced an inscription in

law demanding that the last two allegations be struck out as being foreign to the case, and also entered a plea denying the allegations of the plaintiff and attributing the accident to his own inexcusable fault.

In the opinion of the Superior Court the accident was not caused by inexcusable fault on the part of either the plaintiff or the defendants. The two physicians called by either side agreed that the plaintiff would be handicapped very little if at all as a labourer or for ordinary shop or factory work, but that he might be more or less incapacitated

in special callings. The Court estimated this theoretical permanent disability at six per cent which would entitle the plaintiff to \$18 per annum, or a capital sum of \$340, if he had capacity to institute an action. In its judgment, however, the Court maintained the inscription in law and declared that Article 304 of the Civil Code lays down the general rule that actions belonging to a minor are brought in the name of his

tutor, with the exception that a minor of 14 years of age may himself directly bring actions to recover his wages. Wages earned are quite different in character from the compensation provided by the Act. The present action should have been taken in the name of a tutor duly appointed to the said plaintiff, and not by or in the name of the plaintiff. The action was therefore dismissed with costs. (*Quebec—Dufour vs. Metal Shingle Siding Company.*)

# Information Respecting the Russian Soviet System and its Propaganda in North America

---

Issued by the Department of Labour, Canada

---

AUGUST, 1920

## INFORMATION RESPECTING THE RUSSIAN SOVIET SYSTEM AND ITS PROPAGANDA IN NORTH AMERICA

---

**T**HE Department of Labour has gathered, from many sources, authentic information respecting the Russian Soviet system, its professed objective, and the visible results of its operation.

Numerous sympathizers with the communistic ideal, as experimented with in Russia, have publicly advocated a world-wide adoption of the Russian constitution. Much socialistic and revolutionary literature has been published and distributed, doubtless calculated to disturb and render discontented the minds of people in many lands at a time when economic conditions, due to and arising out of the world war, would seem to aid in the fulfilment of that purpose.

Little has been spoken or written in Canada upon the subject, except by its advocates and those idealists who would experiment with the imaginary rather than endeavor to perfect the real. It is obvious that the people of Canada do not as a whole fully appreciate the gravity of the socialist revolutionary movement in this country.

Canada went to war in 1914, her people fired with righteous indignation against a nation which sought by force to impose its will upon the world, and which repudiated and violated every national, legal, and moral obligation which it had voluntarily assumed. During the intervening years the Canadian people have been feverishly engaged in contributing to the success of our country's effort in the struggle, and in re-establishing our war-worn men and women, as well as our nation's industries, on a permanent peace footing. Those thus nobly engaged have not had much time and still less inclination to listen to or be influenced by the doctrines preached by the Soviet system sympathizers.

Of all the national tragedies which occurred during the war that which befell unfortunate and unhappy Russia was and is the most pathetic. By reason of German duplicity and intrigue the Russian people were betrayed, the last vestige of confidence in their rulers was dissipated, and, in March 1917, the overthrow of the dynasty and government of the Romanoff Czars was accomplished.

Accustomed to obedience without question, generally illiterate and incompetent to govern themselves, the Russian people were easy victims to a disguised but, nevertheless, more real autocracy than that from which they had been freed.

From March to November, 1917, Kerensky endeavored to establish a stable government similar to and patterned after the form existing in the United States, but meanwhile the doctrines of Lenine and Trotsky were welcomed, accepted, and adopted by masses of workers and soldiers who, in the name of liberty, committed every crime imaginable, from theft to murder. In November, 1917, a new Government was declared to exist, the character and constitution of which may be described in the words of the report of the United States Senate Committee on foreign relations, dated April 14, 1920, which Committee had been delegated to investigate the status and activities of Ludwig G. A. K. Martens, the self-announced representative in the United States of the Soviet regime in Russia. His own sworn evidence shows his credentials to have been issued by the "Peoples' Commissariat of Foreign Affairs of the Russian Socialist Federated Soviet Republic" from Moscow, under date of January, 2, 1919, and sealed with the official seal of the Commissariat.

This Government, as was brought out in the course of the testimony, was set up in November, 1917, by counter revolution to the movement of March in that year, which had accomplished the dethronement of the Czar. The Republic operates under a constitution by the terms of which "all property rights in the land, treasures of the earth, water, forest, and fundamental natural resources within its boundaries are abolished; which confirms the transfer of banks into the ownership of the Government, by which there pass over without indemnification to the disposition of the county, provincial, regional, and Federal Soviets, all private live stock and inventoried property of non-labouring homesteads, and under which private merchants, trade and commercial brokers, monks and clergy of all denomination, and, in general, all persons who do not "perform useful social functions" have no right to vote or to be voted for. Under examination Martens explained that a man who owns a farm or other property in Russia and leases it to another cannot vote or be voted for. Under this constitution all banks are converted into a state monopoly, and holdings of bonds in excess of ten thousand roubles, or about five thousand dollars, were confiscated (a rouble is normally worth fifty-one cents in our currency). The confiscation had occurred without authority prior to the adoption of the constitution but was confirmed by that instrument. Under it no Russian is permitted to invest his capital or ship it out of the country or receive interest upon it. The constitution also provides for the disarming of the property classes and the arming of "all toilers" and the organization of a "Socialist Red Army".

Under this constitution, in an election the records are received by a Soviet composed solely of workers, which appoints a commission of verification, which in turn reports back to the Soviet, and the Soviet decides the question when there is a doubt as to which candidate is elected. By this means deputies are elected to the "All Russian Con-

gress of Soviets", and by this Congress the Prime Minister is chosen.

It is not difficult to understand the economic disaster which has fallen upon Russia when one considers the effect of the adoption of such a constitution and form of government in our own country. Imagine all land not personally tilled by the owner confiscated without compensation, and all banks nationalized and deposits above a limited amount confiscated to the State. Imagine all merchants engaged in trade or distribution of goods of any sort, monks and clergy of all denominations being classed as "persons who do not perform useful social functions" and deprived of voice or vote.

The inevitable result of such a suicidal policy has brought to Russia utter industrial demoralization, poverty, hunger, disease, and death, following a couple of years of profligate living and wastefulness by those who suddenly acquired wealth by confiscation, and who were without desire or ability to use it wisely in the interests of the community.

The writer, in personal conversation with a gentleman who left Petrograd in 1918, was informed that it was a desolate City of only 700,000 (formerly 2,000,000) people, hungry and cold, and who held life itself to be of little value. No light, little fuel, shops closed because of shelves stripped and few goods being manufactured outside of army requirements. People of formerly comfortable means were either dead or forced to do the most arduous work. Many, in order to get food at all, had been forced to join the Red army. Moscow, he said, was in almost as pitiable a state as Petrograd; in both Cities the Communists simply took possession of any homes that suited them and occupied them at pleasure, frequently destroying property when it could no longer be of use to them. Industry was paralysed, due to lack of both men and material, as well as demoralized transportation. Wages had risen to such giddy heights that to carry on any industry except with Government paying deficits was impossible; but high wages were of

little value because goods and food were so scarce that prices were still far in excess of wages. Hundreds of thousands of people left the cities of European Russia, especially women and children to seek food and shelter from the revolution, in rural districts. Subsequently organized raids on grain and other stores of food by the Red Army discouraged production, as the only reward for production was confiscation; railway transportation for commercial purposes is very limited, in many districts abandoned because of no available rolling stock or motive power in running order; mining and lumbering, both very important industries, are curtailed to a minimum because of no transport inward for supplies or outward for their product.

Many men and women have come out of Russia and given evidence to the world verifying each other's testimony as to the facts pertaining to conditions there. Reliable labour men, well known to many in Canada, have added their quota.

Ben Turner and Tom Shaw, British labour leaders on their return from Russia, indicate disagreement with the Bolshevik Government policy, especially as regards the franchise. Mr. Turner states there is great lack of clothing, food, and transport, and that smallpox, typhus, and malaria are prevalent. He describes the people as fifty per cent hungry, and that scenes of desolation exist in Petrograd. He states a great division exists between urban and rural populations; the former depends upon the latter for food, the latter upon the former for other commodities; the towns have no commodities to supply, and the rural people are not inclined to satisfy the food requirements because they get no compensating return, currency being practically valueless.

Miss Emma Goldman, the famous anarchist, who, with a number of others was deported from the United States to Russia, has definitely repudiated Bolshevism since she has witnessed it in action.

A most interesting revelation of the existing situation in Russia was published in England on June 3, 1920. It confirms and goes further than the interim report of the British labour delegates referred to. It is from a member of the Council of the People's Economy (Sounarhos) a Bolshevik body, on the present situation in Soviet Russia. This document is reproduced in full from *The Times*, London June 3, as follows:

The economic position of Soviet Russia is growing worse. Every branch of industry and labour is being affected by the process of destruction, which has reached enormous proportions. Partial measures for reconstruction are now totally inadequate.

The chief reason for the catastrophe lies in the general loss of capacity for work in all classes of the population owing to the following:

- (1) Depriving the individual of all incentive to work;
- (2) Remunerating work so inadequately that the payment does not cover the living expenses;
- (3) Hunger, privation, and illness;
- (4) The absence of personal security;
- (5) The appointment to responsible posts of people without adequate qualifications simply because they happen to belong to the Communist Party;
- (6) The deliberate or unconscious sabotage of the Soviet Government by the whole population, carried out in every branch of national life in so far as it manages to escape detection and punishment;
- (7) Military operations, which prevent three-and-a-half millions of the population from engaging in productive work;
- (8) Constant changes in the personnel of the Government, as well as in the existing laws, which often contradict each other, provoking constant inter-departmental friction and loss of time.

It is scarcely possible to effect a remedy in the near future for this loss of working capacity among the working masses and peasants. The peasants are in possession of huge sums of money of various issues, and so long as this is kept in the villages, the peasants feel like millionaires and will not undertake any work outside.

#### THE BONDAGE OF WORKMEN

-By a series of Soviet decrees workmen have been turned into bondmen, bound to whatever situation they may have been working in at the time the decree was issued; bondmen, moreover, without any prospect of promotion, nor any right to exchange their situation even within the confines of factory work or trade union. The Commissaries have not been able to reintroduce discipline among the factory hands, abolished

in 1917, notwithstanding the privileges accorded to Labour, the high level of wages, and the stringent regime to which they have latterly been subjected. The workmen desert works and factories wholesale, even at places where peasant industries have been developed. For instance, in the district of Pavlovsk, in the Government of Nijni-Novgorod, the whole metal industry has ceased to exist, and whole suburbs are deserted; the inhabitants have either fled to the south, or died.

At works and factories previously belonging to big manufacturers, which have been nationalized, there is a heavy penalty on the workmen who desert, but nevertheless the desertions continue to increase. In corresponding ratio with the loss of working capacity and desertions, the production of the factories continually diminishes, and experts are of the opinion that it is impossible to produce above 10 per cent of the pre-revolution output, although official returns state that 25 per cent and even 30 per cent have been reached. The falling off in the output of the factories is also due to the absence of (1) fuel; (2) lubricating oils; (3) repairing material; (4) raw material and raw products. All this has created such a situation that at present it is impossible to speak of the factories as working concerns. The only thing that can be done is to keep the factories running, and this specially occupies the attention of the High Council of the People's Economy. Unfortunately, however, even the mere effort to keep the factories from closing down is, in the majority of cases, impossible, as the factory property is stolen bit by bit by the starving workmen; they barter it for the necessities of life—bread, salt, etc.—to those peasants who are willing to exchange these commodities.

#### LOCOMOTIVES

Up to the present, all efforts have been directed towards maintaining and diminishing transport service and supplying the army. Only 15 per cent of the locomotives awaiting repair have been overhauled. A further decrease in this percentage may be predicted, as the remaining Imperial stock of spare parts and material for repairing locomotives and railway carriages has been exhausted, and it is now necessary to take from one engine the parts which are required to repair another. By applying this method it is possible to repair, on an average, one locomotive by collecting the spare parts from seven others.

The number of new locomotives produced is steadily decreasing; in the whole of Soviet Russia only three or four locomotives per month are turned out, viz., 40 to 50 per annum, as against 800 to 1,000 under the old regime. Nor does the number of new railway carriages in any way correspond with the ever-growing needs of the moment.

Besides the lack of fuel (the wood used being of the 1919-20 season, therefore, still full of sap) and lubricating oils, there is a great dearth

of white metal (babbit) for the railway bearings (which are gradually being replaced by oak bearings lubricated by graphite) and a shortage of steel for railway wheel tires. Only one Martin oven at the Koulebak Works provides the whole of Soviet Russia with steel for railway wheel tires. The non-existence of steel for springs makes it impossible to replace the weakened springs; in consequence, the buffers and coupling-hooks not being on the same level prevents the composing of trains. Moreover, the pneumatic brakes are completely out of order, as well as all the lighting and heating apparatus. The carrying capacity of the railway trucks is not measured by weight, but by space, which makes matters still worse for the railways.

Although the means of transport is so seriously impaired, the Government—by irony—propose to electrify the railways, whilst there are no macadamised roads, no horses and no carts. The railways are falling to pieces at an alarming rate and experts predict that by August, 1920, all railway communication will have come to a standstill. Krassin, for instance, thinks that under the most favourable circumstances this branch of industry may possibly begin to revive by 1928, if taken in conjunction with the partial revival of the iron producing and metallurgic industries in 1927 which is hoped for, provided that the maximum amount of help from Germany is obtained. Other members of the Government are, in their hearts, of the same opinion. The views of engineers are still more pessimistic, as not only the rolling-stock, but also the earthworks, water-supply, workshops, apparatus for signalling, and the like are in a state of dilapidation. In their opinion it is necessary to invest, in round figures, three billions of gold roubles to make the Russian railways more or less fit to meet the requirements of the country.

The Government expects a great deal from the "Labour Army"; but these hopes are without foundation, as no raw material ready for use is available, the mining industry and agriculture being ruined.

#### WATERWAYS AND LAND TRANSPORT

As to waterway communication, hardly 3 per cent of all steamships do not require repairing; the tonnage available for cargo in Soviet Russia is only equal to 3 per cent to 4 per cent of the general tonnage in 1913. It should also be remembered that the waterways, ports, and docks have not been repaired for a long time past, and to put the same into working order would take years and cost at least half a billion gold roubles. New ships are not being built, as the cost of building them is rising more rapidly than freights. For instance, the price of one pood of ship nails at the present time amounts to 25,000 Soviet roubles.

Land transport is almost non-existent, as the number of horses has, on an average, diminished by 70 per cent since 1917, and in the towns even more; for instance at Moscow there are now only

8,000 horses as against 136,000 in 1914. Moreover, in the Soviet Republic there is an extreme scarcity of the following commodities:—Oats (price 5,000 roubles per pood\*); hay (400 roubles per pood); harness (65,000 roubles); horses (60,000 roubles); horse-shoes, nails, iron hoops, sledges, and the like.

#### DISORGANIZATION OF FACTORIES

Other branches of industry are likewise in a state of disorganization. For example, on December 31, 1919, only four Martin ovens, three converters, six cupola furnaces, one blast furnace (being fed with inferior iron ore at the Wiksynsky factory) were in working order, and then only intermittently, and there was not a single rolling machine of any description to be had. In the Urals, immediately after their occupation, all industry collapsed, and at present, according to information received from one of the most prominent engineers, "after destroying everything, they hoped to set up a form of factory trust of Soviet Russia in the Urals, in competition to the United States of America." There, under threat of being shot or punished with the knout, only the Ishevsky factories are still at work, and they are turning out 2,000 rifles a day. The critical situation of the Ural factories is enhanced by the fact that they depend almost entirely upon wood fuel; therefore the aforementioned shortage in horses has had a particularly bad effect, as without them it is impossible to fetch the wood. At present there is no wood available, and there will be none for the next two or three years to come; the Ural region, therefore, cannot be counted upon.

The Petrograd group of factories has ceased to exist; the Moscow group is almost in a like condition; the Sormovo Works at Nijni-Novgorod produce army trains, a small number of cannon and ammunition, approximately 8 per cent of the amount produced in 1914; the Tishinsk Works are practically at a standstill; the Bulebansky Foundry turns out a small quantity of cast iron; the Vyksa has practically ceased to work, although their budget amounts to nearly three billions of Soviet roubles. The Kolomensky and Briansky Works belong to this group; they specialize in building locomotives, and their annual output was at one time 220 and 250 locomotives respectively; at present, however, they turn out  $1\frac{1}{2}$  locomotives per month, that is, 18 per annum, instead of 470. The output of munitions is also extraordinarily small, not exceeding 10 per cent of the work turned out during the Tsarist Government.

Other requirements of the country are equally badly looked after. When thought fit by the administration, orders are accepted, but no guarantee is given as to time of delivery, materials and fuel being supplied by the customer who gives the order.

Many kinds of iron which are only used by village blacksmiths and for agricultural purposes are not being produced at all, as, for instance, soldering iron and bloom-steel.

The position is bound to become worse in the near future, as the Soviet Government is still drawing on the reserve stocks left over from former times, which are now almost exhausted. They cannot last longer than three or four months.

#### ABSENCE OF FUEL

There is no fuel, because only one-eighteenth of the estimated minimum quantity has been prepared. The cause of this is due to the absence of bread, horses, forage, necessary implements, and the new psychology of the workmen and peasants, who have lost their working capacity. Even this one-eighteenth was only achieved through the Government enforcing work by aid of exorbitant wages. Private individuals, who could not use this lever, were unable even to fulfil their contracts.

The drying and cutting of peat, which was limited to the district around Moscow, now yields only 20 per cent on the amount required, consequently there is no electric current for the weaving industry and other factories at Moscow. In the autumn of 1919, at the Moscow Electrical Power Station, a load of eight railway trucks of interest-bearing papers was burnt. Never before has a kilowatt cost Russia so much.

#### THE POSITION OF AGRICULTURE

The position of agriculture is the worst of all. A murrain among the animals, and the various "decrees" issued by the Government, have worked havoc, until the number of agricultural horses has decreased by 50 per cent, and even 90 per cent in the less fortunate quarters. Thus, in many instances, there is only one horse to 150 dessiatins of ploughable land. Hope of procuring horses from the Steppes has also had to be abandoned, as—(1) vast droves of horses have succumbed to mange, vaginitis, and the Siberian plague; (2) horses from the Steppes are useless for the plough and for other agricultural work. Experiments with tractors and the adaptation of motor lorries to the plough have, since October, 1919, had both time and money spent upon them, but they have not yet produced any good results.

There are no seeds for sowing either field or garden, and only 20 per cent of the arable land is under cultivation. The last harvest was poor, chiefly owing to bad tillage, unsatisfactory manuring, and inferior seeds, and also partly to unfavourable weather. It is now impossible to get seeds from Siberia, as there is no means of transport. Soviet estates have not fulfilled the high hopes anticipated; over one billion of roubles has been spent, and they have not even grown sufficient corn for the requirements of the labourers working on them.

Under the influence of the Soviet policy, the peasants have restricted their production to the limits of their own indisputable needs, and, in consequence, there is no agricultural produce which can be sent to the towns. There is no

\* Note—A Pood is equal to 36 pounds avoirdupois.

corn, hemp, flax, seeds, no breeding of animals. Under normal conditions all this should be flourishing prosperously, because there has been no export trade since 1916. The first blow at the production of raw products and foodstuffs had already been struck in October, 1916. Restrictions were levied against the transport of goods from one province to another, and the shortage of raw products began to be felt. The revolution put an end to production altogether, and at the present time there are no raw products, nor will there be any until the means of transport is reorganized and personal freedom in working is restricted.

### POLICY AND PRICES

The Soviet policy was based on the granting of certain privileges to the town workers at the expense of the peasants. At first there were established disproportionately high prices for factory products as compared with low fixed prices for agricultural products. This has led to the necessity of obtaining agricultural produce from the peasants by force—"by pricking them with the point of the bayonet"—as the Soviet saying goes; thus the peasant has been compelled to diminish his production to the limits of his own personal needs.

In January, 1920, in Moscow,

One pound of bread cost.....	200 roubles
" " groats.....	260 "
" " horse flesh.....	400 "
" " beef.....	800 "
" " pork.....	1,000 "
" " fat.....	1,200 "
" " butter.....	2,000 "

Thus prices became more or less equivalent to those of town products, as for instance:—

1 yd. of cotton fabric.....	400 roubles (instead of 8 copecks.)
1 box of matches.....	75 roubles
1 pair of boots.....	17,000 "
etc.	

### EFFECT ON THE PEOPLE

Such an economic policy of the Soviets has only fostered and strengthened the feeling of ownership, and produced a marked leaning towards reaction. This tendency is becoming very pronounced, and if the present regime should collapse, the re-establishment of the strongest bourgeois capitalistic structure in the world may be expected. With this evolution of "deeper Russia" there appears a growing dissatisfaction with the present regime and its rulers, who take no measures (and indeed are quite incapable of doing so) to change this attitude of the people. Peasants and workmen often say now, "The time will come when we shall have a real master."

The attitude of the people towards our former Allies is sympathetic, and hostility towards the Germans is gradually dying away. Unfortunately, however, there is a spread of anti-Semitic

feeling, as the result of the activities of some commissaries, who are often of Jewish origin, and who are held responsible by popular opinion for the disappearance of foodstuffs and increase of prices.

Many members of the Bolshevik party and leaders in Soviet Russia realize the situation, but cannot remedy it; others still remain optimistic owing to incorrect information they have obtained from officials and institutions concerned. It is not easy to obtain correct information, as otherwise the unsatisfactory state of affairs disclosed would lead to an inquiry, and to the discovery of malpractices among officials, resulting in punishment inflicted by the "All-Russian Extraordinary Committee for Fighting Counter-Revolution and Speculation." Thus an accurate report would in the first place affect those representing the department. Malpractices are generally not found out, even by the Government control, as those who issue the reports usually have a secret understanding between the supervising controllers and themselves, and if one suffers the other does likewise. Besides, Government control is not encouraged; it is only tolerated by the members of the Soviet, and they endeavour to avoid it as much as possible. For instance, in the Military Commissariat and the All-Russian Extraordinary Committee control of any sort is *de facto*, non-existent. Control officials have no claim upon the Government rations, are badly paid, and belong mostly to anti-revolutionaries, so they are more susceptible to clandestine intrigue, which hampers national economy. With all this it is difficult to expect any improvement in the inner situation of the country. Even if the blockade is raised and international commercial relations are re-established things will scarcely improve, because the Soviet Government's means of transport has been destroyed to such an extent that all traffic and trade will be difficult for many years to come. The people have no means of production, and no incentive to work. Therefore the Soviet Government is unable to export much. The reserve stocks of timber, corn and flax, which are still in the hands of the peasants, serve their own needs, and the enforced export of such goods abroad would provoke an outburst of ill-feeling towards the Government and the importing countries.

### GOODS FOR EXPORT

The only available goods for export would be timber, and accordingly the Labour Army has been commandeered for lumbering work. Unfortunately their working capacity has proved extremely low, only equal to about one-third of the average. Besides, the need of fuel in the interior of the country is so pressing that the Labour Army will hardly be able to prepare sufficient timber even for the railways, not to speak of other requirements. Lastly, the Labour Army could not be sent to lumbering districts in the north as there are no foodstuffs, and it is very difficult to transport bread and fodder to such places. Thus the Labour Army can only be used in Eastern Russia and in the region of

Moscow, Nijni-Novgorod, and other districts, whence no timber could be exported abroad owing to the extreme distance from shipping ports.

Wages on terms of free hire are now prohibitive in all branches of industry; six hours of work per diem is paid 600 roubles per man; six hours of work per diem is paid 500 to 700 roubles per horse with a lad. If the export of timber is to begin, means of communication must be re-established beforehand, and horses, men, victuals, fodder, and industrial implements must be provided.

To maintain the power of the Soviet Government it is necessary to improve the economic conditions of the country, and, first of all, to re-establish the means of transport. The export of wood to Entente countries would, by the import of certain goods, relieve the country to some extent, and thus strengthen the position of the Communist party. Besides, it would furnish a reason for keeping up a strong Labour Army which at any time could be used in the field.

#### FLAX AND WHEAT

As to flax, it is necessary to bear in mind that the manufacture of cotton goods has stopped, and, simultaneously, a regulation has been issued prohibiting the peasants from receiving such goods; therefore, the flax produced is kept exclusively for home use, and that flax seed is used for oil pressing in such quantities that difficulties are expected in resowing the fields. This is the result of the absence of fats and the high price of oil; linseed oil fetches 1,200 roubles per pound. Besides, flax demands a strong potassium fertilizer and very careful preparation, and, in the absence of alkali salts and manure, flax cannot possibly yield a satisfactory harvest. Lastly, flax is at present subject to a fixed price, therefore the peasants grow it only for their personal requirements. There existed old stocks of flax in the provinces of Kostroma, Tver, and Pskov, but most of them have been already used up by the peasants themselves, and a part has been requisitioned by the Government and used for the production of yarn and peroxiline. All this renders the collection or requisitioning of the remaining small stocks of flax very difficult.

The same thing may be said of the export of wheat. The production of wheat has decreased at the present moment by two-thirds or more. Up to the year 1914, Russia had been able to export 15 per cent of her total production, after satisfying her own standard of consumption, which is the lowest in Europe. Putting our pre-war production at 100 per cent, we consumed 85 per cent of it, which meant about 14 poods per person, as against 17 poods in Western Europe. At present Russia only produces about 45 per cent which is 40 per cent less than her previous home consumption. We may expect famine in Soviet Russia, and an entire population may die out altogether in Northern Russia, as it chiefly existed on corn transported from the South.

Agriculture has suffered most in Soviet

Russia; to re-establish its special concerns must be created, run by joint-stock companies in the South and South-East, which regions are sparsely populated. In more crowded areas small farms should be set up. This would meet with the approval of the people, who even now realize that they must not appropriate land without payment of taxes. The peasants are ready and willing to buy the land which they occupy. That is one of the reasons why the Soviet Government finds it difficult to collect taxes from the peasants who are saving up and hiding money with a view to eventually buying the land from its legitimate owners. The holding back of currency notes has created the necessity of issuing new emissions, as the notes which reach the villages do not return to the State Bank.

#### LAND AND THE MONETARY SYSTEM.

A settlement of the land question in this sense may provide the means for reorganizing the monetary system, and influencing the mentality of the masses, who will give away their money for their land, and will no longer consider themselves millionaires. Then they will settle to work again. This would be the best way for redressing the trade balance of the country, as the former landowners will invest the money received in industrial and other undertakings.

The adverse trade balance could hardly be restored by granting concessions to foreigners, because the Soviet Government could never admit the existence of concessions, which could have the privilege of ex-territoriality. This would involve the admittance of payments in gold, along with the prevailing Soviet currency, and the contrast between the two currencies might bring about a counter-revolution. Besides, concessions could only be worked advantageously if the conditions of the local labour market—*i.e.*, re-victualling, fodder, necessities of life, dwelling-houses, clothing, etc.—were satisfactory. No concessions could be profitably worked with imported labour; they would have to depend on local labour; but it must be remembered that normal working conditions are at present non-existent in Soviet Russia. The transport service is destroyed, and there are no victuals, no necessities of life, no raw materials, and no possibility of getting them. First of all, the transport service must be restored with foreign assistance, the economic situation of the country must be improved, and the "Labour Army" must be reinforced and reorganized as a strictly military institution—a rifle in a workman's hand is the best weapon against the bourgeoisie! Accordingly, such concessions will not be intended to serve solely economic purposes and cannot be expected to yield profit. If the Government of Soviet Russia were to guarantee a profit on the concessions to be granted, this would be a sort of payment made on behalf of the people. It would supply in an indirect way the necessary sum for the upkeep of the Labour Army. Lastly, such concessions would be the means of fomenting agitation among the popular masses against the Powers holding concessions.

### KRASSIN'S CONDITIONS.

The conditions under which the Soviet Government could grant concessions are very aptly defined by Comrade L. B. Krassin—viz., "Recognition of the decrees of the Soviet Republic in the conceded territory, adoption of the same system of payment and labour regulations as are in force over the territory of the Republic, the recognition of and submission to the Soviet Republic."

Regarding the future status of eventual concessions, Comrade Tchitcherine, in a letter to President Wilson, clearly set forth our fundamental principles. He states that the Communist Party do not consider the present bourgeois Governments to be legitimate, and that the Communists have entered into agreements only as a temporary measure, being forced to do so by the prevailing circumstances, owing to which those who will one day take the place of ruling presidents and monarchs are still detained in prison. This letter is, so far, the credo of the foreign policy of the Soviet Republic. It is evident that, owing to lack of recognition from the bourgeois Governments, it is not necessary to be too particular in the observance of those obligations which have been voluntarily contracted, as, in coming political changes, all such obligations will be automatically set aside. Thus, the Communist Party is ready to conclude any agreement, which will only turn out to be a repetition of the Treaty of Brest-Litovsk. This applies also to negotiations with Poland, with which country we shall certainly be at war as soon as circumstances permit, as, because of the impossibility of a Socialist Communist State being able to conform to its ideals if situated in juxtaposition to bourgeois States, according to the fundamental principles of the Communist Party, wars must go on so long as all existing States are not transformed into Soviet Republics. This is a basic principle, and demands the use of all and every means in the fight for existence. It does not necessarily imply the use of arms. The reign of true Communism cannot be eternally maintained by arms alone; it must be based on the very essence of human nature. The most splendid victories of Communism have been brought about mainly by the power of its principles, and by the judicious inoculation of its ideas by peaceful means.

An example of this is the clever way in which the Soviet authorities took advantage of the political mistakes committed by Koltchak and Denikin. The Soviet Government was not slow to realize these errors; it took quick action and all the anti-revolutionary forces soon collapsed. In the rear of Koltchak the Government expended 80 million roubles in gold for purposes of propaganda, and in the rear of Denikin about 70 millions. Vast sums of money are being sent to Poland in the rear of the Polish armies for the same purpose. This has proved a very efficacious as well as practical method, because, after the occupation of the territory by the Soviets, the money being requisitioned returns almost in full to the State Exchequer. This measure, therefore, scarcely affects the gold balance of the

Soviet Republic, and further requisitions of gold from the bourgeoisie in the occupied territory helped to swell the State Treasury.

Even the 15,000,000 roubles in gold paid by the Republic to Euthonia in accordance with the Peace Treaty may be expected to return to the State Exchequer in due course.

In the closing paragraphs of the foregoing statement three things are particularly noteworthy—i.e. the war with Poland, which is even now in progress; the anticipated granting of concessions to foreign countries, which is borne out by press reports in our own Canadian papers of July 17, indicating that the Russian Soviet Government is proposing to obtain necessary imports to restore transportation and industry within her own borders by granting large timber, iron, gold, oil, and oilshale concessions to outside countries in payment for goods received, and the propaganda methods adopted by which Koltchak and Denikin were first betrayed and then annihilated.

Briefly stated, the Soviet regime in Russia has resulted in the murder of thousands, the death of millions by war, plague, and hunger, and in the destruction of industry, of agricultural production, and financial credit. No one can accurately foretell the extent of the loss, suffering, sorrow, and death which must inevitably still occur before the final act in this terrible drama is ended.

Numerous other reliable authorities might be quoted to verify the foregoing facts indicating the utter failure of socialistic ideals as practiced in unhappy Russia, but these are probably sufficient to indicate the truth.

Our concern, however, does not end with a knowledge of the disasters wrought there. What is the cause and purpose of the active socialist propaganda in North America? The credentials of Mr. Martens, the accredited Ambassador of the Soviet Republic to the United States did not warrant his assumption of diplomatic privilege. He never presented himself at the State Department or sought the usual audience with the Secretary of State which is customary for diplomatic representatives. He protested constantly to the United

States Senate Committee, which was conducting an investigation of his activities, that his sole purpose in the United States was to develop trade relations between the United States and Russia, although he had never communicated in any way with the War Trade Board or any other Department of the United States Government respecting trade. What then was his real purpose? Documentary evidence submitted to the Committee indicated that a Bureau had been organized in the City of New York for the purpose of establishing communications with Russia, and carrying on propaganda work in America. This Bureau was composed of eight persons, Martens being the head, and Mr. Santeri Nuorteva the Secretary. (This latter gentleman will be remembered in connection with certain Canadian matters during and since the war.) Communications between Mr. Martens and his Government were almost invariably carried by couriers whose travels are presumed to have been facilitated by spurious passports, or otherwise certainly in violation of the laws governing foreign intercourse between the two countries at that time. He testified that twenty couriers were engaged in this service. In addition to letters, instructions, and other communications, large sums of money were brought over by them.

As to his real mission in America the following excerpt from the United States Senate Committee's report is illuminating;

In seeking to determine what propaganda, if any, he is carrying on, for the overthrow of Governments, as directed by the resolution of the Senate, the testimony is somewhat complicated. It is evident from the constitution of the Government which he affects to represent (p. 165) that the fundamental problem of Soviet Russia is to bring about "the victory of socialism in all lands" In this motive Martens admitted (p. 166) the United States is "absolutely" included. There were also adduced in evidence two letters, copies of which were furnished by Martens himself, purporting to have been addressed by Nicolas Lenin, Prime Minister of Soviet Russia, to American workingmen. The first of these letters (p. 111) dated August 20, 1908, counted "on the inevitability of the international revolution" (p. 116),

while the second, dated January 21, 1919, laid emphasis (p. 117) on the tremendous rapidity with which the workers in various countries have gone over to communism and Bolshevism, and boasted (p. 120) "that the Soviet power is great and spreading, growing, and establishing itself all over the world." These documents, the authenticity of which Martens admitted (p. 121) were justified by him—the earlier appeal on the ground that this was necessary counter-propaganda against the activities which, as he asserted, the so-called Creel Committee had carried on in Soviet Russia (p. 122). He pointed out that this letter was written prior to his appointment as Soviet representative in this country. But the second letter, dated January 21, 1919, and also offered by himself in evidence, (p. 117) was written some three weeks after Martens' appointment, and he justified it (p. 179) upon the ground that American troops were in Russia opposing Bolsheviks, though he qualified this justification by declaring (p. 180) that propaganda of this character a few months later would have no justification.

It appeared, however, that even at this time, when as he contended, propaganda of this kind would be unjustifiable, there met in Moscow the so-called Third Internationale, which is the parent body of all Communist organizations, and, in fact, its international court of last resort. From this body issued a manifesto signed, among others, by Nicholas Lenin, the Soviet Prime Minister, and by Leon Trotsky, the Soviet Minister of War, who are the ruling spirits in the Soviet Government. It is addressed "to the proletariat of all lands" and purports to contain (p. 182) "the authentic direct message from the conquering proletariat of great Russia to the toiling masses of the world." It pictures "alongside the dethroned dynasties of the Romanoffs, Hohenzollerns, and Hapsburgs, and the capitalistic cliques of these lands the rulers of France, England, Italy and the United States . . . revealed in the light of unfolding events and diplomatic disclosures in their immeasurable villainess."

With these sentiments (p. 183) Martens said that he agreed; and (p. 185) in an article signed by him and published in the *New York Call* on Thursday May 1, 1919, he declared that "the attitude of the workers of the world toward the Russian workers' revolution has proved that the spirit of International solidarity of the workers is not dead. It is resurrecting in the Third Internationale a new glory," and he concluded his article with the exclamation, "Long live the Third Internationale." He later (p. 185) testified that he approved of the Third Internationale and its principles. It also appeared (p. 187) that the Russian Soviet Government, by a decree issued in December, 1917, appropriated 2,000,000 roubles "for the needs of the revolutionary international movement for the disposition of the foreign representatives of the commissariat for foreign affairs". Martens

himself, by the *prima facie* evidence of his own letter of credence, is such a representative, and this appropriation of money for the purpose of propaganda in foreign lands he justified (p. 189) on the ground that at this time "Russia was in the throes of a revolution and civil war and was attacked by all Governments". He added that he supposed the amount allocated was much more than 2,000,000 roubles. He declared that the Bureau through which this money was to be expended has now passed out of existence, but admitted that his information on this point was gained through the Russian newspapers (p. 190). In this connection it was developed that a report alleged to have been sent by Martens to Fredrick Strom (p. 191) the Soviet representative at Stockholm, spoke of Martens' agents being "busy in the Western States and in Canada where they are. . . creating secret Committees for propaganda and becoming acquainted with professional organizations and local press" and that "American workers" associations are passionately interested in the state of Russia and they are becoming more and more firm in the creed that nothing but Bolshevism could advance the proletariat". Martens admitted to have sent many communications by courier to Strom, but he denied that any report of this character was among them.

In line with the foregoing it may be significant that Martens, in his closing words of testimony before the Committee, testified that it "would be an improvement to have the Soviet Government here" and that he "would call that revolution."

It further appeared (p. 208) that a newspaper published in Petrograd in the interest of trade unions of that City, and known as the "Trud", on November 10, 1919, published an article declaring that "soon the victory of the proletariat dictatorship in the whole world will be guaranteed", that "with the proletariats of all countries an agreement would be reached without any diplomats. But with you, Messrs. Imperialists, we shall carry on conversations just as you do with us—behind every word force; behind every condition force—behind every demand force". In commenting on this Martens testified that he did not believe in "force as such" but that he did believe in it "if necessary".

Martens admitted (p. 239) that he had been a revolutionist for 25 years and in every country where he has ever lived; that he was a revolutionist when he came to the United States, and that he is a revolutionist now.

As indicating the difficulty of separating Martens and his activities from propaganda carried on for the purpose of replacing the existing Government of the United States with Sovietism, it is instructive to note (p. 52) his emphatic testimony that he never "attempted in any way to have the people of this country advocate a soviet form of Government; that he was not connected directly or indirectly with any organization or association which advocated sovietism in this country; and that he had never given support either moral or financial to such an organization. This testimony, however, was followed immediately by an admission (p. 52) that he was "very often in touch with these

organizations" and that "on several occasions" he "accepted their invitation and spoke about Russia but never in regard to the internal affairs of the United States". These speeches, he testified (p. 53) were fully reported in the *New York Call* yet in connection with speeches made by others and likewise reported in the *New York Call* he protested vehemently that they were incorrectly reported (p. 24). This leads to the suggestion that Martens possibly occupied a privileged position in the columns of the *New York Call* such as he testified attended him when he sought to obtain Russian citizenship.

Referring to the secret activities of Martens, it will be noted from the testimony (pp. 212, 220 and elsewhere) that he denied all knowledge or relationship with the Russian Socialist Federation except in so far as the evidence presented by counsel for the Committee compelled qualifications in reply to interrogations. For example the telegram addressed to the convention of the Russian Socialist Federation in Detroit (p. 284) is documentary refutation of the witness's statement that he never gave, directly or indirectly, moral support to an organization which advocated a soviet form of Government in the United States. The record shows (p. 251) that in spite of repeated denials on the part of the witness he was regarded by his most important assistant, Mr. Nuortova, and his friend, Dr. Mislig, Treasurer of the Russian Federation, as an actual member of the association. This association, be it noted, not only advocates a soviet form of Government but is organizing for the purpose of overthrowing the present form of Government under which we live, by force and violence. Martens denied explicitly (p. 281) that he had engaged in secret political activity, yet when confronted with the minutes of the secret convention held by the Russian Socialist Federation in Detroit in August 1919, he was compelled to admit making a speech before the delegates. On at least two other occasions also he had tried to reach a basis of co-operation in conference with the executive committee of the Association.

In connection with his Bureau Martens published a weekly newspaper known as "Soviet Russia" which has a circulation of from 15,000 to 30,000, about one half of this number going to subscribers, some 2,000 being "sent without charge to public men in the country" and the balance distributed by new agencies (p. 57). He also contemplated opening a technical school for Russians purposing to return to this country (p. 57), but this plan was never consummated. He proposed "to call a technical conference of those who desired to help Soviet Russia" and for this purpose registered over 20,000 people. This registration took place not only at the office of the Soviet Bureau in West Fortieth Street, New York City, but also at the Rand School, where some form of branch office was maintained (p. 345). A questionnaire was furnished to each registrant and in its original form a registrant was asked if he preferred to "remain in America to work with the Soviet Government" (p. 347). Martens adduced no adequate explanation of what this "work with the Soviet Government" in this country would comprise.

Martens himself appeared to have had very little to do with the practical management of this Bureau. He seems to have been something on the order of a show figure, and he frequently responded in tactful terms of gratitude to letters and resolutions of greeting which were sent to him by numerous organizations of a socialist nature, both American and Russian in their membership. One of these letters of greeting presented in evidence (p. 279) came from the Socialist party of the eighth assembly district of New York, in which the members of this organization pledged themselves "to work unceasingly for the propagation of those principles and policies and tactics that will aid directly in the establishment of a socialistic federated soviet republic in America." Against such sentiments Martens testified (p. 280) he did not protest, saying that he regarded this as none of his concern, and adding that he did not regard it as a crime "to propagate the Soviet idea in the United States" (p. 281).

Prominent among Martens' activities was his attendance upon public meetings generally held under the auspices of some of the numerous branches of the Socialist party. One such (p. 215) was addressed by Gregory Weinstein, who was reported in the newspapers to have said "we have come here to tell Comrade Martens that we intend to prepare to take over this great country just as the working class has taken over Russia". Another, held April 1, 1919, presided over by Nicholas Hourwich, a near relative of whom later became the head of a Department in the Martens Soviet Bureau, and who was quoted in the *New York Call* as having said in his opening address that the "left wing proposed to bring Bolshevism to America" (p. 218). Martens declared that he did not remember having heard either of these declarations, that he made no protest about it at any rate, that he is a Bolshevik, that he "would be very glad to see America Bolshevik" and that "any means which would produce this condition would be justified".

The repeated reference to the fact that Martens used the *New York Call* extensively as his publicity medium is interesting to Canadians in that this was the publication for which the Rev. Wm. Ivens of Winnipeg was the reputed correspondent. During the brief period that telegraphic communication was in the hands of the strike Committee, of Winnipeg, in 1919, reports of the situation there continued to appear in the *New York Call* apparently transmitted by its Winnipeg correspondent.

The reference in the foregoing report to funds received by the Martens' Bureau, for propaganda work, recalls to mind the fact that United States currency in Fifty Dollar denominations

was quite extensively circulated in Winnipeg in May 1919, being presented at Banks, chiefly by foreigners, to be changed into bills of smaller denomination.

It is apparent from the foregoing report that the alleged mission of Mr. Martens to America was not his real mission, and, further, that his propaganda campaign included Canada as well as the United States.

Indicative of the Soviet Government's ultimate aim the following extract from Lenin's letter of May 30, 1920, to the members of the British Labour delegation then in Russia, is significant: "Shaw and Guest, members of your delegation, were obviously surprised and hurt by my statement that England, notwithstanding our peace proposals, continues her intervention, is carrying on a war against us in the Crimea and in Poland, and they asked me whether I have proofs to this effect. I replied that, for the purpose of getting access to the secret agreements of the British Government, it is necessary to overthrow it by revolutionary means and to lay hold of all documents of its foreign policy, as was done by us in 1917." Needless to observe Mr. Lenin's answer was not accepted as proof of his statement.

#### Is Canada Affected?

It is reasonably apparent that Socialism, as practiced under the Russian Soviet System, has proven a disastrous failure in Russia, and that it was and is the ambition of the Soviet Republic to make their revolution world-wide in scope. Neither a nation nor an individual can live wholly independent of all others. It is equally obvious that Soviet Russia cannot hope to perpetuate her ideals unless they are practiced internationally, hence her object is to involve the world.

Various organizations in Canada are spreading socialistic propaganda, the promoters and leaders in most instances knowing full well that they are wilfully misleading many honest-intentioned citi-

zens by the various disguises under which their aims are cloaked.

Among the numerous organizations referred to may be named the following:

- The Socialist Party of Canada;
- International Bible Students;
- The One Big Union;
- The Labour Church;
- The Russian Socialist group;
- The Ukranian Socialist group;
- The Finn Socialist group;
- The Ukranian Dramatic Society—Moose Jaw;
- Ex-Soldiers and Sailors Labour Party, Winnipeg;
- The Union of Russian Workers;
- Zluka (Ukranian Bolsheviks);
- Spujnia (Polish);
- The Bulgarian Bolsheviks;

- The Jewish Bolshevik party;
- The Socialist Revolutionary group;
- The Anarchist Communists;
- The Communist Labour party;

Their policies differ in degree only. Almost all repudiate religion. Each in their own way propose to make over our economic system by forcible means, adding, as most of them do, "if necessary".

A number of these organizations control certain so-called labour papers, the most influential of which are the B. C. Federationist of Vancouver, Searchlight of Calgary, O. B. U. Bulletin of Winnipeg, Vanpas (Finnish) of Sudbury, Travailleur (in English and French) of Montreal, together with others published in various languages.

Pamphlets and cards are extensively printed and distributed. Following is a sample:

#### CARD OF MEMBERSHIP

## ONE BIG UNION

### NATIONAL INDUSTRIAL UNION OF THE DOMINION OF CANADA

"Money is the Root of All Evil,"  
saith the Lord.

I, the undersigned, do hereby declare that, by the help of God, I will STRIKE against the use of money at any time I may be called upon.

Name .....

Address .....

Witness .....

"Come unto me, all ye that labor and are heavy laden, and I will give you rest," saith the Lord.

Space will not permit reference to each of the organizations referred to herein, but mention of two would seem desirable, viz: THE ONE BIG UNION: THE LABOUR CHURCH.

The One Big Union is an industrial organization conceived by prominent Socialists in this country, who evidently hoped to effect an economic and political revolution by means of the strike weapon. It proposes that all who toil would become members of one union and by economic force, compel acceptance of their demands. To many the thought appeals. Is not organization the order of the day? Organized capital, organized employers, and organized labour are all realities; why not create one huge union of which all workers would be members and thus greatly add to the efficiency and strength of labour? Why not try the new idea? . . . The idea is not new; it was first seriously advanced in 1869, by Uriah Smith, in Philadelphia, when he and other garment workers originated the "Knights of Labour". That organization advocated public ownership and operation of all public utilities, co-operation in the production and distribution of goods, for the common good of all. "An injury to one is the concern of all", was their declaration of faith. They were organized in one body, without distinction of trade or craft. They denied all identity of interest between employer and employee and objected to being expected to respect any contractual obligations. In 1875 at a National convention at Tyrone, Penn., the Social Democratic party of North America joined the Knights of Labour. For a decade the dual organization progressed until, in 1885, they introduced sabotage in the Gould strike, which brought upon them public condemnation resulting in their dissolution as a labour organization in the nineties. The One Big Union of to-day, is in principle, a reproduction of the "Knights of Labour" of 1869.

Following close upon the dissolution of the Knights of Labour the "Socialist Trade and Labour Alliance" sprang into existence, in 1895, when a delegation from District Assembly 49 of the Knights

of Labour met with the Central Labour Federation of New York City and formed the new alliance. The plan originated with Daniel DeLeon, a fervid Marxian Socialist, and the organization was endorsed by the Socialist Labour Party. The alliance never prospered and ceased to exist in 1905, but its leaders played a prominent role at a Convention in Chicago in the same year, at which the Industrial Workers of the World was formed, and into this latter organization the Socialist Trades and Labour Alliance was merged.

To indicate the close similarity between the policy of the Socialist Trades and Labour Alliance and the One Big Union a letter addressed to Mr. R. B. Russell, just prior to the first One Big Union convention at Calgary, in 1919, which has for some time been a public document, is here quoted:

Dear Friend Russell:

Glad to hear from you. I know how busy you are so never apologize for not writing me. I had the enclosed tucked safely away for the last nine years awaiting the day which I knew was coming. I want you to have a print made of it by someone whom you can trust not to destroy the original, then carefully send it on to Wells, B. C. Federationist, with similar instructions. I want it returned to me; gold cannot buy it. It is off this that Lenin has formed his Soviet administration as far as possible. It was drawn up by Daniel DeLeon, 9 years ago. Get paper copies of this on a circular and send it broadcast. The Henry Dubbs will get the idea quickly, much more so than dozens of lectures. So you see I was in O. B. U. before I was a Socialist or Bolshevik.

(Signed) ROSE HENDERSON.

The preamble of the One Big Union constitution is also quoted to indicate similarity between the "Knights of Labour" and the One Big Union.

#### CONSTITUTION AND LAWS OF THE ONE BIG UNION.

AMENDED AT WINNIPEG CONVENTION,  
JANUARY, 1920.

#### PREAMBLE.

Modern industrial society is divided into two classes, those who possess and do not produce and those who produce and do not possess. Alongside this main division all other classifications fade into insignificance. Between these

two classes a continual struggle takes place. As with buyers and sellers of any commodity there exists a struggle on the one-hand of the buyer to buy as cheaply as possible, and, on the other, of the seller to sell for as much as possible, so with the buyers and sellers of labour power. In the struggle over the purchase and sale of labour power the buyers are always masters—the sellers always workers. From this fact arises the inevitable class struggle.

As industry develops and ownership becomes concentrated more and more into fewer hands; as the control of the economic forces of society become more and more the sole property of imperialistic finance, it becomes apparent that the workers, in order to sell their labour power with any degree of success, must extend their forms of organization in accordance with changing industrial methods. Compelled to organize for self-defence they are further compelled to educate themselves in preparation for the social change which economic developments will produce whether they seek it or not.

The One Big Union, therefore, seeks to organize the wage worker, not according to craft but according to industry; according to class and class needs, and calls upon all workers to organize irrespective of nationality, sex, or craft, into a workers' organization, so that they may be enabled to more successfully carry on the every day fight over wages, hours of work, etc., and prepare themselves for the day when production for profit shall be replaced by production for use.

#### WORKERS OF THE WORLD UNITE.

##### NAME.

*Clause 1.*—The name of the organization shall be THE ONE BIG UNION.

##### MEMBERSHIP.

*Clause 2.*—Membership in the O. B. U. shall be open to all wage workers. No member shall be eligible for any elective office in the O. B. U. who is carrying a membership card in any International Union, and no delegate to represent a unit who carries any other form of union card.

##### INITIATION FEE.

*Clause 3.*—The maximum initiation fee to be charged by local units for new members shall be One Dollar.

The I. W. W. headquarters advertised, published, and distributed One Big Union literature in 1919, and gave aid and encouragement to its organization in Canada. The name "One Big Union" was adopted at the Calgary convention, it being stated that it would not do for them to be known as the I. W. W. in Canada. Scores of documents and incidents could be quoted in evidence to

prove the close connection existing between Martens' Soviet Bureau in New York and O. B. U. leaders in Canada. A few will doubtless suffice.

Appeals are being directed to all O. B. U. units in Canada to contribute to a fund for sending medical assistance to Soviet Russia. These appeals have appeared in the *British Columbia Federationist*, and have been read in most if not all of the O. B. U. branches in Canada. In some cases they have been presented by emissaries who appeared in person. It will be noticed that the Soviet Bureau in New York is acquainted with the whereabouts of the O. B. U. branches in Canada.

In Toronto, on April 9, last, a speaker said that "in the very near future the O. B. U. will be a real communistic organization and a lot of members of this body are communist anarchists, and I. W. W., and are getting more powerful all the time. Very soon all the Unions will join the O. B. U. All organized workers are waiting and getting ready for a general strike; then will break out something."

At an O. B. U. meeting in Montreal, on March 28 last, a well known organizer stated "he was in Winnipeg during the strike and no one can deny at the present time it was the object pure and simple to overthrow the Government and establish a Soviet Government in Canada. All realized now they had made a mistake in starting in Winnipeg alone, but that they should first have got a thorough organization all over Canada and then made one big revolution which it would have been impossible to suppress".

These examples of the utterances of the O. B. U. leaders surely indicate their real purpose. It is, however, only fair to point out that they have at the moment many adherents who are not aware of and would not willingly support their revolutionary intentions.

The name "One Big Union" was adopted to mislead the worker who would not affiliate with the I. W. W. movement. The Labour Church is a subsidiary of the One Big Union, as the following information will indicate;

The first so-called Labour Church was established in Winnipeg during the winter of 1918-1919 under the auspices of Rev. Wm. Ivens, the reputed Winnipeg correspondent to the *New York Call*.

In June 1919 a New People's Church was set up in Brandon, presided over by Rev. A. E. Smith. In September 1919, the Labour Church in Edmonton was formed, with the Rev. G. L. Ritchie as pastor. In June 1920, an effort was made to establish one in Fort William under Mr. A. Henry, one in Vancouver under Mr. J. S. Woodsworth, and also one in Calgary. It may be recalled that the Russian Soviet Republic in its constitution adopted in 1917 repudiated all forms of religion as then practiced and declared that monks and clergy of all denominations do not perform any useful social functions.

Mr. Martens is the authorized ambassador of the Soviet Republic in the United States and head of the Soviet Bureau in America for the conducting of a propaganda campaign admittedly financed by the Russian Soviet Government.

There is evidence of the fact that Martens had agents at work in the Western States and Canada, and proof that Rev. Wm. Ivens was an active O.B.U. promoter, and correspondent for the *New York Call*, Marten's chief publicity medium.

Mr. T. A. Barnard, of Victoria, in mentioning the Labour Church said, "one could speak on anything which would benefit the state of things in the present world and let the world hereafter take care of itself."

Mr. A. Henry, at Fort William, said, "We could get some recruits from the Orthodox Church; the best thing to call this education is the Labour Church, because if it is called a socialist meeting there are a lot of people who would not come."

Many more similar utterances of the men acting as pastors of these so-called Labour Churches might be quoted. It

would appear that this movement is merely a subsidiary of the Socialist Revolutionary movement and a piece of hypocrisy, evidently conscious in the case of most of its promoters, designed to interest in the revolutionary movement persons of religious and humanitarian principles to whom the ordinary Marxian propaganda would not be attractive. It surely contains no genuine element of religion.

Mr. R. B. Russell, Manitoba Secretary for the O.B.U. and a member of the Executive, was asked, in May 1919, why they were attacking the international trade union movement so bitterly. His reply was that the Trade Unions had always stood in the way of the progress of socialism and that they must be destroyed. This was exactly the attitude of the Knights of Labour. In Canada the International Trade Unions have a total membership of about 260,000; their policies are well known. In the industrial field they endeavour, by crafts, to negotiate agreements with employers by direct conference or arbitration, a strike always being a last resort. They respect and uphold constitutional Government; their members are obligated before God and hold sacred the moral law. The following table will give the reader an idea of the relative standing of the various organisations of labour in Canada:

	Branches	Membership.
International.....	2,309	260,247
Non-International...	325	33,372
Independent.....	29	8,278
National Catholic....	83	35,000
One Big Union....	101	41,150
Totals.....	2,847	378,047

There is at the moment some indication of an attempted alliance between the non-Internationals and the One Big Union, but there would appear to be little probability of success.

The National Catholic Unions are located in the Province of Quebec and are very anti-socialist.

It is to be remembered finally that the insidious propaganda campaign which has resulted so disastrously in Russia is still being carried on in North America and in other parts of the world. The popular motto is "bore from within." This process is going on in both the religious and industrial field. Employers who do not show due regard for the needs and rights of their workmen are substantially aiding the enemy that would destroy them. Many do not recognize that the legitimate labour movement is today playing a large part in preventing industrial and economic disaster, it is also the power that guarantees to the worker a reasonable return for his labour, a standard of living much above that which would prevail were his interest not protected, and is an anchor to steady him from the waves of radicalism which from time to time seek to wreck all that has been accomplished by way of constructive permanent improvement. Trade Unions which retain within their ranks men who use their membership to "bore from within", and destroy instead of support, are assuming a serious responsibility and risk. There is unquestionably need

of and opportunity for work by the Christian Churches of every denomination.

The Government of Canada has given serious and constant attention to this problem during the past year and a half. Every action taken to protect the people has been misrepresented by the Red propagandists. If further sympathy or support is given to this revolutionary movement, that would if it prevails devastate North America, as it has destroyed Russia, it will not be done innocently.

It was not deemed advisable to make any official statement regarding this propaganda campaign until a thorough examination of it had been completed. The facts as they exist are outlined in this article. It is for every citizen to decide as to how his or her influence will be directed. If our industrial, social, political, and religious institutions, established through years of experience, should, in the opinion of our people, be replaced by a Constitution such as now exists in Russia, then their course is clear; if, on the other hand, they desire to perpetuate the British constitution, civil and religious liberty, love of God, home and native land, then their line of duty is also plain.
